Ministry of Transport, Water Control and Public Works: The Hague, Plesmanweg 1-6; there are some 1,774 km. of motorway and a total of 92,525 km. of roads in the Netherlands.

INLAND WATERWAYS

Ministry of Transport, Water Control and Public Works: Plesmanweg 1-6, The Hague; responsible for all waterways, water control, construction of dikes and land reclamation (see also above).

An extensive network of rivers and canals navigable for ships of 100 tons and over, totalling 4,847 km., has led to an outstanding development in Dutch inland shipping. About one third of goods transported inside the Netherlands are carried on the canals and waterways. Dutch inland shipping has access to the Federal Republic of Germany and France along the Rhine and its branch rivers, and to France and Belgium along the Meuse and Scheldt. Ocean traffic reaches Rotterdam via the New Waterway, and Amsterdam is connected to the North Sea by the 21 km.-long North Sea Canal.

SHIPPING

PRINCIPAL COMPANIES

Holland Amerika Lijn N.V.: Curaçao, Netherlands Antilles, J. B. Gorsiraweg 6; f. 1873; gross tonnage 123,419; specialized transport (integrated heavy loads, worldwide); cruises from U.S. to all parts of the world, and from Singapore to Indonesia; Mems. Exec. Board N. VAN DER VORM, J. T. GARRITY.

KNSM-Kroonburg B.V.: Westerkade 31, Rotterdam, P.O.B. 958; freight services between the Netherlands and Bordeaux, Guernsey, Jersey; Casablanca, Gibraltar, Spain (Cadiz); Tunisia, Greece, Turkey, Egypt; Lebanon; Malta, Israel; Copenhagen, Aarhus; Man. Dir. H. J. VAN DE ROEMER.

Koninklijke Hollandsche Lloyd N.V. (tot Voortzetting van de): Amsterdam, Oostelijke Handelskade 12, P.O.B. 132; f. 1936; gross tonnage 54,127; freight services from Hamburg, Bremen and Amsterdam to Brazil, Uruguay, and Argentina; Mans. P. DE VREEDE, J. B. MEYER.

Koninklijke Nedlloyd Groep N.V. (Royal Nedlloyd Group): Houtlaan 21, 3016 DA Rotterdam, P.O.B. 487, 3000 AL Rotterdam; divisions: Nedlloyd Fleet Services, Nedlloyd Lines, Nedlloyd Bulk, Neddrill, Ports Division, Specialized Transport Division, Industrial Services Division, Damco International Transport, Heavy Transport Division, Transavia; controls over 100 subsidiaries in shipping, transport, travel and industry; Chair. B. E. RUVS; Deputy Chair. J. GROENENDIJK; fleet of 126 ships with tonnage of 2.8m. d.w.t.

Nederlandsche Stoomvaart Maatschappij "Oceaan" B.V.: Prins Hendrikkade 160, P.O.B. 29, 1000 AA Amsterdam; gross tonnage 46,409; associated with Ocean Transport and Trading Ltd., see U.K.; Man. Dir. J. W. DIETRICH.

Phs. van Ommeren N.V. (Nederland) B.V. (Internationaal) B.V.: 3016 CK Rotterdam, Westerlaan 10; f. 1839; ocean-going tankers, bulk carriers, coastal vessels, chartering, brokerage and marine consultancy, bulk storage, inland shipping, agencies and transport, trading and insurance; Chair. W. H. BROUWER.

Shell Tankers B.V.: P.O.B. 874, Rotterdam; total d.w. tonnage, Aug. 1981, 3,045,785 (34 tankers, 1 bulk carrier); Man. Dir. A. L. RASTERHOFF.

SHV Shipping Group: Van Vollenhovenstraat 3, 3016 BE Rotterdam; P.O.B. 941, 3000 AX Rotterdam; major subsidiary companies in Netherlands, U.K., Federal Republic of Germany, South America and Singapore.

Stoomvaart Maatschappij Zeeland, Koninklijke Nederlandsche Postvaart N.V.: P.O.B. 2, 3150 AA Hook of Holland; f. 1875; gross tonnage 15,920.86; passenger, commercial freight vehicle and car ferry service daily

day and night between Holland and England in co-operation with Sealink U.K. Ltd.; Gen. Man. Internatio-Müller N.V.

Van Nievelt, Goudriaan & Co. B.V.: Veerhaven 2, 3016 CJ Rotterdam, P.O.B. 825, 3000 AV Rotterdam; f. 1905; mem. of SHV Shipping Group (q.v.); regular services: *Rotterdam South America Line:* Rotterdam, Bremen, Hamburg, Antwerp, East Coast South America; *Europe-Paraguay Line:* Hamburg, Bremen, Rotterdam, Paraguay; *Holland Pan-American Line:* East Coast South America, East Coast U.S.A.; *Africa-Europe Line:* Hamburg, Bremen, Rotterdam, South Africa; *Elephant Line:* Hamburg, Bremen, Rotterdam, Mozambique; *Macwan Container Service:* Rotterdam, U.K.; *Associated Portugal Lines:* Rotterdam, Antwerp, Portugal, U.K.; *Meri Line:* Finland, U.K., Belgium; Man. Dir. B. C. FOCK.

Van Uden's Scheepvaart en Agentuur Maatschappij B.V.: 3016 CJ Rotterdam, Veerhaven 14; gross tonnage 21,000; regular freight services to Scandinavia, North and West Africa, east-coast South America; Pres. and Man. Dir. PH. VAN 'T HOFF, Jr.

Vinke and Co.: Amsterdam, De Ruyterkade 107; Rotterdam, Parklaan 28; shipowners, shipbrokers, forwarding and passenger agents; Dirs. A. VINKE, E. VINKE, G. WARNDERINK VINKE, Th. E. WARNDERINK VINKE.

B.V. Maatschappij Zeevaart: Rotterdam, Willemskade 23; f. 1913; gross tonnage 1,305; liner service from Rotterdam to Belfast, Dublin, Waterford and Le Havre twice weekly; Man. Dir. G. A. FONTEIN.

SHIPPING ASSOCIATION

Koninklijke Nederlandse Redersvereniging (Royal Netherlands Shipowners' Assn.): 2006 The Hague, Stationsweg 137, P.O.B. 16638; f. 1905; Deputy Mem. of Council Dr. G. H. BAST; 45 mems.

CIVIL AVIATION

The main Dutch airport is at Schiphol, near Amsterdam and there are international airports at Zestienhoven for Rotterdam, Beek for Maastricht and at Eelde for Groningen.

KLM (Koninklijke Luchtvaart Maatschappij N.V.) (Royal Dutch Airlines): Schiphol Airport, P.O.B. 7700, 1117 ZL Schiphol; f. 1919; regular air services throughout Europe; inter-continental services between Europe, Near, Middle and Far East, Australia, North, Central and South America, Africa; fleet of 9 Boeing 747-200B, 7 747-200 Combi, 6 DC-10-30, 11 DC-8-63 and 20 DC-9; Pres. S. ORLANDINI; Deputy Pres. J. F. A. DE SOET; Man. Dir. L. J. VAN AMEIJDEN.

Martinair Holland N.V.: P.O.B. 7507, 1118 ZG Schiphol Airport; f. 1958; worldwide passenger and cargo charter services; Pres. J. M. SCHRÖDER; Excc. Vice-Pres. F. C. PEDERSEN; fleet of 4 DC-10-30, 2 DC-9-33, 1 DC-9-80, 1 Cessna Citation II, 1 Cessna 402, 5 Fuji 200, 1 Beechcraft 182C23, 2 Cessna F-127, 8 Pipers Super Cub (Nov. 1981).

NLM Dutch Airlines (NLM City Hopper B.V.): P.O.B. 7700, 1117 ZL Schiphol; f. 1966; subsidiary of KLM; scheduled domestic services from Amsterdam to Eindhoven, Enschede, Groningen and Maastricht, also operates from Eindhoven, Amsterdam and Rotterdam to destinations in France, the Federal Republic of Germany, Belgium, Switzerland, the U.K. and Ireland; fleet of 5 F-27 MK 200, 3 F-27 MK 500 and 4 F-28; Pres. A. J. LEYER.

NETHERLANDS

Transavia Holland B.V.: P.O.B. 7777, 1118 ZM Schiphol; f. 1966; world-wide charter and sub-services, passenger and freight; Man. Dir. P. J. LEGRO; fleet of 9 Boeing 737.

The Netherlands is also served by the following foreign airlines: Aeroflot (U.S.S.R.), Aer Lingus (Ireland), Air Anglia, Air France, Air Portugal, Air Zaire, Alitalia, British Air Ferries, British Airways, Canadian Pacific, CSA (Czechoslovakia), Dan-Air (U.K.), El Al (Israel), Finnair, Garuda Indonesian, Iberia (Spain), JAL (Japan), JAT (Yugoslavia), LOT (Poland), Lufthansa (Federal Republic of Germany), Luxair (Luxembourg), MALEV (Hungary), Nigeria Airways, Olympic (Greece), PIA (Pakistan), Pan American, Philippine Airlines, Qantas (Australia), Royal Air Maroc, Sabena (Belgium), SAS (Sweden), SAA (South Africa), Swissair, TAROM (Romania), TIA (U.S.A.), Tunis Air, THY (Turkey) and Varig (Brazil).

TOURISM AND CULTURE

Stichting Nederlands Nationaal Bureau voor Toerisme (*Netherlands National Tourist Office*): Bezuidenhoutseweg 2, P.O.B. 90415, 2594 AV The Hague; f. 1969; Dir. J. A. T. CORNELISSEN.

Koninklijke Nederlandse Toeristenbond ANWB: Wassenaarseweg 220, 2596 EC The Hague; f. 1883; 2,500,000 mems.; Dir.-Gen. B. IJNTEMA.

CULTURAL ORGANIZATIONS

Ministry of Cultural Affairs, Recreation and Social Welfare: "Bogaard Centre", Sir Winston Churchilllaan 366-368, P.O.B. 5406, 2280 HK Rijswijk; Minister ANDRÉ A. VAN DER LOUW.

Nederlands Impresariaat: P.O.B. 5253, Amsterdam; government subsidized foundation; organizes concerts and other performances.

Dutch Arts Council (*Raad voor de Kunst*): R. J. Schimmelpennincklaan 3, 2517 JN The Hague; advises the Government in all fields of the arts.

NATIONAL THEATRES

Publiekstheater: Marnixstraat 427, 1017 PK Amsterdam.

Haagse Comedie: Schouwburgstraat 8, 2511 VA The Hague; f. 1947; Management EDDY HABBEMA, GUIDO DE MOOR, HANS VAN WESTREENEN.

Koninklijke Schouwburg (*Royal Theatre*): Korte Voorhout 3, The Hague; f. 1804; used for all kinds of performances, notably by De Haagse Comedie company; Dir. FRANS VAN DER VEEN.

PRINCIPAL ORCHESTRAS

Concertgebouw Orchestra: Jacob Obrechtstraat 51, 1071 KJ Amsterdam; Chief Conductor BERNARD HAITINK.

Transport, Tourism and Culture, Atomic Energy

Residentie-Orkest: Statenlaan 28, The Hague; Principal Conductor HANS VONK.

Rotterdams Philharmonisch Orkest: c/o de Doelen, Kruisstraat 2, 3012 CT Rotterdam; f. 1918; Conductor DAVID ZINMAN; Principal Guest Conductor SIMON RATTLE; Gen. Man. Dr. J. OOSTERLEE; Artistic Adviser WILLEM VOS; 113 musicians.

ATOMIC ENERGY

Industrial Council for Nuclear Energy: Bezuidenhoutseweg 6, The Hague; to advise the ministers on the industrial application of nuclear energy and ionizing radiation; Pres. H. W. BLOEMERS.

The first nuclear power plant, a 54 MW boiling-water reactor, at Dodewaard (nr. Nijmegen), was brought into operation at the end of 1968. A second power plant at Borssele (near Flushing), with a 477 MW pressurized water reactor, came into full operation in autumn 1973. A proposal for the construction of three more plants which would increase present capacity sixfold was still under discussion in 1981.

Interdepartmental Committee on Nuclear Energy: c/o Ministry of Economic Affairs, Directorate of Electricity and Nuclear Energy, Bezuidenhoutseweg 30, P.O.B. 20101, 2500 EC The Hague; f. 1964; interdepartmental preparation of the policy of various ministries as to measures to be taken towards peaceful uses of nuclear energy; members: representatives of most ministries.

Stichting voor Fundamenteel Onderzoek der Materie (FOM) (*Foundation for Fundamental Research on Matter*): Van Vollenhovenlaan 659-663, 3527 JP Utrecht; Dir. Dr. A. A. BOUMANS.

In the FOM Institute for Atomic and Molecular Physics at Amsterdam work on fundamental atomic physics with ion beams is carried out. The FOM Institute for Plasma Physics at Nieuwegein (Utrecht) is a centre for thermonuclear research, established 1959. FOM organizes and finances research on nuclear physics, atomic physics, metals, molecular physics, solid state physics, high energy physics, and plasma physics at the Universities in the Netherlands. A National Institute for Nuclear and High Energy Physics is being established.

Stichting Instituut voor Kernfysisch Onderzoek (*Foundation Institute for Nuclear Physics Research*): Ooster Ringdijk 18, Amsterdam; Man. Dir. Dr. J. SCHUTTEN; Scientific Dir. Prof. Dr. A. H. WAPSTRA.

A 300 MeV linear electron accelerator with instrumentation for electron scattering and pion-muon physics research, as well as for radiochemistry, was near completion in 1980. Both the Institute and FOM (above) also undertake radioisotope research.

Nederlandsche Centrale Organisatie voor Toegepast-Natuurwetenschappelijk Onderzoek (TNO) (*Central Organization for Applied Scientific Research in the Netherlands*): Head Office, Juliana van Stolberglaan 148, 2595 CL The Hague; P.O.B. 297, 2501 BD The Hague; 5,600 employees; Chair. Prof. Ir. W. A. DE JONG; publs. general information about TNO.

Hoofdgroep Bouw en Metaal TNO (*Division for Building and Metal Research TNO*): Laan van Westen 501, 7334 DT Apeldoorn, P.O.B. 541, 7300 AM Apeldoorn; Dir. Ir. J. M. NIJES.

The Project Group for Nuclear Energy TNO, Laan van Westenenk 501, 7334 DT Apeldoorn, P.O.B. 370, 7300 AJ Apeldoorn, co-ordinates the research and development activities within TNO in the nuclear field; Dir. Ir. A. R. BRAUN.

Focus is on high temperature technology in the frame of development of large components for sodium-cooled fast reactors (in co-operation with the industrial consortium Neratoom).

Main activities are:

Materials research and development (mechanical and corrosion properties of structural materials, bearing facing materials); strength, safety and reliability (development of calculational methods including fatigue, creep and plasticity effects); heat transfer and fluid flow (including stability, vibrations in tube bundles); remote repair methods development; bearing, vibration and sealing problems of long shafts.

Under contract from the Government, operation of a 50 MW sodium component test facility.

Association Euratom—ITAL (*Institute for Atomic Sciences in Agriculture*): Keyenbergseweg 6, Wageningen; f.

1957; 105 mems.; Dir. Dr. A. RINGOET; Deputy Dir. Drs. W. F. OOSTERHEERT.

Irradiation facilities include a 1.7 MeV electron generator, gamma sources of 300 and 3,000 Curie Cs 137, X-ray machine.

There is a pilot plant for food-irradiation with gamma sources of 250,000 and 50,000 Curie Co 60.

Netherlands Energy Research Foundation ECN (*formerly Reactor Centrum Nederland RCN*): Head office: 112 Scheveningseweg, 2584 AE The Hague; Research centre: 3 Westerduinweg, 1755 LE Petten; f. 1955; conducts research into fission energy, fusion energy and superconductivity, flow energies, combustion energy, non-energy applications of nuclear fission (nuclear physics, solid state physics and radiobiology); staff of 863; Chair. Dr. Ir. H. Hoog; Financial Dir. Drs. R. W. R. DEE; Scientific Dir. Prof. Dr. J. A. GOEDKOOP; Technical Dir. Ir. J. PELSER; publ. *Energie spectrum* (12 a year).

In August 1976 the foundation changed its name to ECN and broadened its scope from research on the release of nuclear energy to research concerned with the whole field of energy supply.

NORWAY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Norway forms the western part of Scandinavia in Northern Europe, bordered to the East by Sweden and, within the Arctic Circle, by Finland and the U.S.S.R. A long, indented coast faces the Atlantic. Norway exercises sovereignty over the Svalbard archipelago, and the uninhabited islands of Jan Mayen, Bouvet and Peter I. Queen Maud Land in Antarctica is also a Norwegian dependency. Norway's climate is temperate on the west coast but colder inland. There are two forms of the Norwegian language, which are officially recognized as equal. About 80 per cent of children in schools use the older form *Bokmål* as their principal language, whereas only 20 per cent use the newer form, *Nynorsk* (Neo-Norwegian). The Evangelical Lutheran Church is the established religion. The national flag (proportions 11 by 8) has a dark blue cross, bordered with white, on red field, the upright of the cross being left of centre. The capital is Oslo.

Recent History

Norway was a founder member of the United Nations in 1945 and the country's Minister for Foreign Affairs, Trygve Lie, was elected as the first UN Secretary-General. Norway abandoned its traditional policy of neutrality and joined NATO in 1949. It was also a founder member of the Nordic Council in 1952 and of EFTA in 1960.

Apart from the German occupation of 1940 to 1945, when a "puppet" régime was administered by Vidkun Quisling, the Labour Party formed the Government, with only one month's interruption, from 1935 to 1965. The 1965 elections resulted in the formation of a non-socialist coalition Government under Per Borten, which lasted until March 1971. The Labour Government led by Trygve Bratteli which then came to power resigned in October 1972, after its Treaty of Accession to the EEC was rejected in a referendum. A minority coalition of Liberals and the Centre and Christian People's Parties formed a Government with Lars Korvald as Prime Minister, but the general election of September 1973 resulted in a major redistribution of political power. The Labour Party had been split over EEC entry and lost many seats to the left-wing Socialist Electoral League; the Liberals also lost heavily because of the defection of the New People's Party; and four seats were won by a new populist movement, Anders Lange's Party (later renamed the Progress Party).

In October 1973 Bratteli formed a minority Labour Government, dependent on the support of the Socialist Electoral League (from 1975 the Socialist Left Party). In September 1977 Bratteli's successor, Odvar Nordli, called a general election whose results gave the Labour Party and the Socialist Left Party an aggregate majority of one seat. In August 1980, the Government had to resort to compulsory arbitration to end an economically damaging labour strike on offshore oil rigs, and in September made a highly controversial commitment to stockpile U.S. non-nuclear military equipment in central Norway for use in the event of conflict with the U.S.S.R. Under pressure from its left-wing, the Government later declared

its support for a Nordic nuclear-free zone. In February 1981 Nordli resigned on health grounds and was succeeded by Mrs. Gro Harlem Brundtland, Norway's first woman Prime Minister. The Government's popularity declined, however, amid growing debate about rising inflation and the extent of state participation in the economy. In general elections held in September, the Labour Party lost ground to centre-right groups. In October a minority administration led by Kåre Willoch became Norway's first Conservative Government since 1928. Willoch promised to cut taxation and public spending and to increase private sector participation in North Sea exploration and development.

Government

Norway is a constitutional monarchy, headed by an hereditary King. Legislative power is held by the unicameral Parliament (*Storting*), with 155 members elected for four years by universal adult suffrage, using proportional representation. For the consideration of legislative proposals, the *Storting* divides itself into two chambers by choosing one-quarter of its members to form the *Lagting* (upper house), the remainder forming the *Odelsting* (lower house). Executive power is nominally held by the King but is exercised by the State Council (Council of Ministers), led by the Prime Minister. The Council is appointed by the King in accordance with the will of the *Storting*, to which the Council is responsible. Norway comprises 19 counties (*fylker*).

Defence

Norway is a full member of NATO. In 1980, 8,000 million kroner was spent on defence. Every male is liable for national service from the age of 19 to 45. At 19 he does twelve months' service in the army, or fifteen months in the navy or air force. He is then called back periodically for refresher training. The total strength of the armed forces in July 1981 was 37,000, including 26,580 conscripts: army 18,000, navy 9,000, and air force 10,000. There is also a mobilization reserve of 162,000 and a Home Guard of 85,000.

Economic Affairs

The geographic structure and climate of Norway make farming difficult. Less than 3 per cent of the land surface is cultivated and the Norwegians have naturally turned to the sea for a living, and fish is a major export. Norway's merchant fleet is one of the largest and most modern in the world. The great majority of ships are not home-based, but are totally engaged in foreign trading.

For a long while industry, which is protected and subsidized by the Government, was based on local raw materials such as iron ore, timber and fish. The use of hydroelectric power has expanded industry rapidly and aluminium has now become a valuable export. Shipbuilding, engineering and electro-technical industries are also important.

Two of Norway's most important trade partners, the Federal Republic of Germany and the United Kingdom,

are in the EEC. Following the popular decision not to join, the Government negotiated a free trade agreement with the EEC in 1973, gaining trade advantages for Norway's major exports, particularly fish, aluminium, paper and steel.

In the late 1960s reserves of petroleum and natural gas were discovered in the Norwegian sector of the North Sea. The Government set up a state oil company to exploit these resources in partnership with foreign oil companies, and three major fields, Frigg, Ekofisk and Statfjord, are now in production and undergoing further development. In late 1975 Norway began exporting crude petroleum on a large scale. It has been government policy to hold back development of offshore finds, in order to avoid imposing undue strains on the economy, but in 1978 there was some acceleration in the opening up of new blocks for exploration. The resumption of oil and gas exploration north of the 62nd parallel was approved by the *Storting* in March 1980 and exploratory drilling by three Norwegian companies took place in 1980 and 1981, although no discoveries have yet been reported.

Anti-recession measures taken in 1975 led to a rise in the current deficit on the balance of payments, which was partly due to the increase in the net debt of oil companies, as Norway had been borrowing abroad against future oil income. However, oil exports have narrowed the deficit; in 1980 they contributed 34 per cent of export earnings. In 1979 an area west of Bergen was identified which is believed to contain the world's biggest offshore gas field and proposals for its exploration have been approved. Plans for the construction of a major gas gathering pipeline with a Norwegian mainland terminal were approved by the *Storting* in April 1981. This technically-difficult project is expected to cost 12,500 million kroner and is due for completion in 1986. In October 1980 the Labour Government stated that it intended to maintain a "moderate" rate of development of Norway's oil and gas fields and would not allow any future finds in Arctic waters to increase the country's overall rate of production. In 1980 the petroleum industry accounted for 20 per cent of state revenues.

In 1975, for the first time in twenty years, the shipping industry ran into financial difficulties and a guarantee institute was established to provide loans to shipping companies which might otherwise be sold. Severely depressed conditions persisted in 1978 and the outlook has remained clouded. The size of the merchant fleet has been gradually reduced by sales to foreign buyers.

Discussions were held with the U.S.S.R. in December 1977 to decide on fishing limits, as both countries have claimed exclusive economic zones within 200 nautical miles (370 km.) of their coastlines. Agreement was reached in January 1978 providing for the temporary introduction of a "grey zone" in which the two countries would exercise joint control pending the future settlement of a dividing line in the Barents Sea. The U.S.S.R., however, refused to recognize Norway's unilateral establishment of a fishery protection zone around Svalbard. In 1979 Norway entered negotiations with Iceland over conflicting claims to fishing rights, and similar negotiations with Denmark were begun in October 1981.

Reflecting the Government's concern at the rising level of external debt, the 1979 budget sought zero growth in

private consumption and minimal rises in public sector spending. By late 1979 the consequent decline in real living standards had eroded the Government's popularity, but by late 1980 Norway's liberal use of oil revenues to buoy the domestic economy had become a major factor in increasing the rate of inflation to 10.9 per cent, although oil revenues reduced Norway's foreign debt by 10,300 million kroner to 93,300 million, the first net reduction since 1969. Inflation was expected to rise to 12 per cent for 1981, although the new Government assigned a high priority to the control of public spending and increasing industrial productivity in 1982.

Transport and Communications

The Norwegian State Railways have a total length of 4,241 km., more than half of which is electrified. In 1981 Norway had 81,717 km. of roads, 25,282 km. of which are main roads and 212 km. modern motorway. In 1980 the Norwegian merchant fleet numbered 1,697 ships, totalling over 21 million gross tons. Norwegian Airlines has a two-sevenths share in the Scandinavian Airlines System (SAS).

Social Welfare

A compulsory National Pension Scheme covers old age, disability, widows, widowers, children and rehabilitation. Financed by premiums from those covered, employers' contributions and grants from local and central government, the Scheme provides a basic pension, irrespective of former income, as well as an additional pension calculated on previous earnings which rises automatically with wage and price increases.

Education

Education is compulsory for all children between the ages of 7 and 16. Elementary education is divided into a 6-year lower stage (*barneskolen*) and a 3-year upper stage (*ungdomsskolen*). A pupil may then transfer to an upper secondary school for a course which may last from 1 to 3 years. Upon completion of a 3-year course, a pupil may then seek admission to one of the four universities and 10 colleges of university standing. A broader system of higher professional education is being organized on a regional basis. Since 1969 10 regional colleges (*distriktshøgskole*) have been established.

Tourism

Norway is a popular resort for tourists who prefer holidays in rugged, peaceful surroundings. It is also a centre for winter sports. Receipts from tourism in 1980 amounted to 3,673 million kroner.

Public Holidays

1982: April 8th (Maundy Thursday), April 9th (Good Friday), April 12th (Easter Monday), May 1st (May Day), May 17th (Constitution Day), May 20th (Ascension Day), May 31st (Whit Monday), December 25th, 26th (Christmas).

1983: January 1st (New Year's Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 øre = 1 Norwegian krone.

Exchange rates (October 1981):

£1 sterling = 10.865 kroner;

U.S. \$1 = 5.80 kroner.

FINANCE

100 øre=1 Norwegian krone.

Coins: 5, 10, 25 and 50 øre; 1 and 5 kroner.

Notes: 10, 50, 100, 500 and 1,000 kroner.

Exchange rates (October 1981): £1 sterling=10.865 kroner; U.S. \$1=5.80 kroner.

100 Norwegian kroner=£9.20=\$17.23.

Note: Between September 1949 and August 1971 the par value of the krone was 14 U.S. cents (U.S. \$1=7.143 kroner). From December 1971 to February 1973 the central exchange rate was \$1=6.645 kroner (1 krone=15.05 U.S. cents). In terms of sterling, the exchange rate was £1=17.143 kroner from November 1967 to August 1971; and £1=17.316 kroner from December 1971 to June 1972. Since March 1973 the Norwegian krone has been allowed to "float" against the U.S. dollar and sterling. The average exchange rate (kroner per U.S. dollar) was: 5.7658 in 1973; 5.5397 in 1974; 5.2269 in 1975; 5.4565 in 1976; 5.3235 in 1977; 5.2423 in 1978; 5.0641 in 1979; 4.9392 in 1980.

THE CONSTITUTION

THE Constitution of the Kingdom of Norway was promulgated on May 17th, 1814, by the National Assembly at Eidsvold.

According to the Constitution, Norway is a "free, independent, indivisible, inalienable Kingdom"; its form of government a "limited and hereditary monarchy". The Evangelical-Lutheran religion is the established religion of the State.

Executive power is vested in the King, legislative power in the Storting (the Parliament), and judicial power in the Judicature.

EXECUTIVE POWER

The King exercises his power through the Statsråd (State Council). The State Council (the Government) is composed of a Prime Minister and not fewer than seven other Councillors of State, all above thirty years of age. The business to be dealt with in State Council is prepared by the various executive Ministries, each with a State Councillor at its head. These executive departments conduct the administrative work of the country.

The Government submits the budget estimates and introduces bills in the Storting.

Formally, the King appoints the Government, but since the introduction of the parliamentary system in 1884 it is the practice for him to act in accordance with the will of the Storting.

LEGISLATIVE POWER

The Storting is elected quadrennially by universal suffrage. All Norwegian citizens aged 18 and over are eligible to vote and every qualified voter who has resided in Norway for at least 10 years is eligible to stand for election. The Storting has 155 members, who elect a quarter of their own

body to constitute the Lagting; the other three-quarters compose the Odelsting. All bills must first be introduced in the Odelsting, either by the Government through a State Councillor or by a member of the Odelsting. Should the bill be passed by the Odelsting, it is sent to the Lagting, who may adopt it or return it with amendments. If a bill be passed twice by the Odelsting and rejected on both occasions by the Lagting, it is submitted to the entire Storting and decided by a two-thirds majority. When a bill has thus been passed it must receive the royal assent in State Council.

Bills for the revision of the Constitution must be introduced in the first, second or third session after a new election. But only the Storting, after the next election, has power to decide whether the proposed alteration should be adopted. Bills relating to the Constitution are dealt with only by the united Storting. For the adoption of a bill of this nature a two-thirds majority is required, and the measure becomes law without the royal assent.

The Storting votes all State expenditure and determines State revenue, taxes, customs tariffs and other duties; the Odelsting exercises control over government administration, government appointments and so forth.

The Storting prepares its business through its committees and settles such business, with the exception of bills, in plenum. The State Councillors (Ministers) may attend the Storting, having the right of speech but not of voting.

The Storting determines the duration of each session. It is opened and prorogued by the King each year. The Storting cannot be dissolved either by the King or by its own resolution until the expiry of the quadrennial period for which it has been elected.

JUDICIAL SYSTEM

Judges are appointed by the Crown. The Supreme Court, sitting in Oslo, deals with both civil and criminal cases.

Supreme Court, Oslo: Pres. ROLV RYSSDAL.

Superior Court for Civil and Criminal Cases, Bergen: Pres. HANS FR. MARTINUSSEN.

Superior Court for Civil and Criminal Cases, Oslo: Pres. ASTRI S. RYNNING.

Superior Court for Civil and Criminal Cases, Skien: Pres. KRISTEN SYVERTSEN.

Superior Court for Civil and Criminal Cases, Tromsø: Pres. JON FJALSTAD.

Superior Court for Civil and Criminal Cases, Trondheim: Pres. KARL S. SOLBERG.

CIVIL

In each municipality there is a Conciliation Court (*Forliksrdd*) consisting of three members elected by the municipal council for four years. As a rule, no case may be taken to a court of justice without mediation having been attempted by a Conciliation Court. In addition to mediation, the Conciliation Court has a judicial capacity and is intended to settle minor cases in a simple manner without great expense to the parties involved.

The ordinary lower courts are the District and Town Courts (*Hervedsrett, Byrett*), which decide all cases not adjudicated upon by the Conciliation Court, and they also act as courts of appeal from judgments given in the Conciliation Court. The cases are adjudicated by a judge or magistrate, who sits either alone or with two lay judges.

Judgments delivered in the District and Town Courts may be taken, on appeal, to the Courts of Appeal (*Lagmannsrett* or "Lagmann's" Courts) or to the Supreme Court (*Høyesterett*). In the Courts of Appeal cases are judged by three qualified judges, but if requested by one of the parties, lay judges may be summoned.

The Supreme Court sits in Oslo and decides cases in the last instance. Five judges here participate in judging appeal cases.

CRIMINAL

The criminal courts are: Examining Courts (*Forhørsretten*), the District and Town Courts, Courts of Appeal (*Lagmannsrett*) and the Supreme Court. In the Examining Courts the professional judge presides alone, but in the District and Town Courts two lay judges also sit. The more serious criminal cases must be brought directly before the *Lagmannsrett*. Cases originating in the lower courts may be retried by the *Lagmannsrett* when the question of guilt is at issue; otherwise they are appealed directly to the Supreme Court. The *Lagmannsrett* is presided over by three legally qualified judges, who judge the case with the assistance of a jury of ten jurymen. For the accused to be pronounced guilty, at least seven jurymen must vote that he is so.

The Supreme Court (*Høyesterett*) is the Court of Final Appeal. In criminal cases the competence of the Court is, however, limited to questions concerning the application of the law, the nature of the penalty, and procedural errors of the lower court.

Capital punishment has been abolished.

OMBUDSMAN

Since the office was introduced by law in 1963, an Ombudsman has been elected by the Storting every four years. The Ombudsman provides a free service to all citizens to "try and ensure against the public administration committing any injustice to the individual citizen" and "that civil servants and others employed in the state administration do not make mistakes or fail in their duties". The Ombudsman's field of activity does not cover private legal affairs, and does not carry the right to reverse an official decision. In practice, however, his pronouncements are normally complied with. In 1981 an additional Ombudsman was appointed with special responsibility for matters involving the interests of children.

RELIGION

The Evangelical Lutheran Church is the established Church of Norway and is endowed by the State. The King is the head of the Church and nominates its clergy. There are 10 dioceses, 90 archdeaconries and some 600 clerical districts.

The Evangelical Lutheran State Church: Bishops: ANDREAS AARFLOT, Oslo; GUNNAR LISLERUD, Borg; GEORG HILLE, Hamar; HÅKON E. THE PRESS

The principle of press freedom is safeguarded in the Norwegian Constitution. There is no law specifically dealing with the Press. Editors bear wide responsibility in law for the content of their papers, especially regarding such matters as libel. Although a journalist is legally entitled to conceal his source he may be required to disclose this information under penalty of imprisonment; but such instances are rare. A three-member Council of Conduct gives judgements in cases of complaint against a paper or of disputes between papers. It has no powers of enforcement but its judgements are highly respected. The Press Association has a Code of Ethics aimed at maintaining the standards and reputation of the profession.

The Eastern region is the scene of most press activity. Oslo has eight dailies which are especially influential throughout this area, and four of these—*Aftenposten*, *Verdens Gang*, *Dagbladet* and *Arbeiderbladet*—have a national readership. Nevertheless, in Norway's chief cities the large local dailies easily lead in their own districts. There are no Sunday newspapers but on Saturday the dailies usually have an extra large edition. In 1981 Norway had 141 newspapers, including 72 dailies, with a total circulation of over 2.2 million. A few very large papers are responsible for the bulk of this circulation.

There are almost 2,000 periodicals with an estimated total circulation of two million copies. Women's magazines are particularly popular and make up over a quarter of this circulation figure.

There are no major publishing chains; newspapers are mainly privately owned. Most of the big papers are owned by corporations whose shares are held by individuals and political parties. The Labour Party and the Norwegian Federation of Trade Unions (LO) own and subsidize the Labour press. Certain papers with Conservative sympathies such as *Morgenbladet* are subsidized by the Conservative holding company, *Libertas*, but many Conservative papers insist on being financially independent. The chief organs of the parties are *Nasjonen* (Centre), *Arbeiderbladet* (Labour) and, to a lesser extent, *Aftenposten* (Conservative).

A number of medium-sized papers which have been experiencing economic difficulties receive financial help from private individuals, parties and other organizations. Some papers economize by engaging in a form of co-operation by which two papers, sometimes with different

political views, share the news copy while carrying different headings, editorials and sometimes one or two different pages. A State loan fund was set up in 1972 to ease newspapers' credit problems.

In 1980/81 the most popular newspapers were *Aftenposten* (Oslo), *Verdens Gang* (Oslo), *Dagbladet* (Oslo), *Bergens Tidende*, *Adresseavisen* (Trondheim), *Arbeiderbladet* (Oslo) and *Stavanger Aftenblad*.

RADIO

Broadcasting is a monopoly of the State, which operates 2 long wave, 4 medium wave, 3 short wave, 43 VHF transmitters and 428 low-power relay stations. Programmes are broadcast for 120 hours per week. The foreign

service broadcasts from one medium wave and two short wave transmitters.

In 1980 there were an estimated 1,335,000 radio sets in use.

TELEVISION

A non-commercial State monopoly. There are 44 main transmitters with 959 low-power relay stations. Transmissions are obtainable by about 96.2 per cent of the population. In the South-East it is possible to receive Swedish TV programmes, Finnish and U.S.S.R. transmissions can be received in the North, Danish and Swedish programmes on the South coast and British programmes on the South-West coast.

In 1980 there were 1,204,770 television licences.

FINANCE

Norway's banking system is of comparatively recent date. The central bank, the Bank of Norway, has existed in its present form since 1816; the first savings bank was founded in 1822, and the first commercial bank began operations in 1848. Commercial banking gained impetus during the industrial upsurge in the second half of the 19th century. In mid-1980 there were 25 commercial banks, although several mergers were planned.

The commercial banks can be divided into three categories: the major banks, some large regional banks and a number of smaller regional and local banks. The three largest banks in Norway have an extensive network of local offices and branches, and collectively account for about 63 per cent of the combined total assets of the commercial banks. At the end of 1979, deposits held by all commercial banks totalled 59,000 million kroner.

Co-operation: Norway has bilateral agreements with the U.S.A. and the United Kingdom, and is a member of the International Atomic Energy Agency, the European Nuclear Energy Agency, the European Organisation for Nuclear Research, the Nordic Institute for Theoretical Atomic Physics and the European Atomic Energy Society.

SVALBARD

Location and Climate

The Svalbard archipelago lies in the Arctic Sea between latitudes 74° and 81°N. and longitudes 10° and 35°E., comprising a total area of 62,000 sq. km. (24,000 sq. miles). The group consists of nine principal islands, Spitsbergen (formerly Vestspitsbergen), the main island, Kvitøya, Edgeøya, Barentsøya, Bjørnøya, Nordaustlandet, Prins Karls Forland, Kong Karls Land and Hopen, together with numerous small islands. Mild Atlantic winds lessen the severity of the Arctic climate.

History and Government

The existence of Svalbard has been known since Viking exploration in the 12th century. There were conflicting claims to sovereignty by Britain, the Netherlands and Denmark-Norway in the 17th century, when the area was an important centre for whale hunting, but interest subsequently lapsed until the early years of the 20th century, when coal deposits were discovered. By a treaty of 1920, the sovereignty of Norway was recognized by 41 nations. International rights of access and economic exploitation were agreed but use for military purposes and the construction of fortifications was expressly forbidden. In accordance with the treaty of 1920, the Norwegian Government in 1925 laid down a Mining Code regulating all mineral prospecting and exploitation in the islands and their territorial waters extending to 4 nautical miles (7.4 km.). The Mining Code is administered by a Commissioner of Mines. Apart from a small permanent research station established by Poland, only Norway and the U.S.S.R. maintain permanent settlements on Svalbard, which was formally incorporated in Norway in 1925 and is

administered by a Governor resident at Longyearbyen, on Spitsbergen, which is the administrative centre of the archipelago.

In 1941 the population was evacuated by Allied forces for the duration of the war, and three years later the U.S.S.R., to which Svalbard is of considerable strategic interest, unsuccessfully sought Norway's agreement to a revision of the 1920 treaty whereby part of the archipelago would become a Soviet-Norwegian condominium. The U.S.S.R. currently maintains a helicopter station and a mobile radar station adjoining its coal mining settlement at Barentsburg on Spitsbergen. The U.S.S.R. has refused to recognize Norway's unilateral declaration of a fisheries protection zone around Svalbard.

Economic Affairs

Coal is the islands' main product. One Norwegian and two Soviet mining camps are in operation and a second Norwegian camp is being developed. In 1980, 486,097 metric tons were exported by the U.S.S.R. and 313,462 metric tons by Norway.

Three deep drillings for petroleum have been carried out by Norwegian and other companies, but no results have been reported.

The total population (December 1980) was 3,755, of whom 1,308 were resident in the Norwegian communities, 2,437 in the Soviet settlements and 10 at the Polish research station.

Norway maintains radio and meteorological stations at Bjørnøya, Hopen, Isfjord, Longyearbyen and Ny-Ålesund. An airport was opened near Longyearbyen in 1975.

Governor: JAN GRØNDAHL.

Commissioner of Mines: JOHANNES VIK.

POLAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Polish People's Republic is situated in Eastern Europe, bounded to the north by the Baltic Sea, to the west by the German Democratic Republic, to the south by Czechoslovakia and to the east by the U.S.S.R. The climate is temperate. Over 70 per cent of the population are Roman Catholic but there are 18 other religious denominations, the largest being the Polish Autocephalous Orthodox Church. The language is Polish. The national flag (proportions 8 by 5) has two equal horizontal bands of white and red. The capital is Warsaw (Warszawa).

Recent History

A people's democracy was set up after the defeat of the German forces in 1944. Under the Potsdam Agreement signed by the major Allied powers in 1945, the former German territories along the line of the rivers Oder and Neisse, and now forming one-third of Poland's total area, came under Polish sovereignty. Józef Cyrankiewicz led a Communist-dominated government elected in 1947, with Władysław Gomułka as deputy premier. As the control of the Communists increased and allegiance to the Soviet Union strengthened, Gomułka was dismissed. The Government's strict control eased slightly with the death of Stalin, and in 1956 "bread riots" by industrial workers brought a political crisis which resulted in Gomułka's return to office. Soviet intervention was resisted by the new leaders and a period of liberalization followed.

In 1970 "bread riots" led to Gomułka's resignation. He was succeeded as First Secretary of the Polish United Workers' Party (PUWP) by Edward Gierek, who gave priority to raising living standards. In June 1976 substantial rises in food prices were proposed, but strikes and violent demonstrations forced the Government to postpone the increases. In 1978 further unrest was created by the introduction of a compulsory production-linked pension scheme for farmers. A major government reshuffle took place in February 1979, and in February 1980 Piotr Jaroszewicz was replaced as Chairman of the Council of Ministers by Edward Babuch.

In July the introduction of higher meat prices led to strikes in factories near Warsaw. A wave of labour unrest began to sweep the country, and many industries and services were disrupted. The Government adopted a conciliatory stance and permitted pay negotiations with the unofficial strike committees. However, workers' demands for higher wages developed into unprecedented protests against the economic and political management of the country, and in August Babuch resigned. He was succeeded by Józef Pińkowski, a Secretary of the PUWP Central Committee, and an extensive reshuffle was carried out. Shipyard workers along the Baltic, where the port of Gdańsk had been brought to a standstill, continued to press for the right to form free trade unions, independent of the Central Council. The Government was compelled to make concessions and, under agreements concluded with the strike committees of Gdańsk and Szczecin, permission to establish independent trade unions and the right to strike were granted. Self-governing unions were formed

under the guidance of *Solidarność* (Solidarity), the organization involved in the Gdańsk strike.

In September Gierek was taken ill and was removed from the PUWP leadership. Stanisław Kania was promoted to the post of First Secretary of the Central Committee. The revelation of a series of corruption and mismanagement scandals involving high-ranking officials resulted in further dismissals in October. Tension was renewed by the delays in the registration process for the new trade unions, and in particular by the Warsaw Provincial Court's insertion into the statutes of *Solidarność* of a clause upholding the leading role of the PUWP. The Supreme Court, however, allowed *Solidarność's* appeal against the lower court. In November the fourth major reshuffle of the Council of Ministers since January included the appointment of a prominent Independent Catholic as Deputy Chairman.

In January 1981 the Central Council of Trade Unions was formally dissolved. The question of the implementation of the five-day working week led to further widespread strike action, but lengthy negotiations between the Government and *Solidarność* resulted in a compromise. Pińkowski resigned as Chairman of the Council of Ministers in February, and was succeeded by Gen. Wojciech Jaruzelski, Minister of Defence and member of the Politburo. A ministerial reshuffle followed.

Solidarność welcomed the appointment of Gen. Jaruzelski, who then appealed for a 90-day respite from strikes. The announcement of new arrangements for meat and sugar rationing, however, followed by an incident at Bydgoszcz during which *Solidarność* members were allegedly assaulted by the police, provoked a fresh crisis, and at the end of March the country was paralyzed by a four-hour national strike. The formal recognition of *Rural Solidarność* in May ended the protracted dispute between the Government and Poland's 3.5 million private farmers.

The Council of Ministers was reorganized in June, and again in July, when several ministries were restructured. At the Ninth (Extraordinary) Congress of the PUWP, Kania retained his leadership, under the new system of multi-candidacy and secret ballot. *Solidarność's* first National Congress was convened in September. Radical proposals for social and economic reform were debated, indicating the union's widening sphere of interest. By the autumn the most crucial issue was that of food supplies. "Hunger marches" had begun in July, and the worsening shortages of food and other commodities led to further strikes. Kania was replaced by Gen. Jaruzelski as First Secretary of the PUWP in October. The Government, *Solidarność* and the Church met to discuss the crisis. In December the authorities used force for the first time to break a sit-in strike at a firemen's college. Martial law was imposed in mid-December (see Late Information).

Government

Under the 1952 Constitution, the supreme organ of state power is the *Sejm* (Parliament), a unicameral body comprising 460 deputies elected for a four-year term by all

citizens of 18 years and over. From its number the *Sejm* elects the Council of State (17 members) to be its permanent organ. The Council of State, headed by a President, functions as a collective head of state. Supreme executive power lies with the Council of Ministers, who are appointed or recalled by the *Sejm*. The Council of Ministers is responsible for its activities to the *Sejm* and to the Council of State between sessions of parliament. The Supreme Board of Control oversees national and local administration. It is responsible to the *Sejm*, but remains independent of the Government and the Council of State whose activities it supervises.

In February 1976 numerous amendments to the 1952 Constitution were approved. The Republic was for the first time officially described as a socialist state and the Polish United Workers' Party (PUWP) recognized as the leading political force in the state. The Communist PUWP dominates the Front of National Unity (including two other smaller parties), which presents an approved list of candidates for elections to representative bodies. The PUWP's highest authority is the Party Congress, normally convened every five years. The Congress elects a Central Committee (200 full members and 70 candidate members were elected in July 1981) to supervise Party work. To direct its policy the Committee elects a Political Bureau (Politburo), with between 12 and 19 full members and between two and five alternate members.

Since 1975 local government has been on a two-tier system. The country is divided into 49 provinces (voivodships), each with a People's Council elected for four years.

Defence

Poland is a member of the Warsaw Pact. Military service normally lasts for two years in the army, internal security forces and air force, and for three years in the navy. The estimated strength of the armed forces in July 1981 was 319,500: army 210,000, navy 22,500, air force 87,000. There was also 72,000 security and border troops. The defence budget for 1980 totalled 70,400 million zlotys.

Economic Affairs

Poland is traditionally a major exporter of agricultural produce and 30 per cent of the labour force work on the land. Although co-operative and state farms exist, 68.4 per cent of agricultural land remains in private hands (1980). Livestock production is important, and meat and meat products such as ham, bacon, sausage, etc. normally make significant contributions to Polish exports. The principal crops are rye, wheat, oats, sugar beet and potatoes.

About 30 per cent of the working population are in industry, which provides about 55 per cent of Poland's material product. The mineral industry is another vital source of foreign earnings. There are rich deposits of coal, copper, silver and sulphur, and also natural gas. About 80 per cent of Poland's energy needs are derived from coal. Output fell to 198 million tons in 1980, 12 million tons less than planned. Other important industries are shipbuilding, textiles, engineering, steel, cement, chemicals and foodstuffs. The main exports are coal, ships, motor cars and clothing.

The 1971-75 Five-Year Plan aimed at increasing exports and satisfying the home market. During this period, total agricultural production rose by 20 per cent, and industrial

output by 73 per cent, thus exceeding the target. National income increased by 64 per cent, and investment expanded by 133 per cent. The 1976-80 Five Year Plan, which was not fulfilled, originally envisaged an increase of 30 per cent in industrial production, with emphasis on the mechanical engineering, electrical and chemical industries, and a 16 per cent increase in agricultural production. National income was expected to rise by 55 per cent, and investment by 40 per cent.

Since 1975, however, there have been mounting difficulties brought about by excessive investment and related purchases of capital equipment, exceptionally adverse weather conditions, and successive bad harvests, which necessitated the import of large quantities of grain and fodder. Many key commodities, particularly meat and butter, have been in short supply, leading to the introduction of rationing. Industry has been disrupted by shortages of power, fuels, raw materials and components, and by the labour unrest since 1980. The mineral industry has also been affected by falling copper and silver prices on the world market. In 1980 net industrial production fell by 3 per cent over the previous year, and agricultural output declined by 15 per cent. National income decreased by 4 per cent. Only 60 per cent of the investment projects scheduled for completion in 1980 went into operation.

This decline continued in 1981, the sharp drop in coal production being particularly serious. The system of food subsidies, which were expected to total 228,000 million zlotys in 1981 (40 per cent more than in 1980), represents a heavy burden on the economy. Foreign loan repayment obligations have also placed a severe strain on resources. The total foreign debt at June 1981 was stated to total U.S. \$23,000 million. The situation was eased by deferments and further foreign credits.

Poland is a member of the Council for Mutual Economic Assistance (CMEA), and a contracting party to the General Agreement on Tariffs and Trade (GATT). In 1980 about 35 per cent of Poland's foreign trade was with the Soviet Union. Since 1978 steady progress towards eliminating the trade deficit with the West has been made, but the surplus on trade with CMEA in 1979 moved into a deficit of 3,000 million zlotys in 1980. The value of exports rose by 3.4 per cent in 1980, compared with 1979, and that of imports by 6.1 per cent.

Transport and Communications

Transport is by rail, road, inland waterway and air. In 1980 there were 27,185 km. of railways, 6,868 km. of which were electrified. There were 117,653 km. of main roads and 4,040 km. of navigable waterways. The Polish airline LOT maintains internal and international services. There are three large ports on the Baltic coast at Gdynia, Gdańsk and Szczecin. The merchant fleet had 331 ships in 1980, with a displacement of 2,904,300 gross tons.

Social Welfare

The Polish social welfare system is controlled by the Ministry of Health and Social Welfare. Locally the system is administered by the Health and Social Welfare Departments of the Presidiums of the National Councils. Medical care is provided free for all workers and rural population. In 1980 there were 67,780 physicians and 237,300 hospital beds. The Polish Red Cross organizes and carries out the

care of the sick at home and general home assistance to those who are incapacitated through ill-health, etc. Alimony is assured by law to single mothers. Pensions are organized and managed by the Union of Pensioners, Invalids and Retired Persons.

Education

Education is free and compulsory for children between the ages of 7 and 14 years. Before the age of 7, children may attend creches (*złobki*) and kindergartens (*przedszkola*). Basic schooling begins at 7 years of age with the eight-year school (*szkola podstawowa*). Curricula are uniform throughout Poland. There is a small number of private schools run under state supervision. Secondary education is free to candidates successful in the entrance examination and about 98 per cent of pupils continue their studies. Of these, 80 per cent go to vocational and technical schools (*technika zawodowe*), or to basic vocational schools (*zasadnicze szkoły*). The latter provide three-year courses consisting of three days' theoretical and three days' practical training per week, and in addition some general education is given. Vocational technical schools provide five-year courses of general education and vocational training together, and can lead to qualifications for entering higher educational establishments. The remaining 18 per cent of children who leave the eight-year school to continue with their education enter general secondary schools (*liceum ogólnokształcące*), where four-year courses lead to college or university entrance. In 1978 the first pupils started courses in ten-year comprehensive schools, but the new system

was abandoned in 1980. There are 91 higher educational establishments in Poland, including ten universities and 18 technical universities. Expenditure from the government budget on education for 1980 was 79,984 million zlotys.

Tourism

The Polish Tourist and Country Lovers' Society is responsible for tourism and itself maintains about 260 tourist hotels and hostels throughout the country. Poland is rich in historic cities such as Wrocław, Cracow and Warsaw. There are 30 health and climatic resorts, while the mountains, forests and rivers provide splendid scenery and excellent facilities for sporting holidays. Poland was visited by 7,080,000 foreign tourists in 1980.

Public Holidays

1982: April 11th and 12th (Easter), May 1st (Labour Day), May 9th (Victory Day), June 10th (Corpus Christi), July 22nd (Polish National Day), November 1st (All Saints' Day), December 25th, 26th (Christmas).

1983: January 1st (New Year's Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 groszy = 1 zloty.

Tourist rates (October 1981):

£1 sterling = 62.05 zlotys;

U.S. \$1 = 33.20 zlotys.

¹ Pure and mixed yarns. Cotton includes tyre cord yarn.

² Pure and mixed fabrics, after undergoing finishing processes. Cotton and wool include substitutes.

³ Tyres for passenger motor cars and commercial vehicles, including inner tubes and tyres for animal-drawn road vehicles, and tyres for non-agricultural machines and equipment.

⁴ Fertilizer production is measured in terms of (a) nitrogen or (b) phosphoric acid. Phosphate fertilizers include ground rock phosphate.

⁵ Including synthetic products.

⁶ Including blast-furnace ferro-alloys.

⁷ Figures refer to both primary and secondary metal. Zinc production includes zinc dust and remelted zinc.

FINANCE

100 groszy=1 zloty.

Coins: 1, 2, 5, 10, 20 and 50 groszy; 1, 2, 5, 10, 20 and 50 zlotys.

Notes: 50, 100, 200, 500, 1,000 and 2,000 zlotys.

Exchange rates (October 1981):

£1 sterling=62.05 zlotys; U.S. \$1=33.20 zlotys (non-commercial rates).

1,000 zlotys=£16.12=\$30.12.

Note: Since 1961, except for a short period in 1975-76, the zloty has been officially valued at 22.5 Soviet kopeks (1 rouble=4.444 zlotys). Prior to August 1971 the official exchange rate was U.S. \$1=4.00 zlotys (1 zloty=25 U.S. cents). Between December 1971 and February 1973 the rate was \$1=3.68 zlotys (1 zloty=27.14 U.S. cents). In terms of sterling, the basic exchange rate between November 1967 and June 1972 was £1=9.60 zlotys. In March 1973 the basic exchange rate was fixed at U.S. \$1=3.32 zlotys (1 zloty=30.12 U.S. cents). This remained in effect until 1978. During the same period the value of foreign trade transactions was calculated on an exchange rate of 1 zloty=30.10 U.S. cents (\$1=3.322 zlotys). The average value of the exchange zloty was 31.59 cents in 1978; 32.37 cents in 1979; 32.74 cents in 1980. Since 1978 the non-commercial rate has been \$1=33.20 zlotys.

THE CONSTITUTION

(Adopted on July 22nd, 1952; amended in 1976).

Summary

The Polish People's Republic is a republic of the working people. A State of People's Democracy has been firmly established, and a new social system is taking shape and growing in strength.

Political Structure

The Polish People's Republic is a socialist State. Power belongs to the working people of town and country, who rule the State through their representatives elected to the *Sejm* (Parliament) and to the People's Councils. The Polish United Workers' Party is the leading political force in the building of socialism. Co-operation between the Polish United Workers' Party, the United Peasants' Party and the Democratic Party is the basis of the National Unity Front. The main aim of the Polish People's Republic is the development of a socialist society. The Polish People's Republic is guided by the interests of the Polish nation, strengthens friendship and co-operation with the U.S.S.R. and other socialist states, and bases relations with states of different social structure on the principles of peaceful co-existence and co-operation.

Social and Economic Structure

The socialist economic system is the basis of the socio-economic structure of the Polish People's Republic. The State has the monopoly of foreign trade. The State provides for participation by the workers in the management of State enterprises. The Polish People's Republic promotes the development of different forms of the co-operative movement, and recognizes and protects indi-

vidual property. Work is the right and the duty of every citizen.

The Supreme Organs of State Authority

The supreme organ of State authority is the *Sejm*, which is made up of 460 Deputies. The Council of State convokes a session of the *Sejm* at least twice a year. The *Sejm* elects from among its members a Chairman, Deputy Chairmen and Committees. The right to propose legislation is vested in the Council of State, the Government and the Deputies. The *Sejm* is elected for a term of four years. It elects a Council of State composed of a President, four Vice-Presidents, a Secretary and eleven members. The Council of State is accountable to the *Sejm*. In the intervals between the sessions of the *Sejm*, the Council of State issues decrees with force of law. The Council of State exercises ultimate supervision over the local People's Councils.

The Supreme Board of Control

The Supreme Board of Control is appointed to supervise the activities of the central and local organs of State administration. It serves the *Sejm*, the Council of State and the Council of Ministers, and is supervised by the *Sejm*. The Chairman of the Supreme Board of Control is appointed and recalled by the *Sejm*.

The Supreme Organs of State Administration

The *Sejm* appoints and recalls the Government—the Council of Ministers or its individual members. In the

intervals between sessions of the *Sejm* the Council of State, on the motion of the Chairman of the Council of Ministers, appoints and recalls members of the Council of Ministers. The Council of Ministers is the supreme executive and administrative organ of State authority, and is responsible to the *Sejm*. The Council of Ministers is composed of: the Chairman and Deputy Chairmen of the Council of Ministers, the Chairman of the Supreme Board of Control, Ministers and Chairmen of Commissions and Committees. The Chairman and Deputy Chairmen of the Council of Ministers are the Presidium of the Government.

The Local Organs of State Authority and Administration

The People's National Councils are the local organs of State authority. The People's Councils express the will of the working people, and direct and co-ordinate the activity of all administrative and economic units in their regions. The local organs of State administration are: voivods, mayors of cities and heads of towns, heads of districts and heads of communes.

The Courts and the Public Prosecutor's Office

The administration of justice is carried out by the Supreme Court, Voivodship Courts, District Courts and Special Courts. People's Assessors take part in the hearing of cases and the pronouncement of judgment, and have equal rights with judges. People's Assessors are elected by People's Councils. Judges are appointed and recalled by the Council of State. The Supreme Court is the highest judicial organ, and is appointed by the Council of State

for a term of five years. The Chief Public Prosecutor is appointed and recalled by the Council of State.

Fundamental Rights and Duties of Citizens

The Polish People's Republic strengthens and extends the rights and liberties of citizens. Citizens have equal rights, irrespective of sex, origin, education, occupation, nationality, race, religion, descent or social status. Citizens have the right to work and the right to rest; the right to health protection; and the right to education. Women are guaranteed equal rights with men. Freedom of conscience is guaranteed. The Church is separated from the State. Citizens are guaranteed freedom of speech, of the press, of meetings etc.; the right to unite in public organizations; and the inviolability of the person and of the home.

Principles of Electoral Law

Election of the *Sejm* and to People's Councils are universal, equal, direct and carried out by secret ballot. At the age of 18 every citizen has the right to vote, and is eligible for election to People's Councils; at the age of 21 every citizen is eligible for election to the *Sejm*. Candidates to the *Sejm* and to the People's Councils are nominated by political and social organizations uniting citizens of town and country.

Coat-of-Arms, Colours and Capital of the Polish People's Republic

The coat-of-arms of the Polish People's Republic is a white eagle on a red field. The National Anthem is the *Mazurek Dąbrowskiego*. The capital of the Polish People's Republic is Warsaw.

JUDICIAL SYSTEM

Note: the administrative reforms of June 1975 have not yet been implemented in the Judicial system. Below is the system as it was before.

THE SUPREME COURT

First President: Prof. Dr. hab. WŁODZIMIERZ BERUTOWICZ.

The Supreme Court is the highest judicial organ and court of cassation, and is the court of revision for sentences passed by Voivodship Courts. The judges for this court are elected by the Council of State for a term of five years.

Volvodship and Regional Courts. Persons may appeal from

the Regional Courts to the Voivodship (province) Courts. The Regional Courts consist of one professional magistrate and two laymen, and these try less serious cases. The Voivodship Courts try more serious cases; when acting as court of first instance they consist of one professional judge and two laymen, and when acting as court of second instance they consist only of professional judges.

The Public Prosecutor-General is appointed and recalled by the Council of State. He is especially charged with the protection of social property.

Prosecutor-General: FRANCISZEK RUSEK.

THE PRESS

The Polish Press is probably the most distinctive in Eastern Europe. It was nationalized in 1946 along with the other communications media and remains under strict government control. The majority of newspapers and magazines are published by the Communist Party (Polish United Workers' Party).

Freedom of the Press is guaranteed by the 1952 constitution, yet is subject to general control by administrative bodies. The government dictates general policy on what appears in Polish newspapers, and they must still follow the Party line. However, Poland has long been one of the more nationalistic of the Communist Bloc countries, and this spirit is still evident in the Press. More and more editors have expressed Poland's national awareness of the currents of European thought. It has resulted in the Polish Press becoming slightly more objective than its East European counterparts, more representative of public opinion, and more aware of a responsibility to its readership. This national awareness has produced a Press with a far more individual character than elsewhere in Eastern Europe. Poland has always had close affinities with the West, and a considerable Western influence is evident in its newspapers and periodicals. *Trybuna Ludu* (circ. 1,220,000), the Party daily, has published display advertisements since 1957 and in some papers they now take up to 20 per cent of the total space. *Express Wieczorny* (circ. 560,000) and *Życie Warszawy* (circ. 420,000) have a particularly Western appearance. *Perspektywy* (circ. 170,000), a weekly magazine, is similar.

In 1980 there were 43 daily newspapers in Poland with a total circulation of 8,407,000. *Trybuna Ludu* is the most influential daily newspaper. There are 2,527 periodicals with a combined circulation of 32.3 million copies.

INDUSTRIAL FEDERATIONS

There are Industrial Federations for the following industries: Agricultural Machinery, Automobiles, Coal, Constructional Machinery, Electrical Goods, Electronics, Foundry Products, Machine Tools, Metal Products, Railway Rolling Stock, Shipbuilding, Textile Machinery, Iron Mining and Iron and Steel Smelting.

TRADE UNIONS

In 1980 striking workers won the right to establish free trade unions (see Recent History, p. 987). In September the Government adopted a resolution on the registration of unions formed outside the official Central Council of Trade Unions. It was originally envisaged that the independent unions would exist alongside those affiliated to the Central Council. The latter was dissolved in January 1981.

Founding committees of new unions apply to the Provincial Court in Warsaw for registration, which is granted if the Court finds the union's statutes not in conflict with the Polish Constitution and other legal regulations. Upon registration, the union is granted legal identity. The registration procedure is free of charge. The parties concerned have the right of appeal to the Supreme Court if the Provincial Court refuses to register a union. By September 1981 a total of 86 independent trade unions had been registered and many applications were still pending.

PORTUGAL

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The mainland portion of the Portuguese Republic lies on the Atlantic side of the Iberian peninsula, bordered by Spain to the north and east. The country also includes two archipelagos in the Atlantic Ocean, the Azores and the Madeira Islands. The climate is mild and temperate, with an annual mean temperature of 16°C (61°F). In the interior the weather is drier and hotter. The language is Portuguese. Roman Catholicism is the religion of the majority of the people. The national flag (proportions 3 by 2) carries two vertical bands of green and red, the green occupying two-fifths of the total area, with the state coat of arms superimposed. The capital is Lisbon (Lisboa).

Recent History

The monarchy which had ruled Portugal since the 11th century was overthrown in 1910. A period of great instability ensued until the regime of the *Estado Novo* (New State) began in 1926. Dr. António Salazar became Prime Minister in 1932 and established a right-wing dictatorship. In 1968 Dr. Salazar was succeeded by Dr. Marcello Caetano, who pursued slightly more liberal policies.

The drain on Portugal's economy by the long wars against nationalist forces in the overseas provinces contributed to the bloodless coup of April 25th, 1974, initiated by the *Movimento das Forças Armadas* (MFA), a group of young army officers. Gen. António de Spínola, head of the Junta of National Salvation which had then assumed power, became President in May and promised liberal reforms. In July Brig.-Gen. Vasco dos Santos Gonçalves replaced Prof. Adelino da Palma Carlos as Prime Minister. President Spínola resigned in September, following a split between left- and right-wing factions in the MFA, and was replaced by Gen. Francisco da Costa Gomes.

The abortive counter-coup by high-ranking officers in March 1975 resulted in a swing to the left. All existing organs of the MFA were dissolved and the Council of the Revolution was created. Six parties signed an agreement with the armed forces movement, ensuring that it would stay in power for five years. In April, elections for the Constituent Assembly resulted in a victory for the Socialist Party (PS). Disputes between Socialists and Communists provoked the PS and the People's Democratic Party (PPD) into leaving the Government. Gen. Vasco Gonçalves was dismissed and Admiral José Pinheiro de Azevedo became Prime Minister in August. In September the provisional government resigned and a new government of "united action" was formed, including members of the armed forces, the PS, the PPD and the Communist Party (PCP). In November the Government suspended its activities due to a lack of support from the armed forces. An abortive leftist military coup resulted from the political turmoil. Changes took place within the Council of the Revolution and in December the armed forces put forward a plan to reduce its political power.

In April 1976 a new Socialist Constitution was promulgated, and elections to a Legislative Assembly resulted in the PS's remaining the largest single party but not having an overall majority. In June the Army Chief of

Staff, Gen. António Ramalho Eanes, backed by the PS, the PPD and the Centre Democratic Party (CDS), was elected President on a platform of law and order. A minority Socialist Government, dependent on temporary alliances with other parties, was formed under Dr. Mário Soares.

In December 1977 the Government resigned following defeat over its proposals to implement an IMF austerity programme, and attempts to undo collectivization in agriculture and industry. The President again invited Dr. Soares to take office as Prime Minister and in January 1978 a new PS/CDS coalition government was established. After only six months the coalition collapsed and, at the President's request, an independent, Alfredo Nobre de Costa, attempted to form a government but without success. A government was finally formed in November under Dr. Carlos Mota de Pinto.

The new Government's draft Budget was rejected by the Assembly in March 1979. Angered at having been forced to abstain, 73 PSD deputies resigned from their party. In July the PS and the PCP tabled two motions of censure against the Government. The second draft Budget was then approved by the Assembly but only after extensive amendments. Faced with such strong opposition to his Government's policies, Dr. Mota de Pinto resigned in July. President Eanes announced that early general elections would be held in December and appointed Dr. Maria de Lourdes Pintasilgo to head a provisional Government. The centre-right Democratic Alliance (AD) won a sweeping victory and Dr. Francisco Sá Carneiro, as leader of the main party (PSD) in the coalition, was appointed Prime Minister.

At the general elections held in October 1980, as scheduled in the Constitution, the AD increased its majority of seats in the Assembly from six to 18. Dr. Sá Carneiro expressed the hope that this would enable the Government to alter the character of the 1976 Constitution from socialist to social democratic and to enact legislation to provide for more private investment in the economy, especially in banking and insurance.

On December 4th Dr. Sá Carneiro and the Minister of Defence, Adelino Amaro da Costa, were killed in an air crash. The presidential election took place as planned, however, on December 7th, and in an 84 per cent electoral turnout President Eanes gained a definitive victory, winning over half the votes. The Government resigned and Dr. Sá Carneiro was replaced by Dr. Francisco Pinto Balsemão, co-founder of the PSD and former Minister. In January 1981 Dr. Balsemão formed a new Council of Ministers, and pledged to support the policies of the previous Government. At the PSD Congress in February Dr. Balsemão survived a challenge to his leadership from a conservative faction of the Party. In March President Eanes fulfilled his election promise, when the offices of President and Chief of Staff of the Armed Forces were formally separated.

A reshuffle of the Council of Ministers in June reflected the growing tension within the coalition Government, and

the resignation of the Minister of Social Affairs in July precipitated a major crisis. As a result of divisions within the PSD, Dr. Balsemão resigned as Prime Minister in August. A week later, however, the PSD passed a vote of confidence in Dr. Balsemão, who then agreed to return to office, thus resolving the situation. A new Council of Ministers was then appointed.

Government

A new Constitution, envisaging the construction of a socialist society in Portugal, was promulgated in April 1976. The organs of sovereignty are the President, the Council of the Revolution, the Assembly of the Republic and the Government. The President, elected by popular vote for a five-year term, appoints the Prime Minister after consultation with the Council of the Revolution and the parties represented in the Assembly. The President appoints other members of the Government on the proposal of the Prime Minister. The Council of the Revolution, comprising the four military commanders plus the President and 12 officers elected by the armed forces, is an advisory body and acts as the guarantor of the Constitution. The unicameral Assembly has 250 members serving a four-year term. Macau is governed by special statute, and the Azores and Madeira were granted autonomy in 1976.

Defence

Military service is compulsory and lasts for 16 months in the army and 24 months in the navy and air force. Portugal is a member of NATO. In July 1981 total strength of the armed forces was 70,926, comprising: army 47,000, navy 13,426 and air force 10,500. Defence expenditure for 1981 was estimated at 49,000 million escudos.

Economic Affairs

Under the regimes of Salazar and Caetano, Portugal was traditionally an agricultural country. Major exports were textiles, clothing, wood products and wine. The coup of 1974 severely disrupted the economy. Foreign investment fell, and two principal sources of revenue, tourism and remittances from emigrant workers, were halted. The achievement of independence by the former colonies in Africa ended Portugal's cheap supply of raw materials, especially cotton, and the return of 800,000 refugees from Africa put a severe strain on resources.

After 1974 the long-awaited agrarian reform programme began. Over 1.5 million hectares of land were expropriated and a further 700,000 hectares were taken over illegally. In 1976 the new Socialist Government announced that land occupied illegally should be returned to its former owners, or compensation made, and the Land Reform Review Law of August 1977 increased the amount of land legally retained by private farmers in the Alentejo. The process of handing back illegally seized land in this region began in 1978, and was accelerated in 1981. Current emphasis is on improving efficiency.

The chief crops are wheat, maize, potatoes, tomatoes and grapes for the production of wine, particularly port, most of which is exported. The initial chaotic application of agrarian reform, along with successive poor harvests owing to adverse weather, led to a drop in agricultural output. By 1980 Portugal was importing over 50 per cent of its basic foodstuffs.

Another heavy burden on the economy is Portugal's dependence on imported energy. The petroleum import bill doubled to reach U.S. \$2,000 million in 1980, and in 1981 the World Bank granted a loan of \$20 million to support petroleum exploration in Portugal. Industry accounts for over 40 per cent of G.N.P. and employs one-third of the labour force. Textiles provide 40 per cent of industrial output and 30 per cent of total exports. Other significant items are shoes, leather, cork and other wood products and ceramics.

The huge Sines development area south of Lisbon, planned to cover 400,000 hectares and begun in the 1960s, comprises a deep-water port handling about 11.5 million metric tons of goods per year and an oil refinery and petrochemical complex which began operations in 1979. There are strong doubts as to whether investment in the complex should continue, in view of the unforeseen escalation in energy costs, but in 1980 there were signs that Portugal was attracting larger investments from foreign companies.

The austerity programme imposed by the IMF in 1977 succeeded in stabilizing Portugal's economy. The Sá Carneiro Government was able to reduce the level of inflation from 24.2 per cent in 1979 to 16.6 per cent in 1980. The revaluation of the escudo in February 1980 contributed towards the increased growth rate in G.D.P. of 5.5 per cent, compared with 4.5 per cent in 1979. Exports, however, rose by only 5 per cent in 1980 (27 per cent in 1979), while imports went up by 9.6 per cent (7.8 per cent in 1979). The trade deficit was \$4,034 million (\$2,634 million in 1970). This was offset by remittances from workers abroad and from tourism, which reached U.S. \$2,200 million and \$1,100 million respectively.

The restructuring of the economy in preparation for Portugal's entry into the EEC in the mid-1980s was the main priority of Dr. Balsemão's Government. Pre-accession aid to finance agricultural and regional development projects was granted in 1980. Negotiations for further IMF credit began in 1981. The prolonged drought during the winter of 1980/81 not only led to crop losses and to even greater expenditure on imported food and animal feed, but also resulted in critical shortages of hydro-electricity and the disruption of industry.

In September 1981 Dr. Balsemão announced plans to boost agricultural output and to increase exports, in an attempt to reduce the current account deficit, which was expected to reach U.S. \$1,700 million by the end of the year. Other proposals included a new housing programme, the decentralization of the administration and greater promotion of tourism.

Transport and Communications

In 1979 there were 51,749 km. of roads in Portugal. The state-operated railways cover 2,829 km. Portugal's merchant fleet had a displacement of 1,240,000 g.r.t. in June 1978. Regular air services connect Lisbon with European, American and African capitals.

Social Welfare

A Ministry of Social Affairs is maintained within the structure of the present Government, with two Secretariats of State, one for Health and one for Social Security. Under the new Constitution the State is obliged to provide a social security system and full health facilities. Many

PORTUGAL

measures have already been taken, including the integration of all health services under the responsibility of the Secretariat of State for Health, increased family allowances, old age pensions, pensions for the handicapped and a statutory minimum wage. The present health system provides free medical consultation for contributors to the national insurance scheme—about 85 per cent of the population. In 1979 the Assembly of the Republic approved a plan for a National Health Service which aims to distribute free medical service evenly throughout the country. Private practices will be allowed to coexist.

Education

Education is free and compulsory between the ages of 7 and 14, and consists of four years' primary school followed by three years' continuation classes. Compulsory schooling at the age of 6 has been virtually guaranteed by the State. Secondary education is voluntary and fees are charged. State fees are low and scholarships are provided. There are eleven universities, and about thirty colleges and institutes providing technical and vocational courses. The *bacharelado* is generally awarded after three years, and the *licenciatura* after five; all universities award doctorates and the creation of a Master's degree is envisaged. University entrance examinations were reintroduced in the 1977/78 academic year, and the year of civic service formerly required was replaced by one of introductory study.

Between 1960 and 1970 average adult illiteracy fell

from 37.2 per cent to 29.0 per cent (males 22.4 per cent; females 34.7 per cent).

Tourism

Portugal is popular with visitors because of its mild and clement weather. Apart from Lisbon and the Algarve on the mainland, Madeira and the Azores are much favoured as winter resorts. Earnings from tourism are an important source of revenue. In 1979 the number of foreign visitors exceeded 5 million.

Public Holidays:

1982: April 9th (Good Friday), April 25th (Liberty Day), May 1st (Labour Day), June 10th (Portugal Day), June 13th (St. Anthony—Lisbon only), June 24th (St. John the Baptist—Oporto only), August 15th (Assumption), October 5th (Proclamation of the Republic), November 1st (All Saints' Day), December 1st (Restoration of Independence), December 8th (Immaculate Conception), December 25th (Christmas).

1983: January 1st (New Year's Day).

THE CONSTITUTION

(Promulgated on April 2nd, 1976)

(Summary)

FUNDAMENTAL PRINCIPLES

Portugal is a sovereign Republic based on the dignity of the individual and the will of the people. It comprises the territory defined by history on the European continent and the archipelagos of the Azores and Madeira. The territory of Macau, under Portuguese administration, shall be governed by a Statute. The Azores and Madeira shall constitute autonomous regions.

The fundamental duties of the State include the following: to safeguard national independence; to secure participation by the people in the solving of national problems; to socialize the means of production; and to promote general welfare.

FUNDAMENTAL RIGHTS AND DUTIES

All citizens are equal before the law.

Rights, freedoms and safeguards

These are upheld by the State and include the following: the right to life; of *habeas corpus*; to the inviolability of the home and of correspondence; to freedom of expression and of conscience; to freedom of movement and of assembly.

Economic, social and cultural rights and duties

The collective appropriation of the means of production and the planning of economic development are safeguards and conditions for the effective exercise of rights and duties which include the following: the right and the duty to work; the freedom to form trade unions and the right to strike; the right to set up co-operatives; the right to private property; the right to social security and medical services; the duty of the State and of society to protect the family and the disabled; the right to education, culture and sport.

ECONOMIC ORGANIZATION

The economic and social organization of Portugal shall be based on the development of socialist relations of production through collectivization of the principal means of production, land and natural resources and through the exercise of democratic power by the working classes.

The State shall promote the establishment of co-operatives. Foreign investment shall be regulated by law. During the transition to socialism there shall be three sectors of ownership: the public, co-operative and private.

The development of social ownership shall be based on the expansion of the public and co-operative sectors.

PLAN

The Plan will be drawn up by a National Planning Council and approved by the Assembly of the Republic.

AGRARIAN REFORM

The aim of agrarian reform is to improve the situation of farm workers and to increase agricultural production and productivity. *Latifundia* (large estates) will be eliminated, and property which has been expropriated shall be handed over to small farmers and farm workers. Co-operatives and other forms of collective farming by workers will be formed.

FINANCIAL AND FISCAL SYSTEM

The financial and fiscal system aims at encouraging savings and achieving the equal distribution of wealth and incomes. The General State Budget shall be supervised by the Assembly and the Audit Office.

TRADE

The State shall intervene in the fixing of prices and the rationalization of the distribution network, and also in the promotion and control of external trade transactions.

POLITICAL ORGANIZATION

Political power shall lie with the people. The organs of sovereignty shall be: the President of the Republic, the Council of the Revolution, the Assembly of the Republic, the Government and the Courts. Direct, secret and regular elections shall be held. No-one shall hold political office for life.

PRESIDENT OF THE REPUBLIC

The President of the Republic shall represent the Republic and exercise the functions of the President of the Council of the Revolution. He shall be elected by direct and secret universal adult suffrage. The candidate who obtains more than half the valid votes will be elected President. The President shall hold office for five years.

The duties of the President include the following: to preside over the Council of the Revolution; to appoint and dismiss the Prime Minister; to appoint and dismiss mem-

bers of the Government at the proposal of the Prime Minister. The President may exercise the right of veto on legislation emanating from the Assembly.

COUNCIL OF THE REVOLUTION

The Council of the Revolution acts as an advisory body to the President, as guarantor of the proper working of democratic institutions, of the implementation of the Constitution and of loyalty to the spirit of the Portuguese Revolution of April 25th, 1974. It also serves as a political and legislative organ in military matters.

The Council is composed of the President, the Chief and Deputy Chief of the General Staff, the Prime Minister (if he is a member of the armed forces), eight army officers, three air force officers and three navy officers and the three Chiefs of Staff.

ASSEMBLY OF THE REPUBLIC

The Assembly shall have a minimum of 240 and a maximum of 250 members, elected by the electoral constituency. The duties of the Assembly include the following: to approve amendments to the Constitution and to approve the political and administrative statutes of the Autonomous Regions and the Statute of the territory of Macau; to enact legislation; to confer legislative authority on the Government; to approve the Plan and the Budget; to approve treaties; to supervise the fulfilment of the Constitution and laws and to scrutinize Government acts; to scrutinize the Government's programme.

Each legislative period shall last four years. The legislative session shall run from October 15th to June 15th each year.

GOVERNMENT

The Government formulates the general policy of the country and is the highest organ of public administration. It shall comprise the Prime Minister, Ministers, Secretaries and Under-Secretaries of State and may include one or more Deputy Prime Ministers. The Prime Minister is appointed and dismissed by the President. Other members of the Government are appointed by the President at the proposal of the Prime Minister. The Government shall be responsible to the President and the Assembly. The Government's programme shall be presented to the Assembly for scrutiny within ten days of the appointment of the Prime Minister.

JUDICIARY

The courts are organs of sovereignty with competence to administer justice. There shall be Courts of First Instance (District Courts), Courts of Second Instance (Courts of Appeal) and the Supreme Court of Justice. There shall also be military courts and a Court of Audit.

The jury shall comprise the judges of the plenary court and the jurors. People's judges may be created. It is the duty of the *Ministério Público* to represent the State. Its highest organ is the *Procuradoria-Geral* which is presided over by the *Procurador-Geral*.

AUTONOMOUS REGIONS

The special political and administrative arrangements for the archipelagos of the Azores and Madeira shall be based on their geographical, economic and social conditions and on the historic aspirations of the people to autonomy. The sovereignty of the Republic is represented in each of the Autonomous Regions by a Minister of the Republic.

The organs of government in the Autonomous Regions are: the Regional Assembly, elected by direct and secret universal adult suffrage, and the Regional Government which shall be politically responsible to the Regional Assembly. Its Chairman is appointed by the Minister of the Republic. The Minister shall appoint or dismiss members of the Regional Government on the proposal of its Chairman.

The President of the Republic shall be assisted by a five-member advisory commission on the affairs of the Autonomous Regions.

LOCAL GOVERNMENT

The local authorities shall be territorial bodies corporate with representative organs serving the particular interests of the local population. The local authorities on the mainland shall be the parishes, municipal authorities and administrative regions. The Autonomous Regions of the Azores and Madeira shall comprise parishes and municipal authorities.

PUBLIC ADMINISTRATIVE AUTHORITIES

The public administrative authorities shall seek to promote the public interest whilst respecting the legal interests and rights of all citizens. Citizens shall have the right to be informed of, and to have redress against, the public administrative authorities when the matter directly concerns them.

ARMED FORCES

The Portuguese Armed Forces shall safeguard national independence, the unity of the State and the integrity of the national territory. They shall secure the continuation of the Revolution of April 25th, 1974. Military service shall be compulsory.

SAFEGUARDS AND REVISION OF THE CONSTITUTION

Before promulgation, all laws shall be sent simultaneously to the President and the Council of the Revolution for a decision on their constitutionality.

Changes in the Constitution shall be approved by a majority of two-thirds of the members of the Assembly present, provided that the number of such members exceeds an absolute majority of the members entitled to vote.

The Statute of the territory of Macau, promulgated on February 17th, 1976, shall continue in force. Portugal shall remain bound by its responsibility to promote and safeguard the right to independence of East Timor.

JUDICIAL SYSTEM

The State is represented in the courts by the Public Prosecution, whose highest organ is the *Procuradoria-Geral da República* (Attorney General's Office).

Procurador-Geral: EDUARDO AUGUSTO DE ARALA CHAVES.

The principle of *habeas corpus* is recognized and persons illegally detained may appeal to the Supreme Court.

Judges are appointed for life and are irremovable. Conditions of appointment, service, dismissal, pension and transfer are governed by law. They may take no other office of profit under the Government, except service on permanent or temporary commissions. The *Conselho Superior da Magistratura* controls their appointment, transfer and promotion and the exercise of disciplinary action.

The jury system was reintroduced in 1976 although it operates only at the request of the prosecutor or defendant.

The Supreme Court: Praça do Comércio, Lisbon; it is the highest organ of the judicial system and has jurisdiction over Metropolitan Portugal and Macau; it consists of a president and 29 judges; Pres. ANTÓNIO ACÁCIO DE OLIVEIRA CARVALHO.

Courts of Second Instance (or Courts of Appeal): there are four courts of appeal; that in Lisbon consists of a president and 44 judges and also has jurisdiction over Macau; in Oporto, of a president and 34 judges; in Coimbra, of a president and 15 judges; and in Évora, of a president and 14 judges.

Courts of First Instance: there is one court for every judicial district or *comarca*, including one in Macau.

Special Courts: these have exclusive jurisdiction in certain matters, i.e. military courts for military crimes, a Court of Audit to judge the public accounts and administrative and revenue courts.

RELIGION

The dominant religion is Roman Catholicism. There is freedom of worship, and some Protestant Churches have been established.

In 1976 there were 8,485,775 Roman Catholics in Portugal.

THE PRESS

After the *coup d'état* of April 1974 censorship of the press was abolished. Under the 1976 Constitution the freedom of the press is guaranteed in so far as it affects: freedom of expression and creation by journalists and writers; intervention by journalists of those organs of the mass media which do not belong to the State or to political parties; the right to found newspapers and other publications; permission for periodical publications to become the property of non-profit-making collective organizations, of societies formed by journalists' groups or publishing companies and of Portuguese citizens; and the independence of the press.

The Lisbon newspapers *A Capital*, *Diário de Lisboa*, *Diário de Notícias*, *Diário Popular*, *Jornal de Comércio* (which ceased publication in 1976) and *O Século* (ceased publication in February 1977) were owned by various banking and financial groups which were nationalized in 1974 and 1975 and have since themselves become state-owned. In 1979 the *Diário de Lisboa* was handed back to private ownership.

Oporto is the principal press centre in northern Portugal. Two of its principal morning dailies, *O Comércio do Porto* and *Jornal de Notícias* were under State control from 1974 until 1979.

Decree-law No. 639/76 of July 29th, 1976, nationalized the following newspaper publishing groups: *Sociedade Nacional de Tipografia*, *Sociedade Industrial de Imprensa*, *Sociedade Gráfica de A Capital* and *Empresa Nacional de Publicidade*. The following state-owned groups were established: *EPNC—Empresa Pública dos Jornais Notícias e Capital* and *EPSP—Empresa Pública dos Jornais O Século e Diário Popular*.

Circulations have recently been falling and many newspapers, particularly in the State-owned sector, have been making heavy losses. In September 1977 the Government announced that it could no longer subsidize unprofitable publications, which must adopt Government guidelines to improve their economic viability or risk bankruptcy. In 1980 the Government proposed financial aid for the private press.

Portugal has bilateral agreements with the United Kingdom, France, the U.S.A., Spain and Brazil (a co-operation agreement), and is a member of the International Atomic Energy Agency, the OECD Nuclear Energy Agency and the European Atomic Energy Society.

ROMANIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Socialist Republic of Romania lies in south-east Europe, bounded to the north and north-east by the U.S.S.R., to the north-west by Hungary, to the south-west by Yugoslavia and to the south by Bulgaria. The south-east coast is washed by the Black Sea. It has a climate of hot summers and cold winters with a moderate rainfall. The average summer temperature is 21°C (70°F) and the winter average is -2°C (28°F). The official language is Romanian, a Romance language, although there are minority groups speaking German and Hungarian. The dominant religion is the Romanian Orthodox Church. The national flag (proportions 5 by 3) consists of three equal vertical stripes, blue, yellow and red, the middle stripe bearing the state emblem. The capital is Bucharest (București).

Recent History

A government of Communists, Social Democrats and members of the Ploughmen's Front, under the leadership of Dr. Petru Groza, was constituted following a coup towards the end of the Second World War, and after elections in 1946 Communists held most of the important posts. A People's Republic was declared in December 1947 and King Michael was forced to abdicate. In 1948 the Republic's first constitution was adopted, and in the same year the nationalization of the main industrial and financial institutions was begun. There followed numerous political arrests, during which full control was gained by the Communist People's Democratic Front. In 1952, following a purge in the Romanian Workers' Party (since 1965 the Romanian Communist Party), a new constitution closer to the Soviet model was adopted. Gheorghe Gheorghiu-Dej then dominated the Government until his death in 1965. Nicolae Ceaușescu succeeded him as First (later General) Secretary of the Party. A new constitution in 1965 made Romania a Socialist Republic. Ceaușescu also became President of the State Council (Head of State) in December 1967, and President of the Republic in March 1974.

Since 1977 there have been numerous party and government reshuffles aimed at strengthening the country's economic management and also Ceaușescu's own position. Ilie Verdeț became Chairman of the Council of Ministers in March 1979. A reshuffle of the Communist Party leadership followed the Twelfth Congress in November. In March 1980 the number of First Deputy Chairmen was increased to three, including Ceaușescu's wife, Elena. The Chairman of the State Planning Committee was replaced in March 1981. In September a reorganization of Ministries included the separation of the Ministry of Mining, Oil and Geology into its three components.

Romania joined the CMEA in 1949, and the Warsaw Pact and the United Nations in 1955. Romania has gradually adopted a more independent foreign policy. In 1979 Romania refused to endorse a Warsaw Pact declaration condemning China's policy in South-East Asia. Romania also opposed its Warsaw Pact partners on a plan to increase defence spending. Instead, Ceaușescu has

reduced successive defence budgets to allow for increased expenditure on social welfare. In late 1980 Ceaușescu called for the withdrawal of Soviet troops from Afghanistan. In October 1981 he spoke in favour of multi-lateral nuclear disarmament in Europe.

Government

Under the 1965 Constitution, the supreme organ of state power is the unicameral Grand National Assembly, with 369 members elected by universal adult suffrage for five years. In the elections of March 1980 a total of 593 candidates contested the 369 seats. The Assembly elects from its number the State Council (25 members were elected in 1980) to be its permanent organ. The President of the Republic (an office created in March 1974) is elected by the Assembly for its duration and is also President of the State Council. The Council of Ministers, the highest organ of state administration, is elected by (and responsible to) the Assembly.

Political power is held by the Romanian Communist Party (RCP), the only legal party, which dominates the Front of Socialist Democracy and Unity. The Front presents an approved list of candidates for elections to representative bodies. The Head of State is General Secretary of the RCP and Chairman of the Front. The RCP's highest authority is the Party Congress, convened every five years. The Congress elects a Central Committee which in its turn elects an Executive Political Committee from its members to direct policy. The Executive Committee has a 16-member Permanent Bureau (including the President), which is the Party's most powerful policy-making body.

Romania comprises the municipality of Bucharest and 40 administrative districts, each with a People's Council elected for two and a half years.

Defence

Romania is a member of the Warsaw Pact. Military service is compulsory and lasts for 16 months in the army and air force, and two years in the navy. In July 1981 total regular forces were estimated at 184,500, comprising army 140,000, navy 10,500 and air force 34,000. There were 37,000 para-military forces, including border troops, and a militia of about 900,000. The defence budget for 1981 totalled 10,400 million lei.

Economic Affairs

Formerly based on agriculture, forestry and petroleum, the Romanian economy is now dominated by industry, which by 1980 accounted for about 60 per cent of the national income. All of industry, mines, banks, telecommunications, transport and external trade enterprises have been nationalized. In 1978, however, in an attempt to increase productivity, new measures giving greater flexibility of economic management, through the relaxation of central controls, were introduced.

The most important industries are mainly heavy: petroleum and natural gas, mining and metallurgy, mechanical engineering, chemicals and timber processing. Principal

exports include petroleum products, timber, machinery and equipment, mineral raw materials, metals and chemical products.

Agriculture uses over 60 per cent of the land area and employs about 30 per cent of the working population. A state-financed irrigation plan, to be completed in 1990, aims to increase agricultural production. Cereals and fruit make large contributions to the export trade. Romania is a principal grape-producing country. Other important products are wheat, maize, rye, sunflower seed, sugar beet, potatoes, plums, apples and eggs.

Both the 1966-70 and the 1971-75 Five-Year Plans emphasized expansion of industry in preference to consumption. The 1976-80 Plan was also directed towards greater industrial expansion, priority being given to the chemical and machine-building industries, and the development of foreign trade. Investment increased by 10.9 per cent annually and the volume of foreign trade by 16.5 per cent annually. National income grew at an average annual rate of 7.2 per cent. Real wages rose by 5.2 per cent a year. Net industrial production went up by an average annual rate of 10.1 per cent and gross agricultural output by 4.8 per cent.

The aims of the seventh Five-Year Plan (1981-85) are more modest, in view of the difficulties encountered in fulfilling the targets of the previous Plan. The annual growth of investment is to be restricted to 5 per cent. National income should increase by over 7 per cent a year. Industrial production is expected to rise by an annual rate of 7.6 per cent and agricultural production by 5 per cent. Imports are to be severely curtailed in an effort to reduce Romania's foreign debt, which was stated to total U.S. \$6,000 million at January 1981. A return to self-sufficiency in energy by 1990 is envisaged. In 1980 imports of fuel, mineral raw materials and metals represented over 50 per cent of total imports (compared with 32.8 per cent in 1975).

Reforms in the exchange rate system and in the price structure are being implemented. In 1981 President Ceauşescu announced that agriculture, particularly the private sector, was to take priority over continued rapid industrialization, in an attempt to improve the food supply situation, which by October had deteriorated to such an extent that the rationing of bread was necessary.

Although the Soviet Union is still its biggest trade partner, Romania has developed commercial relations with non-CMEA countries, having agreements with France, the United Kingdom, the U.S.A., the Federal Republic of Germany, Italy, and also the People's Republic of China and Japan. Trade exchanges with the developing countries accounted for about a third of foreign trade by 1980. Over 40 per cent of Romania's trade was with socialist countries in 1980. Romania became a contracting party to the General Agreement on Tariffs and Trade (GATT) in 1971, and joined the International Monetary Fund and the World Bank in 1972. In 1979 Romania became the first CMEA member to negotiate independently with the EEC, and a trade agreement was signed in July 1980.

Transport and Communications

There are over 11,000 km. of State railways and 73,361 kilometres of national roads, of which 32,764 kilometres have been modernized. The state airlines, TAROM and LAR, provide daily flights between the capital and chief towns, and international services to Europe, America, Africa and Asia. Navigation on the Danube is open to shipping of all nations. Work on the Danube-Black Sea Canal project has begun. The joint Romanian-Yugoslav Iron Gates power and navigation system on the Danube was completed in 1972. The chief ports are Constanţa (on the Black Sea), Galaţi, Brăila and Giurgiu (on the Danube).

Social Welfare

Romania has a comprehensive state insurance scheme, premiums being paid by enterprises and institutions employing the wage-earners. There were 208,213 hospital beds and 39,791 physicians in 1980. In addition, funds are allotted to sickness benefits, children's allowances, pensions, and the provision of health resorts.

Education

Children under the age of 6 may attend crèches (*creşe*), and kindergartens (*grădiniţe de copii*). Between the ages of 6 and 16 years children must attend the general educational school (*şcoală de bază de cultură generală de zece ani*). The general secondary school (*liceul*), for which there is an entrance examination, provides a specialized education suitable for entering college or university. There are also specialized secondary schools, where the emphasis is on industrial, agricultural and teacher training, and art schools, which correspond to secondary schools but cover several years of general education. Vocational secondary schools (*şcoli profesionale de ucenici*) train pupils for a particular career. There are 134 higher educational institutes in Romania, including seven universities and five technological universities.

Tourism

The Carpathian mountains, the Danube delta and the Black Sea resorts (Mamaia, Eforie, Mangalia and others) are the principal attractions. Tourism is promoted by the National Travel Office (ONT). About 6.7 million foreign tourists visited Romania in 1980.

Public Holidays

1982: May 1st (International Labour Day), May 9th (Independence Day), August 23rd (National Day), December 30th (Republic Day).

1983: January 1st (New Year's Day), January 24th (Union Day).

THE CONSTITUTION

(Adopted in August 1965, amended in March 1974)

Summary

The Socialist Republic of Romania

Romania is a socialist republic. It is a sovereign, independent and unitary state of the working people of towns and villages. People's power is based on the worker-peasant alliance. The leading political force of the whole of society is the Romanian Communist Party. The people exercises power through the Grand National Assembly and the People's Councils, bodies elected by universal, equal, direct and secret vote. The national economy of Romania is a socialist economy, based on socialist ownership of the means of production. Work is a duty of honour for each citizen. Foreign trade is a state monopoly. Romania maintains and develops relations of friendship and fraternal collaboration with the socialist countries. The foreign relations of Romania are based on the principles of respect for national sovereignty and independence, equal rights and mutual advantage, and non-interference in internal affairs. The capital of Romania is the municipality of Bucharest.

Basic Rights and Duties of the Citizens

The citizens of Romania, irrespective of nationality, race, sex or religion, are guaranteed equal rights. Citizens have the right to work and the right to leisure; the right to material security in case of old age, sickness or incapacity to work; and the right to free education. Women have equal rights with men. Citizens have the right to elect and to be elected to the Grand National Assembly and the People's Councils. All citizens who have reached the age of 18 years have the right to vote. Citizens who have reached the age of 23 years can be elected as deputies to the Grand National Assembly and to the People's Councils. The right to nominate candidates shall be vested in the Socialist Unity Front. Citizens have the right to associate themselves in trade unions, in co-operative, youth, women's and other public organizations. Citizens are guaranteed freedom of speech, of the press, of assembly, of meeting and demonstration, and freedom of conscience. Other provisions include the guarantee of the inviolability of the person and of the home, and the right to personal property. Military service is compulsory.

Supreme Bodies of State Power

THE GRAND NATIONAL ASSEMBLY

The Grand National Assembly, the Supreme body of state power, is the sole legislative body. Its powers include the election and recall of the President of the Republic, the State Council, the Council of Ministers, the Supreme Court and the Procurator General, and the control of their activity. The Grand National Assembly is elected for a term of five years. It elects the Bureau of the Grand National Assembly, formed of the Chairman of the Grand National Assembly and four Vice-Chairmen. Ordinary sessions of the Grand National Assembly are convened twice a year.

THE STATE COUNCIL

The State Council is the Supreme body of state power with permanent activity; it is subordinated to the Grand National Assembly. In the intervals between the sessions of the Grand National Assembly, it exercises certain functions of the Assembly. The State Council is elected by the Grand National Assembly from among its members.

The President of the Republic is President of the State Council. The State Council consists of a President, Vice-Presidents and members.

THE PRESIDENT OF THE

SOCIALIST REPUBLIC OF ROMANIA

The President is head of state, Supreme Commander of the armed forces and Chairman of the Defence Council. He presides over the State Council, and over the meetings of the Council of Ministers when necessary. He appoints and recalls, on the proposal of the Chairman of the Council of Ministers, the Vice-Chairmen of the Council of Ministers, the ministers and chairmen of other central bodies of state administration. The President is responsible to the Grand National Assembly.

Central Bodies of State Administration

The Council of Ministers is the supreme body of state administration and is elected by the Grand National Assembly. The Council of Ministers consists of the Chairman of the Council of Ministers, the Vice-Chairmen of the Council of Ministers and ministers, as well as heads of other central bodies of state administration.

Local Bodies of State Power and Local Bodies of State Administration

The People's Councils are the local bodies of state power and consist of deputies elected by the constituencies. The mandate of the People's Council is of five years. The Executive Committee of the People's Council is the local body of state administration, and is elected by the People's Council from among its deputies. The Executive Committee of the People's Council consists of a Chairman, Vice-Chairmen, of whom one can be First Vice-Chairman, and other members.

Judicial Organs

The law is administered by the Supreme Court, district courts, county courts and by military courts. The courts defend the socialist system and try civil, penal and any other cases in their competence. The Supreme Court is elected by and responsible to the Grand National Assembly. Cases in the first instance at the county courts, district courts and military courts are tried with the participation of people's jurors.

Organs of the Procurator's Office

The Procurator's Office exercises the supervision of the work of the organs of penal prosecution and execution. It is headed by the Procurator General, who is elected by and responsible to the Grand National Assembly.

Insignia of the Socialist Republic of Romania

The emblem of Romania represents wooded mountains over which the sun is rising. In the left part of the emblem there is an oil derrick. The emblem is surrounded by a wreath of wheat ears, and surmounted by a five-pointed star. At the base of the emblem the sheaves are bound with a tricolour ribbon bearing the words "Republica Socialistă România". The flag of Romania bears the colours red, yellow and blue, placed vertically, with the blue stripe next to the flagstaff. The emblem of Romania is placed in the centre.

JUDICIAL SYSTEM

SUPREME COURT

Chairman: IOAN SĂLĂJAN.

There is one Supreme Court, whose main functions are: to exercise general control over the judicial activity of all courts, by passing judgment on certain appeals and by studying judicial practices; to issue rulings to ensure uniform application of the law; to exercise original jurisdiction in certain cases. The members of the Supreme Court are professional magistrates elected by the Grand National Assembly.

COUNTY COURTS AND LOCAL COURTS

There are 40 county courts and the municipal court of Bucharest (with the status of county court). In every county there are two or three local courts subordinate to the county courts, and in Bucharest there are seven sectional courts. The county courts are mainly appeal courts, and local courts are courts of first instance. The panel of

judges consists of professional magistrates and, under certain circumstances, of people's jurors.

MILITARY COURTS

Court Martial does not exist. Military courts judge contraventions of the law by servicemen and, in certain circumstances, by civilians. The panel of judges consists of professional magistrates and, under certain circumstances, of people's jurors.

ORGANS OF THE PUBLIC PROCURATOR'S OFFICE

Procurator-General: NICOLAE POPOVICI.

The organs of the Public Procurator's office are: the Procurator-General's office and the county, local and military procurators' offices. The Public Procurator's office supervises the work of the organs of penal prosecution. The Procurator-General is appointed by the Grand National Assembly and is responsible to it. Between Assembly sessions he is responsible to the State Council.

RELIGION

According to Article 30 of the Constitution, religious groups are organized and carry on their activities on an autonomous basis, regulated by law. There are fourteen sects and denominations, 85 per cent of believers belonging to the Romanian Orthodox Church.

ROMANIAN ORTHODOX CHURCH

The Romanian Orthodox Church is the major religious organization in Romania and is organized as an autocephalous patriarchate, being led by the Holy Synod, headed by Patriarch Justin. The Patriarchate consists of 5 metropolitanates, 2 archbishoprics and 6 bishoprics.

Patriarch, Metropolitan of Oungro-Wallachia and Archbishop of Bucharest: Dr. JUSTIN MOISESCU.

Metropolitan of Moldavia and Suceava and Archbishop of Iași: THEOTIST ARĂPAȘU (resident in Iași).

Metropolitan of Ardeal and Archbishop of Sibiu: (vacant) (resident in Sibiu).

Metropolitan of Oltenia and Archbishop of Craiova: NESTOR VORNICESCU (resident in Craiova).

Metropolitan of Banat and Archbishop of Timișoara and Caransebeș: Dr. NICOLAE CORNEANU (resident in Timișoara).

Archbishop of Tomis and Lower Danube: Dr. ANTIM NICA (resident in Galați).

Archbishop of Vad, Feleac and Cluj-Napoca: TEOFIL HERINEANU (resident in Cluj-Napoca).

ROMAN CATHOLIC CHURCH

The Roman Catholic Church has approximately 1,300,000 adherents, mostly of Magyar (Hungarian) and German nationalities and chiefly in Transylvania. It is organized in two dioceses.

Archbishop of Bucharest-Iași: Mgr. FRANCISC AUGUSTIN; Str. Nuferilor 19, Bucharest.

Bishop of Alba-Iulia: ANTAL JAKAB; Str. Mihai Viteazul 21, Alba-Iulia (Raionul Alba).

REFORMED CHURCH

The Reformed (Calvinist) Church has two bishoprics and approximately 700,000 members, mostly of Magyar (Hungarian) nationality.

Cluj-Napoca: Bishop GYULA NAGY.

Oradea: Bishop LASZLÓ PAPP.

EVANGELICAL CHURCHES

The Evangelical Church of the Augsburg Confession, founded in the 16th century, comprises some 150,000 members, mainly of German nationality.

Bishop of Sibiu: ALBERT KLEIN; 2400 Sibiu, Str. General Magheru 4.

The Synodo-Presbyterian Evangelical Church comprises about 32,000 members of Magyar nationality.

Superintendent: PAUL SZEDRESSY (resident in Cluj Napoca).

UNITARIAN CHURCH

The Unitarian Church has about 80,600 members of Magyar nationality.

Bishop: LAJOS KOVÁCS; Bd. Lenin 9, 3400 Cluj-Napoca.

Other sects are: Baptist, Pentecostal, Seventh-day Adventist, Armenian-Gregorian, Ancient Rite, Gospel.

MUSLIM COMMUNITY

The Muslim Community comprises some 40,000 members of Turkish-Tatar nationality.

Central Mosque, Constanța; Grand Mufti YACUB MEHMET.

JEWISH COMMUNITY

There are about 34,000 Jews in Romania, half of them in Bucharest. The central body is the Federation of Jewish Communities.

Chief Rabbi: Dr. MOZES ROSEN; Bucharest, Str. SF. Vineri 9-II.

THE PRESS

The Romanian press is highly regionalized, with newspapers and periodicals appearing in all of the administrative districts (as listed below). In 1979 there were 491 newspapers and magazines with a total circulation of 1,521 million copies annually. Fifty-two newspapers and periodicals are published in the languages of co-inhabiting nationalities in Romania, including Hungarian, German, Serbian, Ukrainian, Armenian, Greek and Yiddish. The most influential publications are the Party organs, the most important of which is *Scinteia*.

SAN MARINO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of San Marino is situated in central Italy on the slopes of Mount Titano in the Apennines. San Marino has warm summers and dry, cold winters. The language is Italian. Most of the population is Roman Catholic. The national flag (proportions 4 by 3) has two equal horizontal stripes of white and light blue. The state flag has, in addition, the national coat of arms in the centre. The capital is San Marino.

History

The Republic was founded as a city-state in A.D. 301. A Convention of friendship with Italy was first signed on March 22nd, 1862. It was renewed in March 1939 and revised in September 1971. San Marino has evolved a multi-party political system, the parties paralleling those in Italy.

From 1945 to 1957 San Marino was ruled by a coalition of Communists and Socialists. Defections from the Communist Party in 1957 led to a bloodless revolution, after which a coalition of Christian Democrats and Social Democrats came to power.

This coalition survived until January 1973 when a split between the two parties over economic policy led to the resignation of the Government. In March 1973 a new Government was formed by an alliance between the Christian Democrats and the Socialists. The Socialists withdrew from the coalition in November 1975, bringing down the Government. The Captains-Regent took over the administration until March 1976, when a new Christian Democrat/Socialist Government was formed. This coalition collapsed in late 1977 but continued to govern in a caretaker capacity until a new administration was formed. Attempts by the Communist Party to form a government were frustrated by the lack of a clear majority in the Great and General Council.

Eventually the Council agreed to a dissolution and elections were held in May 1978, when the Christian Democrats gained one seat. However, they were still unable to form an administration and the three left-wing parties, who held 31 seats out of 60, agreed to form a government led by the Communist Party. San Marino thus reverted to the left-wing administration of 20 years before and became the only Western European country with a Communist-led government. Signora Maria Lea Pedini Angelini was elected as the first female Captain-Regent for the term April-September 1981.

Government

San Marino is divided into nine "Castles" corresponding to the original parishes of the Republic. Each "Castle" is governed by a Castle-Captain and an Auxiliary Council, both holding office for one year.

Legislative power is vested in the unicameral Great and General Council, with 60 members elected by universal adult suffrage for five years (subject to dissolution). Women have had the right to vote since 1960, and to stand for election to the Council since 1973. The Council elects

two of its members (one representing the capital, one the rest of the country) to act jointly as Captains-Regent (*Capitani Reggenti*), with the functions of Head of State and Government, for six months at a time (ending in March and September). Executive power is held by the Congress of State, with 10 members elected by the Council for the duration of its term. The Congress, presided over by the Captains-Regent, has three Secretaries of State and seven Deputies.

Economic Affairs

Agriculture and dairy farming are the traditional bases of the economy. Principal exports are wine, woollen goods, furniture, ceramics and building stone quarried in Mount Titano. San Marino postage stamps, sold to collectors, also constitute a source of income from abroad. In addition some income is derived from an agreement not to sell tobacco, salt or matches which are not Italian-made or subject to Italian taxation. In recent years there has been increased development of light industry, including the manufacture of cement, synthetic rubber, leather and textile products. Tourism is the major source of revenue.

Transport

San Marino is connected with Borgo Maggiore on the Adriatic coast, about 1.5 km. away, by funicular from the capital, San Marino. There is also a bus service, and a new highway down to the coast at Rimini, about 12 km. away. There are no frontier or customs formalities.

Tourism

The mild climate attracts many visitors to San Marino each year. The contrasting scenery and the well-preserved medieval architecture, together with the various sporting facilities available, are also attractions.

SPAIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Spain, in south-west Europe, forms more than four-fifths of the Iberian peninsula. The country also includes the Balearic Islands in the Mediterranean Sea, the Canary Islands in the Atlantic Ocean and a few small enclaves in Morocco. Mainland Spain is bounded to the north by France and to the west by Portugal. To the east is the Mediterranean and, 30 km. to the south, Morocco. The climate is less temperate than in most of western Europe, with hot summers and, in the hilly interior, cold winters. The language is Castilian Spanish. Catalan is widely spoken in the north-east, Basque in the north and Galician in the north-west. The overwhelming majority of the population are Roman Catholics but the 1978 constitution laid down that Spain had no official state religion. The national flag (proportions 3 by 2) carries three horizontal bands of red, yellow (half the depth) and red. The state flag carries, in addition, the national coat of arms. The capital is Madrid.

Recent History

After winning the civil war of 1936-39 the Nationalist forces, led by Gen. Francisco Franco y Bahamonde, established an authoritarian rule which provided peace and stability while restricting individual liberties and severely repressing challenges to its power. In 1942 Gen. Franco revived the legislative *Cortes*, with limited powers. After keeping Spain neutral in the Second World War, Gen. Franco announced in 1947 that the monarchy (abolished in 1931) would be restored after his death or retirement.

In 1969 Gen. Franco nominated Prince Juan Carlos de Borbón as his successor, and in June 1973 relinquished the post of President of the Council of Ministers to Admiral Luis Carrero Blanco, who was killed in December: responsibility for the assassination was claimed by ETA, the Basque separatist organization. Carlos Arias Navarro became Prime Minister in January 1974 and promised reforms which, with increased press freedom, the weakening of General Franco's health and the effect of the coup in Portugal in April, led to intense left-wing political activity. Terrorism increased in the Basque provinces, where ETA supporters clashed with the police and right-wing extremists.

General Franco died in November 1975 and was succeeded as Head of State by King Juan Carlos. In December a more liberal Council of Ministers was formed, but left-wing discontent continued when the expected full amnesty for political prisoners was not granted. In 1976 bills were passed lifting restrictions on political meetings and allowing political associations, but the slow progress of the reforms resulted in widespread demonstrations. In July Arias Navarro resigned at the King's request and was replaced by Adolfo Suárez González. The introduction of democratic government proceeded rapidly. Political reforms, including the establishment of an elected bi-cameral parliament, were endorsed by the *Cortes* in November, approved by popular referendum in December and incorporated in the Electoral Law of March 1977. In

February the legalization process for political associations was amended and in April the *Movimiento Nacional*, the only political organization permitted under Franco, was disbanded. These measures enabled most of the numerous *de facto* political parties to take part in the general elections for the *Cortes* held in June. An overall majority was won by the Union of the Democratic Centre (UCD), a coalition party headed by the Prime Minister. The Socialist and regional parties gained almost as many seats.

The *Cortes* was inaugurated in July and began work on a new constitution. There was close co-operation between the Government and Opposition Socialist and Communist parties. The right to strike was accorded in March 1977 and trade unions were legalized in April. By February 1979 limited provisional regional self-government had been granted to Catalonia, Valencia, the Canary Islands, Aragon, Galicia, the Basque provinces (*Euzkadi*) and Andalusia.

In October 1978 the new constitution was approved by both Houses of the *Cortes*, although eight Basque nationalist (PNV) deputies abstained, in protest against the refusal by the *Cortes* to include specific provisions in recognition of the special status of Basque historic rights. In December the constitution was endorsed by referendum and ratified by the King. It confirmed Spain as a parliamentary monarchy, with freedom for political parties, and it recognized and guaranteed the right of Spain's "nationalities and regions" to autonomy. All the "fundamental laws" of the Franco regime were repealed and the Roman Catholic Church was disestablished.

General elections were held in March 1979, resulting in little change in the distribution of seats in the *Cortes* although there was stronger support for the regionalist parties. The new Government was again headed by Adolfo Suárez. Local elections took place a month later, when the UCD won control over 75 per cent of the municipalities, although 20 large cities, including Madrid and Barcelona, passed into left-wing or nationalist hands. Following the continued campaign of terrorism by ETA in 1979, the Basque and Catalan statutes of autonomy (based on those of 1936 and 1932) were approved by referendum in October. Basque and Catalan parliaments were elected in March 1980 and, in both, the regional nationalist moderate parties gained the greatest number of seats. The central Government had, meanwhile, revised its regional policy to slow the process of devolution, so that full powers of home rule were not to be granted until 1985. In October, however, strong protests from Andalusia resulted in the Government's bringing forward the date for autonomy.

Confidence in Suárez diminished after the UCD's defeat in the regional elections and between May and September Suárez reshuffled the Cabinet twice, survived a vote of censure brought by the Socialist Party and narrowly won a vote of confidence in September. In January 1981, as a result of growing opposition from right-wing factions within the UCD, Suárez unexpectedly resigned. The Deputy Prime Minister, Leopoldo Calvo Sotelo, was nominated to succeed him.

In February, however, a group of armed Civil Guards, led by Lt.-Col. Antonio Tejero, stormed into the *Cortes*, taking hostage 350 Deputies. The military commander of Valencia, Gen. Jaime Milans del Bosch, declared a state of emergency in that region and sent tanks on to the streets of Valencia. King Juan Carlos acted swiftly to secure the loyalty of other military commanders, and by the following morning had been able to persuade Gen. Milans del Bosch himself to stand down. Lt.-Col. Tejero surrendered, and the Deputies were released unharmed. Several senior military leaders were subsequently detained, and by mid-1981 over 30 officers had been indicted.

Immediately after the attempted coup, Calvo Sotelo formed a new Council of Ministers, resisting pressure to establish a coalition government. The new Prime Minister faced highly contentious issues in 1981. The toxic cooking oil scandal, which by the end of the year had claimed over 200 lives, brought accusations of incompetence and calls for the resignation of the Minister for Health. The passing of the controversial divorce law highlighted the divisions within the UCD, and ultimately led to the resignation of the Minister for Justice. Calvo Sotelo's proposal for membership of NATO also met with fierce opposition but was approved by the Lower House in October. A ministerial reshuffle took place in December.

The violence in the Basque region did not abate in 1981. In June the Basque Government was granted the right to collect taxes. Catalonia won control over its savings bank resources. The electorates of Galicia and of Andalusia approved statutes for autonomy in December 1980 and October 1981 respectively. At the election for the 71-member Galician parliament, held in October 1981, the *Alianza Popular* won 26 seats, two more than the UCD.

Government

Under the Constitution approved in 1978, Spain is a hereditary monarchy, with the King as Head of State. He appoints the President of the Government (Prime Minister) and, on the latter's recommendation, other members of the Council of Ministers. Legislation is initiated for discussion in the *Cortes* (Parliament), in the Assemblies of the Autonomous Communities, or by popular petition. The King's actions in State affairs must receive the prior approval of the *Cortes*, to which the Government is responsible.

Legislative power is vested in the *Cortes Generales*, comprising two Houses, each elected by direct universal adult suffrage for four years (subject to dissolution). The Congress of Deputies has 350 members, elected by proportional representation, and the Senate has 208 members, including 188 for continental Spain (four for each of the 47 provinces), five for the Balearic Islands, 11 for the Canary Islands (two provinces) and two each for the African enclaves of Ceuta and Melilla. A party can gain representation only if it obtains at least 3 per cent of the votes.

Spain comprises 50 provinces, each with its own Council (*Diputación Provincial*) and Civil Governor.

In October 1979 the statutes of the Basque and Catalan Autonomous Communities were approved by referendum, and those of Galicia and Andalusia in December 1980 and October 1981 respectively. The Basque Country is governed by the *Consejo General del País Vasco* and Catalonia by the *Generalitat*. The Galician Parliament was elected in October 1981.

Defence

Military service is compulsory in Spain and lasts for 15 months. Exemption may be granted on family, medical and other grounds and in 1980 legislation relating to conscientious objection was initiated. Total strength of the armed forces was 342,000 in July 1981: army 255,000, navy 49,000 (including 10,600 marines), and air force 38,000. The para-military *Guardia Civil* numbered 64,000 and the *Policía Armada* 40,000. A new defence agreement, to replace that of 1970, was signed by Spain and the U.S.A. in 1976, providing for the U.S.A.'s continued use of its one naval and three air bases in Spain for a further five years. The arrangement was extended in September 1981, pending a further agreement. Spanish entry into NATO was approved by the Lower House in October 1981. The 1981 defence budget was 337,460 million pesetas.

Economic Affairs

Spain has traditionally been an agricultural country, its main products being cereals, vegetables and citrus fruits. By 1980, however, the proportion of the working population engaged in agriculture had dropped to 17.2 per cent from 26 per cent in 1970. The contribution of agriculture to G.D.P. in 1980 was 7.3 per cent (compared with 11.3 per cent in 1970), while that of industry was 35.8 per cent. The motor, chemical, machine tool and shipbuilding industries grew rapidly in the 1960s, but in recent years shipbuilding has been severely affected by the world recession, and the industry is undergoing a rationalization process. The steel, textile and domestic appliance industries have also declined, and plans for their restructuring are being implemented. The growth rate of the industrial sector dropped from 1 per cent in 1979 to 0.3 per cent in 1980. New investment, particularly by Nissan (Japan) and General Motors (U.S.A.), was expected to help Spain become a major car producer, manufacturing 1.75 million units in 1985. By 1980 the car industry was the country's largest employer, and Spain had become the world's seventh largest producer of cars. In 1981, however, output began to fall. The chemical sector continues to expand due to heavy public and private investment.

The long-standing trade deficit has usually been offset by invisible earnings from tourism, remittances from workers abroad and capital inflows, but since 1978 there have been fewer tourists. The balance of payments current account surplus of 1979 was followed by a deficit of U.S. \$5,000 million in 1980, largely owing to the greatly increased cost of petroleum imports (upon which Spain is heavily dependent). The value of the peseta against other currencies fell by 12.4 per cent in 1980, and this depreciation continued in 1981.

The wages pact signed in June 1981 by trade unions, employers' organizations and the Government limited private sector pay increases to between 9 and 11 per cent until December 1982, in return for a government commitment to create 350,000 jobs. Since 1979 the annual rate of inflation has remained at just over 15 per cent. The unemployment rate has risen steadily since the mid-1970s, and stood at 11.6 per cent of the workforce in September 1981. G.D.P. growth fell to 0.8 per cent in 1979, but rose to 1.7 per cent in 1980. The prolonged drought of 1981 was expected to hamper economic growth.

In the Government's new economic policy proposed in September 1980, existing investment programmes, es-

SPAIN

pecially in the steel, shipbuilding, textile and mining industries, were to receive further encouragement, while capital investment in the public sector was to be increased, primarily in public works and low-cost housing to create more jobs. Andalusia and Extremadura were to receive a 5,500 million peseta government credit to combat poverty and unemployment which was running at a regional level of 25 per cent. The draft 1982 budget reflected a continuation of this policy. Government expenditure was to increase by 26 per cent over 1981, and capital investment was to rise by 24.8 per cent. Priority sectors are energy, housing and transport.

Full negotiations for Spain's entry to the European Communities began in September 1979 but completion is not expected until the mid-1980s. Spain became a member of ECLA in 1979.

Transport and Communications

In 1980 Spain had 13,542 kilometres of wide-gauge railways, of which 5,473 kilometres were electrified. At the end of 1980 Spain had 237,904 kilometres of roads, including 2,008 kilometres of motorway. Iberia, the Spanish national airline, maintains external and internal services. Over 20 airports receive international flights.

Social Welfare

National Insurance is compulsory for all employed or self-employed Spaniards. The National Insurance Scheme covers temporary incapacity to work, accident insurance, assistance to dependants, permanent incapacity, widows' pensions, old-age pensions and unemployment. Contributions are paid by the employer (29.15 per cent of the employee's income), the employee (5.5 per cent) and the State (9.15 per cent).

Education

General basic education is compulsory and free from the ages of 6 to 14. For those students who do not go on to secondary education, first-grade vocational training is obligatory from 15 to 16 years of age.

Secondary education lasts three years from 14 to 16 years of age and leads to the *Bachiller*. In 1978 the study

Introductory Survey, Statistical Survey

of the Catalan language was made compulsory in primary and secondary schools in Catalonia. University education is preceded by an orientation course and in 1975-76 university entrance examination became obligatory.

There are 20 state universities, one open university, three polytechnics in Madrid, Barcelona and Valencia, two independent universities in Bilbao and Pamplona, autonomous universities in Madrid and Barcelona and eight technical universities. The degree course leads to a *Licenciatura* and lasts five years; the doctorate is usually a two-year course by examination and thesis. Higher Technical Studies in engineering and architecture are followed at *Escuelas Técnicas de Grado Medio* and *Escuelas Técnicas de Grado Superior*.

Tourism

Tourism makes an important contribution to the country's economy. In 1979, and again in 1980, the number of visitors failed to reach the 1978 record of 40 million. Receipts from tourism totalled U.S. \$7,200 million in 1980.

Public Holidays

FINANCE

100 céntimos = 1 Spanish peseta.

Coins: 10 and 50 céntimos; 1, 2½, 5, 25, 50 and 100 pesetas.

Notes: 100, 500, 1,000 and 5,000 pesetas.

Exchange rates (October 1981): £1 sterling = 176.30 pesetas; U.S. \$1 = 94.15 pesetas.

1,000 Spanish pesetas = £5.67 = \$10.62.

Note: From November 1967 to August 1971 the central exchange rate was U.S. \$1 = 70.00 pesetas. Between December 1971 and February 1973 the rate was \$1 = 64.474 pesetas. In terms of sterling, the central rate between July 1959 and June 1972 was £1 = 168.00 pesetas. In February 1973 a new exchange rate of \$1 = 58.026 pesetas was established but since January 1974 the peseta has been allowed to "float". The average market rate (pesetas per \$) was: 58.260 in 1973; 57.687 in 1974; 57.407 in 1975; 66.903 in 1976; 75.962 in 1977; 76.668 in 1978; 67.125 in 1979; 71.702 in 1980.

THE CONSTITUTION

The Constitution of the Kingdom of Spain was approved by popular referendum on December 6th, 1978, and promulgated on December 29th, 1978.

According to the final provisions, all the fundamental laws of the Franco regime are repealed, together with all measures incompatible with the Constitution.

The following is a summary of the main provisions:

PRELIMINARY PROVISIONS

Spain is established as a social and democratic State whose supreme values are freedom, justice, equality and political pluralism. National sovereignty and power reside with the Spanish people, the political form of the State being a parliamentary Monarchy.

The Constitution is based on the indissoluble unity of the Spanish nation, and recognizes and guarantees the right to autonomy of the nationalities and regions.

FUNDAMENTAL RIGHTS, DUTIES AND FREEDOMS

Standards concerning fundamental rights and freedoms recognized in the Constitution are to be interpreted in accordance with the Universal Declaration of Human Rights and other international treaties and agreements of a similar nature ratified by Spain.

All Spaniards are equal under the law and no Spaniard by birth may be deprived of his nationality. The age of majority is 18, suffrage is free and universal and every person has a right to public service.

The main freedoms listed are described below, bearing in mind that the Constitution contains the proviso that no person, group or action pose a threat to public order and safety. Free entry to and exit from Spain, freedom of thought, belief and expression are guaranteed, as is the right of access to State and public communications media by significant social and political groups and to administrative archives and registers by individuals, except in matters concerning State security and defence, and the private life and home of the individual, which are inviolable.

The Constitution states that there is no State religion but that it will maintain co-operation with the Roman Catholic Church and other religious groups.

Freedom of association is guaranteed, except for criminal, para-military and secret associations, all associations being bound to inscribe themselves in a public register; the right to form trade unions and to strike is also guaranteed, military personnel being subject to special laws in these cases.

Every person has a right to work for a just remuneration, including paid holiday, under conditions of safety, hygiene and a healthy environment. The State is to be run on the principles of a market economy. Taxation is determined according to means and consumer protection is encouraged by the State. Social security payments are provided for and it is stipulated that special care be taken of the handicapped and the elderly.

In criminal matters, the death penalty is abolished except under military criminal law in time of war. Extra-judicial functions on the principle of reciprocity but the terms do not apply to political crimes; acts of terrorism are however, not being considered as such. All persons are presumed innocent before trial, and a *habeas corpus* clause provides for a detainee to be freed within 72 hours of arrest or brought before a court.

THE CROWN

The King is the Head of State, the symbol of its unity and permanence, and the highest representative of the Spanish State in international relations. The person of the King is inviolable. His decisions and acts must be approved by the Government, without which they are deemed invalid, and responsibility for the King's actions is borne by those who approve them. The Crown is hereditary, descending to the sons of the Sovereign in order of seniority or, if there are no sons, to the daughters. Persons marrying against the wishes of the King or *Cortes* (Parliament) are excluded from the succession. The Constitution lays down the procedure for establishing a Regency.

The King's duties are as follows:

To approve and promulgate laws;

To convene and dissolve the *Cortes Generales* and to call elections and referendums (according to the Constitution);

To propose a candidate for the presidency of the *Cortes* and dismiss him;

To appoint the members of the *Cortes* on the proposal of the President;

To issue decrees approved by the Council of Ministers, and to confer civil and military posts and grant honours and distinctions in accordance with the laws;

To be informed of the affairs of State, and to preside over the Council of Ministers when he deems it necessary on the request of the President of the Government;

To command the Armed Forces;

To grant mercy according to the law (which may not authorize general pardons);

To accredit ambassadors and other diplomatic representatives;

To express the State's assent to bind itself to international treaties;

To declare war and peace on the prior authorization of the *Cortes*.

THE CORTES GENERALES (Parliament)

The *Cortes* represents the Spanish people and is formed by the Congress of Deputies (Lower House) and the Senate (Upper House).

The Congress has a minimum of 300 deputies and a maximum of 400, elected by universal, free, equal, direct and secret suffrage. Each province forms one constituency, the number of deputies in each one being determined according to population and elected by proportional representation for four years, Ceuta and Melilla having one deputy each. Elections must be held between 30 and 60 days after the end of each parliamentary mandate, and Congress convened within 25 days of the elections.

The Senate is based on territorial representation. Each province elects four senators for four years. Each island or group of islands forms one constituency. *Gran Canaria*, *Mallorca* and *Tenerife* return three senators each, the others one each. The Autonomous Communities return, in addition, one senator, plus one more for each million inhabitants, appointed by the legislative assembly of the Community.

Each House lays down its own rules of procedure and elects its own president and governing body. Each year there are two ordinary sessions of Parliament, of four and five months each, and a standing committee of 21 members in each House looks after affairs while Parliament is in recess or during electoral periods. Plenary sessions are

normally public. Measures are adopted by a majority in both Houses providing that a majority of the members is present. If agreement is not reached between the Congress and the Senate, a joint committee must attempt to solve the differences by drawing up a text to be voted on again by both Houses. In the case of further non-agreement, the issue is decided by an absolute majority vote in Congress. Members may not vote by proxy.

LEGISLATION

Laws may not be retroactive.

Organic laws concern the development of fundamental rights and public freedoms, the approval of statutes of autonomy, the general electoral system, and other matters specified in the Constitution. Any approval, modification or repeal of these laws requires an absolute majority in Congress. The *Cortes* may delegate the power to issue measures called Legislative Decrees with the status of law to a governmental legislative body. In urgent cases the Government may issue provisional measures in the form of Decree-Laws not affecting the fundamental laws and rights of the nation, which must be voted upon by the *Cortes* within 30 days.

All laws must be sanctioned by the King within 15 days of their approval by the *Cortes*.

Provision is made for the popular presentation of bills if they are supported by 500,000 reputable signatures. Petitions to the *Cortes* by public demonstration are prohibited.

THE GOVERNMENT

The Government is the executive power and is composed of a President proposed by the King on the *Cortes'* approval and voted into office by Congress by absolute majority. If no President is elected within two months, the King will dissolve the *Cortes* and convene new elections with the President of Congress's approval. The President of the Government designates the Ministers.

The Council of State is the supreme consultative organ of the Government. (An Organic law will regulate its composition.)

Further articles provide for the procedure for declaring a state of alarm, emergency or siege.

THE JUDICIARY

Justice derives from the people and is administered in the name of the King by judges and magistrates subject only to the law. The principle of jurisdictional unity is the basis of the organization and functioning of the Courts, which are established in an Organic Law of judicial power. Emergency courts are prohibited.

The Judiciary is governed by the General Council of Judicial Power, presided over by the President of the Supreme Court and made up of 20 members appointed by the King for five years, of whom 12 are judges or magistrates, four are nominated by Congress and four by the Senate, these eight being elected by a three-fifths majority from lawyers and jurists of more than 15 years' professional service.

The Attorney-General is appointed by the King on the Government's approval. Citizens may act on juries.

TERRITORIAL ORGANIZATION

The State is organized into municipalities, provinces and Autonomous Communities, all of which have local autonomy. The Constitution states that the differences between the Statutes of the Autonomous Communities shall not imply economic or social privileges.

THE AUTONOMOUS COMMUNITIES

The peripheral provinces, with their own historical, cultural and economic characteristics, are entitled to accede to self-government, but the Constitution states that in no case will the federation of the Autonomous Communities be permitted.

Article 148 lists the matters in which the Communities may assume competence, among which are: land use and building, public works and transport, ports, agriculture, environment, minerals, economic development, culture, tourism, social aid, health and local policing, all within the framework of national laws and policy and as long as nothing outside the regional boundaries is involved. Areas solely under State control are listed in article 149. In the specific case of financial autonomy, revenue proceeds from the State and from each Autonomous Community's own taxes, and a State Compensation Fund acts to correct any imbalances between the Communities. State competence will always prevail over regional competence should conflict arise over matters not under the exclusive control of the Autonomous Communities.

Although the State will delegate State powers wherever possible, legislative measures must always be guided by State law. The State, in the general public interest, may pass laws by absolute majority to establish the principles for the harmonization of measures taken by the Autonomous Communities, even concerning matters directly under their authority.

The institutional organization of the Communities is based on a Legislative Assembly elected by universal suffrage and proportional representation, a Governing Council with executive and administrative functions, and a President elected by the Assembly from its members and appointed by the King to be the supreme representative of the Community to the State, and the ordinary representative of the State in the Community, and finally a High Court of Justice, inferior only to the Supreme Court.

THE CONSTITUTIONAL COURT

This Court monitors observance of the Constitution and comprises 12 members appointed by the King, of whom four are elected by Congress and four by the Senate by three-fifths majority, two on the proposal of the Government and two on the proposal of the General Council of Judicial Power. The members must satisfy the conditions for membership of the aforesaid Council. They are appointed for nine years, with three members resigning every three years.

Three further articles establish the procedure for constitutional reform.

POLITICAL PARTIES

Until 1974 there was only one legally constituted political organization, the **Movimiento Nacional** (National Movement), based on the **Falange Española Tradicionalista y de las Juntas de Ofensiva Nacional-Sindicalistas**.

A law providing for the recognition of political associations came into force in January 1975, which specified that a political association would be recognized only if it had over 25,000 members representing over 15 provinces.

In June 1976 the Cortes approved a bill on political associations which meant that all associations permitted under the 1974 legislation (see above) could operate immediately under the new law. Spaniards over the age of 18 could form associations and the Ministry of the Interior

would register or reject the formation of an association within two months of application. Associations would in future be responsible to ordinary tribunals under the auspices of the Supreme Court. They would be forbidden to receive funds from abroad. The Penal Code was approved in July 1976 and it specifically prohibited those parties which "obeyed orders from abroad" and were "aimed at establishing a totalitarian regime".

In February 1977 Decree-Law 12/77 specified that a political association should receive recognition within ten days of submitting its statutes to the Ministry of the Interior, or that the application should be referred to the Supreme Court for a ruling within thirty days. The Natio-

SPAIN

JUDICIAL SYSTEM

Tribunal Supremo (Supreme Court of Justice): Palacio de Justicia, Plaza de la Ville de Paris 1, Madrid; is composed of six tribunals, each with its president and its respective judges; Pres. ANGEL ESCUDERO DEL CORRAL; Attorney-Gen. JUAN MANUEL FANJUL SEDENO; Sec. ISIDRO ALMONACID HERNÁNDEZ.

First Court (Civil): President and twelve judges; Pres. JULIO CALVILLO MARTÍNEZ.

Second Court (Criminal): Ten judges; Pres. FERNANDO DÍAZ PALOS.

Third Court (Litigation): Ten judges; Pres. FRANCISCO PERA VERDAGUER.

Fourth Court (Litigation): Ten judges; Pres. PEDRO MARTÍN DE HIJAS MUÑOZ.

Fifth Court (Legal Administration): Ten judges; Pres. LUIS VACAS MEDINA.

Sixth Court (Social and Labour Questions): Ten judges; Pres. RAFAEL JIMENO GAMARRA.

Audiencia Nacional (National High Court): Established in 1977 to supplement the functions of the *Tribunal Supremo* and *Audiencias Territoriales*; consists of a Tribunal for Criminal Matters, and one for Legal Administration, each with its president and respective judges; deals primarily with crimes associated with a modern industrial society; three Central Courts of Proceedings are attached; Pres. RAFAEL MENDIZABAL ALLENDE.

Audiencia Territorial (Territorial High Courts): There are fifteen Territorial Courts in the capitals of the fifteen districts into which the country is divided for the administration of justice. These courts are located in Madrid, Albacete, Barcelona, Burgos, Cáceres, Coruña, Granada, Oviedo, Palma de Mallorca, Las Palmas, Pamplona, Sevilla, Valencia, Valladolid, Zaragoza. They deal with civil and criminal cases and litigation. Pres. of the *Audiencia Territorial* of Madrid, ACISCLO FERNÁNDEZ CARRIEDO.

Audiencia Provincial (Provincial High Courts): There are fifty provincial courts, fifteen of which constitute *Salas* (Tribunals) of the corresponding *Audiencias Territoriales* and the remaining thirty-five are located in the capitals of provinces in which there is no *Audiencia Territorial*, the area of their jurisdiction corresponding to that of the provincial boundary. They deal mainly with criminal cases but since September 1968 they have also dealt with some civil cases.

Juzgados de Primera Instancia e Instrucción (Courts of Primary Jurisdiction and Proceedings): Policy is now to separate the civil and criminal jurisdiction of these courts. In Madrid there are 19 Courts of Primary Jurisdiction and 22 Courts of Proceedings and in Barcelona there are 11 and 14 respectively.

Juzgados Municipales (Municipal Courts): administer justice in localities with a population of up to 30,000 inhabitants. They have civil and criminal jurisdiction. There are thirty-three of these courts in Madrid and twenty-four in Barcelona.

Juzgados Comarcales y de Paz (Regional Courts and Justices): administer justice in less important cases in districts where the courts mentioned above do not function. Justices are freely appointed and do not belong to the legal profession.

Consejo Superior de Protección de Menores (Higher Council for the Protection of Juveniles): A Commission of the Council forms a Court of Appeal against the judgments of the Provincial Juvenile Courts. The Commission is composed of a president, a vice-president, two permanent members, two substitutes, and a secretary, all of whom must be trained in the law; Pres. GUSTAVO LESCURE MARTÍN.

Juzgados de Peligrosidad y Rehabilitación Social (Social Danger and Rehabilitation Courts): These courts have been established in Madrid, Barcelona, Burgos, Málaga, Palma de Mallorca, Valencia, Sevilla, Valladolid and Algeciras.

RELIGION

The population of Spain is overwhelmingly Roman Catholic, and there are some 61,000 churches, with about 500 persons in each parish. In 1976 there were 34,415,600 Roman Catholics in Spain.

Opus Dei (see International Organizations, p. 342) plays an important role in Spanish society.

THE PRESS

Freedom of thought, belief and expression are guaranteed in the 1978 Constitution, as is the right to receive and disseminate true information, provided that, in the exercise of these rights, the laws regulating professional secrecy are observed and that personal privacy and honour are respected. The Constitution also states that these rights may not be restricted by pre-censorship.

In 1979 all journalists were required to have a diploma from one of three universities offering courses in journalism. These are the State universities in Madrid and Barcelona and the independent university of Navarre run by the *Opus Dei*.

The Government closed six newspapers, *Solidaridad Nacional* (Barcelona), *La Prensa* (Barcelona), *El Pueblo Gallego* (Vigo), *Libertad* (Valladolid), *Arriba* (Madrid) and *Amanecer* (Madrid), and the news agency *PYRESA* in 1979 while the future of the remaining newspapers under State control was being discussed. The news agency EFE is more or less State-controlled but it does not in any way monopolize the distribution of news abroad.

There are no truly national newspapers although some, such as *ABC*, *Ya*, *El País* and *El Imparcial*, may readily be obtained outside the region in which they are published. Since 1978 there has been a marked decline in the local press and an increase in the importance of the regional press. The largest newspapers are *ABC* of Madrid and *La Vanguardia* of Barcelona whose circulation reaches 290,000 and 270,000 respectively for the Sunday editions.

No newspapers are published on Monday except the *Hojas del Lunes*. These are published by the Press Associations which exist only in towns where there are one or more dailies. The Press Associations are old-established institutions (dating back to the nineteenth century) to which all active journalists belong.

FINANCE

There are a large number of savings banks (*cajas de ahorro*) in Spain, accounting in 1979 for just over a third of all deposits in the banking system, in which a widespread consolidation process is currently taking place. In 1981 there were over 100 private and commercial banks operating.

Following the collapse of several small banks in 1978, the Corporación Bancaria was established by the Bank of Spain and private banks to take over and administer banks which find themselves in difficulties.

In the Valencian region the Banco de Promoción de Negocios (Promobanc), Banco de la Exportación, Banco de Alicante, and the Caja de Ahorros de Valencia have agreed to set up a joint banking corporation, to be known as the Corporación Financiera del País Valenciano S.A., with capital distributed equally among the four. The Corporation will also have an option on 30 per cent of the equity in each of the banks concerned.

In 1978 a decree-law was passed to permit the free establishment in Spain of subsidiaries, branches or representative offices by foreign banks for the first time since the civil war.

TRADE UNIONS

In April 1977 Law 19/77, amplified by Royal Decree 873/77, established the right of workers to form professional associations to safeguard their interests. Legalization is accorded twenty days after the lodging of statutes at the Public Office, provided no Supreme Court ruling to the contrary has occurred in the interim.

Royal Decree-Law 31/77 of June 1977 provided for the adaptation or cessation of the former syndicates in which both employers and workers were represented.

The following represent some of the more important trade unions, many of which have long been established as *de facto* organizations:

Confederación Sindical de Comisiones Obreras—CC.OO (*Workers' Commissions*): Atocha 90-1°, Madrid 1; f. 1956; linked with the PCE; 1,605,000 mems.; Sec.-Gen. MARCELINO CAMACHO ABAD.

TRANSPORT

RAILWAYS

R.E.N.F.E. (Red Nacional de los Ferrocarriles Españoles) (*National System of Spanish Railways*): Avda. Pío XII s/n (Chamartín), Madrid 16; Pres. ALEJANDRO REBOLLO ALVÁREZ-AMANDI; Gen. Man. EMILIO MAGDALENA CARREÑO; 13,542 km. (1980) of wide-gauge track of which 5,473 km. are electrified, and 2,271 km. double-track; passengers carried (1980): 167.2 million; goods loaded (1980): 36.5 million metric tons net.

Plans are in hand for the construction of a standard-gauge railway line linking Madrid with Barcelona and the French frontier. The estimated cost of the project (which was to be completed in 1980) is 40,000 million pesetas. At present, a variable-axle train that can adjust from the broader Spanish gauge to the narrower European one enables passengers to travel direct to Paris and Geneva.

In the 1982-84 period 322,249 million pesetas are to be invested in the railway system. A further 2,587 km. will be electrified, and 2,376 km. of double-track line will be constructed.

Ferrocarriles de Vía Estrecha (F.E.V.E.): General Rodrigo 6, 2°, Madrid 3; f. 1965; result of integration of 14 companies; Pres. FRANCISCO JAVIER SAGÜES MARTÍNEZ DE AZAGRA; Dir.-Gen. JORGE FANLO NICOLAS; 1,602.1 km. (1981) of narrow-gauge track of

which 188.9 km. (1981) are electrified; passengers carried (1980): 38 million; goods loaded (1980): 4.7 million metric tons net.

There are 384 km. (1980) of narrow-gauge railway under local government and 179 km. (1980) under private control.

There are underground systems in Madrid and Barcelona, and systems are planned for Bilbao, Seville and Valencia.

ROADS

Total road length at December 31st, 1980, was 237,904 km., including 2,008 km. of motorway. Tolls are levied on 1,071.1 km.

Motorways under construction include the Autopista del Mediterráneo, running from the French border to Alicante, the first stage of which was completed in 1976, the Bilbao-Behovia motorway and the Seville-Cádiz motorway.

SWEDEN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Sweden lies in north-west Europe, occupying half the Scandinavian peninsula. It is bordered by Finland to the north-east and Norway to the north-west and west. The Baltic Sea and the Gulf of Bothnia are to the east, the Skagerrak and Kattegat to the south-west. Winters are cold and summers mild. In Stockholm the mean summer temperature is 17°C (62°F) and the mean winter temperature -3°C (27°F). The national language is Swedish, but there are Finnish and Lapp minorities retaining their own languages. The predominant faith is Lutheran Protestantism. The national flag (proportions 8 by 5) is light blue with a yellow cross, the upright of the cross being to the left of centre. The capital is Stockholm.

Recent History

Although taking an active part in promoting international co-operation, Sweden refuses to join organizations such as the EEC which might compromise its neutrality. In 1946 Sweden joined the United Nations, to which it has since given considerable financial and military support. Sweden was also a founder member of the Council of Europe in 1949 and of the Nordic Council in 1952.

From 1932 until 1976, except for a short break in 1936, Sweden was governed by the Social Democratic Labour Party, either alone or as senior coalition partner, and a highly advanced social welfare system was developed. However, correspondingly high taxes caused growing dissatisfaction. A minority Social Democrat Government led by Olof Palme, Prime Minister since October 1969, was defeated in the September 1976 election. A centre-right coalition was formed in October, with the Centre Party leader, Thorbjörn Fälldin, as Prime Minister. However, faced with Sweden's mounting economic problems, the Government was obliged substantially to pursue Social Democratic policies.

Serious controversy over the wish of the Centre Party to abandon Sweden's nuclear power programme erupted in June 1978 when an independent commission recommended that nuclear power continue to be utilized as an energy source. This view was endorsed by the Liberal and Moderate Parties, and their rejection of a proposal by Mr. Fälldin to put the nuclear issue to a national referendum resulted in the resignation of the Government in October 1978. The Liberal Party, although holding only 39 seats in Parliament, was able to form a minority Government, led by Ola Ullsten, and a referendum on the future of nuclear power was held in March 1980. By a narrow majority, the electorate approved a limited programme of nuclear reactor development, to be phased out as and when alternative energy resources are developed.

Following general elections in September 1979, Fälldin returned as Prime Minister of a tripartite Centre, Moderate and Liberal coalition with an overall Parliamentary majority of only one seat. During 1980 the Government's economic policies came under heavy pressure, which included major industrial disputes in May and Fälldin's narrow survival of a Parliamentary vote of confidence in October. Disagreement with proposed tax reforms led to

the Moderate Party leaving the coalition in May 1981, but Fälldin was able to form a new minority government with continued Liberal support. The coalition's economic policies, particularly in relation to social welfare expenditure, were strongly opposed by the Social Democrats, and their full implementation before general elections due in September 1982 remains conjectural.

Government

The Kingdom of Sweden is a constitutional monarchy. The hereditary Monarch is Head of State but has very limited formal prerogatives. Executive power rests with the Cabinet (*Regeringen*) which is responsible to Parliament (*Riksdag*). The unicameral *Riksdag* was introduced in January 1971. It has 349 members elected by universal adult suffrage for three years, using proportional representation. The Prime Minister is nominated by the Speaker of the *Riksdag* and later confirmed in office by the whole House. The country is divided into 24 counties.

Defence

In July 1981 Sweden maintained total armed forces of 64,300, including 47,200 conscripts, and had a total mobilization strength of 800,000. The army consisted of 44,500 men, of whom 36,000 were conscripts; the navy 10,000 men, including 6,600 conscripts, and the air force 9,800 men including 4,600 conscripts. In addition there were voluntary defence reservists totalling 500,000. The 1981/82 budget for defence was 17,981 million kronor.

Economic Affairs

About 6 per cent of the working population are in agriculture, forestry and fisheries. Agriculture is concentrated in the southern region, the chief products being oats, wheat, rye, barley, potatoes and dairy produce. Nearly all the livestock and crop production is consumed in Sweden. Over half the country is covered by forests, providing raw materials for the paper and rayon industries.

Sweden is rich in mineral resources, which include approximately 15 per cent of total known world deposits of uranium. There are large deposits of iron ore, which provide the basis of domestic heavy industry and a continuing supply to the industrial market in Western Europe. Although its output has been declining since the mid-1970s, Sweden accounts for some 10 per cent of world iron ore production.

In 1980 about 25 per cent of the working population were employed in manufacturing industry, of which the largest branches are metalworking and engineering. Industrial products include machinery, vehicles, electronics, telecommunications, and shipping. Many of Sweden's state-owned businesses are controlled by *Statsföretag*, a state holding company.

In March 1976 Sweden and Norway agreed to co-ordinate their petroleum industries. A bill passed in May envisaged increasing the number of nuclear plants in Sweden from six to 13, which would be producing 50 per cent of the country's energy requirements by 1985. In April 1980, authorization was given for the fuelling of the ninth and tenth of these reactors. The future scope of

this expansion was limited to 12 reactors by the nuclear referendum held in March 1980, but it is expected that Sweden's dependence on petroleum will be reduced from 70 per cent to 40 per cent by 1990.

The krona was devalued for the third time in a year in August 1977, bringing its cumulative depreciation to 15 per cent over the preceding twelve months and forcing Sweden to leave the European joint currency float (the "snake"). The devaluation was designed to restore the competitive value of Swedish industry and to reduce the balance of payments deficit. The krona again came under pressure in late 1979, partly because of Sweden's low level of interest rates. These were raised to more competitive levels, but high industrial costs and increasing levels of foreign borrowing finally led to a 10 per cent devaluation in September 1981.

Sweden, which sells more than 50 per cent of its industrial output abroad, entered 1978 with all its main industries—shipbuilding, iron ore, pulp and paper and steel—suffering from overcapacity in world markets. By June 1978 some measure of short-term recovery had been achieved, and this revival was maintained in 1979. Measures including a national wage settlement restricting pay rises were taken, but the impact of rising inflation led in May 1980 to trade union demands for wage increases of 11.3 per cent, which in turn precipitated the most serious industrial strife in Sweden's history. Following government intervention, the unions accepted average wage rises of 7 per cent, although inflation was reported to be running at over 13 per cent. In September the Fälldin Government increased VAT by 2.9 per cent to 23.46 per cent, the highest rate of any country in Europe. In moves to stimulate economic growth and calm labour unrest, the Government reduced this rate to 20 per cent in October 1981 and froze prices until the end of the year, while concluding a two-year national wage agreement restricting rises to 13 per cent. Personal tax reductions were also promised for 1983. Public spending cuts of 12,000 million kronor, equivalent to over 2 per cent of G.D.P., were made in the 1982/83 budget. The effective restraint of industrial costs without creating unemployment remains a fundamental problem, and Sweden is expected to remain at least partially reliant on foreign borrowing in the short term if full employment and the comprehensive system of social benefits are to be maintained.

Transport and Communications

Sweden has an excellent railway system. Of the 11,377 km. (1980) of nationalized railways, about 7,000 km. are electrified. Swedish State Railways operate ferry services to Denmark and the German Democratic Republic. Roads extend for 129,066 km. (1979). The ocean-going fleet had a total displacement of 6,508,000 gross tons at June 30th,

1978. The Swedish airline, AB Aerotransport, owns a three-sevenths share in the Scandinavian consortium SAS (Scandinavian Airlines System).

Social Welfare

There is a highly advanced system of social security schemes covering old age and family pensions, sickness, unemployment and disability benefits based on a National Pension Fund. Expenditure on the social services absorbs a considerable part of the national income, and the welfare system has been under government review since 1976.

Sweden has been developing detailed planning for the development of medical services comprising hospitals and health centres for ambulatory care. There is a very high ratio of hospital beds to population—about 16.4 per 1,000 inhabitants.

Education

Basic education, which is compulsory, extends for ten years, starting at the age of 7, and is received at the comprehensive school (*grundskolan*). At the end of this period, the pupil may enter the integrated upper secondary school. In the integrated school there are 22 programmes of 2–4 years' duration and also special vocational courses of varying lengths of time. There are 13 state universities, several state owned professional schools and institutes on university level and one semi-private business school.

Tourism

Sweden offers a variety of landscape from the mountains of the Midnight Sun north of the Arctic Circle to the white sand beaches of the south. There are many lakes and forests. Stockholm, a beautifully situated capital, is famous for modern architecture. Income from visitors in 1980 totalled 4,070 million kronor.

Public Holidays

1982: April 9th (Good Friday), April 12th (Easter Monday), May 1st (May Day), May 20th (Ascension Day), May 31st (Whit Monday), June 26th (Midsummer), November 6th (for All Souls' Day), December 25th, 26th (Christmas).

1983: January 1st (New Year's Day), January 6th (Epiphany).

100 kronor=£9.76=\$18.28.

Note: Between September 1949 and August 1971 the par value of the Swedish krona was 19.33 U.S. cents (U.S. \$1=5.173 kronor). From December 1971 to February 1973 the central exchange rate was \$1=4.813 kronor (1 krona=20.78 U.S. cents). In terms of sterling, the exchange rate was £1=12.416 kronor from November 1967 to August 1971; and £1=12.541 kronor from December 1971 to June 1972. Since March 1973 the krona has been allowed to "float", although until August 1977 it was part of the European joint currency float (the "snake"). Since August 1977 the krona's value has been linked to a "basket" of 15 currencies of the country's principal trading partners. The average exchange rate (kronor per U.S. dollar) was: 4.3673 in 1973; 4.4394 in 1974; 4.1522 in 1975; 4.3559 in 1976; 4.4816 in 1977; 4.5185 in 1978; 4.2871 in 1979; 4.2296 in 1980.

THE CONSTITUTION

The Swedish constitution dating from 1809 was based on four fundamental laws: the Instrument of Government, the Act of Succession, the Freedom of the Press Act and the Riksdag Act. Following partial reforms in 1968 and 1969, a new Instrument of Government and a new Riksdag Act were adopted in 1973 and 1974, and the revised constitution came into force in January 1975. Government commissions then considered further changes. The principles behind these extensive reforms are described in the Instrument of Government:

All public power in Sweden emanates from the people. The Swedish democracy is founded on freedom of opinion and on universal and equal suffrage and shall be realized through a representative and parliamentary polity and through local self-government. Public power shall be exercised under the laws.

THE RIKSDAG

The Riksdag is described in the Instrument of Government as the prime representative of the Swedish people. It enacts laws, decides the amount and use of taxation and examines the government's actions. The Riksdag at present contains 349 members, elected for three years. Previously, Riksdag members had the right of unlimited speaking time, but the number and length of speeches a member may deliver in a debate may now be restricted.

THE COMMITTEE SYSTEM

In accordance with tradition the work of the Swedish Riksdag is, to a great extent, carried on in a non-partisan atmosphere. This is largely the result of the thorough attention given to all questions by numerous standing committees elected on a basis of proportional representation. Besides the *Utrikesnämnden* (Advisory Council on Foreign Affairs) and Special Committees, every Riksdag appoints from within the assembly a Constitution Committee, a Finance Committee, a Taxation Committee and at least 12 other committees. At the moment there are 16 standing committees, each with 15 members: Constitution (*Konstitutionsutskottet*), Finance (*Finansutskottet*), Taxation (*Skatteutskottet*), Administration of Justice (*Justitieutskottet*), Laws (*Lagsutskottet*), Foreign Affairs (*Utrikesutskottet*), Defence (*Försvarsutskottet*), Social Insurance (*Socialförsäkringsutskottet*), Social Welfare (*Socialutskottet*), Cultural Affairs (*Kulturutskottet*), Education (*Utbildningsutskottet*), Communications (*Trafikutskottet*), Agriculture (*Jordbruksutskottet*), Economic Affairs (*Näringsutskottet*), Home Affairs (*Arbetsmarknadsutskottet*) and Local Government (*Civilutskottet*).

The Constitution Committee has to examine the minutes of the Cabinet and to deal with or to initiate proposals concerning alterations of the fundamental laws and of laws regulating local government.

THE GOVERNMENT

Under the Instrument of Government, the Cabinet governs Sweden and is responsible to the Riksdag. Sweden's parliamentary system of government has been written into the constitution only since 1968-69. The constitution of 1975 formalized the position of the Monarch relative to Cabinet and Parliament, and laid down rules on the selection and resignation of the Cabinet. In 1978 the Riksdag amended the constitutional law of succession to allow the first-born royal child, whether male or female, to be heir to the throne, with effect from 1980.

As head of state, the King has representative and ceremonial duties only. The King does not participate in the government of the country, which is conducted rather by the Cabinet at meetings not attended by the King. Decisions of government do not require the King's signature, and it is the Speaker of the Riksdag, and not the King, who leads the procedure resulting in the formation of a new Government. Following consultations within the Riksdag, the Speaker nominates a candidate for Prime Minister. If not more than half of the total number of members of the Riksdag vote against the proposed candidate, he is approved. Failing this approval the procedure has to be repeated. After four unsuccessful attempts to secure Riksdag approval of a candidate for the premiership, a new election to the Riksdag must be held within three months. A candidate for the premiership approved by the Riksdag nominates the other members of the Government himself.

The Prime Minister can be dismissed at his own request, by the Speaker of the Riksdag, or in the event of a vote of no confidence in the Riksdag. Other ministers can be dismissed at their own request, by the Prime Minister or by a vote of no confidence. If the Prime Minister should resign or die, all of the ministers in his Cabinet must resign. A Cabinet which is due to resign shall, however, remain in power until a new Prime Minister has been appointed.

A demand for a vote of no confidence will be considered only if it is supported by 10 per cent of the members of the Riksdag. A vote of no confidence requires the support of more than half of the Riksdag members. If the Riksdag decides upon a vote of no confidence the Cabinet can avoid resigning if it calls for an extra general election within one week. The Riksdag may continue its business, or be summoned to convene, even after a decision has been made to hold new elections. A Riksdag session may, however, be terminated by a special decision of the Government. Existing terms of office do not expire until the new terms of office have begun.

LOCAL GOVERNMENT

In Sweden, local government, following a now traditional evolution of de-centralization, is exceedingly important, and it is estimated that municipalities are responsible for about 40 per cent of public administration. However, interaction between local and national government is of fundamental importance to the development and management of the country. For these reasons local government elections have a strong element of national politics, and the turnout for local elections is as large as for general elections.

ELECTORAL SYSTEM

In order that local and national government terms of office should coincide, the Constitution calls for local and general elections to be held on the same day. In both cases the term of office for the elected candidate is three years. Proportional representation was introduced in Sweden between the years 1906 and 1909, universal and equal suffrage by 1921. The voting age is 18. In allocating the 349 seats in the Riksdag the seats are divided into two groups. The first group of 310 "constituency seats" is distributed among the constituencies according to the number of eligible voters, and within each constituency among the parties. The remaining 39 seats are distributed as "adjustment seats". First, it is calculated how many seats each party would have obtained if the whole country had been treated as a single constituency and if the

SWEDEN

The Constitution, The Government, Legislature, Political Parties

distribution of seats had taken place according to a modified Lague method. From this figure is subtracted the number of "constituency seats" received, the result being the number of "compensatory seats" to be allocated to each party. These seats are filled by candidates nominated in the constituencies. There is a check to the

emergence of small parties in that only parties which have received at least 4 per cent of the total votes cast are entitled to a seat. However, any party which receives 12 per cent or more of the votes in any constituency will be allowed to compete for a permanent seat in that constituency.

JUDICIAL SYSTEM

In Sweden the judiciary and the executive are separate. Judges are appointed by the Government. A judge can be removed by an authority other than a court, but in such an event he may always call for a judicial trial of the decision.

To supervise the courts in administrative matters, there is a central authority, the Domstolsverket, in Jönköping. This authority has no control over the judicial process, in which the court is independent even of the Government.

There are state officers who exercise control over the judiciary as well as the administrative authorities. The *Justitiekansler* (Chancellor of Justice) and the four *Justitieombudsmen* supervise the courts and the general administration including the armed forces. The *Justitiekansler* performs his functions on behalf of the Government. The *Justitieombudsmen* are appointed by and act on behalf of Parliament.

COURTS OF FIRST INSTANCE

Tingsrätt (*District Court*): The Court of First Instance in both civil and criminal cases. In criminal cases the court is composed of a presiding professional judge and five lay judges; in petty cases the court consists of the professional judge only. In civil cases the court is ordinarily composed of three professional judges; however, preparatory sessions are conducted by one professional judge. In family-law cases, e.g. divorce cases and cases concerning the guardianship or the custody of a child, the court is, however, composed of a professional judge and five lay judges. The lay judges are elected for a period of six years. They act as members of the bench and should consequently be distinguished from the jurors of other countries. There are 97 District Courts.

APPELLATE COURTS

Hovrätt (*Court of Appeal*): The Court of Second Instance, consisting of a president, judges of appeal and assessors. The work is apportioned between various divisions, each of which has five or six members. In criminal cases the bench consists of three professional judges and two lay judges (*see above*); in petty and in civil cases there are four professional judges only. There are six Courts of Appeal:

Svea Hovrätt in Stockholm; Pres. S. RUDHOLM.

Göta Hovrätt in Jönköping; Pres. E. ÅQVIST.

Hovrätten över Skåne och Blekinge in Malmö; Pres. T. LANDAHL.

Hovrätten för Västra Sverige in Göteborg; Pres. O. LINDH.

Hovrätten för Nedre Norrland in Sundsvall; Pres. K. E. SKARVALL.

Hovrätten för Övre Norrland in Umeå; Pres. C.-I. SKARSTEDT.

SUPREME COURT

Högsta Domstolen (*Supreme Court of Sweden*): in Stockholm, consisting of 25 members, is the Court of Highest Instance. The Court works in divisions, each of which is duly constituted with five members. Certain cases are

decided by full session of the Court. There are also special divisions with three members, which decide if the Court is to consider a case or not.

Supreme Court Justices: B. V. HULT (Pres. of the Court), K. J. G. GYLLENSVÄRD, N. P. WESTERLUND, S. C. E. T. HESSER, C. V. HOLMBERG, L. S. FREDLUND, O. A. HÖGLUND, L. BRUNDIN, H. N. I. ULVESON, N. O. GREGOW.

SPECIAL COURTS

Special courts exist for certain categories of cases, e.g. *fastighetsdomstolar* (real estate courts) for cases concerning real estate.

ADMINISTRATIVE COURTS

The Swedish system of guarantees of the legality of administrative actions is a mixed one, composed on the one hand of elements common to the system of control of lower agencies by higher agencies and on the other hand of a system of separate administrative courts. The most important administrative courts are:

COUNTY ADMINISTRATIVE COURTS

In each of the 24 administrative districts of the country there is a *Länsrätt* (County Administrative Court). This Court is competent in certain cases under the Child Welfare Act and the Temperance Act that are appealed from administrative bodies, e.g. cases concerning detention. It also handles cases concerning compulsory transfer of a child from a custodian to another and cases concerning withdrawal of driving licences. The Court also hears cases concerning taxation. The bench consists of a professional judge and three or four lay judges.

ADMINISTRATIVE COURTS OF APPEAL

All decisions by the County Administrative Courts may be appealed to *Kammarrätt* (Administrative Courts of Appeal) consisting of a president, judges of appeal and assessors. These courts also handle cases that are appealed from administrative bodies concerning the salary of public servants, social welfare, etc. The courts work in divisions, each of which has five members. The bench consists of at least three and not more than four judges. In certain cases there are, however, three professional judges and two lay judges (*see above*). There are four Administrative Courts of Appeal:

Kammarrätten i Stockholm: Pres. H. MONTGOMERY.

Kammarrätten i Göteborg: Pres. N. WENTZ.

Kammarrätten i Sundsvall: Pres. B. ORRHEDE.

Kammarrätten i Jönköping: Pres. B. HOLMBERG.

SUPREME ADMINISTRATIVE COURT

Regeringsrätten (Supreme Administrative Court of Sweden) in Stockholm, consisting of 23 members, is the Court of Highest Instance in Administrative cases. The composition of the Court is governed by rules very similar to those that apply to the Supreme Court (see above).

Supreme Administrative Court Justices:

President of the Court: K. H. B. WIESLANDER

THE OMBUDSMEN

For many years, Sweden's "Chancellor of Justice" officially protected the citizen from undue interference, negligence or errors caused by government officials. Furthermore, the ordinance of 1766 proclaimed that all documents from which government officials make their decisions were to be made public. By the beginning of the 19th century, however, the Chancellor of Justice was considered not sufficiently independent of the Government, and in 1809 the post of *Justitieombudsman* was created to supervise the manner in which judges, government officials and other civil servants observe the laws, and to prosecute those who act illegally, misuse their position or neglect their duties. The Ombudsman is allowed access to all documents and information and has the right to be present at the considerations of the courts and other authorities. Government ministers in Sweden are not subject to supervision by the Ombudsman. In 1941 the term of office was extended from one to four years. At present there are four Ombudsmen.

Ombudsmen: PER-ERIK NILSSON, ANDERS WIGELIUS, SIGVARD HOLSTAD, TOR SVERNE.

RELIGION

CHURCH OF SWEDEN

Svenska Kyrkan (*Church of Sweden*): Of the Evangelical Lutheran Faith. The State controls its property, and the King must profess the pure evangelical creed. About 95 per cent of the population are members. The Church consists of 13 dioceses, 2,570 parishes which are united into 1,145 rectors' districts (pastorates), and 179 rural deaneries. The number of active clergy is 3,340 (including missionaries in the mission fields). The administrative authority of the diocese is the chapter, the president of which is the Bishop. Since 1164 the Archbishop of Uppsala has been head of the Church. The relations between the Church of Sweden and other religious denominations are regulated by the Act of Religious Freedom, 1951; publs. *Vår Kyrka*, *Svensk Kyrkotidning*, *Svensk Pastoraltidskrift* (all weekly).

THE PRESS

Press freedom in Sweden dates from the law of 1766. The 1949 Freedom of the Press Act, a fundamental law embodying the whole of the press legislation in the Constitution guarantees the Press's right to print and disseminate ideas; protects those supplying information by forbidding editors to disclose sources under any circumstances; authorizes all public documents to be publicly available, official secrets being the only exception; and contains provision for defamation. Press offences are to be referred to common law; and all cases against the Press must be heard by jury.

In 1916 the *Pressens Opinionsnämnd* or Press Council

was founded. Lacking judicial status, it has powers to rehabilitate persons wronged by the Press who refuse to apply to courts of law. Its judgments are widely published and highly respected.

In 1969 the office of Press Ombudsman was established to supervise adherence to ethical standards. Public complaints shall be directed to the Press Ombudsman, who is also entitled to act on his own initiative. He may dismiss a complaint if unfounded, or if the newspaper agrees to publish a retraction or rectification acceptable to the complainant. In clear-cut cases of minor importance, he may issue an *ex officio* criticism of the newspaper. When he

finds that the grievance is of a more serious nature, he will file a complaint with the Press Council, which will then publish a statement acquitting or censuring the newspaper. The findings of the Council are published in the newspaper concerned.

Since 1969 the Swedish Parliament has granted the newspapers several forms of press support. For the budget year 1981/82 the sum of the grants amounted to 337 million kronor.

The Press serves as a major medium for political discussion, and the Conservative and Socialist press each enjoy over 20 per cent of daily circulation and the Liberal over 40 per cent. Many papers are directly owned or run by political parties or by the trade unions, which give financial support through the intermediary of the Trade Union Confederation to some 25 Socialist dailies. Though these papers are party organs, in close contact with the party, each editor expresses a considerable measure of independence. The Trade Union Confederation owns *Aftonbladet*. Affiliated trade unions publish some 20 periodical organs, with 1.6 million total circulation, including the popular *Metallarbetaren*.

Among the major dailies, *Svenska Dagbladet* is owned by an independent foundation, and *Göteborgs-Posten* by its editor. One of the main publishers is the Bonnier group which stems from Albert Bonnier's publishing house for books. This group also owns, among a number of enterprises in the paper and printing field, Semic/Åhlén & Åkerlund, whose magazines enjoy 35 per cent of the total circulation of periodicals. Bonniers is also the majority shareholder in the popular *Dagens Nyheter* and its associated evening paper *Expressen*. Five other companies account for a further 65 per cent of Sweden's magazine circulation.

The dominating influence of the few major dailies is largely confined to Stockholm, the provinces having a strong Press of their own.

The major dailies are: *Expressen*, *Dagens Nyheter*, *Aftonbladet*, *Svenska Dagbladet* (all Stockholm), *Göteborgs-Posten*, *Göteborgs-Tidningen* (Göteborg), *Sydsvenska Dagbladet*, *Kvällsposten*, *Arbetet* (Malmö). The most popular weekly periodicals include the family magazine *Året Runt* and the home and household magazine *ICA-Kuriren*. *Vi* caters for serious cultural and political discussion and *Bonniers Litterära Magasin* specializes in literary topics.

SWITZERLAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Swiss Confederation lies in central Europe, bounded to the north by the Federal Republic of Germany, to the east by Austria, to the south by Italy and to the west by France. The climate is generally temperate, but varies considerably with altitude, aspect and gradient. In Zürich the average temperature ranges from -1°C in winter to 16°C in summer. There are three official languages—German, French and Italian, spoken by 65, 18 and 12 per cent of the population respectively in 1970. A fourth language, Romansch, is spoken by a very small minority in parts of the canton of Grisons in eastern Switzerland. About 48 per cent of the population are Protestants and 49 per cent Roman Catholic. The Federal flag, which is square, consists of a white upright cross in the centre of a red ground. The capital is Berne.

Recent History

During the Second World War Switzerland's permanent neutrality, recognized in the Treaty of Vienna in 1815, meant that it escaped extensive damage to industry and infrastructure. Although Switzerland has long been the headquarters of many international organizations, it has not yet joined the UN, the World Bank nor the IMF. However, it maintains a Permanent Observer at the UN and has joined the UN specialized non-political agencies. In 1979 the Government announced that a proposal for full membership would be put to the Federal Assembly and to a national referendum by 1983. Switzerland was a founder member of EFTA in 1960 and joined the Council of Europe in 1963. Various agreements have been concluded with the EEC but, as a small, neutral country, Switzerland faces the problem of increasing isolation as European integration progresses.

Since 1959 government posts have been divided between the Social Democrats, the Radical Democrats, the Christian Democrats and the People's Party. This coalition has over four-fifths of the seats in the National Council, and an even larger majority in the Council of States. In the elections of October 1975 it won 169 of the 200 seats in the National Council and retained this majority following the elections of October 1979, when the Social Democrats lost their position as the strongest single party in the National Council, winning the same number of seats as the Radical Democrats.

The restricted powers of the Federal Council cause referenda and initiatives to become the main foci of political debate. In 1978 a new draft constitution for Switzerland was drawn up and was expected to be put to the Federal Assembly in the 1980s and thereafter to a national referendum. In a referendum of March 1980, the Swiss voted to give the Government special powers, without prior recourse to Parliament, to ensure essential supplies in times of international crisis and also to preserve the links between Church and State.

In May 1980 riots broke out among Zürich's youth, as a protest against established Swiss values. The riots

continued at frequent intervals until June 1981, constituting the worst civil disturbances since the 1930s. In April 1981 the Swiss people voted in a national referendum against proposals to improve the circumstances of Switzerland's foreign workers.

Government

The Swiss Confederation, composed of 20 cantons and 6 half-cantons, has a republican federal constitution. Legislative power is held by the bicameral Federal Assembly: a Council of States with 46 members representing the cantons (two for each canton and one for each half-canton), elected for three to four years; and the National Council with 200 members directly elected by universal adult suffrage for four years, using proportional representation. Executive power is held by the Federal Council, which has seven members elected for four years by a joint session of the Federal Assembly. The Assembly also elects one of the Federal Councillors to be President of the Confederation (Head of State) for one year at a time.

National policy is the prerogative of the Federal Government, but considerable power is vested in the cantons. The Swiss citizen shares three distinct allegiances—communal, cantonal and national. Direct participation is very important in communal government, and all adult Swiss residents may take part in the communal assemblies or referenda which decide upon local affairs. Each canton has its own written constitution, government and legislative assembly. The referendum, which can be on a communal, cantonal or national scale, further ensures the possibility of direct public participation in decision-making.

Defence

National defence is based on compulsory military service. Switzerland maintains no standing army except for a small permanent personnel of commissioned and non-commissioned officers primarily concerned with training. Military service consists of 17 weeks' recruit training followed by refresher training of varying lengths according to age. Service totals about one year between the ages of 20 and 50 for a private. Each soldier keeps his equipment in his own home, and receives compulsory marksmanship training between periods of service. The total strength of the armed forces when mobilized is about 625,000. The Confederation belongs to no international defence organizations, and the strategy of the army and air force is defensive. Estimated defence expenditure for 1981 was 3,490 million Swiss francs.

Economic Affairs

Switzerland is one of the world's leading industrial nations. It has no significant natural resources, except water, and has concentrated on diversified industrial production. Swiss precision engineering, especially in clocks and watches, has long been famous and heavy engineering, textiles, chocolate, chemicals and pharmaceuticals are all important export industries. Switzerland is a centre of international banking and also draws considerable revenue from tourism.

In 1979 industry employed 39.6 per cent of the working population, agriculture 7.4 per cent and the services sector 53.0 per cent. Exports of goods and services account for about 34 per cent of G.N.P. and output is closely related to demand from abroad. Industrial production rose by only 1.4 per cent in 1979, but output accelerated in almost all quarters by the end of the year. However, traditional branches of industry, such as watch manufacturing, are now facing severe problems. The number of watches exported fell by 10 per cent in 1978 and by 15 per cent in 1979. In 1980, however, the value of watch exports rose by 8.9 per cent, the highest level since 1974.

As a result of Government measures in 1975 to cut investment and private consumption, the economy recovered from the recession. G.N.P. rose by 3.2 per cent in 1979 and by 4 per cent in 1980, the biggest increase since 1972. The recovery of the dollar in the first half of 1979 depressed the value of the franc, leading to a rise in the rate of inflation, which reached 3.6 per cent in 1979, compared with 1 per cent in 1978. In August 1981 inflation reached 7.4 per cent, causing the National Bank to raise the lending rate to a record level of 6 per cent, in an effort to stabilize prices. This was the fourth increase in the Swiss bank rate since January 1981, when the rate was 3 per cent.

The 1976 trade surplus of 174 million francs was the first surplus Switzerland had achieved for over 20 years. However, in 1977-80 there was again an annual trade deficit, exceeding 11,000 million francs in 1980. In the first seven months of 1981 exports rose by 7.9 per cent, compared with the same period in 1980, while imports rose by only 0.9 per cent. The trade gap therefore narrowed to 511 million francs in July 1981, about half the figure for July 1980. Most Swiss trade is with the EEC, although figures include transit trade of raw materials and semi-finished products from developing countries. In 1979 70 per cent of imports were from the EEC and 50 per cent of Swiss exports went to EEC countries. In 1979 Switzerland signed agreements to further trade with the U.S.S.R. and the People's Republic of China.

The economy has depended on foreign labour: resident aliens, seasonal workers and workers who commute from neighbouring countries. However, in 1975, because of unemployment, restrictions on immigration and on the number of seasonal workers permitted were introduced, although Switzerland still has the highest percentage of foreign workers in Europe. In 1979 they numbered about 650,000, half of whom had residence permits. Unemployment, which reached a peak of 32,000 in February 1976, fell to 4,470 (0.1 per cent of the work force) in June 1981, the lowest level since April 1975.

The Confederation relies for more than half its receipts on indirect taxes, above all on a turnover tax (levied on goods but not on services) and on customs duties (levied on weight rather than value). A government savings programme, which includes increases in turnover tax rates and cantonal income tax rates and cuts in butter and bread subsidies, was approved by referendum in May 1978. However, a Government proposal to introduce V.A.T. was rejected for the second time in a referendum in May 1979. A proposed tax plan, including sales taxes on electricity and fuel, aims at reducing the expected deficit in the national budget by 970 million francs in 1983.

Transport and Communications

The Swiss Federal Railways (2,926 km.) are almost wholly electrified and among the most efficient in the world. The many small private railways chiefly cover short mountain routes. There are more than 18,900 km. of main roads and a comprehensive programme of motorway construction is scheduled to be completed by the late 1980s. In 1978 there was an ocean-going merchant fleet of 30 ships and 427 Rhine barges registered in the port of Basel. Swissair is the national airline and Zürich, Geneva and Basel-Mulhouse are the principal airports.

Social Welfare

Almost all Swiss citizens are insured against illness by the Federal Insurance Law of 1911. This insurance is not yet universally compulsory, but is widely undertaken as there is no national health service. There is compulsory unemployment insurance for all salaried employees, many of whom are also compulsorily insured against professional and non-professional accidents. There is a compulsory system of old-age, widows' and invalids' insurance. The social insurance schemes are under revision.

Education

Education is under cantonal and communal control with the result that there are twenty-six different systems in operation. Education has been compulsory for children between the ages of 7 and 14 years since 1874, and in most cantons a further two years of compulsory education are required. Primary education is from the age of 7 to 13, after which, up to the age of 14 or 16, children attend one of two types of lower secondary school according to ability. About 15 per cent of 16 year-olds go on to a higher secondary school (*Gymnasium/Collège*) and a leaving certificate from one of these is a prerequisite for entry to higher education. About 65 per cent go on to vocational training (trade and technical) for a period of two to three years. There are seven universities, two Federal Institutes of Technology of university standing, a college of economics and social sciences and twelve art and music colleges. Numerous private schools exist and many foreign children receive part of their education in Switzerland.

Tourism

Switzerland's principal attractions are the lakes and lake resorts and the mountains. Walking, mountaineering and winter sports are the chief pastimes. Receipts from tourism were 5,640 million francs in 1979, and overnight stays of visitors from abroad totalled 36 million in 1980.

Public Holidays

1982: April 9th (Good Friday), April 12th (Easter Monday), May 20th (Ascension Day), May 31st (Whit Monday), December 25th (Christmas).

1982: January 1st-2nd (New Year).

In addition, May 1st (Labour Day), August 1st (National Day), and various regional holidays are observed in many parts of Switzerland.

FINANCE

100 Rappen (centimes) = 1 Schweizer Franken (franc suisse) or Swiss franc.

Coins: 1, 2, 5, 10, 20 and 50 centimes; 1, 2 and 5 francs.

Notes: 10, 20, 50, 100, 500 and 1,000 francs.

Exchange rates (October 1981): £1 sterling = 3.51 francs; U.S. \$1 = 1.88 francs.

100 Swiss francs = £28.49 = \$53.26.

Note: Before May 1971 the official exchange rate was U.S. \$1 = 4.373 Swiss francs, though external trade figures were based on the conversion factor of \$1 = 4.297 francs (1 Swiss franc = 23.27 U.S. cents). From December 1971 to January 1973 the central exchange rate was \$1 = 3.84 Swiss francs. In terms of sterling, the official rate was £1 = 10.495 Swiss francs from November 1967 to May 1971; and £1 = 10.006 Swiss francs from December 1971 to June 1972. Since January 1973 the Swiss franc has been allowed to "float". The average exchange rate (Swiss francs per U.S. dollar) was: 3.1665 in 1973; 2.9793 in 1974; 2.5813 in 1975; 2.4996 in 1976; 2.4035 in 1977; 1.7880 in 1978; 1.6627 in 1979; 1.6749 in 1980.

THE CONSTITUTION

(adopted May 29th, 1874)

Switzerland is divided into federated cantons which have sovereign authority except where the constitution defines limits to their powers or accords responsibility to the Federal authority. After a referendum in September 1978 the Constitution was amended to allow for the formation of the canton of Jura, increasing the number of cantons to twenty-three (three of these are sub-divided and they are sometimes collectively referred to as the twenty-six states).

Principally, the Federal authority is responsible for civil, penal and commercial law, legislation concerning marriage, residence and settlement, export and import duties, defence, postal, telephone and telegraph services, the mint, forestry, hunting and fishing, hydro-electric power, the economy, railways, important roads and bridges, social insurance, and international affairs. Administration is largely in the hands of the cantons, and in the combined management of Federal authorities and cantons. The cantons derive their revenue from direct taxation. The Federal authority draws its revenue from direct and indirect taxation, and Federal direct taxes, such as the defence tax, are becoming increasingly important. The profits from Federal enterprises and customs duties are received by the Federal authorities.

THE COMMUNES

Each of the more than 3,000 communes of Switzerland has local autonomy over such matters as public utilities and roads, and grants primary citizenship. Decisions are made by communal assemblies or by communal parliaments (*Gemeindeparlamenten*). The smallest communes have fewer than 20 inhabitants, the largest, Zurich, nearly 370,000.

THE CANTONS

The 26 cantons and half-cantons of the Swiss Confederation each have their own constitutions and their own methods of choosing the members of the cantonal assembly and cantonal government and the States Councillors who represent them at the federal level. Five cantons, Glarus, Appenzell Ausserrhoden and Innerrhoden, Obwalden and Nidwalden, retain the *Lands-gemeinde*, an assembly of all citizens of the canton held annually, as their decision-making authority. Elsewhere, democracy is less direct, the secret ballot and the referendum having replaced the mass assembly.

THE FEDERAL ASSEMBLY

The Federal Assembly is the supreme governing body of the Confederation. It is composed of two bodies, the

National Council and the Council of States, which deliberate separately. The 200 members of the National Council are elected directly, by proportional representation, every four years. The minimum age for voting and eligibility for election in the Confederation is 20 years, but it is lower or higher in certain cantons. In 1974 women gained full political rights at federal level and in almost all the cantons. The Council of States represents the cantons, each of which send two councillors, elected by the people in various ways according to the cantonal constitutions. Both houses have to accept legislative and fiscal measures, and the Federal Assembly supervises the army, the civil service and the application of the law, exercises the right of pardon and elects the Federal Supreme Court, the Federal Insurance Court, the General who commands the army in times of crisis, and the Federal Council.

THE FEDERAL COUNCIL

Executive authority is vested in the Federal Council, whose seven members are each in charge of a Federal Ministry. Each year the Federal Assembly appoints the President and Vice-President of the Confederation from among the Federal Councillors. Generally, the Councillors are chosen from the members of the Federal Assembly for four years after every general election.

REFERENDA AND INITIATIVES

Referenda are held on both cantonal and federal levels. In many cantons all legislation has to be accepted by a majority of the voters, and in some cantons major financial matters have to be submitted to the popular vote. In federal affairs the consent of a majority of the voters and of the cantons must be obtained for amendments to the Federal Constitution, for extraconstitutional emergency legislation and for the decision to join organizations for public safety or international bodies, but referenda are optional for other legislation. A petition from 50,000 voters is needed to bring about a national referendum, which can accept or reject any legislation which has been passed by Parliament. The initiative gives voters in many cantons the right to propose a constitutional or legislative amendment and to demand a popular vote on it. A petition by 100,000 voters is needed to initiate a vote on an amendment to the Federal Constitution, but as federal laws cannot be proposed by means of an initiative, some constitutional amendments introduced in this manner concern relatively unimportant matters and participation of the voters is, on average, 40 to 45 per cent. The initiative is also used by the political opposition to bring about changes in government policy.

JUDICIAL SYSTEM

Switzerland has possessed a common Civil Code since 1912, but the Penal Code was only unified in 1942. Under the Code capital punishment was abolished by the few Cantons which still retained it. The individual Cantons continue to elect and maintain their own magistracy, and retain certain variations in procedure. The Canton of Zürich, for example, has justices of the peace (*Friedensrichter*—normally one for each commune), District Courts (*Bezirksgerichte*), Labour Courts (*Arbeitsgerichte*), Courts for Tenancy Matters, an Appeal Court (*Obergericht*) with various specialized benches, a Cassation Court (*Kassationsgericht*), and, for the more important cases under penal law, a Jury Court (*Geschworenengericht*). Apart from military courts, there are only two Federal judicial authorities, the Federal Tribunal and the Federal Tribunal of Insurance.

THE FEDERAL TRIBUNAL

1000 Lausanne 14.

President: ROLANDO FORNI.

Vice-President: OTTO KONSTANTIN KAUFMANN.

The Federal Tribunal (*Bundesgericht, Tribunal fédéral, or Tribunale Federale*) consisting, in all, of 28 members, sits at Lausanne. There are 15 supplementary judges. Both judges and supplementary judges are appointed by the Federal Assembly for six years and may be re-elected. The President and Vice-President are elected for two years.

In matters of Federal Law, the Tribunal decides non-financial civil cases and financial civil cases involving more than 8,000 frs. value. It gives final decisions on civil matters if both parties apply to it rather than to the cantonal courts, in cases involving more than 20,000 frs.

In penal cases the Tribunal acts mainly as a court of cassation, examining the decisions of cantonal courts for violations of federal law. It cannot change a lower court's finding on facts.

The Tribunal also decides civil cases between Cantons, between Cantons and the Confederation and claims by individuals or corporations against the Confederation involving over 8,000 frs. It gives final decisions on execution and bankruptcy proceedings and on the application of administrative law by federal and cantonal administrative and legal authorities, and acts as a constitutional court, deciding appeals concerning the violation of citizens' rights.

The Tribunal consists of the following sections:

- (a) Court of Public and Administrative Law (*Staats- und Verwaltungsrechtliche Abteilung, Cour de droit public et de droit administratif, Corte di diritto pubblico e di diritto amministrativo*).
- (b) Two Civil Courts (*Zivilabteilungen, Cours civiles, Corti civili*).
- (c) Bankruptcy Court (*Schuldbetreibungs- und Konkurskammer, Chambre des poursuites et des faillites, Camera di esecuzione e dei fallimenti*).
- (d) Court of Penal Cassation (*Kassationshof, Cour de cassation pénale, Corte di cassazione penale*).
- (e) Court of Arraignment (*Anklagekammer, Chambre d'accusation, Camera d'accusa*).
- (f) Criminal Court (*Kriminalkammer, Chambre criminelle, Camera criminale*).
- (g) Federal Penal Court (*Bundesstrafgericht, Cour pénale fédérale, Corte penale federale*).

FEDERAL TRIBUNAL OF INSURANCE

President: EDUARD AMSTAD.

Vice-President: GIORDANO BEATI.

The Tribunal was founded in 1918 and consists of seven members. It sits at Lucerne. Since 1969 it has been considered as the Court of Social Insurance (*Sozialversicherungsabteilung, Cour des assurances sociales, Corte delle assicurazioni sociali*) of the Federal Tribunal.

RELIGION

According to the 1970 Census, the religious adherence per 1,000 of the population was as follows: Protestant 478, Roman Catholic 494, Old Catholic 3, Jewish 3, other denominations (or without religion) 22.

THE ROMAN CATHOLIC CHURCH

In 1978 there were 3,101,956 Catholics in Switzerland. The Church in Switzerland and Liechtenstein is divided into 6 dioceses and the abbeys of Maria Einsiedeln and St-Maurice, each directly subordinate to the Holy See.

Diocese of Basel: Bischöfliche Kanzlei, Baselstr. 58, 4500 Solothurn; Bishop Mgr. ANTON HÄNGGI.

Diocese of Chur: Bischöfliches Ordinariat, Hof 19, 7000 Chur; Bishop Mgr. JOHANNES VONDERACH.

Diocese of Lausanne, Geneva and Fribourg: 86 rue de Lausanne, P.O.B. 271, 1701 Fribourg; Bishop Mgr. PIERRE MAMIE.

Diocese of Lugano: Curia Vescovile, Borghetto 6, 6900 Lugano; Bishop Mgr. ERNESTO TOGNI.

Diocese of St. Gallen: Bischöfliches Palais, Klosterhof 6b, 9000 St. Gallen; Bishop Mgr. OTMAR MÄDER.

Diocese of Sion: avenue de la Tour 12, 1950 Sion 2; Bishop Mgr. HENRI SCHWERY.

Old Catholic Church: Bishop Rt. Rev. L. GAUTHIER, Willadingweg 39, Berne.

PROTESTANT CHURCHES

Federation of Swiss Protestant Churches (*Schweizerischer Evangelischer Kirchenbund, Fédération des Eglises protestantes de la Suisse*): Sulgenauweg 26, 3000 Berne 23; f. 1920. The Protestant Churches of Switzerland are grouped in this Federation of which the executive organ is the Council of the Federation (*Vorstand des Schweizerischen Evangelischen Kirchenbundes, Conseil de la Fédération*); Pres. Rev. J.-P. JORNOD (Berne); Vice-Pres. Rev. R. KUSTER (Basel); Sec. W. PROBST (Berne).

The eighteen reformed churches of Aargau, Appenzell, Basel-Stadt, Basel-Land, Berne, Fribourg, Geneva, Glarus, Graubünden, Neuchâtel, St. Gallen, Schaffhausen, Solothurn, Tessin, Thurgau, Valais, Vaud, Zürich, the Kirchenverband Zentralschweiz, the Eglise évangélique libre de Genève and the Evangelisch-methodistische Kirche form part of this federation, as well as the Swiss churches abroad.

THE PRESS

Freedom of the Press in Switzerland is guaranteed by Article 55 of the amended 1874 Constitution, and the only formal restrictions on the press are the legal restraints concerned with abuses of this freedom. A federal law, enacted in October 1968, protects the right of journalists to refuse, in administrative procedures, to reveal their sources of information, except in cases where the security of the state is involved.

The Swiss combination of a high literacy rate and a strong interest in local news, the political autonomy of communes and cantons, direct democracy, the federal constitutional structure and the coexistence of diverse languages and religions have tended to produce a decentralized press, fragmented into numerous local papers, often with very low circulations. In 1980 there were 126 daily newspapers, but only 14 had a circulation of over 50,000. The majority of newspapers are regional, even such high circulation ones as *Tages Anzeiger Zürich* and *Basler Zeitung* and popular national dailies such as *Neue Zürcher Zeitung*. About 75 per cent of newspapers are printed in German, 20 per cent in French, and 5 per cent in Italian. The presence of immigrant workers and the Swiss interest in foreign news has led to the import of 100,000 copies of French, German, Italian and Spanish newspapers every day.

Feuille d'Avis de Neuchâtel, dating from 1738, is the oldest Swiss paper. *Blick* (280,870) and *Tages Anzeiger Zürich* (263,580) have easily the largest circulations, followed by *Neue Zürcher Zeitung* (123,420), *Basler Zeitung* (110,320) and *24 Heures/Feuille d'Avis de Lausanne* (93,350). The two most respected dailies are *Neue Zürcher Zeitung*, founded in 1780, and the French-language *Journal de Genève*, established nearly fifty years later. Both papers carry an exceptionally high proportion of foreign news, and have a large readership abroad.

BEAT DURRER; publs. *SBC Yearbook, Programme Schedule of SBC European and Overseas Services* (twice yearly), *Télédiffusion*.

The Swiss Broadcasting Corporation (SBC) is a private company which fulfils a public duty on the basis of a licence granted to it by the Swiss Federal Council. This gives the SBC the right to use the electrical and radio-electrical installations of the Swiss Postal and Telecommunications undertaking (PTT) for public broadcasting of radio and television programmes. It specifies that the SBC is responsible for the programme services, whilst the PTT is responsible for all technical aspects of transmission. Receiver licence fees are collected by the PTT, which takes 30 per cent of them, the remaining 70 per cent going to the SBC.

The SBC is composed of the following regional societies:

Société de Radiodiffusion et de Télévision de la Suisse Romande (SRTR): 6 ave. de la Gare, 1001 Lausanne; Dir. of radio and television RENÉ SCHENKER; Programme Dirs.: Radio: BERNARD NICOD, Maison de la Radio, 1010 Lausanne; Television: ALEX-ANDRE BURGER, 20 Quai Ernest Ansermet, 1211 Geneva 8.

Società cooperativa per la radiotelevisione nella Svizzera Italiana (CORSI): Radio Lugano, 6903 Lugano-Besso; f. 1933; Dirs. of radio and television CHERUBINO DARANI, MARCO BLASER; Radio-TV Programme Dir. progr. BIXIO CANDOLFI; Dir. of operations FERNANDO BIANCHI.

RADIO

In 1977 there were five medium-wave transmitters (including the three national ones at Beromünster, Sottens and Monte Ceneri), 196 VHF transmitters and 12 short-wave transmitters. Two different programmes for each linguistic region, regular programmes in Romansch and local programmes for German-speaking Switzerland are transmitted on medium-wave and VHF. Swiss Radio International broadcasts on short-wave in nine languages. The Swiss Wire Network Service, which broadcasts radio programmes on the telephone cable network of the PTT, comes under the same directorship as the short-wave Service. It provides six programmes to over 400,000 subscribers. Paid advertising is forbidden on radio.

In 1979 the total number of radio licences was 2,209,828.

INTERNATIONAL SERVICE

Swiss Radio International (*Swiss Broadcasting Corporation*): Giacomettistrasse 1, 3000 Berne 15; programmes in French, German, Italian, Romansch, English, Spanish, Portuguese, Esperanto and Arabic to all parts of the world. Twelve short-wave transmitters are situated at Schwarzenburg and Sottens (overseas), Lenk, Sarnen and Beromünster (Europe and worldwide); Dir. JOEL CURCHOD.

TELEVISION

In 1981 there were 1,137 transmitters and boosters in operation. A complete TV programme service for each linguistic region and regular broadcasts in Romansch are provided on the 1st (VHF) channel. The 2nd and 3rd (UHF) channels are used in each linguistic region for transmitting programmes of the other two linguistic regions. Limited direct advertising (20 minutes on weekdays) is allowed.

In 1980 there were 1,979,518 TV sets in Switzerland.

FINANCE

(cap.=capital; p.u.=paid up; dep.=deposits; res.=reserves; m.=million; brs.=branches; all values are in Swiss francs)

Switzerland's neutrality during and since the First World War has helped to develop the reputation of the Swiss banks as a secure repository for foreign capital. A provision of the Swiss Banking Law of 1934 made it a penal offence for a bank to provide information about its clients without their explicit authorization, unless a court has ordered otherwise. When foreign authorities wish to investigate Swiss accounts, criminal charges must have been made in a foreign court and accepted as valid by Switzerland. The system of numbered accounts has also kept depositors' shares free from investigation. However, the abuse of bank secrecy by organized crime led Switzerland and the U.S.A. to sign a treaty in May 1973, under which the banking secrecy rules may be lifted in the case of common-law crime, but not for non-criminal tax evasion and anti-trust law infringements which are still immune from investigation.

An agreement concluded with the banks by the Swiss National Bank and the Swiss Bankers' Association in

June 1977 led to a tightening-up of the Swiss banks' handling of foreign funds. The code has made the opening of numbered accounts subject to closer scrutiny and checked the practice of banks actively encouraging the flow of foreign money into the country. In 1978, in view of the steady increase in Swiss banks' international business, the Federal Banking Commission was given greater supervisory powers. Banks were required for the first time to submit consolidated balance sheets to the Commission and new consolidation requirements forced banks to raise capital to between 6 and 8 per cent of total liabilities. The capital requirement is now one of the highest in the world. In December 1979 the negative interest levy on non-residents' accounts with Swiss banks and restrictions on the forward sale of Swiss francs to non-residents were abolished. From August 1980 interest on foreign deposits in francs at Swiss banks can be paid without restrictions.

At the end of 1980 there were 4,881 bank branches in Switzerland, owned by 557 banks, 25 private banks, 16

SWITZERLAND

Finance

Swiss branches of foreign banks, two loan-office associations and 80 finance companies. Swiss banking is dominated by the "Big Five Banks" (*Union Bank of Switzerland, Swiss Bank Corporation, Swiss Credit Bank, Swiss Volksbank* and *Bank Leu*). About 50 per cent of their share comes from foreign business. Foreign banks have become increasingly important; in 1980 84 foreign-controlled banks and 16 branches of foreign banks held about 11 per cent of all Swiss banking assets.

The 29 canton banks are financed and controlled by the cantons and their activities are co-ordinated by the Federation of Swiss Canton Banks. In 1980 they had 1,274 branches and controlled 20.7 per cent of total banking assets.

Nuclear power stations in operation are: Beznau I, which started operating in 1969 with an effective output of 350,000 kW and energy production in 1977 of 2,710 million kWh; Beznau II, which started operating in 1972 and in 1977 had an effective output of 350,000 kW and energy production of 2,810 million kWh; Mühleberg, which started operating in 1972 with an effective output of 306,000 kW and energy production in 1977 of 2,550 million kWh.

Nuclear power stations projected or under construction: Gösgen (920 MW), Leibstadt (940 MW), Kaiseraugst (925 MW) and Graben (1,140 MW).

CO-OPERATION

Switzerland is a member of UNESCO, the International Atomic Energy Agency, the European Nuclear Energy Agency, the European Organization for Nuclear Research and the European Atomic Energy Society. An agreement for Atomic Co-operation with the United Kingdom was signed in 1963, and with the U.S.A. in 1966 and an agreement with the EEC in 1978 to co-operate on nuclear research. Switzerland has also co-operated with France, Brazil, Federal Germany, Belgium, Romania and Canada in this field.

TURKEY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The European and Asian parts of the Republic of Turkey (Thrace and Anatolia, respectively) are separated by the Straits of the Bosphorus which link the Black Sea and the Mediterranean. Most of Turkey lies in Asia, the vast Anatolian peninsula being bordered to the east by the U.S.S.R. and Iran and to the south by Iraq and Syria. The small European part of the country abuts upon Greece and Bulgaria. In the Asian interior the climate is one of great extremes. On the Mediterranean coast it is more equable with mild winters and warm summers. The principal language is Turkish, spoken by 90 per cent of the population. About 7 per cent speak Kurdish, mainly in the south-east. In 1928 the Arabic characters of the written Turkish language were superseded by Western-style script. Islam is the religion of 99 per cent of the population. The national flag (proportions 3 by 2) consists of a white crescent and five-pointed star on a red background. The capital is Ankara.

Recent History

The Republic of Turkey was declared in 1923 and, under the leadership of Kemal Atatürk, made great progress away from the traditions of the Ottoman Empire and towards European modernity. Atatürk created a secular state which looked to Europe for its institutions and technology, based on the principles of republicanism, nationalism, populism and state control. Neutral during the Second World War, Turkey was driven by Soviet threats into joining NATO in 1952 and CENTO in 1955 (dissolved in 1979). Turkey belongs to the Council of Europe, and has established links with the EEC.

In May 1960 a military coup overthrew the Government of Adnan Menderes, and political activities were suspended until January 1961. A new constitution was approved by referendum in June and took effect in October 1961. From 1961 to 1965 İsmet İnönü led a succession of coalition Governments. The elections of 1965 brought the Justice Party (JP) to power, with Süleyman Demirel, İnönü's successor, as Prime Minister. This conservative Government lasted until March 1971, when a wave of strikes and student and labour unrest caused the armed forces to demand its resignation. "Guided democracy", under military supervision, continued until October 1973, with a succession of right-wing cabinets, martial law and the rigorous suppression of all left-wing activities. The return to civilian rule began when the Grand National Assembly chose Fahri Korotürk as President, in preference to a candidate backed by the armed forces. During 1973 the senior military commanders were replaced by non-political officers, and military participation in government was ended by the elections of October 1973. No party had a majority sufficient to form a government, and negotiations on the formation of a coalition continued until January 1974 when Bülent Ecevit, the Republican People's Party (RPP) leader, became Prime Minister, having negotiated a coalition with the National Salvation Party (NSP). The discovery of petroleum beneath the bed of the Aegean Sea

led to a dispute with Greece over the extent of territorial rights, which was overshadowed by the Greek-backed coup in Cyprus (*q.v.*) in July 1974, when the Turkish army invaded northern Cyprus.

In September 1974 Ecevit resigned the premiership and a caretaker administration took over until March 1975, when Süleyman Demirel formed a Nationalist Front coalition Government, comprising members of the JP, the NSP, the Republican Reliance Party (RRP) and the National Action Party (NAP). Since the coalition proved incapable of decisive action to deal with the many problems facing Turkey, Demirel called an early general election for June 1977, but no party gained an overall majority in the National Assembly, and Ecevit, having formed a minority government, was defeated in a vote of no confidence in July. Demirel then formed a coalition government, almost identical to the former Nationalist Front, which gradually lost its majority in a series of defections from the JP in December. In January 1978 Ecevit formed a government with support from independents, the Democratic Party and the RRP, which aimed to deal with Turkey's pressing debt burden and the mounting political violence. However, by September 1979 further violence had claimed more than 2,000 lives, and martial law was imposed in 19 provinces. The JP's victory in the five by-elections in October 1979 meant that Ecevit had lost his working majority and he resigned.

In November Demirel, as leader of the second largest party in the National Assembly, formed a minority government with the backing of the NAP and the NSP. His plans to introduce a tough policy on terrorism were obstructed by the RRP. With no improvement in the level of violence, the Turkish generals issued a warning on January 2nd, 1980, that the politicians must take some action. However, political leaders seemed incapable of forming a united front. The National Assembly was virtually paralysed by its inability to agree on a new President after Korotürk's term ended in April. No legislation was enacted except for emergency measures, and by September the violence was nearing the scale of civil war, with as many as 40 deaths each day.

On September 12th the armed forces, led by General Kenan Evren, Chief of the General Staff, seized power in a bloodless coup, forming a five-man National Security Council (NSC) which appointed a mainly civilian Cabinet, with Bülent Ulusu, formerly Commander of the Turkish Navy, as Prime Minister. Martial law was declared throughout the country. Former political leaders were detained, suspected terrorists and political extremists were rounded up, and all political activity was banned. Some newspapers and trade unions were closed down. In October the NSC drew up a provisional constitution and in December a law was passed providing the NSC with unlimited powers. Throughout 1981 the campaign against all possible sources of political violence was continued. The main targets were underground right- and left-wing terrorist organizations, but the media, the trade unions and the universities were also under attack. By May 1981

some 20,000 suspects were said to have been detained in Turkey's prisons, including the leaders of the NSP and the NAP, together with a large number of trade unionists and the editors of some leading dailies. Censorship of the press was not officially imposed, but the military rulers proved highly sensitive to criticism, and the press was obliged to exert strict self-censorship. The new Government succeeded in reducing the level of political violence in Turkey and in establishing law and order. However, there were fears that this had been achieved only at the expense of human rights, and the NATO countries urged Turkey to return to democratic rule as soon as possible. The first step in this direction was taken in October 1981, when all political parties were disbanded and a Constituent Assembly was set up to draft a new constitution (*see below*).

Turkey's former close relations with the U.S.A. and Western Europe were under strain from 1975 to 1979. In July 1975 the Demirel Government closed all U.S. bases in Turkey in protest against the arms embargo imposed by the U.S.A. after the invasion of Cyprus. In August 1978 the embargo was finally lifted, but the supply of arms was dependent on continued progress towards a settlement in Cyprus. In response, four key bases were reopened in Turkey. A five-year agreement was signed in March 1980, in which Turkey allowed the U.S.A. access to over 25 military establishments in return for economic aid.

Relations between Greece and Turkey showed some improvement during 1980. Both countries revoked their claims to control airspace over the Aegean in February and Turkish Airlines resumed flights between the two countries in July. In September 1981, however, it was clear that the problem was still unresolved. In October the new Greek Prime Minister declared that Greece would withdraw from the military wing of NATO unless guaranteed by the U.S.A. against an attack by Turkey. However, in November the two countries exchanged messages of goodwill.

Government

Following the military coup in September 1980, the functions of the Grand National Assembly were taken over by the National Security Council, with its President as Head of State. On October 15th, 1981, a Constituent Assembly was formed to draft a new constitution and to prepare the way for a return to parliamentary rule. It consisted of the five members of the NSC and 160 members of a consultative assembly, 40 of whom were appointed directly by the NSC, while the remaining 120 were chosen by the Council from candidates put forward by the governors of the 67 provinces. All former politicians were excluded and were not to be allowed to stand at the next election. On October 16th all political parties were disbanded.

Defence

Turkey joined the North Atlantic Treaty Organization (NATO) in 1952. Military service in the army lasts for 20 months. The total strength of the armed forces in July 1981 was 569,000: army of 470,000, navy of 46,000 and air force of 53,000; there was a gendarmerie numbering 120,000. Defence expenditure estimates for 1981 amounted to TL298,000 million.

Economic Affairs

Agriculture, the most important sector of the Turkish economy, employed 60 per cent of the working population and accounted for 57 per cent of total export earnings and 19.8 per cent of the G.N.P. in 1980. The value of industrial exports overtook that of agricultural exports for the first time during the first eight months of 1981. Government investment policy concentrates on industry rather than agriculture, and while industrial crops such as cotton and tobacco have gained in importance, wheat and rice have had to be imported as domestic production falls behind demand. With the exception of cotton, agriculture remains largely underdeveloped, as do livestock production and forestry. Turkey's principal exports are cotton, hazelnuts and tobacco.

Turkey's production of chromium, copper and borax is internationally significant, and coal and bauxite are also mined. Mining is dominated by state-owned companies, but the lifting of restrictions on foreign investment in January 1980 was expected to encourage investment by the private sector and a greater development of the mining industry. Petroleum production, which is expected to decline gradually until 1993, amounted to an estimated 2.5 million tons, about 14 per cent of Turkey's domestic requirements, in 1980. Exploration for new oil-fields offshore in the Aegean is continuing although limited by a dispute with Greece over territory. Cheap locally available cotton and low wages have made textiles Turkey's biggest industrial growth sector, despite low labour productivity. The chemical industry is another area of rapid expansion. The 1973-77 five-year plan placed emphasis on industrial development, achieving an average annual rate of growth in G.D.P. of 8.6 per cent in 1974-76, and of 4.4 per cent in 1977. A fourth five-year plan was formulated in 1977 but was subsequently abandoned. G.D.P. grew by 3.3 per cent in 1978. The 1979-83 five-year plan aims at an average annual rate of growth in G.N.P. of 8 per cent, but the increase was only 0.8 per cent in 1980, largely due to a fall of 11.7 per cent in industrial production.

The demands of Turkey's economic development have resulted in a growing trade deficit which reached U.S. \$4,016.3 million in 1977. This fell to \$2,310.8 million in 1978, but rose to \$2,808.3 million in 1979 and to \$4,757 million in 1980. Heavy reliance is placed on remittances from Turkish workers abroad as a source of foreign exchange, which partly offsets Turkey's persistent trade deficit. These remittances fell from \$1,312 million in 1975 to \$983 million in 1978. This, combined with an increase in foreign debt servicing, resulted in an increase in the current account deficit from \$1,848 million in 1975 to \$3,224 million in 1977. These factors contributed to serious demands being made on Turkey's foreign currency reserves which by the end of 1977 had rendered the country virtually bankrupt and forced a currency devaluation. In return for a \$450 million credit and the arrangement of a banking consortium to reschedule Turkey's pressing short-term debts, the IMF in March 1978 imposed a stringent financial package. The current deficit fell to \$1,211 million in 1978 and remained stable at \$1,013 million in 1979, mainly due to a dramatic increase in workers' remittances, which rose to \$1,694 million in 1979 and totalled \$2,071 million in 1980. The current deficit, how-

ever, rose to \$2,756 million in 1980 as the trade gap widened.

After the announcement of an economic stabilization programme in March 1979, followed by devaluations against the dollar and 20 major currencies, an agreement in principle was reached with the IMF in July, covering a new stand-by credit of \$327.5 million for one year. In January 1980 the Government introduced a new austerity package. The lira was devalued by 33 per cent against the dollar and price controls and subsidized prices were abolished. The prices of state-traded goods were raised by up to 400 per cent; fuel oil rose by 400 per cent and petrol by 25 per cent. As a result, the "black market" was wiped out and shortages of vital commodities ended with the help of foreign aid. In May 1981 OECD countries pledged aid worth \$940 million to Turkey, of which \$350 million was from the U.S.A. West Germany's promised \$246 million was cut to \$202 million, and aid from the EEC has also been delayed, both in protest against the military rulers' delay in returning the country to democratic rule. Iraq agreed to supply Turkey with 8.5 million metric tons of crude oil in 1982, almost half the country's import requirements.

Massive emigration helps to disguise the problem of unemployment in a country where the population is growing annually by about 2.6 per cent. Registered unemployment rose from 8.3 per cent in 1979 to 10.6 per cent in 1980, but the real unemployment rate is probably about 20 per cent. Industry was functioning at half normal capacity because of a shortage of imported supplies. Inflation has become a severe problem since 1974 and reached 100.8 per cent in the 12 months to September 1980. However, the rate of inflation fell to 35 per cent in the following year.

Transport and Communications

The length of railway track in 1978 was 10,066 km. The total length of the road network is about 232,800 km. (1979). The Turkish Maritime Lines, a state corporation, operates passenger and cargo lines with a fleet of 19 ships and 68 ferries. Private shipping companies operate tankers and cargo vessels totalling about 500,000 gross tons. Turkish Airlines have an internal air service and flights to the Middle East and all the major cities in Europe.

Social Welfare

Social insurance for wage-earners is provided by the Workers' Social Insurance Institution of the Ministry of

Labour. In 1978, 2,478,782 workers and employees were covered by social insurance, including free medical care. It is planned to extend socialized health services to the whole population.

Education

Education has made big advances in Turkey. Although literacy is now estimated at 65 per cent in towns, it is still much lower in the villages. Education is compulsory between the ages of 7 and 12 years. All state education up to University or Higher Institute levels is co-educational and free. The number of primary schools reached 43,731 in 1978/79, compared with 12,511 in 1950, and over 5.5 million children were attending primary schools. The six years of secondary education are divided into two stages. The Middle School period lasts for three years after which students may proceed to the Lycées for a further three years. A state examination must be passed by those students wishing to proceed to University or to an Institute of Higher Education. There are 18 universities. In November 1981 a law was passed depriving the universities of administrative autonomy. Budget expenditure for education was set at TL88,256 million for 1980/81.

Tourism

Tourism is being stimulated by the Government, and the industry is expanding slowly. 1,524,000 tourists visited Turkey in 1979.

Public Holidays

1982: April 23rd (National Sovereignty and Children's Day), May 1st (Spring Day), May 18th (half day) and 19th (Youth and Sports Day), May 26th (half day) and 27th (Freedom and Constitution Day), July 23rd (Şeker Bayram—End of Ramadan), August 30th (Victory Day), September 29th (Kurban Bayram—Feast of the Sacrifice), October 28th–30th (Republic Days).

1983: January 1st (New Year's Day).

JUDICIAL SYSTEM

Until the foundation of the Turkish Republic, a large large part of the Turkish civil law—the laws affecting the family, inheritance, property, obligations, etc.—was based on the Koran, and this holy law was administered by special religious (Sharia) courts. The legal reform of 1926 was not only a process of secularization, but also a radical change of the legal system. The Swiss Civil Code and the Code of Obligation, the Italian Penal Code, and the Neuchâtel (Cantonal) Code of Civil Procedure were adopted and modified to fit Turkish customs and traditions.

Constitutional Court: Consists of fifteen regular and five alternate members. Reviews the constitutionality of laws passed by the Turkish Grand National Assembly. Sits as a High Council empowered to try senior members of state. The rulings of the Constitutional Court are final. Decisions of the Court are published immediately in the Official Gazette, and shall be binding on the legislative, executive, and judicial organs of the State.

Court of Cassation: The court of the last instance for reviewing the decisions and verdicts rendered by courts of law. It has original and final jurisdiction in specific cases defined by law. Members are elected by the Supreme Council of Judges.

Council of State: An administrative court of the first instance in matters not referred by law to other administrative courts, and an administrative court of the last instance in general. Hears and settles administrative dis-

putes and expresses opinions on draft laws submitted by the Council of Ministers.

High Military Administrative Court: A military court for the judicial control of administrative acts concerning military personnel.

Military Court of Cassation: A court of the last instance to review decisions and verdicts rendered by military courts.

Court of Jurisdictional Disputes: Settles disputes among civil, administrative and military courts arising from disagreements on jurisdictional matters and verdicts.

Supreme Council of Judges: Consists of eighteen regular and five alternate members. Decides all personnel matters relating to judges.

Public Prosecutor: The law shall make provision for the tenure of public prosecutors and attorneys of the Council of State and their functions.

The Chief Prosecutor of the Republic, the Chief Attorney of the Council of State and the Chief Prosecutor of the Military Court of Cassation are subject to the provisions applicable to judges of higher courts.

Military Trial: Military trials are conducted by military and disciplinary courts. These courts are entitled to try the military offences of military personnel and those offences committed against military personnel or in military areas, or offences connected with military service and duties. Military courts may try non-military persons only for military offences prescribed by special laws.

RELIGION

ISLAM

Diyanet İşleri Reisi (*Head of Religious Affairs in Turkey*): TAYYAR ALTIKULAC.

Over 99 per cent of the Turkish people are Muslims, mostly Sunnis. Turkey is a secular state. Although Islam was stated to be the official religion in the constitution of 1924, an amendment in 1928 removed this privilege. After 1950 subsequent Governments have tried to re-establish links between religion and state affairs, but secularity has been protected, first by the revolution of 1960 and now by the recent coup.

THE PRESS

It is almost impossible to produce a correct list of the numerous provincial newspapers, which tend to be small in circulation and rather short-lived.

Almost all Istanbul papers are also printed in Ankara and Izmir on the same day, and some in Adana. Among the most serious and influential papers are the dailies *Milliyet* and *Cumhuriyet*. *Gıyır* is noted for its political satire. The most popular dailies are the Istanbul papers *Hürriyet*, *Milliyet*, *Tercüman*, *Son Havadis*, *Günaydın* and *Cumhuriyet*; *Yeni Asir*, published in Izmir, is the best selling quality daily of the Aegean region.

FINANCE

The Central Bank of the Republic of Turkey was originally founded in 1930, and constituted in its present form in 1970. The Central Bank is the bank of issue and is also responsible for the execution of monetary and credit policies, the regulation of the foreign and domestic value of the Turkish lira jointly with the Government, and the supervision of the credit system.

There are some 42 other banks functioning in Turkey. Fourteen were created by special laws to fulfil specialized services for particular industries. The Sumerbank directs the operation of a number of state-owned factories; Etibank operates primarily in the extractive industries and electric power industries; the Agricultural Bank makes loans for agriculture; the Maritime Bank operates government-owned port facilities, the merchant marine and its own fleet of ships; the Real Estate Credit Bank participates in industrial undertakings and the construction of all types of building. Other specialized banks deal with tourism, municipalities and mortgages, etc.

The largest of the private sector Turkish banks is the Türkiye İş Bankası which operates over 850 branches. The private banks borrow at medium- and long-term mainly from the State Investment Bank.

There are several other credit institutions in Turkey, including the Industrial Development Bank of Turkey, which encourages private investment in industry by acting as underwriter in the issue of share capital. The Türkiye Sınai Kalkınma Bankası was founded in 1950 with the assistance of the World Bank to stimulate industrial growth in the private sector.

There are numerous co-operative organizations, and in the rural areas there are Agricultural Sale Co-operatives and Agricultural Co-operatives. There are also a number of savings institutions.

THE UNION OF SOVIET SOCIALIST REPUBLICS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Union of Soviet Socialist Republics extends from the Baltic to the Pacific Ocean, and for 5,000 km. from north to south. It is the largest country in the world. Its western frontier, running from the Arctic Ocean in the north to the Black Sea in the south, is bordered by Norway, Finland, Poland, Czechoslovakia, Hungary and Romania. The southern frontier, running from west to east, is bordered by Turkey, Iran, Afghanistan, the People's Republic of China, Mongolia and the Democratic People's Republic of Korea. The climate of this area is continental and has extreme variations. In winter, temperatures can fall to -70°C (-94°F) in north-east Siberia, and in summer it can reach 50°C (122°F) in Central Asia, part of which is desert. There are 112 recognized languages spoken in the U.S.S.R. and altogether five alphabets are used; Russian is the mother tongue of 58 per cent of the people. The Russian Orthodox faith is the traditional belief of Russians and there are other Christian and also Jewish and Muslim communities. The national flag (proportions 2 by 1) is red with a gold hammer and sickle surmounted by a five-pointed gold-edged red star in the upper left part. The capital is Moscow.

Recent History

The Second World War inflicted immense losses upon the Soviet Union in damage to industry, agriculture and population. About 20 million Soviet citizens were killed. At the end of the war the Soviet Union made certain territorial gains, most notably the annexation of part of East Prussia, formerly German territory, as war reparation. During the post-war years 1948-49 the Soviet Union played a decisive role in the establishment of governments dominated by communists in a number of European and Asian countries.

Much of the devastation and destruction of the War had disappeared by the time of Stalin's death in 1953, and due to the Five-Year Plans the economy, particularly in the field of heavy industry, had made considerable progress. In September 1953 Nikita Khrushchev was nominated First Secretary of the Communist Party by the Central Committee, and in February 1958 he became Chairman of the Council of Ministers. Under his leadership, certain reforms were introduced into the political life of the Soviet Union, and the principle of peaceful coexistence with the West was developed. However, relations with the People's Republic of China deteriorated sharply from the early 1960s. In October 1964 Khrushchev was replaced as Chairman of the Council of Ministers by Aleksei Kosygin and as First (subsequently General) Secretary of the Communist Party Central Committee by Leonid Brezhnev.

From the early 1970s relations with Western countries began to improve and by 1975 trade with the West accounted for almost a third of Soviet trade. The Soviet Union plays a leading part in the economic and military groupings of the East European countries, the Council for Mutual Economic Assistance (CMEA) and the Warsaw Pact. It has intervened in political crises in several of the Eastern European countries, notably in Hungary in 1956

and Czechoslovakia in 1968. Social unrest in Poland, exemplified by the formation in 1980 of a popular independent trade union and a corresponding weakening of the authority of the Party and Government, caused the Soviet leaders to take steps to ensure that the unrest did not spread to other East European countries. Poland's leaders were urged to defend their political authority and the "socialist structure" of the country, and considerable aid was given to the disrupted Polish economy.

During the first half of the 1970s Soviet influence in the Middle East declined, but its influence and involvement in southern Africa increased considerably, notably with its support of the successful faction bidding for power in the former Portuguese colonies of Angola and Mozambique. During the late 1970s the Soviet Union also established closer ties with Ethiopia. Hostility towards China continued in the early 1970s, but since 1979 both countries have expressed a cautious desire to negotiate a better relationship. Elsewhere in Asia, Soviet influence increased, particularly in Indo-China, the People's Democratic Republic of Yemen and Afghanistan. Soviet military intervention in the Afghan coup which took place in December 1979 provoked widespread international condemnation of the U.S.S.R., which maintained that it was acting in response to the new Afghan Government's request for aid. The UN General Assembly passed a resolution in January 1980 calling for the withdrawal of foreign troops from Afghanistan, but a worldwide embargo on trade with the U.S.S.R., sought by President Carter of the U.S.A., failed to obtain sufficiently widespread support, and was abandoned early in 1981 when it became clear that the Soviet Union was able to find alternative sources of imports. In October 1980 the Soviet Union undertook to keep troops in Afghanistan until opposition to the Government there had been eliminated.

In May 1977 Nikolai Podgorny was removed from the Politburo of the Communist Party, and replaced as Chairman of the Presidium of the Supreme Soviet by Leonid Brezhnev, who retained the post of General Secretary of the Party Central Committee. The creation of the post of First Vice-President of the Presidium (a provision of the new constitution, adopted in October) further enhanced Brezhnev's position, as did a reshuffle of the Politburo in November 1978. Elections took place in March 1979, the first to be held under the new constitution, in which new deputies were elected to the two chambers of the Supreme Soviet. In October 1980 Aleksei Kosygin retired as Chairman of the Council of Ministers and was replaced by Nikolai Tikhonov, the First Vice-Chairman, who had led the Government on several occasions since the beginning of Kosygin's illness a year previously. Kosygin died in December 1980.

In June 1979 the U.S.S.R. and the U.S.A. signed the Strategic Arms Limitation Treaty (SALT II), but ratification by the U.S. Government was delayed as a protest over the Soviet Union's presence in Afghanistan. Negotiations with the U.S.A. on intermediate range land-based nuclear missiles were begun in November 1981, while the resump-

tion of talks on reduction of strategic (inter-continental) weapons was planned for early 1982.

Government

Under the 1977 Constitution, the Soviet Union is formally a federal state comprising 15 Union (constituent) Republics of equal status, voluntarily linked and having the right to secede. Some Union Republics contain Autonomous Republics and Autonomous Regions. The Russian Soviet Federative Socialist Republic (R.S.F.S.R.) also includes 10 National Areas.

The highest organ of state power is the bicameral legislature, the Supreme Soviet of the U.S.S.R., comprising the Soviet (Council) of the Union, with 750 members elected from constituencies, and the Soviet of Nationalities, with 750 members (32 from each of the Union Republics; 11 from each of the 20 Autonomous Republics; five from each of the eight Autonomous Regions; one from each of the 10 National Areas). Both houses have equal rights and powers and their terms run concurrently. Members are directly elected (from a single list of candidates) by universal adult suffrage and serve five-year terms. At a joint session the members elect the Presidium of the Supreme Soviet to be the legislature's permanent organ. The Presidium, led by a Chairman, functions as a collective Head of State. It has 39 members, including (as *ex officio* deputy chairmen) the 15 chairmen of the Supreme Soviets of the Union Republics. The Supreme Soviet also appoints the Council of Ministers, headed by a Chairman, to form the executive and administrative branch of government, responsible to the Supreme Soviet.

Each of the 15 Union Republics has a constitution and state structure on the same pattern as the central government, with a unicameral Supreme Soviet and a Council of Ministers to deal with internal affairs. The Chairmen of the Councils of Ministers of the Union Republics are *ex officio* members of the U.S.S.R. Council of Ministers.

Political power is held by the highly centralized Communist Party of the Soviet Union (CPSU), described in the constitution as "the leading and guiding force of Soviet society". The CPSU is the only legal party, has an absolute monopoly of power in all political affairs and controls government at all levels. The CPSU's highest authority is the Party Congress, which should be convened every five years. The Congress elects the Central Committee (319 full members and 151 candidate, i.e. non-voting, members were chosen in March 1981), which supervises Party work and directs state policy. The Committee, which meets twice a year, elects a Political Bureau (Politburo), which is the Party's most powerful policy-making body.

Apart from the R.S.F.S.R., each Union Republic has its own Communist Party, with a Central Committee led by a First Secretary. These parties form an integral part of the CPSU.

Defence

The Soviet Union is a nuclear power armed with long-range rockets and is a member of the Warsaw Pact Alliance. Military service is compulsory and lasts for two years in the army and air force and between two and three years in the navy and in the border force. The total strength of the armed forces was estimated at 3,678,000 in July 1981: army 1,825,000, air force 475,000, navy 443,000 (including a naval air force of 59,000), strategic rocket

forces of 385,000 and air defence forces of 550,000. Paramilitary forces number about 560,000, made up of 260,000 security troops and 300,000 border troops. According to state budget allocations, defence expenditure for 1981 was 17,050 million roubles, although estimates from Western sources are as much as six times this amount. Army divisions are stationed in Czechoslovakia, Hungary, Poland and the German Democratic Republic.

Economic Affairs

The U.S.S.R. has the largest and strongest economy in the world after the U.S.A. and is the world leader in petroleum production, coal mining, iron ore, mineral fertilizers, cement and steel.

The economy is centrally planned, based on state or collective ownership, with production targets fitted into the framework of a development plan. Between 1919 and 1928 plans were drawn up annually, until in 1929 Stalin introduced the first Five-Year Plan.

The eighth Five-Year Plan (1966-70) was successfully completed and in many cases, particularly in the oil, non-ferrous metal, automation and mineral industries, targets were exceeded. Net material product ("national income") rose by 41 per cent between 1966 and 1970, and industrial production by 50 per cent; real incomes increased by a third. The ninth and tenth Five-Year Plans failed to achieve the levels of growth sought in most sectors of the economy and targets have progressively become more modest. The most significant feature of the tenth Five-Year Plan (1976-80) was a shift of resources to agriculture, with over a quarter of investment during the five years being allocated to this sector, resulting in a 9 per cent increase in production, compared with the goal of 14-17 per cent. Industrial production rose by 24 per cent, against a target of 35-39 per cent, and national income grew by 23 per cent, compared with a planned growth of 24-28 per cent. The eleventh Five-Year Plan (1981-85) gives priority to the production of consumer goods, representing a shift from the traditional emphasis on heavy industry. Targets for the eleventh Plan are for industrial production to increase by 26-28 per cent (with heavy industry attaining a similar rate of growth and the output of consumer goods increasing by 27-29 per cent) and for agricultural production to increase by 12-14 per cent: overall, the economy is to grow by 18 per cent.

Heavy industry accounts for more than two-thirds of industrial production. Industry accounts for more than 50 per cent of the net material product. Industrial output increased by only 3.6 per cent in 1980, compared with a target of 4.5 per cent and the 1979 figure of 3.4 per cent. In addition to extensive deposits of iron ore, petroleum and peat, the Soviet Union has the largest proven coal reserves in the world and about one-third of the world's proven natural gas reserves. Production of non-ferrous metals includes aluminium, nickel, manganese, lead, copper and zinc. The coal basins of the Donetsk near the Black Sea, Kuznetsk in Siberia and Karaganda in Kazakhstan are the main sources. In 1974 the Soviet Union superseded the U.S.A. as the world's leading petroleum producer. Petroleum is produced in Azerbaijan, the Western Urals, the Volga region, East and West Siberia, in the south of the Central Asian Republics, Byelorussia and the Ukraine.

The country is the second greatest producer of electrical power and in 1980 generated 1,295,000 million kWh. of electricity: nuclear power provided 5 per cent of total Soviet electricity output. Almost one-third of the total land area is forest, two-thirds of it in Siberia and the far east; the Soviet Union is the world's leading producer of roundwood and sawnwood. The textile and consumer goods industries have been greatly increased in recent years.

Agriculture is large-scale and mechanized, with two main types of farm. The collective farms work slightly more than half of the cultivable land and distribute profits to members. About 60 per cent of the marketable agricultural output is provided by collective farms. The state farms are owned and operated by the state, the employees receiving a wage. At the end of 1980 there were 25,800 collective farms and 21,000 state farms. In 1980 agricultural output fell by 3 per cent from 1979 because of the poor harvest of grain crops (cereals and pulses). The development of the Virgin Lands of West Siberia and Northern Kazakhstan has significantly increased production. The chief grain crops are wheat, rye, oats and maize; other crops are sugar beet, hemp, cotton and oil seeds. Poor grain harvests of 179-189 million metric tons in 1979, 1980 and 1981, as against targets of about 230 million tons, have caused the Soviet Union to import large quantities of grain, mainly to feed its livestock. In 1981 the harvest amounted to 181 million tons.

Trade inside the U.S.S.R. is conducted by state trading establishments, consumers' co-operatives and collective farm markets. Foreign trade is a state monopoly. In 1980 total Soviet trade turnover increased by 17.2 per cent over the previous year, to reach 94,097 million roubles. Trade with other "Socialist" countries accounted for 53.7 per cent of this amount. In 1980 the U.S.S.R. achieved a trade surplus with the West for the first time, exports exceeding imports to the value of 100 million roubles.

Transport and Communications

The vastness of the Soviet Union's territory and the rapid growth of its economy make considerable demands on the transport system. Railways carry most freight traffic and in July 1981 the total track length was about 142,000 km.; 42,500 km. of railway track were electrified by July 1980. The major railway project currently under construction is the Baikal-Amur Mainline (BAM) railway which, when completed, will stretch 3,200 km. from Taishet to Komsomolsk-on-Amur in the Far East. By September 1981 about 1,600 km. of the railway had been completed. At the end of 1976 the total length of roads was 1,405,600 km., of which 700,000 km. were hard surface roads by 1979. A project is under way for the construction of a dense network of modern hard surface roads. There are about 150,000 km. of inland waterways which play an important role in transporting bulk cargo and timber. Canals navigable by large vessels link the White Sea with the Baltic through the River Volga and the Rivers Moscow and Don with the Caspian, Azov and Black Seas. In 1978 river vessels carried about 138 million passengers. The Soviet merchant marine totalled 21.9 million gross tons in 1980, the sixth largest in the world's fleets of ocean vessels. There are 27 major ports, the most important being Leningrad, Arkhangelsk, Riga, Murmansk, Odessa,

Baku and Vladivostok. Aeroflot, the Soviet airline, maintains both internal and external services, covering 650,000 km. in domestic services and operating flights to 87 countries. In 1976 there were 58,600 km. of pipelines transporting over 532 million tons of petroleum and 130,500 km. of pipelines pumping 309,500 million cubic metres of natural gas.

Social Welfare

In the 1981 budget the State allocated 45,800 million roubles for social insurance and security, or almost 12 per cent of total budget expenditure. Apart from a complete range of social security benefits (disability pensions, loss of wage earner, student grants, maternity benefits), pensions are paid to retired men at 60 and women at 55 and average 60-70 per cent of their salary prior to retirement. Employees in enterprises where the work conditions are arduous may receive pensions five or ten years earlier than is the norm. In 1981 there were 49.9 million people receiving retirement, disablement or army pensions in the U.S.S.R. A new social security scheme for old and disabled collective farm workers has been introduced. The centralized fund of the scheme is made up of deductions from the farmers' wages made by the collective farm, and of allocations from the state budget.

There is a streamlined system of public health services providing medical aid for the entire population. The public health services are supervised by the Ministry of Public Health and the Ministries of Public Health of the Union and Autonomous Republics, through regional (territorial), district, and city Boards of Health, under the corresponding Soviets of Working People's Deputies. All medical services and treatment are given free of charge, as are drugs and medicines in hospitals. In 1978 state allocations for free medical aid totalled over 8,000 million roubles. The U.S.S.R. has a total of 35,000 outpatients' clinics of various kinds. Public health institutions (hospitals, special clinics, maternity health centres, etc.) administer free services. In 1981 there were over 24,000 hospitals, and 125 hospital beds per 10,000 of the population. The number of doctors totalled 995,600 (37.4 per 10,000 of the population). In addition to these hospitals there is a large network of sanatoria and holiday homes. Accommodation for children, and in tuberculosis sanatoria, is free of charge. Working people are generally charged a nominal fee—usually about 30 per cent of the cost. Infant health centres and children's polyclinics have been set up as part of the public health system in order to watch over the health and proper physical development of all children. At the age of 16 years the child is transferred to an adult polyclinic. There are more than 500,000 hospital beds for children. Workers temporarily unable to work due to sickness receive a sick leave benefit on the basis of a certificate issued by the adult polyclinic. Disabled workers are either transferred to lighter work or given a disability pension.

Increased pensions were instituted in November 1981 together with increased maternity benefits in Siberia, the Far East and northern regions of the U.S.S.R.; similar maternity benefits were to come into effect in the rest of the European regions in November 1982 and in the Central Asian republics in November 1983.

Rents are controlled and on average amount to 3 per cent of family expenditure.

Education

According to the 1979 census, approximately 63.8 per cent of the population aged 10 years and over had been or were being educated above primary school level, and 6.8 per cent had completed courses in higher education. In 1979 the literacy rate was 99.8 per cent.

All schools are state-run except a few colleges belonging to co-operatives and public organizations. There are 120,000 permanent nurseries and kindergartens in the Soviet Union, maintained largely by the State. In 1980 14 million children attended such pre-school establishments. In 1975 compulsory free education for 10 years from the age of seven was introduced. There are three-year primary schools, eight-year schools and ten- or eleven-year secondary schools. Tuition is conducted in 52 languages throughout the Soviet Union.

Secondary education is provided in either general secondary schools or polytechnic schools, both having the same educational syllabus. In 1959 urban and rural vocational training schools were established, which admit children who have completed the eight year school. Sixty to 70 per cent of the student's time is taken up with practical work although training also includes theoretical grounding. Instruction is given in 1,300 different trades. Upon graduation the successful student is given a job in his chosen trade. Young workers can continue their studies by attending evening schools of secondary general education. In addition to these types of secondary school, there are also specialized schools which provide a general education together with the necessary instruction and practical skills of a profession. The course lasts from two to four years and the students receive a government grant. Graduates are given jobs in their chosen profession. There are also special schools for foreign languages where children start at the age of seven years, and schools for children gifted in subjects such as music.

Secondary education takes students up to university level. Entrance to university is by competitive examination, and the number of new places each year is laid down in the annual economic plan. Each Union Republic has universities and colleges with various forms of training. Tuition is free and students are provided with State stipends and other benefits. Each institution provides specialized education, both practical and theoretical. In the first years students are usually taught general subjects; specialization normally begins with the third year. The curriculum consists of compulsory general and special subjects and subjects which can be chosen by the students themselves. Undergraduate courses are completed when the student has presented his thesis and taken state examinations. Graduates are provided with jobs and living quarters upon completing their studies. About 2,092,000 specialists graduated in 1980 with higher and secondary education.

In the 1980/81 academic year there were 44.3 million children attending general schools. The proposed state budget allocation for education and science in 1981 was 41,200 million roubles.

Tourism

Although foreign tourism is not a major source of income in the Soviet economy, it does contribute a valuable

amount of foreign currency. The state organization, Intourist, founded in 1929, assists foreign tourists in the U.S.S.R. and Soviet tourists going abroad. Tours are also organized by the Central Board of Tourism of the All-Union Central Council of Trade Unions, the International Youth Tourism Bureau "Sputnik", the Union of Soviet Societies for Friendship and Cultural Relations with Foreign Countries, and other public bodies. Favourite tourist spots are Moscow, Kiev, Leningrad, Odessa, the Black Sea and Baltic resorts, the Urals and Altai mountains, and the ancient cities of Samarkand and Bukhara in central Asia. There were about 25 million visitors to the U.S.S.R. in the five-year period 1976-80. The Hotel Rossiya in Moscow is the largest in Europe, with accommodation for 5,500 guests.

Space Research

In 1957 the U.S.S.R. launched the world's first space satellite, following it in 1961 with the first manned space flight. Since then the Soviet Union has carried out an extensive space exploration programme, the emphasis of which has tended to rest on unmanned flights. The Luna spacecraft series has made studies of the moon and has succeeded in bringing back samples of lunar soil and rock. In November 1970 Luna 17 landed a vehicle on the moon—Lunokhod 1—equipped with television systems, an X-ray telescope and other scientific instruments. Space probes have been sent to Mars and Venus and in October 1975 Venus 9 and 10 space probes landed on Venus and sent back pictures of the planet. Over 1,300 earth satellites have been sent up in the Kosmos series.

The Interkosmos series, now run in conjunction with nine other socialist member-countries, was launched in 1969. Manned spaceflights have been carried out in the Vostok, Voskhod and Soyuz series; Soyuz crews included cosmonauts from each of the Interkosmos member-countries. By 1980 the U.S.S.R. had launched more than 40 manned space-craft, some of which linked with Salyut 6, one of a series of space stations which has itself been orbiting the earth since September 1977. A new record was set in October 1980, when two cosmonauts returned to earth in Soyuz 37 after 185 days on Salyut 6. An important stage in the development of the Interkosmos programmes was successfully completed with the flight of a Soviet-Romanian crew in May 1981. No further manned space flights had been planned by November 1981.

The U.S.S.R., together with the U.S.A. and the United Kingdom, signed an international treaty in January 1967 prohibiting the use of outer space for military purposes. The Soviet Union co-operated with France in the launch of technological and telecommunications satellites in April 1972, and signed agreements with the U.S.A. on the exchange of moon samples and on a project to link up Soyuz and Apollo craft in space, which was carried out successfully in July 1975.

¹³ Including extensions, restorations and conversions.

¹⁴ Excluding gas used for the gasification of coal.

NATIONAL ECONOMIC DEVELOPMENT PLAN, 1961-80

1. Increase industrial productivity by 300-350 per cent.
2. Total electrification of the country.
3. Expansion of the metals and fuels industries.
4. Comprehensive development of the chemical industry.
5. Development of automation.
6. Development of jet engineering.
7. Rationalization of the distribution of industry.
8. Entire electrification of agriculture.
9. Higher pay for better work and greater material incentives.
10. Higher efficiency on collective farms.

FINANCE

100 kopeks = 1 rubl' (ruble or rouble).

Coins: 1, 2, 3, 5, 10, 15, 20 and 50 kopeks; 1 rouble.

Notes: 1, 3, 5, 10, 25, 50 and 100 roubles.

Exchange rates (October 1981): £1 sterling = 1.305 roubles; U.S. \$1 = 77.3 kopeks.

100 roubles = £76.63 = \$129.38.

Note: From January 1961 to August 1971 the official exchange rate was U.S. \$1 = 90.00 kopeks (1 rouble = \$1.111). Between December 1971 and February 1973 the rate was \$1 = 82.895 kopeks (1 rouble = \$1.206). Since March 1973 the exchange rate has been frequently adjusted. The average value of the rouble was: \$1.356 in 1973; \$1.322 in 1974; \$1.386 in 1975; \$1.326 in 1976; \$1.357 in 1977; \$1.463 in 1978; \$1.526 in 1979; \$1.541 in 1980. In terms of sterling, the official rate between November 1967 and June 1972 was £1 = 2.16 roubles.

THE CONSTITUTION**(FUNDAMENTAL LAW)**

(Adopted at the Seventh (Special) Session of the Supreme Soviet of the U.S.S.R., Ninth Convocation, on October 7th, 1977-)

Preamble

The Great October Socialist Revolution, made by the workers and peasants of Russia under the leadership of the Communist Party headed by Lenin, overthrew capitalist and landowner rule, broke the fetters of oppression, established the dictatorship of the proletariat, and created the Soviet state, a new type of state, the basic instrument for defending the gains of the revolution and for building socialism and communism. Humanity thereby began the epoch-making turn from capitalism to socialism.

After achieving victory in the Civil War and repulsing imperialist intervention, the Soviet government carried through far-reaching social and economic transformations, and put an end once and for all to exploitation of man by man, antagonisms between classes, and strife between nationalities. The unification of the Soviet Republics in the Union of Soviet Socialist Republics multiplied the forces and opportunities of the peoples of the country in the building of socialism. Social ownership of the means of production and genuine democracy for the working masses were established. For the first time in the history of mankind a socialist society was created.

The strength of socialism was vividly demonstrated by the immortal feat of the Soviet people and their Armed Forces in achieving their historic victory in the Great Patriotic War. This victory consolidated the influence and international standing of the Soviet Union and created new opportunities for growth of the forces of socialism, national liberation, democracy, and peace throughout the world.

Continuing their creative endeavours, the working people of the Soviet Union have ensured rapid, all-round development of the country and steady improvement of the socialist system. They have consolidated the alliance of the working class, collective-farm peasantry, and people's intelligentsia, and friendship of the nations and nationalities of the U.S.S.R. Socio-political and ideological unity of Soviet society, in which the working class is the leading force, has been achieved. The aims of the dictatorship of the proletariat having been fulfilled, the Soviet state has become a state of the whole people. The leading role of the Communist Party, the vanguard of all the people, has grown.

In the U.S.S.R. a developed socialist society has been built. At this stage, when socialism is developing on its own foundations, the creative forces of the new system and the advantages of the socialist way of life are becoming increasingly evident, and the working people are more and more widely enjoying the fruits of their great revolutionary gains.

It is a society in which powerful productive forces and progressive science and culture have been created, in which the well-being of the people is constantly rising, and more and more favourable conditions are being provided for the all-round development of the individual.

It is a society of mature socialist social relations, in which, on the basis of the drawing together of all classes and social strata and of the juridical and factual equality of all its nations and nationalities and their fraternal co-operation, a new historical community of people has been formed—the Soviet people.

It is a society of high organizational capacity, ideological commitment, and consciousness of the working people, who are patriots and internationalists.

It is a society in which the law of life is concern of all for the good of each and concern of each for the good of all.

It is a society of true democracy, the political system of which ensures effective management of all public affairs, ever more active participation of the working people in running the state, and the combining of citizens' real rights and freedoms with their obligations and responsibility to society.

Developed socialist society is a natural, logical stage on the road to communism.

The supreme goal of the Soviet state is the building of a classless communist society in which there will be public, communist self-government. The main aims of the people's socialist state are: to lay the material and technical foundation of communism, to perfect socialist social relations and transform them into communist relations, to mould the citizen of communist society, to raise the people's living and cultural standards, to safeguard the country's security, and to further the consolidation of peace and development of international co-operation.

The Soviet people,
 guided by the ideas of scientific communism and true
 to their revolutionary traditions,
 relying on the great social, economic, and political gains
 of socialism,
 striving for the further development of socialist
 democracy,
 taking into account the international position of the
 U.S.S.R. as part of the world system of socialism, and
 conscious of their internationalist responsibility,
 preserving continuity of the ideas and principles of the
 first Soviet Constitution of 1918, the 1924 Constitution
 of the U.S.S.R. and the 1936 Constitution of the U.S.S.R.,
 hereby affirm the principles of the social structure and
 policy of the U.S.S.R., and define the rights, freedoms
 and obligations of citizens, and the principles of the
 organization of the socialist state of the whole people,
 and its aims, and proclaim these in this Constitution.

I. Principles of the Social Structure and Policy of the U.S.S.R.

CHAPTER I THE POLITICAL SYSTEM

Article 1

The Union of Soviet Socialist Republics is a socialist
 state of the whole people, expressing the will and interests
 of the workers, peasants, and intelligentsia, the working
 people of all the nations and nationalities of the country.

Article 2

All power in the U.S.S.R. belongs to the people.

The people exercise state power through Soviets of
 People's Deputies, which constitute the political founda-
 tion of the U.S.S.R.

All other state bodies are under the control of, and
 accountable to, the Soviets of People's Deputies.

Article 3

The Soviet state is organized and functions on the
 principle of democratic centralism, namely the electiveness
 of all bodies of state authority from the lowest to the
 highest, their accountability to the people, and the
 obligation of lower bodies to observe the decisions of higher
 ones. Democratic centralism combines central leadership
 with local initiative and creative activity and with the
 responsibility of each state body and official for the work
 entrusted to them.

Article 4

The Soviet state and all its bodies function on the basis
 of socialist law, ensure the maintenance of law and order,
 and safeguard the interests of society and the rights and
 freedoms of citizens.

State organizations, public organizations and officials
 shall observe the Constitution of the U.S.S.R. and Soviet
 laws.

Article 5

Major matters of state shall be submitted to nationwide
 discussion and put to a popular vote (referendum).

Article 6

The leading and guiding force of Soviet society and the
 nucleus of its political system, of all state organizations and
 public organizations, is the Communist Party of the Soviet
 Union. The C.P.S.U. exists for the people and serves the
 people.

The Communist Party, armed with Marxism-Leninism,
 determines the general perspectives of the development of
 society and the course of the home and foreign policy of the
 U.S.S.R., directs the great constructive work of the Soviet
 people, and imparts a planned, systematic and theoretically
 substantiated character to their struggle for the victory of
 communism.

All party organizations shall function within the
 framework of the Constitution of the U.S.S.R.

Article 7

Trade unions, the All-Union Leninist Young Communist
 League, co-operatives, and other public organizations,
 participate, in accordance with the aims laid down in their
 rules, in managing state and public affairs, and in deciding
 political, economic, and social and cultural matters.

Article 8

Work collectives take part in discussing and deciding
 state and public affairs, in planning production and social
 development, in training and placing personnel, and in
 discussing and deciding matters pertaining to the manage-
 ment of enterprises and institutions, the improvement of
 working and living conditions, and the use of funds
 allocated both for developing production and for social and
 cultural purposes and financial incentives.

Work collectives promote socialist emulation, the spread
 of progressive methods of work, and the strengthening of
 production discipline, educate their members in the spirit
 of communist morality, and strive to enhance their
 political consciousness and raise their cultural level and
 skills and qualifications.

Article 9

The principal direction in the development of the
 political system of Soviet society is the extension of
 socialist democracy, namely ever broader participation of
 citizens in managing the affairs of society and the state,
 continuous improvement of the machinery of state,
 heightening of the activity of public organizations,
 strengthening of the system of people's control, consolida-
 tion of the legal foundations of the functioning of the state
 and of public life, greater openness and publicity, and
 constant responsiveness to public opinion.

CHAPTER 2

THE ECONOMIC SYSTEM

Article 10

The foundation of the economic system of the U.S.S.R.
 is socialist ownership of the means of production in the
 form of state property (belonging to all the people), and
 collective farm-and-co-operative property.

Socialist ownership also embraces the property of trade
 unions and other public organizations which they require
 to carry out their purposes under their rules.

The state protects socialist property and provides
 conditions for its growth.

No one has the right to use socialist property for personal
 gain or other selfish ends.

Article 11

State property, i.e. the common property of the Soviet
 people, is the principal form of socialist property.

The land, its minerals, waters, and forests are the
 exclusive property of the state. The state owns the
 basic means of production in industry, construction,
 and agriculture; means of transport and communica-
 tion; the banks; the property of state-run trade organiza-
 tions and public utilities, and other state-run undertakings;

most urban housing; and other property necessary for state purposes.

Article 12

The property of collective farms and other co-operative organizations, and of their joint undertakings, comprises the means of production and other assets which they require for the purposes laid down in their rules.

The land held by collective farms is secured to them for their free use in perpetuity.

The state promotes development of collective farm-and-co-operative property and its approximation to state property.

Collective farms, like other land users, are obliged to make effective and thrifty use of the land and to increase its fertility.

Article 13

Earned income forms the basis of the personal property of Soviet citizens. The personal property of citizens of the U.S.S.R. may include articles of everyday use, personal consumption and convenience, the implements and other objects of a small-holding, a house, and earned savings. The personal property of citizens and the right to inherit it are protected by the state.

Citizens may be granted the use of plots of land, in the manner prescribed by law, for a subsidiary small-holding (including the keeping of livestock and poultry), for fruit and vegetable growing or for building an individual dwelling. Citizens are required to make rational use of the land allotted to them. The state, and collective farms provide assistance to citizens in working their small-holdings.

Property owned or used by citizens shall not serve as a means of deriving unearned income or be employed to the detriment of the interests of society.

Article 14

The source of the growth of social wealth and of the well-being of the people, and of each individual, is the labour, free from exploitation, of Soviet people.

The state exercises control over the measure of labour and of consumption in accordance with the principle of socialism: "From each according to his ability, to each according to his work." It fixes the rate of taxation on taxable income.

Socially useful work and its results determine a person's status in society. By combining material and moral incentives and encouraging innovation and a creative attitude to work, the state helps transform labour into the prime vital need of every Soviet citizen.

Article 15

The supreme goal of social production under socialism is the fullest possible satisfaction of the people's growing material, and cultural and intellectual requirements.

Relying on the creative initiative of the working people, socialist emulation, and scientific and technological progress, and by improving the forms and methods of economic management, the state ensures growth of the productivity of labour, raising of the efficiency of production and of the quality of work, and dynamic, planned, proportionate development of the economy.

Article 16

The economy of the U.S.S.R. is an integral economic complex comprising all the elements of social production, distribution, and exchange on its territory.

The economy is managed on the basis of state plans for economic and social development, with due account of the sectoral and territorial principles, and by combining

centralized direction with the managerial independence and initiative of individual and amalgamated enterprises and other organizations, for which active use is made of management accounting, profit, cost, and other economic levers and incentives.

Article 17

In the U.S.S.R., the law permits individual labour in handicrafts, farming, the provision of services for the public, and other forms of activity based exclusively on the personal work of individual citizens and members of their families. The state makes regulations for such work to ensure that it serves the interests of society.

Article 18

In the interests of the present and future generations, the necessary steps are taken in the U.S.S.R. to protect and make scientific, rational use of the land and its mineral and water resources, and the plant and animal kingdoms, to preserve the purity of air and water, ensure reproduction of natural wealth, and improve the human environment.

CHAPTER 3

SOCIAL DEVELOPMENT AND CULTURE

Article 19

The social basis of the U.S.S.R. is the unbreakable alliance of the workers, peasants, and intelligentsia.

The state helps enhance the social homogeneity of society, namely the elimination of class differences and of the essential distinctions between town and country and between mental and physical labour, and the all-round development and drawing together of all the nations and nationalities of the U.S.S.R.

Article 20

In accordance with the communist ideal—"The free development of each is the condition of the free development of all"—the state pursues the aim of giving citizens more and more real opportunities to apply their creative energies, abilities, and talents, and to develop their personalities in every way.

Article 21

The state concerns itself with improving working conditions, safety and labour protection and the scientific organization of work, and with reducing and ultimately eliminating all arduous physical labour through comprehensive mechanization and automation of production processes in all branches of the economy.

Article 22

A programme is being consistently implemented in the U.S.S.R. to convert agricultural work into a variety of industrial work, to extend the network of educational, cultural and medical institutions, and of trade, public catering, service and public utility facilities in rural localities, and transform hamlets and villages into well-planned and well-appointed settlements.

Article 23

The state pursues a steady policy of raising people's pay levels and real incomes through increase in productivity.

In order to satisfy the needs of Soviet people more fully social consumption funds are created. The state, with the broad participation of public organizations and work collectives, ensures the growth and just distribution of these funds.

Article 24

In the U.S.S.R., state systems of health protection, social security, trade and public catering, communal services and amenities, and public utilities, operate and are being extended.

The state encourages co-operatives and other public organizations to provide all types of services for the population. It encourages the development of mass physical culture and sport.

Article 25

In the U.S.S.R. there is a uniform system of public education, which is being constantly improved, that provides general education and vocational training for citizens, serves the communist education and intellectual and physical development of the youth, and trains them for work and social activity.

Article 26

In accordance with society's needs the state provides for planned development of science and the training of scientific personnel and organizes introduction of the results of research in the economy and other spheres of life.

Article 27

The state concerns itself with protecting, augmenting and making extensive use of society's cultural wealth for the moral and aesthetic education of the Soviet people, for raising their cultural level.

In the U.S.S.R. development of the professional, amateur and folk arts is encouraged in every way.

CHAPTER 4 FOREIGN POLICY

Article 28

The U.S.S.R. steadfastly pursues a Leninist policy of peace and stands for strengthening of the security of nations and broad international co-operation.

The foreign policy of the U.S.S.R. is aimed at ensuring international conditions favourable for building communism in the U.S.S.R., safeguarding the state interests of the Soviet Union, consolidating the positions of world socialism, supporting the struggle of peoples for national liberation and social progress, preventing wars of aggression, achieving universal and complete disarmament, and consistently implementing the principle of the peaceful coexistence of states with different social systems.

In the U.S.S.R. war propaganda is banned.

Article 29

The U.S.S.R.'s relations with other states are based on observance of the following principles: sovereign equality; mutual renunciation of the use or threat of force; inviolability of frontiers; territorial integrity of states; peaceful settlement of disputes; non-intervention in internal affairs; respect for human rights and fundamental freedoms; the equal rights of peoples and their right to decide their own destiny; co-operation among states; and fulfilment in good faith of obligations arising from the generally recognized principles and rules of international law, and from the international treaties signed by the U.S.S.R.

Article 30

The U.S.S.R., as part of the world system of socialism and of the socialist community, promotes and strengthens friendship, co-operation, and comradely mutual assistance with other socialist countries on the basis of the principle of socialist internationalism, and takes an active part in socialist economic integration and the socialist international division of labour.

CHAPTER 5 DEFENCE OF THE SOCIALIST MOTHERLAND

Article 31

Defence of the Socialist Motherland is one of the most important functions of the state, and is the concern of the whole people.

In order to defend the gains of socialism, the peaceful labour of the Soviet people, and the sovereignty and territorial integrity of the state, the U.S.S.R. maintains armed forces and has instituted universal military service.

The duty of the Armed Forces of the U.S.S.R. to the people is to provide reliable defence of the Socialist Motherland and to be in constant combat readiness, guaranteeing that any aggressor is instantly repulsed.

Article 32

The state ensures the security and defence capability of the country, and supplies the Armed Forces of the U.S.S.R. with everything necessary for that purpose.

The duties of state bodies, public organizations, officials, and citizens in regard to safeguarding the country's security and strengthening its defence capacity are defined by the legislation of the U.S.S.R.

II. The State and the Individual

CHAPTER 6 CITIZENSHIP OF THE U.S.S.R. EQUALITY OF CITIZENS' RIGHTS

Article 33

Uniform federal citizenship is established for the U.S.S.R. Every citizen of a Union Republic is a citizen of the U.S.S.R.

The grounds and procedure for acquiring or forfeiting Soviet citizenship are defined by the Law on Citizenship of the U.S.S.R.

When abroad, citizens of the U.S.S.R. enjoy the protection and assistance of the Soviet state.

Article 34

Citizens of the U.S.S.R. are equal before the law, without distinction of origin, social or property status, race or nationality, sex, education, language, attitude to religion, type and nature of occupation, domicile, or other status.

The equal rights of citizens of the U.S.S.R. are guaranteed in all fields of economic, political, social, and cultural life.

Article 35

Women and men have equal rights in the U.S.S.R.

Exercise of these rights is ensured by according women equal access with men to education and vocational and professional training, equal opportunities in employment, remuneration, and promotion, and in social and political, and cultural activity, and by special labour and health protection measures for women; by providing conditions enabling mothers to work; by legal protection, and material and moral support for mothers and children, including paid leaves and other benefits for expectant mothers and mothers, and gradual reduction of working time for mothers with small children.

Article 36

Citizens of the U.S.S.R. of different races and nationalities have equal rights.

Exercise of these rights is ensured by a policy of all-round development and drawing together of all the nations and

nationalities of the U.S.S.R., by educating citizens in the spirit of Soviet patriotism and socialist internationalism, and by the possibility to use their native language and the languages of other peoples of the U.S.S.R.

Any direct or indirect limitation of the rights of citizens or establishment of direct or indirect privileges on grounds of race or nationality, and any advocacy of racial or national exclusiveness, hostility or contempt, are punishable by law.

Article 37

Citizens of other countries and stateless persons in the U.S.S.R. are guaranteed the rights and freedoms provided by law, including the right to apply to a court and other state bodies for the protection of their personal, property, family, and other rights.

Citizens of other countries and stateless persons, when in the U.S.S.R., are obliged to respect the Constitution of the U.S.S.R. and observe Soviet laws.

Article 38

The U.S.S.R. grants the right of asylum to foreigners persecuted for defending the interests of the working people and the cause of peace, or for participation in the revolutionary and national-liberation movement, or for progressive social and political, scientific or other creative activity.

CHAPTER 7 THE BASIC RIGHTS, FREEDOMS, AND DUTIES OF CITIZENS OF THE U.S.S.R.

Article 39

Citizens of the U.S.S.R. enjoy in full the social, economic, political and personal rights and freedoms proclaimed and guaranteed by the Constitution of the U.S.S.R. and by Soviet laws. The socialist system ensures enlargement of the rights and freedoms of citizens and continuous improvement of their living standards as social, economic, and cultural development programmes are fulfilled.

Enjoyment by citizens of their rights and freedoms must not be to the detriment of the interests of society or the state, or infringe the rights of other citizens.

Article 40

Citizens of the U.S.S.R. have the right to work (that is, to guaranteed employment and pay in accordance with the quantity and quality of their work, and not below the state-established minimum), including the right to choose their trade or profession, type of job and work in accordance with their inclinations, abilities, training and education, with due account of the needs of society.

This right is ensured by the socialist economic system, steady growth of the productive forces, free vocational and professional training, improvement of skills, training in new trades or professions, and development of the systems of vocational guidance and job placement.

Article 41

This right is ensured by the development and upkeep of state and socially-owned housing; by assistance for co-operative and individual house building; by fair distribution, under public control, of the housing that becomes available through fulfilment of the programme of building well-appointed dwellings, and by low rents and low charges for utility services. Citizens of the U.S.S.R. shall take good care of the housing allocated to them.

Article 45

Citizens of the U.S.S.R. have the right to education.

This right is ensured by free provision of all forms of education, by the institution of universal, compulsory secondary education, and broad development of vocational, specialized secondary, and higher education, in which instruction is oriented toward practical activity and production; by the development of extramural, correspondence and evening courses; by the provision of state scholarships and grants and privileges for students; by the free issue of school textbooks; by the opportunity to attend a school where teaching is in the native language; and by the provision of facilities for self-education.

Article 46

Citizens of the U.S.S.R. have the right to enjoy cultural benefits.

This right is ensured by broad access to the cultural treasures of their own land and of the world that are preserved in state and other public collections; by the development and fair distribution of cultural and educational institutions throughout the country; by developing television and radio broadcasting and the publishing of books, newspapers and periodicals, and by extending the free library service; and by expanding cultural exchanges with other countries.

Article 47

Citizens of the U.S.S.R., in accordance with the aims of building communism, are guaranteed freedom of scientific, technical, and artistic work. This freedom is ensured by broadening scientific research, encouraging invention and innovation, and developing literature and the arts. The state provides the necessary material conditions for this and support for voluntary societies and unions of workers in the arts, organizes introduction of inventions and innovations in production and other spheres of activity.

The rights of authors, inventors and innovators are protected by the state.

Article 48

Citizens of the U.S.S.R. have the right to take part in the management and administration of state and public affairs and in the discussion and adoption of laws and measures of All-Union and local significance.

This right is ensured by the opportunity to vote and to be elected to Soviets of People's Deputies and other elective state bodies, to take part in nationwide discussions and referendums, in people's control, in the work of state bodies, public organizations, and local community groups, and in meetings at places of work or residence.

Article 49

Every citizen of the U.S.S.R. has the right to submit proposals to state bodies and public organizations for improving their activity, and to criticize shortcomings in their work.

Officials are obliged, within established time-limits, to examine citizens' proposals and requests, to reply to them, and to take appropriate action.

Persecution for criticism is prohibited. Persons guilty of such persecution shall be called to account.

Article 50

In accordance with the interests of the people and in order to strengthen and develop the socialist system, citizens of the U.S.S.R. are guaranteed freedom of speech, of the press, and of assembly, meetings, street processions and demonstrations.

Exercise of these political freedoms is ensured by putting public buildings, streets and squares at the disposal of the working people and their organizations, by broad dissemination of information, and by the opportunity to use the press, television, and radio.

Article 51

In accordance with the aims of building communism, citizens of the U.S.S.R. have the right to associate in public organizations that promote their political activity and initiative and satisfaction of their various interests.

Public organizations are guaranteed conditions for successfully performing the functions defined in their rules.

Article 52

Citizens of the U.S.S.R. are guaranteed freedom of conscience, that is, the right to profess or not to profess any religion, and to conduct religious worship or atheistic propaganda. Incitement of hostility or hatred on religious grounds is prohibited.

In the U.S.S.R., the church is separated from the state, and the school from the church.

Article 53

The family enjoys the protection of the state.

Marriage is based on the free consent of the woman and the man; the spouses are completely equal in their family relations.

The state helps the family by providing and developing a broad system of child-care institutions, by organizing and improving communal services and public catering, by paying grants on the birth of a child, by providing children's allowances and benefits for large families, and other forms of family allowances and assistance.

Article 54

Citizens of the U.S.S.R. are guaranteed inviolability of the person. No one may be arrested except by a court decision or on the warrant of a procurator.

Article 55

Citizens of the U.S.S.R. are guaranteed inviolability of the home. No one may, without lawful grounds, enter a home against the will of those residing in it.

Article 56

The privacy of citizens, and of their correspondence, telephone conversations, and telegraphic communications is protected by law.

Article 57

Respect for the individual and protection of the rights and freedoms of citizens are the duty of all state bodies, public organizations, and officials.

Citizens of the U.S.S.R. have the right to protection by the courts against encroachments on their honour and reputation, life and health, and personal freedom and property.

Article 58

Citizens of the U.S.S.R. have the right to lodge a complaint against the actions of officials, state bodies and public bodies. Complaints shall be examined according to the procedure and within the time-limit established by law.

Actions by officials that contravene the law or exceed their powers, and infringe the rights of citizens, may be appealed against in a court in the manner prescribed by law.

Citizens of the U.S.S.R. have the right to compensation for damage resulting from unlawful actions by state organizations and public organizations, or by officials in the performance of their duties.

Article 59

Citizens' exercise of their rights and freedoms is inseparable from the performance of their duties and obligations.

Citizens of the U.S.S.R. are obliged to observe the Constitution of the U.S.S.R. and Soviet laws, comply with the standards of socialist conduct, and uphold the honour and dignity of Soviet citizenship.

Article 60

It is the duty of, and a matter of honour for, every able-bodied citizen of the U.S.S.R. to work conscientiously in his chosen, socially useful occupation, and strictly to observe labour discipline. Evasion of socially useful work is incompatible with the principles of socialist society.

Article 61

Citizens of the U.S.S.R. are obliged to preserve and protect socialist property. It is the duty of a citizen of the U.S.S.R. to combat misappropriation and squandering of state and socially-owned property and to make thrifty use of the people's wealth.

Persons encroaching in any way on socialist property shall be punished according to the law.

Article 62

Citizens of the U.S.S.R. are obliged to safeguard the interests of the Soviet state, and to enhance its power and prestige.

Defence of the Socialist Motherland is the sacred duty of every citizen of the U.S.S.R.

Betrayal of the Motherland is the gravest of crimes against the people.

Article 63

Military service in the ranks of the Armed Forces of the U.S.S.R. is an honourable duty of Soviet citizens.

Article 64

It is the duty of every citizen of the U.S.S.R. to respect the national dignity of other citizens, and to strengthen friendship of the nations and nationalities of the multinational Soviet state.

Article 65

A citizen of the U.S.S.R. is obliged to respect the rights and lawful interests of other persons, to be uncompromising toward anti-social behaviour, and to help maintain public order.

Article 66

Citizens of the U.S.S.R. are obliged to concern themselves with the upbringing of children, to train them for socially useful work, and to raise them as worthy members of socialist society. Children are obliged to care for their parents and help them.

Article 67

Citizens of the U.S.S.R. are obliged to protect nature and conserve its riches.

Article 68

Concern for the preservation of historical monuments and other cultural values is a duty and obligation of citizens of the U.S.S.R.

Article 69

It is the internationalist duty of citizens of the U.S.S.R. to promote friendship and co-operation with peoples of other lands and help maintain and strengthen world peace.

III. The National-State Structure of the U.S.S.R.

CHAPTER 8

THE U.S.S.R.—A FEDERAL STATE

Article 70

The Union of Soviet Socialist Republics is an integral federal, multinational state formed on the principle of socialist federalism as a result of the free self-determination of nations and the voluntary association of equal Soviet Socialist Republics.

The U.S.S.R. embodies the state unity of the Soviet people and draws all its nations and nationalities together for the purpose of jointly building communism.

Article 71

The Union of Soviet Socialist Republics unites:
the Russian Soviet Federative Socialist Republic,
the Ukrainian Soviet Socialist Republic,
the Byelorussian Soviet Socialist Republic,
the Uzbek Soviet Socialist Republic,
the Kazakh Soviet Socialist Republic,
the Georgian Soviet Socialist Republic,
the Azerbaijan Soviet Socialist Republic,

the Moldavian Soviet Socialist Republic,
the Latvian Soviet Socialist Republic,
the Kirghiz Soviet Socialist Republic,
the Tadzhik Soviet Socialist Republic,
the Armenian Soviet Socialist Republic,
the Turkmen Soviet Socialist Republic,
the Estonian Soviet Socialist Republic.

Article 72

Each Union Republic shall retain the right freely to secede from the U.S.S.R.

Article 73

The jurisdiction of the Union of Soviet Socialist Republics, as represented by its highest bodies of state authority and administration, shall cover:

1. the admission of new republics to the U.S.S.R.; endorsement of the formation of new autonomous republics and autonomous regions within Union Republics;
2. determination of the state boundaries of the U.S.S.R. and approval of changes in the boundaries between Union Republics;
3. establishment of the general principles for the organization and functioning of republican and local bodies of state authority and administration;
4. the ensurance of uniformity of legislative norms throughout the U.S.S.R. and establishment of the fundamentals of the legislation of the Union of Soviet Socialist Republics and Union Republics;
5. pursuance of a uniform social and economic policy; direction of the country's economy; determination of the main lines of scientific and technological progress and the general measures for rational exploitation and conservation of natural resources; the drafting and approval of state plans for the economic and social development of the U.S.S.R., and endorsement of reports on their fulfilment;
6. the drafting and approval of the consolidated Budget of the U.S.S.R., and endorsement of the report on its execution; management of a single monetary and credit system; determination of the taxes and revenues forming the Budget of the U.S.S.R.; and the formulation of prices and wages policy;
7. direction of the sectors of the economy, and of enterprises and amalgamations under Union jurisdiction, and general direction of industries under Union-Republican jurisdiction;
8. issues of war and peace, defence of the sovereignty of the U.S.S.R. and safeguarding of its frontiers and territory, and organization of defence; direction of the Armed Forces of the U.S.S.R.;
9. state security;
10. representation of the U.S.S.R. in international relations; the U.S.S.R.'s relations with other states and with international organizations; establishment of the general procedure for, and co-ordination of, the relations of Union Republics with other states and with international organizations; foreign trade and other forms of external economic activity on the basis of state monopoly;
11. control over observance of the Constitution of the U.S.S.R., and ensurance of conformity of the Constitutions of Union Republics to the Constitution of the U.S.S.R.;
12. and settlement of other matters of All-Union importance.

Article 74

The laws of the U.S.S.R. shall have the same force in all Union Republics. In the event of a discrepancy between a Union Republic law and an All-Union law, the law of the U.S.S.R. shall prevail.

Article 75

The territory of the Union of Soviet Socialist Republics is a single entity and comprises the territories of the Union Republics.

The sovereignty of the U.S.S.R. extends throughout its territory.

CHAPTER 9 THE UNION SOVIET SOCIALIST REPUBLIC

Article 76

A Union Republic is a sovereign Soviet socialist state that has united with other Soviet Republics in the Union of Soviet Socialist Republics.

Outside the spheres listed in Article 73 of the Constitution of the U.S.S.R., a Union Republic exercises independent authority on its territory.

A Union Republic shall have its own Constitution conforming to the Constitution of the U.S.S.R. with the specific features of the Republic being taken into account.

Article 77

Union Republics take part in decision-making in the Supreme Soviet of the U.S.S.R., the Presidium of the Supreme Soviet of the U.S.S.R., the Government of the U.S.S.R., and other bodies of the Union of Soviet Socialist Republics in matters that come within the jurisdiction of the Union of Soviet Socialist Republics.

A Union Republic shall ensure comprehensive economic and social development on its territory, facilitate exercise of the powers of the U.S.S.R. on its territory, and implement the decisions of the highest bodies of state authority and administration of the U.S.S.R.

In matters that come within its jurisdiction, a Union Republic shall co-ordinate and control the activity of enterprises, institutions, and organizations subordinate to the Union.

Article 78

The territory of a Union Republic may not be altered without its consent. The boundaries between Union Republics may be altered by mutual agreement of the Republics concerned, subject to ratification by the Union of Soviet Socialist Republics.

Article 79

A Union Republic shall determine its division into territories, regions, areas, and districts, and decide other matters relating to its administrative and territorial structure.

Article 80

A Union Republic has the right to enter into relations with other states, conclude treaties with them, exchange diplomatic and consular representatives, and take part in the work of international organizations.

Article 81

The sovereign rights of Union Republics shall be safeguarded by the U.S.S.R.

CHAPTER 10 THE AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Article 82

An Autonomous Republic is a constituent part of a Union Republic.

In spheres not within the jurisdiction of the Union of Soviet Socialist Republics and the Union Republic, an Autonomous Republic shall deal independently with matters within its jurisdiction.

An Autonomous Republic shall have its own Constitution conforming to the Constitutions of the U.S.S.R. and the Union Republic with the specific features of the Autonomous Republic being taken into account.

Article 83

An Autonomous Republic takes part in decision-making through the highest bodies of state authority and administration of the U.S.S.R. and of the Union Republic respectively, in matters that come within the jurisdiction of the U.S.S.R. and the Union Republic.

An Autonomous Republic shall ensure comprehensive economic and social development on its territory, facilitate exercise of the powers of the U.S.S.R. and the Union Republic on its territory, and implement decisions of the highest bodies of state authority and administration of the U.S.S.R. and the Union Republic.

In matters within its jurisdiction, an Autonomous Republic shall co-ordinate and control the activity of enterprises, institutions, and organizations subordinate to the Union or the Union Republic.

Article 84

The territory of an Autonomous Republic may not be altered without its consent.

Article 85

The Russian Soviet Federative Socialist Republic includes the Bashkir, Buryat, Dagestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North Ossetian, Tatar, Tuva, Udmurt, Chechen-Ingush, Chuvash and Yakut Autonomous Soviet Socialist Republics.

The Uzbek Soviet Socialist Republic includes the Karakalpak Autonomous Soviet Socialist Republic.

The Georgian Soviet Socialist Republic includes the Abkhazian and Adzhara Autonomous Soviet Socialist Republics.

The Azerbaijan Soviet Socialist Republic includes the Nakhichevan Autonomous Soviet Socialist Republic.

CHAPTER 11 THE AUTONOMOUS REGION AND AUTONOMOUS AREA

Article 86

An Autonomous Region is a constituent part of a Union Republic or Territory. The Law on an Autonomous Region, upon submission by the Soviet of People's Deputies of the Autonomous Region concerned, shall be adopted by the Supreme Soviet of the Union Republic.

Article 87

The Russian Soviet Federative Socialist Republic includes the Adygei, Gorno-Altai, Jewish, Kharachayev-Cherkess and Khakass Autonomous Regions.

The Georgian Soviet Socialist Republic includes the South Ossetian Autonomous Region.

The Azerbaijan Soviet Socialist Republic includes the Nagorno-Karabakh Autonomous Region.

The Tadzhik Soviet Socialist Republic includes the Gorno-Badakhshan Autonomous Region.

Article 88

An Autonomous Area is a constituent part of a Territory or Region. The Law on an Autonomous Area shall be adopted by the Supreme Soviet of the Union Republic concerned.

IV. Soviets of People's Deputies and Electoral Procedure

CHAPTER 12 THE SYSTEM OF SOVIETS OF PEOPLE'S DEPUTIES AND THE PRINCIPLES OF THEIR WORK

Article 89

The Soviets of People's Deputies, i.e. the Supreme Soviet of the U.S.S.R., the Supreme Soviets of Union

Republics, the Supreme Soviets of Autonomous Republics, the Soviets of People's Deputies of Territories and Regions, the Soviets of People's Deputies of Autonomous Regions and Autonomous Areas, and the Soviets of People's Deputies of districts, cities, city districts, settlements and villages shall constitute a single system of bodies of state authority.

Article 90

The term of the Supreme Soviet of the U.S.S.R., the Supreme Soviets of Union Republics, and the Supreme Soviets of Autonomous Republics shall be five years.

The term of local Soviets of People's Deputies shall be two and a half years.

Elections to Soviets of People's Deputies shall be called not later than two months before the expiry of the term of the Soviet concerned.

Article 91

The most important matters within the jurisdiction of the respective Soviets of People's Deputies shall be considered and settled at their sessions.

Soviets of People's Deputies shall elect standing commissions and form executive-administrative and other bodies accountable to them.

Article 92

Soviets of People's Deputies shall form people's control bodies combining state control with control by the working people at enterprises, collective farms, institutions, and organizations.

People's control bodies shall check on the fulfilment of state plans and assignments, combat breaches of state discipline, localistic tendencies, narrow departmental attitudes, mismanagement, extravagance and waste, red tape and bureaucracy, and help improve the working of the state machinery.

Article 93

Soviets of People's Deputies shall direct all sectors of state, economic, and social and cultural development, either directly or through bodies instituted by them, take decisions and ensure their execution, and verify their implementation.

Article 94

Soviets of People's Deputies shall function publicly on the basis of collective, free, constructive discussion and decision-making, of systematic reporting back to them and the people by their executive-administrative and other bodies, and of involving citizens on a broad scale in their work.

Soviets of People's Deputies and the bodies set up by them shall systematically inform the public about their work and the decisions taken by them.

CHAPTER 13 THE ELECTORAL SYSTEM

Article 95

Deputies to all Soviets shall be elected on the basis of universal, equal, and direct suffrage by secret ballot.

Article 96

Elections shall be universal: all citizens of the U.S.S.R. who have reached the age of 18 shall have the right to vote and to be elected, with the exception of persons who have been legally certified insane.

To be eligible for election to the Supreme Soviet of the U.S.S.R. a citizen of the U.S.S.R. must have reached the age of 21.

Article 97

Elections shall be equal: each citizen shall have one vote; all voters shall exercise the franchise on an equal footing.

Article 98

Elections shall be direct: deputies to all Soviets of People's Deputies shall be elected by citizens by direct vote.

Article 99

Voting at elections shall be secret: control over voters' exercise of the franchise is inadmissible.

Article 100

The following shall have the right to nominate candidates: branches and organizations of the Communist Party of the Soviet Union, trade unions, and the All-Union Leninist Young Communist League; co-operatives and other public organizations; work collectives, and meetings of servicemen in their military units.

Citizens of the U.S.S.R. and public organizations are guaranteed the right to free and all-round discussion of the political and personal qualities and competence of candidates, and the right to campaign for them at meetings, in the press, and on television and radio.

The expenses involved in holding elections to Soviets of People's Deputies shall be met by the state.

Article 101

Deputies to Soviets of People's Deputies shall be elected by constituencies.

A citizen of the U.S.S.R. may not, as a rule, be elected to more than two Soviets of People's Deputies.

Elections to the Soviets shall be conducted by electoral commissions consisting of representatives of public organizations and work collectives, and of meetings of servicemen in military units.

The procedure for holding elections to Soviets of People's Deputies shall be defined by the laws of the U.S.S.R., and of Union and Autonomous Republics.

Article 102

Electors give mandates to their Deputies.

The appropriate Soviets of People's Deputies shall examine electors' mandates, take them into account in drafting economic and social development plans and in drawing up the budget, organize implementation of the mandates, and inform citizens about it.

CHAPTER 14 PEOPLE'S DEPUTIES

Article 103

Deputies are the plenipotentiary representatives of the people in the Soviets of People's Deputies.

In the Soviets, Deputies deal with matters relating to state, economic, and social and cultural development, organize implementation of the decisions of the Soviets, and exercise control over the work of state bodies, enterprises, institutions and organizations.

Deputies shall be guided in their activities by the interests of the state, and shall take the needs of their constituents into account and work to implement their electors' mandates.

Article 104

Deputies shall exercise their powers without discontinuing their regular employment or duties.

During sessions of the Soviet, and so as to exercise their deputy's powers in other cases stipulated by law, Deputies shall be released from their regular employment or duties, with retention of their average earnings at their permanent place of work.

Article 105

A Deputy has the right to address inquiries to the appropriate state bodies and officials, who are obliged to reply to them at a session of the Soviet.

Deputies have the right to approach any state or public body, enterprise, institution, or organization on matters arising from their work as Deputies and to take part in considering the questions raised by them. The heads of the state or public bodies, enterprises, institutions or organizations concerned are obliged to receive Deputies without delay and to consider their proposals within the time-limit established by law.

Article 106

Deputies shall be ensured conditions for the unhampered and effective exercise of their rights and duties.

The immunity of Deputies, and other guarantees of their activity as Deputies, are defined in the Law on the Status of Deputies and other legislative acts of the U.S.S.R. and of Union and Autonomous Republics.

Article 107

Deputies shall report on their work and on that of the Soviet to their constituents, and to the work collectives and public organizations that nominated them.

Deputies who have not justified the confidence of their constituents may be recalled at any time by decision of a majority of the electors in accordance with the procedure established by law.

V. Higher Bodies of State Authority and Administration of the U.S.S.R.

*CHAPTER 15***THE SUPREME SOVIET OF THE U.S.S.R.***Article 108*

The highest body of state authority of the U.S.S.R. shall be the Supreme Soviet of the U.S.S.R.

The Supreme Soviet of the U.S.S.R. is empowered to deal with all matters within the jurisdiction of the Union of Soviet Socialist Republics, as defined by this Constitution.

The adoption and amendment of the Constitution of the U.S.S.R.; admission of new Republics to the U.S.S.R.; endorsement of the formation of new Autonomous Republics and Autonomous Regions; approval of the state plans for economic and social development, of the Budget of the U.S.S.R., and of reports on their execution; and the institution of bodies of the U.S.S.R. accountable to it, are the exclusive prerogative of the Supreme Soviet of the U.S.S.R.

Laws of the U.S.S.R. shall be enacted by the Supreme Soviet of the U.S.S.R. or by a nationwide vote (referendum) held by decision of the Supreme Soviet of the U.S.S.R.

Article 109

The Supreme Soviet of the U.S.S.R. shall consist of two chambers: the Soviet of the Union and the Soviet of Nationalities.

The two chambers of the Supreme Soviet of the U.S.S.R. shall have equal rights.

Article 110

The Soviet of the Union and the Soviet of Nationalities shall have equal numbers of deputies.

The Soviet of the Union shall be elected by constituencies with equal populations.

The Soviet of Nationalities shall be elected on the basis of the following representation: 32 deputies from each Union Republic, 11 deputies from each Autonomous Republic, five deputies from each Autonomous Region, and one deputy from each Autonomous Area.

The Soviet of the Union and the Soviet of Nationalities, upon submission by the credentials commissions elected by them, shall decide on the validity of Deputies' credentials, and, in cases in which the election law has been violated, shall declare the election of the Deputies concerned null and void.

Article 111

Each chamber of the Supreme Soviet of the U.S.S.R. shall elect a Chairman and four Vice-Chairmen.

The Chairmen of the Soviet of the Union and of the Soviet of Nationalities shall preside over the sittings of the respective chambers and conduct their affairs.

Joint sittings of the chambers of the Supreme Soviet of the U.S.S.R. shall be presided over alternately by the Chairman of the Soviet of the Union and the Chairman of the Soviet of Nationalities.

Article 112

Sessions of the Supreme Soviet of the U.S.S.R. shall be convened twice a year.

Special sessions shall be convened by the Presidium of the Supreme Soviet of the U.S.S.R. at its discretion or on the proposal of a Union Republic, or of not less than one-third of the Deputies of one of the chambers.

A session of the Supreme Soviet of the U.S.S.R. shall consist of separate and joint sittings of the chambers, and of meetings of the standing commissions of the chambers or commissions of the Supreme Soviet of the U.S.S.R. held between the sittings of the chambers. A session may be opened and closed at either separate or joint sittings of the chambers.

Article 113

The right to initiate legislation in the Supreme Soviet of the U.S.S.R. is vested in the Soviet of the Union and the Soviet of Nationalities, the Presidium of the Supreme Soviet of the U.S.S.R., the Council of Ministers of the U.S.S.R., Union Republics through their highest bodies of state authority, commissions of the Supreme Soviet of the U.S.S.R. and standing commissions of its chambers, Deputies of the Supreme Soviet of the U.S.S.R., the Supreme Court of the U.S.S.R., and the Procurator-General of the U.S.S.R.

The right to initiate legislation is also vested in public organizations through their All-Union bodies.

Article 114

Bills and other matters submitted to the Supreme Soviet of the U.S.S.R. shall be debated by its chambers at separate or joint sittings. Where necessary, a bill or other matter may be referred to one or more commissions for preliminary or additional consideration.

A law of the U.S.S.R. shall be deemed adopted when it has been passed in each chamber of the Supreme Soviet of the U.S.S.R. by a majority of the total number of its Deputies. Decisions and other acts of the Supreme Soviet of the U.S.S.R. are adopted by a majority of the total number of Deputies of the Supreme Soviet of the U.S.S.R.

Bills and other very important matters of state may be submitted for nationwide discussion by a decision of the Supreme Soviet of the U.S.S.R. or its Presidium taken on their own initiative or on the proposal of a Union Republic.

Article 115

In the event of disagreement between the Soviet of the Union and the Soviet of Nationalities, the matter at issue shall be referred for settlement to a conciliation commission formed by the chambers on a parity basis, after which it shall be considered for a second time by the Soviet of the Union and the Soviet of Nationalities at a joint sitting. If agreement is again not reached, the matter shall

be postponed for debate at the next session of the Supreme Soviet of the U.S.S.R. or submitted by the Supreme Soviet to a nationwide vote (referendum).

Article 116

Laws of the U.S.S.R. and decisions and other acts of the Supreme Soviet of the U.S.S.R. shall be published in the languages of the Union Republics over the signatures of the Chairman and Secretary of the Presidium of the Supreme Soviet of the U.S.S.R.

Article 117

A Deputy of the Supreme Soviet of the U.S.S.R. has the right to address inquiries to the Council of Ministers of the U.S.S.R., and to Ministers and the heads of other bodies formed by the Supreme Soviet of the U.S.S.R. The Council of Ministers of the U.S.S.R., or the official to whom the inquiry is addressed, is obliged to give a verbal or written reply within three days at the given session of the Supreme Soviet of the U.S.S.R.

Article 118

A Deputy of the Supreme Soviet of the U.S.S.R. may not be prosecuted, or arrested, or incur a court-imposed penalty, without the sanction of the Supreme Soviet of the U.S.S.R. or, between its sessions, of the Presidium of the Supreme Soviet of the U.S.S.R.

Article 119

The Supreme Soviet of the U.S.S.R., at a joint sitting of its chambers, shall elect a Presidium of the Supreme Soviet of the U.S.S.R., which shall be a standing body of the Supreme Soviet of the U.S.S.R., accountable to it for all its work and exercising the functions of the highest body of state authority of the U.S.S.R. between sessions of the Supreme Soviet, within the limits prescribed by the Constitution.

Article 120

The Presidium of the Supreme Soviet of the U.S.S.R. shall be elected from among the Deputies and shall consist of a Chairman, First Vice-Chairman, 15 Vice-Chairmen (one from each Union Republic), a Secretary, and 21 members.

Article 121

The Presidium of the Supreme Soviet of the U.S.S.R. shall:

1. name the date of elections to the Supreme Soviet of the U.S.S.R.;
2. convene sessions of the Supreme Soviet of the U.S.S.R.;
3. co-ordinate the work of the standing commissions of the chambers of the Supreme Soviet of the U.S.S.R.;
4. ensure observance of the Constitution of the U.S.S.R. and conformity of the Constitutions and laws of the Union Republics to the Constitution and laws of the U.S.S.R.;
5. interpret the laws of the U.S.S.R.;
6. ratify and denounce international treaties of the U.S.S.R.;
7. revoke decisions and ordinances of the Council of Ministers of the U.S.S.R. and of the Councils of Ministers of Union Republics should they fail to conform to the law;
8. institute military and diplomatic ranks and other special titles; and confer the highest military and diplomatic ranks and other special titles;
9. institute orders and medals of the U.S.S.R., and honorific titles of the U.S.S.R.; award orders and medals of the U.S.S.R.; and confer honorific titles of the U.S.S.R.;

10. grant citizenship of the U.S.S.R., and rule on matters of the renunciation or deprivation of citizenship of the U.S.S.R. and of granting asylum;
11. issue All-Union acts of amnesty and exercise the right of pardon;
12. appoint and recall diplomatic representatives of the U.S.S.R. to other countries and to international organizations;
13. receive the letters of credence and recall of the diplomatic representatives of foreign states accredited to it;
14. form the Council of Defence of the U.S.S.R. and confirm its composition; appoint and dismiss the high command of the Armed Forces of the U.S.S.R.;
15. proclaim martial law in particular localities or throughout the country in the interests of defence of the U.S.S.R.;
16. order general or partial mobilization;
17. between sessions of the Supreme Soviet of the U.S.S.R., proclaim a state of war in the event of an armed attack on the U.S.S.R., or when it is necessary to meet international treaty obligations relating to mutual defence against aggression;
18. and exercise other powers vested in it by the Constitution and laws of the U.S.S.R.

Article 122

The Presidium of the Supreme Soviet of the U.S.S.R. between sessions of the Supreme Soviet of the U.S.S.R. and subject to submission for its confirmation at the next session, shall:

1. amend existing legislative acts of the U.S.S.R. when necessary;
2. approve changes in the boundaries between Union Republics;
3. form and abolish Ministries and State Committees of the U.S.S.R. on the recommendation of the Council of Ministers of the U.S.S.R.;
4. relieve individual members of the Council of Ministers of the U.S.S.R. of their responsibilities and appoint persons to the Council of Ministers on the recommendation of the Chairman of the Council of Ministers of the U.S.S.R.

Article 123

The Presidium of the Supreme Soviet of the U.S.S.R. promulgates decrees and adopts decisions.

Article 124

On expiry of the term of the Supreme Soviet of the U.S.S.R., the Presidium of the Supreme Soviet of the U.S.S.R. shall retain its powers until the newly elected Supreme Soviet of the U.S.S.R. has elected a new Presidium.

The newly elected Supreme Soviet of the U.S.S.R. shall be convened by the outgoing Presidium of the Supreme Soviet of the U.S.S.R. within two months of the elections.

Article 125

The Soviet of the Union and the Soviet of Nationalities shall elect standing commissions from among the Deputies to make a preliminary review of matters coming within the jurisdiction of the Supreme Soviet of the U.S.S.R., to promote execution of the laws of the U.S.S.R. and other acts of the Supreme Soviet of the U.S.S.R. and its Presidium, and to check on the work of state bodies and organizations. The chambers of the Supreme Soviet of the U.S.S.R. may also set up joint commissions on a parity basis.

When it deems it necessary, the Supreme Soviet of the U.S.S.R. sets up commissions of inquiry and audit, and commissions on any other matter

All state and public bodies, organizations and officials are obliged to meet the requests of the commissions of the Supreme Soviet of the U.S.S.R. and of its chambers, and submit the requisite materials and documents to them.

The commissions' recommendations shall be subject to consideration by state and public bodies, institutions and organizations. The commissions shall be informed, within the prescribed time-limit, of the results of such consideration or of the action taken.

Article 126

The Supreme Soviet of the U.S.S.R. shall supervise the work of all state bodies accountable to it.

The Supreme Soviet of the U.S.S.R. shall form a Committee of People's Control of the U.S.S.R. to head the system of people's control.

The organization and procedure of people's control bodies are defined by the Law on People's Control in the U.S.S.R.

Article 127

The procedure of the Supreme Soviet of the U.S.S.R. and of its bodies shall be defined in the Rules and Regulations of the Supreme Soviet of the U.S.S.R. and other laws of the U.S.S.R. enacted on the basis of the Constitution of the U.S.S.R.

CHAPTER 16

THE COUNCIL OF MINISTERS OF THE U.S.S.R.

Article 128

The Council of Ministers of the U.S.S.R., i.e. the Government of the U.S.S.R., is the highest executive and administrative body of state authority of the U.S.S.R.

Article 129

The Council of Ministers of the U.S.S.R. shall be formed by the Supreme Soviet of the U.S.S.R. at a joint sitting of the Soviet of the Union and the Soviet of Nationalities, and shall consist of the Chairman of the Council of Ministers of the U.S.S.R., First Vice-Chairman and Vice-Chairmen, Ministers of the U.S.S.R., and Chairmen of State Committees of the U.S.S.R.

The Chairmen of the Councils of Ministers of Union Republics shall be *ex officio* members of the Council of Ministers of the U.S.S.R.

The Supreme Soviet of the U.S.S.R., on the recommendation of the Chairman of the Council of Ministers of the U.S.S.R., may include in the Government of the U.S.S.R. the heads of other bodies and organizations of the U.S.S.R.

The Council of Ministers of the U.S.S.R. shall tender its resignation to a newly elected Supreme Soviet of the U.S.S.R. at its first session.

Article 130

The Council of Ministers of the U.S.S.R. shall be responsible and accountable to the Supreme Soviet of the U.S.S.R. and, between sessions of the Supreme Soviet of the U.S.S.R., to the Presidium of the Supreme Soviet of the U.S.S.R.

The Council of Ministers of the U.S.S.R. shall report regularly on its work to the Supreme Soviet of the U.S.S.R.

Article 131

The Council of Ministers of the U.S.S.R. is empowered to deal with all matters of state administration within the jurisdiction of the Union of Soviet Socialist Republics insofar as, under the Constitution, they do not come within the competence of the Supreme Soviet of the

U.S.S.R. or the Presidium of the Supreme Soviet of the U.S.S.R.

Within its powers the Council of Ministers of the U.S.S.R. shall:

1. ensure direction of economic, social, and cultural development; draft and implement measures to promote the well-being and cultural development of the people, to develop science and engineering, to ensure rational exploitation and conservation of natural resources, to consolidate the monetary and credit system, to pursue a uniform prices, wages, and social security policy, and to organize state insurance and a uniform system of accounting and statistics; and organize the management of industrial, constructional, and agricultural enterprises and amalgamations, transport and communications undertakings, banks, and other organizations and institutions of All-Union subordination;
2. draft current and long-term state plans for the economic and social development of the U.S.S.R. and the Budget of the U.S.S.R., and submit them to the Supreme Soviet of the U.S.S.R.; take measures to execute the state plans and Budget; and report to the Supreme Soviet of the U.S.S.R. on the implementation of the plans and Budget;
3. implement measures to defend the interests of the state, protect socialist property and maintain public order, and guarantee and protect citizens' rights and freedoms;
4. take measures to ensure state security;
5. exercise general direction of the development of the Armed Forces of the U.S.S.R., and determine the annual contingent of citizens to be called up for active military service;
6. provide general direction in regard to relations with other states, foreign trade, and economic, scientific, technical, and cultural co-operation of the U.S.S.R. with other countries; take measures to ensure fulfilment of the U.S.S.R.'s international treaties; and ratify and denounce intergovernmental international agreements;
7. and when necessary, form committees, central boards and other departments under the Council of Ministers of the U.S.S.R. to deal with matters of economic, social and cultural development, and defence.

Article 132

A Presidium of the Council of Ministers of the U.S.S.R., consisting of the Chairman, the First Vice-Chairman, and Vice-Chairmen of the Council of Ministers of the U.S.S.R., shall function as a standing body of the Council of Ministers of the U.S.S.R. to deal with questions relating to guidance of the economy, and with other matters of state administration.

Article 133

The Council of Ministers of the U.S.S.R., on the basis of, and in pursuance of, the laws of the U.S.S.R. and other decisions of the Supreme Soviet of the U.S.S.R. and its Presidium, shall issue decisions and ordinances and verify their execution. The decisions and ordinances of the Council of Ministers of the U.S.S.R. shall be binding throughout the U.S.S.R.

Article 134

The Council of Ministers of the U.S.S.R. has the right, in matters within the jurisdiction of the Union of Soviet Socialist Republics, to suspend execution of decisions and ordinances of the Councils of Ministers of Union Republics, and to rescind acts of ministries and state committees of the U.S.S.R., and of other bodies subordinate to it.

Article 135

The Council of Ministers of the U.S.S.R. shall co-ordinate and direct the work of All-Union and Union-Republican ministries, state committees of the U.S.S.R., and other bodies subordinate to it.

All-Union ministries and state committees of the U.S.S.R. shall direct the work of the branches of administration entrusted to them, or exercise inter-branch administration, throughout the territory of the U.S.S.R. directly or through bodies set up by them.

Union-Republican ministries and state committees of the U.S.S.R. direct the work of the branches of administration entrusted to them, or exercise inter-branch administration, as a rule, through the corresponding ministries and state committees, and other bodies of Union Republics, and directly administer individual enterprises and amalgamations of Union subordination. The procedure for transferring enterprises and amalgamations from Republic or local subordination to Union subordination shall be defined by the Presidium of the Supreme Soviet of the U.S.S.R.

Ministries and state committees of the U.S.S.R. shall be responsible for the condition and development of the spheres of administration entrusted to them; within their competence, they issue orders and other acts on the basis of, and in execution of, the laws of the U.S.S.R. and other decisions of the Supreme Soviet of the U.S.S.R. and its Presidium, and of decisions and ordinances of the Council of Ministers of the U.S.S.R., and organize and verify their implementation.

Article 136

The competence of the Council of Ministers of the U.S.S.R. and its Presidium, the procedure for their work, relationships between the Council of Ministers and other state bodies, and the list of All-Union and Union-Republican ministries and state committees of the U.S.S.R. are defined, on the basis of the Constitution, in the Law on the Council of Ministers of the U.S.S.R.

VI. Basic Principles of the Structure of the Bodies of State Authority and Administration in Union Republics

CHAPTER 17

HIGHER BODIES OF STATE AUTHORITY AND ADMINISTRATION OF A UNION REPUBLIC

Article 137

The highest body of state authority of a Union Republic shall be the Supreme Soviet of that Republic.

The Supreme Soviet of a Union Republic is empowered to deal with all matters within the jurisdiction of the Republic under the Constitutions of the U.S.S.R. and the Republic.

Adoption and amendment of the Constitution of a Union Republic; endorsement of state plans for economic and social development, of the Republic's Budget, and of reports on their fulfilment; and the formation of bodies accountable to the Supreme Soviet of the Union Republic are the exclusive prerogative of that Supreme Soviet.

Laws of a Union Republic shall be enacted by the Supreme Soviet of the Union Republic or by a popular vote (referendum) held by decision of the Republic's Supreme Soviet.

Article 138

The Supreme Soviet of a Union Republic shall elect a Presidium, which is a standing body of that Supreme Soviet and accountable to it for all its work. The composition and powers of the Presidium of the Supreme Soviet of a Union Republic shall be defined in the Constitution of the Union Republic.

Article 139

The Supreme Soviet of a Union Republic shall form a Council of Ministers of the Union Republic, i.e. the Government of that Republic, which shall be the highest executive and administrative body of state authority in the Republic.

The Council of Ministers of a Union Republic shall be responsible and accountable to the Supreme Soviet of that Republic or, between sessions of the Supreme Soviet, to its Presidium.

Article 140

The Council of Ministers of a Union Republic issues decisions and ordinances on the basis of, and in pursuance of, the legislative acts of the U.S.S.R. and of the Union Republic, and of decisions and ordinances of the Council of Ministers of the U.S.S.R., and shall organize and verify their execution.

Article 141

The Council of Ministers of a Union Republic has the right to suspend the execution of decisions and ordinances of the Councils of Ministers of Autonomous Republics, to rescind the decisions and orders of the Executive Committees of Soviets of People's Deputies of Territories, Regions, and cities (i.e. cities under Republic jurisdiction) and of Autonomous Regions, and in Union Republics not divided into regions, of the Executive Committees of district and corresponding city Soviets of People's Deputies.

Article 142

The Council of Ministers of a Union Republic shall co-ordinate and direct the work of the Union-Republican and Republican ministries and of state committees of the Union Republic, and other bodies under its jurisdiction.

The Union-Republican ministries and state committees of a Union Republic shall direct the branches of administration entrusted to them, or exercise inter-branch control, and shall be subordinate to both the Council of Ministers of the Union Republic and the corresponding Union-Republican ministry or state committee of the U.S.S.R.

Republican ministries and state committees shall direct the branches of administration entrusted to them, or exercise inter-branch control, and shall be subordinate to the Council of Ministers of the Union Republic.

CHAPTER 18

HIGHER BODIES OF STATE AUTHORITY AND ADMINISTRATION OF AN AUTONOMOUS REPUBLIC

Article 143

The highest body of state authority of an Autonomous Republic shall be the Supreme Soviet of that Republic.

Adoption and amendment of the Constitution of an Autonomous Republic; endorsement of state plans for economic and social development, and of the Republic's Budget; and the formation of bodies accountable to the Supreme Soviet of the Autonomous Republic are the exclusive prerogative of that Supreme Soviet.

Laws of an Autonomous Republic shall be enacted by the Supreme Soviet of the Autonomous Republic.

Article 144

The Supreme Soviet of an Autonomous Republic shall elect a Presidium of the Supreme Soviet of the Autonomous Republic and shall form a Council of Ministers of the Autonomous Republic, i.e. the Government of that Republic.

CHAPTER 19

LOCAL BODIES OF STATE AUTHORITY
AND ADMINISTRATION

Article 145

The bodies of state authority in Territories, Regions, Autonomous Regions, Autonomous Areas, districts, cities, city districts, settlements, and rural communities shall be the corresponding Soviets of People's Deputies.

Article 146

Local Soviets of People's Deputies shall deal with all matters of local significance in accordance with the interests of the whole state and of the citizens residing in the area under their jurisdiction, implement decisions of higher bodies of state authority, guide the work of lower Soviets of People's Deputies, take part in the discussion of matters of Republican and All-Union significance, and submit their proposals concerning them.

Local Soviets of People's Deputies shall direct state, economic, social and cultural development within their territory; endorse plans for economic and social development and the local budget; exercise general guidance over state bodies, enterprises, institutions and organizations subordinate to them; ensure observance of the laws, maintenance of law and order, and protection of citizens' rights; and help strengthen the country's defence capacity.

Article 147

Within their powers, local Soviets of People's Deputies shall ensure the comprehensive, all-round economic and social development of their area; exercise control over the observance of legislation by enterprises, institutions and organizations subordinate to higher authorities and located in their area; and co-ordinate and supervise their activity as regards land use, nature conservation, building, employment of manpower, production of consumer goods, and social, cultural, communal and other services and amenities for the public.

Article 148

Local Soviets of People's Deputies shall decide matters within the powers accorded them by the legislation of the U.S.S.R. and of the appropriate Union Republic and Autonomous Republic. Their decisions shall be binding on all enterprises, institutions, and organizations located in their area and on officials and citizens.

Article 149

The executive-administrative bodies of local Soviets shall be the Executive Committees elected by them from among their deputies.

Executive Committees shall report on their work at least once a year to the Soviets that elected them and to meetings of citizens at their places of work or residence.

Article 150

Executive Committees of local Soviets of People's Deputies shall be directly accountable both to the Soviet that elected them and to the higher executive and administrative body.

VII. Justice, Arbitration, and Procurator's
Supervision

CHAPTER 20

COURTS AND ARBITRATION

Article 151

In the U.S.S.R. justice is administered only by the courts.

In the U.S.S.R. there are the following courts: the Supreme Court of the U.S.S.R., the Supreme Courts of

Union Republics, the Supreme Courts of Autonomous Republics, Territorial, Regional, and city courts, courts of Autonomous Regions, courts of Autonomous Areas, district (city) people's courts, and military tribunals in the Armed Forces.

Article 152

All courts in the U.S.S.R. shall be formed on the principle of the electiveness of judges and people's assessors.

People's judges of district (city) people's courts shall be elected for a term of five years by the citizens of the district (city) on the basis of universal, equal and direct suffrage by secret ballot. People's assessors of district (city) people's courts shall be elected for a term of two and a half years at meetings of citizens at their places of work or residence by a show of hands.

Higher courts shall be elected for a term of five years by the corresponding Soviet of People's Deputies.

The judges of military tribunals shall be elected for a term of five years by the Presidium of the Supreme Soviet of the U.S.S.R. and people's assessors for a term of two and a half years by meetings of servicemen.

Judges and people's assessors are responsible and accountable to their electors or the bodies that elected them, shall report to them, and may be recalled by them in the manner prescribed by law.

Article 153

The Supreme Court of the U.S.S.R. is the highest judicial body in the U.S.S.R. and supervises the administration of justice by the courts of the U.S.S.R. and Union Republics within the limits established by law.

The Supreme Court of the U.S.S.R. shall be elected by the Supreme Soviet of the U.S.S.R. and shall consist of a Chairman, Vice-Chairmen, members, and people's assessors. The Chairmen of the Supreme Courts of Union Republics are *ex officio* members of the Supreme Court of the U.S.S.R.

The organization and procedure of the Supreme Court of the U.S.S.R. are defined in the Law on the Supreme Court of the U.S.S.R.

Article 154

The hearing of civil and criminal cases in all courts is collegial; in courts of first instance cases are heard with the participation of people's assessors. In the administration of justice people's assessors have all the rights of a judge.

Article 155

Judges and people's assessors are independent and subject only to the law.

Article 156

Justice is administered in the U.S.S.R. on the principle of the equality of citizens before the law and the court.

Article 157

Proceedings in all courts shall be open to the public. Hearings *in camera* are only allowed in cases provided for by law, with observance of all the rules of judicial procedure.

Article 158

A defendant in a criminal action is guaranteed the right to legal assistance.

Article 159

Judicial proceedings shall be conducted in the language of the Union Republic, Autonomous Republic, Autonomous Region, or Autonomous Area, or in the language spoken by the majority of the people in the locality. Persons participating in court proceedings, who do not

know the language in which they are being conducted, shall be ensured the right to become fully acquainted with the materials in the case; the services of an interpreter during the proceedings; and the right to address the court in their own language.

Article 160

No one may be adjudged guilty of a crime and subjected to punishment as a criminal except by the sentence of a court and in conformity with the law.

Article 161

Colleges of advocates are available to give legal assistance to citizens and organizations. In cases provided for by legislation citizens shall be given legal assistance free of charge.

The organization and procedure of the bar are determined by legislation of the U.S.S.R. and Union Republics.

Article 162

Representatives of public organizations and of work collectives may take part in civil and criminal proceedings.

Article 163

Economic disputes between enterprises, institutions, and organizations are settled by state arbitration bodies within the limits of their jurisdiction.

The organization and manner of functioning of state arbitration bodies are defined in the Law on State Arbitration in the U.S.S.R.

CHAPTER 21

THE PROCURATOR'S OFFICE

Article 164

Supreme power of supervision over the strict and uniform observance of laws by all ministries, state committees and departments, enterprises, institutions and organizations, executive-administrative bodies of local Soviets of People's Deputies, collective farms, co-operatives and other public organizations, officials and citizens is vested in the Procurator-General of the U.S.S.R. and procurators subordinate to him.

Article 165

The Procurator-General of the U.S.S.R. is appointed by the Supreme Soviet of the U.S.S.R. and is responsible and accountable to it and, between sessions of the Supreme Soviet, to the Presidium of the Supreme Soviet of the U.S.S.R.

Article 166

The procurators of Union Republics, Autonomous Republics, Territories, Regions and Autonomous Regions are appointed by the Procurator-General of the U.S.S.R.

The procurators of Autonomous Areas and district and city procurators are appointed by the Procurators of Union Republics, subject to confirmation by the Procurator-General of the U.S.S.R.

Article 167

The term of office of the Procurator-General of the U.S.S.R. and all lower-ranking procurators shall be five years.

Article 168

The agencies of the Procurator's Office exercise their powers independently of any local bodies whatsoever, and are subordinate solely to the Procurator-General of the U.S.S.R.

The organization and procedure of the agencies of the Procurator's Office are defined in the Law on the Procurator's Office of the U.S.S.R.

VIII. The Emblem, Flag, Anthem and Capital of the U.S.S.R.

Article 169

The State Emblem of the Union of Soviet Socialist Republics is a hammer and sickle on a globe depicted in the rays of the sun and framed by ears of wheat, with the inscription "Workers of All Countries, Unite!" in the languages of the Union Republics. At the top of the Emblem is a five-pointed star.

Article 170

The State Flag of the Union of Soviet Socialist Republics is a rectangle of red cloth with a hammer and sickle depicted in gold in the upper corner next to the staff and with a five-pointed red star edged in gold above them. The ratio of the width of the flag to its length is 1 to 2.

Article 171

The State Anthem of the Union of Soviet Socialist Republics is confirmed by the Presidium of the Supreme Soviet of the U.S.S.R.

Article 172

The Capital of the Union of Soviet Socialist Republics is the city of Moscow.

IX. The Legal Force of the Constitution of the U.S.S.R. and Procedure for Amending the Constitution

Article 173

The Constitution of the U.S.S.R. shall have supreme legal force. All laws and other acts of state bodies shall be promulgated on the basis of and in conformity with it.

Article 174

The Constitution of the U.S.S.R. may be amended by a decision of the Supreme Soviet of the U.S.S.R. adopted by a majority of not less than two-thirds of the total number of Deputies of each of its chambers.

ALL-UNION LEGISLATURE

In the Soviet Union laws are enacted exclusively by the higher government bodies—the Supreme Soviet of the U.S.S.R. which passes All-Union laws, and the Supreme Soviets of the Union and Autonomous Republics which pass laws effective in the republics concerned. All acts of government bodies must conform precisely to law and may be abolished or altered only by law. A law is considered valid when adopted by both chambers of the U.S.S.R. Supreme Soviet, by a simple majority of each chamber (laws on amendments of the articles of the Constitution of the U.S.S.R., are adopted by a qualified majority). Validation of a law is preceded by the introduction of a bill by persons or institutions which have the right of legislative initiative. They are published not later than seven days after adoption and go into effect ten days after their publication, unless the law itself indicates otherwise. If a necessity arises to legislate in the interval between the sessions of the Supreme Soviet, this may be done by the Presidium of the Supreme Soviet in the form of a special Decree which is subject to subsequent validation by the Supreme Soviet.

The manner in which laws are passed by the Supreme Soviets of the Union and Autonomous Republics is analogous to that in which they are passed by the U.S.S.R. Supreme Soviet. Unlike All-Union laws, Republican laws are valid only on the territory of the given republic. In cases of discrepancies between a Republic and an All-Union law, the All-Union law assumes superiority. (See also the Constitution.)

SUPREME SOVIET OF THE U.S.S.R.

The Supreme Soviet adopts and repeals laws, sees that the Soviet Constitution is observed, takes decisions on the most important questions of internal and external policy, forms the leading bodies of the State, controls the work of state bodies and officials. It elects the collegiate President, forms the Soviet Government and Council of Ministers, elects the Supreme Court and appoints the Procurator-General; all these bodies are responsible to the Supreme Soviet. It is elected every five years by all citizens of 18 years and over. There are two constituent Chambers, with equal rights.

The Soviet of the Union represents the common interests of all citizens, irrespective of their nationality. The Soviet of Nationalities represents the specific interests of each nation. These two chambers are vested with equal powers to initiate legislation, have equal terms of office, simultaneous sessions. Approval of both chambers is required for a bill to be passed. They have the following permanent Commissions:

Mandate; Legislative Proposals; Planning and Budget; Foreign Affairs; Industry; Transport and Communications; Construction and Building Materials Industry; Agriculture; Public Health and Social Security; Education, Science and Culture; Trade, Domestic Services and Municipal Services; Youth; Nature Protection; Consumer Goods; Questions of Labour and Women and the Protection of Mothers and Children.

The Presidium of the Supreme Soviet is a permanent body elected by a joint meeting of the Soviet of the Union and the Soviet of Nationalities. It consists of a Chairman, a First Vice-Chairman, 15 Vice-Chairmen, a Secretary and 21 members. It is fully accountable to the Supreme Soviet; between sessions it considers and settles all the main questions of state administration and controls the work of subordinate bodies. Meetings are convened by the Chairman about every two months.

At elections in March 1979, official figures state that over 99 per cent of the electorate voted.

THE SOVIETS OF WORKING PEOPLE'S DEPUTIES

The Soviets of Working People's Deputies represent all sections of the population. The deputies attend sessions to discuss and adopt legislation, take various decisions and participate regularly in running state and public affairs.

POLITICAL ORGANIZATIONS

THE COMMUNIST PARTY

Kommunisticheskaya Partiya Sovetskovo Soyuz—KPSS
(*Communist Party of the Soviet Union—CPSU*): Central Committee, Staraya pl. 4, Moscow.

The Communist Party was founded in 1903 by V. I. Lenin following a split in the Russian Social Democratic Labour Party at its London Congress into Bolsheviks (Majority) and Mensheviks (Minority). After the October Socialist Revolution (1917) it became the Russian Communist Party. In 1925, following the creation of the U.S.S.R., the All-Union Communist Party of Bolsheviks was formed, uniting various Communist Parties of the Republics of the U.S.S.R. Since 1952 this has been called the Communist Party of the Soviet Union. According to Article 6 of the Constitution, the CPSU is the leading and guiding force of Soviet society, and the nucleus of its political system, of all state organizations and public organizations. The Communist Party follows and develops the doctrine of Marxism-Leninism.

The supreme organ of the Communist Party of the Soviet Union is the Party Congress which is convened by the Central Committee at least every five years. Congress elects the Central Committee which supervises all Party activities in the intervals between congresses and directs the work of the central state and public organizations through Party groups in them. The Central Committee elects the Political Bureau of the CPSU, the Secretariat and a general secretary, and organizes a Party Control Commission. The Central Committee sets up different Party organs and institutions and guides their activities, appoints the editorial boards of central Party newspapers and journals, allocates and controls Party funds, represents the Party in relations with other parties. It holds plenary sessions periodically to discuss vital problems of Party policy. The work of the Central Committee between plenary sessions is guided by the Political Bureau of the Committee, while the Secretariat of the Committee is responsible for routine work.

The Central Auditing Commission of the Communist Party of the Soviet Union is elected by Party congress, supervises the expeditious and proper handling of affairs by the Central bodies of the Party, audits the funds of the Central Committee of the CPSU and controls the work of its institutions (Party schools, publishing houses, etc.). The number of members of the Party Central Committee and of the Central Auditing Commission is determined by the Congress. The 26th Congress in March 1981 elected 319 members and 151 candidate members of the Central Committee and 75 members of the Central Auditing Commission.

The guiding principle of the organizational structure of the Party is democratic centralism. Party organization throughout the Soviet Union is built on the territorial-and-production principle. Each Territory, Region, District and Republic has a Party Committee representing all its Branches. All Party organizations are autonomous in the decision of local questions, unless their decisions conflict with Party policy. The Branch is the basic unit, usually embracing all the Party members in a factory, farm or other sizeable institution or group of institutions. The Branch might comprise all the members of a profession (e.g. writers) in a territory. Each Branch elects a secretary or bureau to lead its work and large Branches elect a committee and have full-time secretaries. Each of the fourteen Republican Communist Parties has as the supreme

Party organ a Congress which elects a Central Committee. The Central Committee elects a Politburo and Secretariat. The election of Party bodies is effected by secret ballot. Each Republican Party is ultimately responsible to the Central Committee and Politburo of the CPSU.

Party members are accepted on an individual basis only. Membership is confined to Soviet citizens over 18 years old accepting the Programme and Statute of the Party, fulfilling Party decisions, paying Party dues and working in one of the Party organizations. A one year candidature is demanded before admission. Each Party member and candidate is given a card. There were about 16,763,000 members and 717,759 candidate members in 1981. Workers made up 43.4 per cent of the membership of the Party and collective farmers 12.8 per cent.

Chairman of the Collegium for Criminal Cases: A. M. FILATOV.

Chairman of the Military Collegium: G. I. BUSHUEV.

The Supreme Court of the U.S.S.R. is the highest judicial organ in the U.S.S.R., exercising supervision of the judicial activities of all the judicial organs in the country. It is elected by the Supreme Soviet of the U.S.S.R. for a term of five years. The Supreme Court of the U.S.S.R. includes (ex-officio) the Chairmen of the Supreme Courts of the Union Republics. The Supreme Court of the U.S.S.R. is composed of the Plenum and three Collegia (civil cases, criminal cases and military). The Procurator-General and the Minister of Justice of the U.S.S.R. attend the sessions of the Plenum.

The judicial collegia examine protests, by way of judicial supervision, against the rulings and verdicts passed by the Supreme Courts in Union Republics. The military collegium examines appeals and protests, by way of judicial supervision, against the verdicts of military tribunals in the military districts and fleets. All collegia examine, as courts of first instance, cases of exceptional importance coming within their purview under the law. The rulings, verdicts and resolutions of the collegia could be protested by the Chairman of the Supreme Court of the U.S.S.R. or the Procurator-General of the U.S.S.R. by filing a protest to the Plenum of the Supreme Court of the U.S.S.R. The Plenum examines also the protests against the rulings of the Supreme Courts of the Union Republics, the materials pertaining to the summarization of judicial practice and judicial statistics, issues binding interpretations to the courts on questions of application of judicial practice. The Supreme Court of the U.S.S.R. makes appropriate representations to the Presidium of the Supreme Soviet of the U.S.S.R. on questions regarding the interpretation of

the laws. The Supreme Court of the U.S.S.R. has the power of legislative initiative. Cases at the Supreme Court of the U.S.S.R. are examined by a member of the court and two people's assessors, if the case is heard in the first instance. Appeals and protests are examined by three members of the Supreme Court of the U.S.S.R.

Supreme Courts are formed in Union and Autonomous Republics. They are the highest judicial organs of these Republics and exercise supervision of the activities of the judicial bodies in the given Republic. (See also Articles 151-163 of the Constitution.)

PROCURATOR

Procurator. Procurator's Offices supervise the strict observance of law by all ministerial and executive bodies, economic institutions, co-operative and public organizations, officials and individuals, through instituting criminal proceedings against guilty persons and protesting decisions infringing upon law; they exercise supervision over the legality of passing and executing sentences and observance of law in places of detention.

The Procurator-General of the U.S.S.R. and procurators subordinate to him effect prosecutions in courts. They have rights to withdraw a case from the trial for purposes of further examination, to appeal against the decisions and verdicts of courts. The participation of the procurator in court proceedings and the rights he enjoys guarantee the observance of law and the rights of the state and citizens.

Procurator's Offices perform their functions independent of any state bodies; they are subordinated only to the Procurator-General of the U.S.S.R.

The Procurator-General is elected by the U.S.S.R. Supreme Soviet for a term of five years. Procurators of Union and autonomous republics, territories, regions and autonomous regions are appointed by the Procurator-General of the U.S.S.R. for a term of five years, and procurators of towns, districts and areas are appointed by the Procurator of the Union republic. (See also Articles 164-168 of the Constitution.)

Procurator-General: ALEXANDER REKUNKOV.

RELIGION

The Council for Religious Affairs: attached to the Council of Ministers of the U.S.S.R.; Chair. VLADIMIR KUROVEDOV.

According to Article 52 of the Fundamental Law (Constitution) of the U.S.S.R., citizens are guaranteed freedom of conscience, that is, the right to profess or not to profess any religion, and to conduct religious worship or atheistic propaganda. The Church is separated from the State, and the school from the Church.

A religious community is recognized when it consists of twenty or more adherents over the age of eighteen. Places of worship, seminaries and other requirements are provided and maintained by the voluntary contributions of the adherents themselves. A considerable number of churches of various faiths have been restored since the end of the war, and there are a number of religious seminaries for the training of priests in the various religions practised in the U.S.S.R.

There are over 40 officially recognized religious groups in the Soviet Union, including the Russian Orthodox Church, the Georgian Orthodox Church, the Armenian Gregorian Church, the Roman Catholic Church, the Evangelical Lutheran Church, the Evangelical Christian Baptists, the Protestant Church, the Old Believers, the

Methodist Church, Seventh Day Adventists, Jehovah's Witnesses, the Molokani, the Moslem communities, the Jewish Religious Community and the Buddhist Religion.

THE RUSSIAN ORTHODOX CHURCH

The Russian Orthodox Church is the biggest single body among the religious cults with an estimated 30 million members. The Moscow Patriarchate publishes its own monthly magazine.

Moscow Patriarchate: Ul. Kropotkinskaya, Chisty per. 5, Moscow.

Patriarch: PIMEN, Metropolitan of Moscow and all Russia.

Holy Synod consists of seven members, four of whom are permanent—Patriarch PIMEN; the Metropolitans of Krutitsa and Kolomna (YUVENALIY), Leningrad and Novgorod (ANTONIY), Kiev and Galitsa (FILARET) and Tallin and Estonia (ALEKSEY); The Chairman of the Department for Foreign Ecclesiastic Relations of the Patriarchy: Metropolitan FILARET and the Patriarchal Administrator: Metropolitan ALEKSEY.

The Church is divided into 76 bishoprics, whose boundaries correspond to those of the territories and

republics of the U.S.S.R. It also has three exarchates: West European, Central European and American. It maintains a spiritual mission in Jerusalem and representatives in Austria and Hungary. There is a representative of the Alexandrian Orthodox Church in Odessa, and of the Antioch and Bulgarian Orthodox Churches in Moscow. There are two theological academies (the Moscow and Leningrad Academies) and theological seminaries in Moscow, Leningrad and Odessa.

THE GEORGIAN ORTHODOX CHURCH

The Georgian Orthodox Church is divided into four bishoprics.

Patriarch-Catholikos of All Georgia: ILIA II, Tbilisi, Georgian S.S.R.

THE ROMAN CATHOLIC CHURCH

The Church, with a membership of about 4 million, has an archdiocese, diocese and parishes in Lithuania, Latvia and W. Byelorussia and Ukraine. In 1981 there were 1,035 Roman Catholic churches in the U.S.S.R. There is no single administrative centre.

Metropolitan See of Riga: Apostolic Administrator: Bishop GIULIANO VARVODS, Riga 226047, Pils Iela 2, Latvia.

THE ARMENIAN GREGORIAN CHURCH

Religious centre of the Church of Armenia in the U.S.S.R.—headed by the Supreme Patriarch VAZGEN I, Catholikos of All Armenians—is the ancient city of Echmiadzin. The Church has 26 bishoprics (20 outside the U.S.S.R.). Its main following is in Armenia, Georgia and Azerbaijan.

OLD BELIEVERS (The Old Faith)

Divided into three branches: the Belokrinitsky Concord, under the Archbishop of Moscow and All-Russia, the Bezpopovtsi Concord and the Beglopovovtsi Concord. Most of the believers are in the central region of Russia, the Ukraine, Byelorussia, Moldavia and the Baltic republics.

PROTESTANT CHURCHES

The All-Union Council of Evangelical Christian Baptists unites the Baptist, Evangelical, Pentecostal and Mennonite churches in the Soviet Union. There is a religious centre in Moscow.

Chairman of the All-Union Council: ALEXEI KLIMENKO; P.O.B. 520, Moscow.

*** Evangelical Lutheran Church:** an episcopal church, with its greatest following in Latvia and Estonia.

Primate of Estonia: Archbishop EDGAR HARK.

Primate of Latvia: Archbishop Y. P. MATULIS.

Seventh-day Adventists: there are independent religious communities in a number of regions of the Soviet Union.

MOSLEMS

Moslems make up the second largest religious community in the U.S.S.R. The majority are Sunnites with a small number of Shiites, mostly in Azerbaijan. They are divided into four boards, according to the geographical and historical conditions and the existence of different sects. The four Boards are located at Tashkent (Uzbek S.S.R.), Ufa (Bashkir A.S.S.R.), Baku (Azerbaijan S.S.R.) and Makhachkala (Daghestan A.S.S.R.). A theological school is maintained in Bukhara.

Chairman of the Moslem Board of Central Asia and Kazakhstan (the biggest single grouping of Moslems, with headquarters in Tashkent): Grand Mufti ZIYAUD-DIN BABAKHANOV.

Chairman of Moslem Board of European Part of the U.S.S.R. and Siberia: Mufti TALAAT TASEEV.

Chairman of Moslem Board for Transcaucasia (Headquarters in Baku): Shaikh ALLASHUKUR PASHAYEV.

Chairman of Moslem Board for North Caucasus and Daghestan: Mufti MAHMUD QEKKIEV.

JUDAISM

There is no administrative centre, but many independent communities exist in Moscow, Kiev, and other parts of the Ukrainian and Byelorussian Republics, particularly in Lvov and Minsk, as well as in the Jewish Autonomous Region (R.S.F.S.R.), which has many Jewish settlers. There are about 2 million Jews in the Soviet Union. There is a *yeshiva* (Orthodox Jewish Seminary) in Moscow.

BUDDHISM

Buddhism is most widespread in the Buryat Autonomous Republic, where the Central Religious Board has its seat, the Tuva Autonomous Republic and the Irkutsk and Chita Regions.

Chairman of the Central Religious Board: Bandido-Khambo Lama ZHAMBAL DORZHI GAMBOYEV.

THE PRESS

Newspapers and periodicals in the Soviet Union are owned and published by various public or collective organizations, including the Communist Party, the central and local Soviets (district, city and rural councils), trade unions, co-operatives, ministries, planning organizations, cultural bodies, educational and learned institutions of all kinds, and finally, factories and collective farms. These publications cover national, provincial and local interests. *Pravda*, the largest newspaper in the Soviet Union, is printed in 44 cities; in contrast, the smallest local dailies are no more than bulletins posted on official notice-boards for public reading.

Lenin's dictum that "the Press is the most strong and powerful weapon of the Party" is the basis of the Soviet attitude to its newspapers and periodicals. Lenin believed that the Press is powerful as an organizer of the people, rallying them to the Communist cause. The purpose of the

Soviet press is to disseminate the ideas of Marxism-Leninism and to present information on life in the Soviet Union and abroad. It is its duty to encourage a proper attitude to work, an attachment to the Soviet Union and a high sense of social responsibility. In so far as no newspaper is permitted to publish anything harmful to the State or to the Communist cause, a form of censorship exists, but its use is rarely evident since the system provides reliable editors who are Party members, well acquainted with Communist ideology.

Owing to the predominantly political nature of the Soviet Press it may appear dull to Western readers. Stories are generally of a serious nature concentrating on international and government affairs; topics outside this sphere are considered trivial. There are very few entertainment features, and personalities are generally played down. Editorials are on serious topics and are given prominent

positions. Most reporting has a bias towards the Party line. Newspapers, however, are improving in appearance, with careful layout and an increasing use of photographs.

In general the Soviet Press is remarkably popular and produces about 8,000 newspapers (including 640 dailies) in 57 languages spoken in the U.S.S.R. and 9 foreign languages. There are 5,000 journals and other periodicals published in 48 languages spoken in the U.S.S.R. and 25 foreign languages. The most influential daily is *Pravda* (circ. 10,600,000), which is published 365 days a year and has a staff of over 40,000 correspondents. It is the organ of the Central Committee of the Communist Party and is essential reading for all serious Party members. It tends to stress internal matters while *Izvestia* (circ. 8,600,000), the Government newspaper, is more concerned with foreign affairs. Among the more important periodicals are *Ogonyok* and *Kommunist*, devoted mostly to internal problems, *Novoye Vremya*, *Za Rubezhom* and *Mezhdunarodnaya Zhizn*, which deal with international matters, *Krokodil*, a lively satirical magazine, *Novy Mir*, the most influential literary journal, and *Zhurnalist*, published by the Union of Journalists.

The main news agency, TASS, plays an important role in distributing by radio or telegraph foreign and domestic news to newspapers throughout the republics; it also transmits *Pravda* editorials. Much of the control of the Soviet Press is effected through strict supervision of the news agency.

PUBLISHING

There are 236 publishing houses, all under the control of the State Committee for Publishing, Printing and Bookselling; of these about one-quarter serve the whole Union, while the remainder serve the Union Republics, the Autonomous Republics or Regions, and the territories and districts. The majority of publishers cover a special field of subject matter, the leading publishers being *Nauka* which covers all sciences and the humanities; *Mir* dealing with scientific and technical books; *Khudozhestvennaya Literatura* publishing fiction; *Prosveshchenie* educational books; *Meditsina* medical literature; *Progress* language books; and *Det'skaya Literatura* publishing children's books. Republican and Regional publishers issue books and booklets of local interest.

Publishing houses function under the auspices of trade unions, the Communist Party, Young Communist League, Novosti Press Agency (publications mainly for distribution abroad) and other public organizations. Religious organizations and societies also publish their own books. The U.S.S.R. Writers' Union has its own publishing houses, the largest being *Soviet'sky Pisatel* (Soviet Writer). The Union publishes 14 journals and 73 fiction magazines centrally, as well as 60 literary magazines in the national republics and areas. There are no private publishing houses in the U.S.S.R.

All branches of publishing (books, periodicals, newspapers), means of production (printers, paper industry), and means of distribution (bookshops, libraries) are either directly or indirectly supervised by the State Committee. The Committee is composed of three editorial boards dealing with, respectively, social and political literature, fiction, and technical and scientific literature. Subject experts, such as members of the Academy of Sciences, the Union of Soviet Writers, or the Ministry of Higher Education, are consulted on the choice of manuscripts for production, and proposals for publication of certain works often originate from these bodies. The three editorial boards are composed largely of editors from the various publishing houses so that, although all proposed publications must be approved by the State Committee, the publisher still influences choice of material at this level.

Publishers plan their programmes a year in advance, forwarding a list of proposed publications to the State Committee which co-ordinates all the lists to prevent duplication. When a publisher's list has been approved, a sample number of copies is printed and distributed to prospective customers—booksellers, libraries, schools. Customers return an estimate of the number of copies they will require, the books are printed, and distributed by *Soyuz Kniga*, the state distributive organ, which has a centre in each region of the U.S.S.R.

Most bookshops in the U.S.S.R. belong to *Soyuz Kniga*

with the notable exception of chains controlled by *Nauka* and *Soviet'sky Pisatel*. Inter-regional fairs are arranged where surplus stock is sold off at full price, the principle being to re-direct the right material to the right customer. There are 14,000 bookshops besides 34,000 book kiosks (controlled by the bookshops) operating in factories, schools, and offices.

Book prices are fixed by government decree according to the type of book; educational and children's books are priced low, adult fiction higher. Most of the Soviet libraries buy their stock from *Soyuz Kniga*; thus profits gained from a flourishing library market benefit the service given to customers through the bookshops.

An author incurs no expenses involved in publishing his book. He is entitled to royalties dependent on the size, edition and nature of the book and each publishing house signs an appropriate contract with the author. To further cultural co-operation, the U.S.S.R. became party to the *Berne Convention* or the *Universal Copyright Law* following a law passed in February 1973. The Soviet Union will now recognize a foreign copyright only if the work is sent abroad "by a procedure established by legislation" and unauthorized foreign publication will be stopped.

The Soviet Union is the largest book producer in the world, accounting for one-quarter of all books produced in the world. In 1980 80,700 titles were published, amounting to a total printing of 1,760 million copies. The Soviet Union has published books in 89 languages spoken in the U.S.S.R. and in 56 foreign languages.

TRADE UNIONS

In the U.S.S.R. there are 31 branch trade unions with a total membership of 130 million (1981). There are also professional associations with over 105,000 members.

The trade unions take an active part in the social and political life of the country. They participate in the elections to organs of state power—they have the right to nominate candidates for election to Soviets; in drafting laws on production, labour, living conditions and culture; they draw broad sections of working people into industrial management, in particular through the establishment of standing production conferences. The unions prevent the violation of labour laws, settle labour disputes, conclude collective agreements with the managements of industrial enterprises, and ensure that these are fulfilled; they help factory and office workers improve their professional skills and organize training facilities for active trade union members.

The trade unions operate the system of state social insurance, the budget of which amounted to 32,340 million roubles in 1979. They keep a check on housing and the allotment of apartments, and concern themselves generally with questions of cultural and day-to-day services for the population.

The trade unions are organized on the industrial principle, i.e. all persons employed at the same factory or office belong to the same union, each trade union comprises the employees of one or several branches of the national economy.

The trade unions have a centralized organization headed by the All-Union Central Council of Trade Unions (A.U.C.C.T.U.), which convenes a Congress every five years. The last (16th) Congress took place in March 1977. The Congress elects the Central Council, which exercises authority until the next Congress. In the regions, territories, union republics and cities, the work of trade union organizations is co-ordinated by trade union councils.

TRANSPORT

RAILWAYS

Ministry of Railways: Moscow, Novo-Basmanaya 2; Minister IVAN PAVLOVSKY. Administers the railways through 26 railway boards located in the important towns.

The railway network totalled about 142,000 km. in July 1981. By the end of 1976 almost all lines were converted to electric and diesel traction and by July 1980 electrification had been completed on 42,500 km. of track, including the 5,500 km. line between Moscow and Baikal. The major project currently under construction is the 3,200-km. Baikal-Amur Mainline railway; by September 1981, 1,600 km. of track had been laid. The railways carried 55.7 per cent of the total freight turnover of the U.S.S.R., amounting to 3,435,000 million ton-km. in 1980 and 3,557 million passengers were carried.

In addition to the mainline railway network, there are underground railway systems operating in eight Soviet Cities. The largest of these is the Moscow Metro which is 182 km. long and which averages 2,132 million passenger-journeys each year. New underground railways are under construction in six other Soviet cities.

ROADS

Main highways connect Moscow with Kiev, the Crimea, Leningrad, Minsk, Riga and Warsaw, the Caucasus, Kazakhstan, Alma-Ata, Frunze and Tashkent, and with parts of Siberia.

The total length of roads was 1,405,600 km. in 1976, of which 700,000 km. were hard-surfaced by 1979.

INLAND WATERWAYS

Each Republic controls its own waterways; total length about 150,000 km., including nearly 20,000 km. of canals. River transport has always been of great importance to the U.S.S.R., and in those areas where railway lines are few it is essential. In 1980 river vessels carried about 138 million passengers. The main inland waterway systems are those of the Volga, Dnieper, Don, Ob, Yenisei, Lena, Amur and Amu-Darya. The Volga with its tributaries is the largest system and carries nearly half the cargoes; it is linked by canals to the Don and the Black Sea, the Baltic and the White Sea. The main terminal ports on the Volga-Don system are Astrakhan, Rostov-on-Don, Moscow, Perm and Leningrad; the main transfer ports are Volgograd, Saratov, Kuibyshev, Kazan, Gorky and Yaroslavl.

Several river-ports throughout the Soviet Union have

been improved, including Kotlas and Pechora. A new port is under construction at Nizhnevartovsk on the River Ob. It is due to come into service during the 1981-85 Plan period.

PRINCIPAL CANALS

Moscow-Volga Canal: 128 km. long; installations include 9 locks, 8 power stations, 5 pumping stations. It was completed in 1937, taking over four years to construct.

White Sea-Baltic Canal: 227 km. long; built in 1933, connecting the two seas.

Dnieper-Bug Canal: 202 km. long; connects the Ukraine and Byelorussia with the Baltic countries.

Kara-Kum Canal: 850 km. long; connects the Amu Darya, Tedzhen and Murgab rivers and Ashkhabad.

North-Crimean Canal: 400 km. long; irrigates the Crimean steppes with water from the Dnieper.

Volga-Baltic Canal: 362 km. long; re-constituted 1964; links the Baltic, White, Black, Caspian and Azov seas; instead of 39 locks of the old Mariinsky system there are now seven locks.

Volga-Don Canal: 101 km. long; completed May 1952.

Donets-Donbas Canal: in the Ukraine, approx. 120 km. long; completed November 1958; trebles water supply of biggest Soviet industrial area.

Golodnaya Steppe Canal: in the Uzbek S.S.R., 1,300 km. long; irrigates this largely desert region; first section of 60 km. completed in 1960.

SHIPPING

The Soviet Union has one of the largest merchant fleets in the world. It has 16 steamship companies, each specializing in a particular shipping operation. In 1980 the total displacement of the Soviet fleet reached 21.9 million gross tons (7,495 vessels), making it the sixth largest in the world (after Liberia, Japan, Greece, the United Kingdom and Norway).

Soviet companies are full members of a number of freight conferences such as Continent-Australia, Australia-Continent, Mediterranean-North Atlantic (WINAR) and the North Atlantic Passenger Conference. In 1977 the U.S.S.R. shipping companies operated 71 regular sea and ocean lines, including 35 international ocean lines. Scheduled shipping reached a total of 19 million tons.

Ministry of the Merchant Marine: Moscow 103759, Ul. Zhdanova 1/4; Minister TIMOFEY GUZHENKO.

THE UNION REPUBLICS

THE RUSSIAN SOVIET FEDERATIVE SOCIALIST REPUBLIC

(R.S.F.S.R.)

INTRODUCTION

The R.S.F.S.R., which was formed on November 7th, 1917, and joined the U.S.S.R. on December 30th, 1922, has an area of 17,075,400 sq. km. extending from the Baltic Sea and the Arctic Ocean in the north to the People's Republic of China and Mongolia in the south and the Pacific Ocean in the east. It embraces 16 Autonomous Republics, 5 Autonomous Regions and 10 National Areas; there are also 6 territories (krai) and 49 regions (oblasts). It is the biggest of the Union Republics in size and population. Out of the

total population of the R.S.F.S.R. of 139,149,000 (January 1st, 1981), 82.8 per cent are Russians, 3.7 per cent Tartars, 2.6 per cent Ukrainians and 1.3 per cent Chuvash (census 1970). There are over 60 other nationalities in the R.S.F.S.R. Moscow, the capital, has a population of 8,184,000 (1981). Other major towns include the seaports of Leningrad on the Baltic, Archangelsk on the Arctic and Vladivostok on the Sea of Japan.

AGRICULTURE

In 1976 about 10 million people were engaged in agriculture on 12,871 collective farms and 10,624 state farms. The Republic has a diversified agriculture owing to differing conditions over the vast area. The main crops are cultivated everywhere except in the northern area. Sown areas of the R.S.F.S.R. constitute 60 per cent of the sown area of the U.S.S.R. and in 1978 the total yield of grain crops was 57 per cent of that of the U.S.S.R. As for other crops,

in 1975 sugar beet comprised 26 per cent of the total yield in the U.S.S.R., sunflower 50 per cent, flax 40 per cent, potatoes 49 per cent and vegetables 44 per cent. In livestock the R.S.F.S.R. produced 50 per cent of meat, 52 per cent of milk and 58 per cent of eggs in 1978. Bee-keeping, fur farming and reindeer breeding are developed in some regions.

THE ARMENIAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Armenian Republic was formed on November 29th, 1920 and joined the U.S.S.R. on December 30th, 1922. It has an area of 29,800 sq. km. and a population of 3,119,000 (January 1st, 1981). Of these 88.6 per cent are Armenians, 5.9 per cent Azerbaizhanians, 2.7 per cent Russians and 1.5 per cent Kurds (census 1970). Yerevan, the capital, has

a population of 1,055,000 (1981). Armenia is a country of high mountains and fertile valleys, situated in the southern part of Transcaucasia. To the west, Armenia has a land frontier with Turkey and, to the south, a short frontier with Iran.

THE AZERBAIZHAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Azerbaijan Republic was formed on April 20th, 1920 and joined the U.S.S.R. on December 30th, 1922. It has an area of 86,600 sq. km. and a population of 6,203,000 (January 1st, 1981). Of these, 73.8 per cent are Azerbaijanians, 10 per cent Russians and 10 per cent Armenians (census 1970). Baku, the capital, has a population of 1,046,000 (1981). The Republic includes Nakhichevan Autonomous Republic and Nagorno-Karabakhskaya Autonomous oblast.

The Azerbaijan Republic occupies the eastern part of Transcaucasia facing the Caspian Sea. The greater part of the Republic includes the lowlands of the River Kura and the lower reaches of its tributary, the Araks. The Republic juts out into the Caspian Sea, forming the oil-rich Apsheron Peninsula. To the south is a frontier with Iran.

THE GEORGIAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION.

The Georgian Republic was formed on February 25th, 1921 and joined the U.S.S.R. on December 30th, 1922. It has an area of 69,700 sq. km. and a population of 5,071,000 (January 1st, 1981). Of these, 66.8 per cent are Georgians, 9.7 per cent Armenians, 8.5 per cent Russians, 4.6 per cent Azerbaijani, 3.2 per cent Ossetians and 1.7 per cent Abkhazians (census 1970). Tbilisi, the capital, has a population of 1,095,000 (1981). The Georgian Republic

includes the Abkhazian Autonomous Republic (capital Sukhumi), the Adjara Autonomous Republic (Batumi), and the South-Ossetian Autonomous Region (Tskhinvali). The Republic is situated in West Transcaucasia on both sides of the Suram range. A humid sub-tropical zone with luxuriant evergreen vegetation stretches along the Black Sea coast. There is a short frontier with Turkey in the south.

AGRICULTURE

Georgia's main crop is tea, accounting for 95 per cent of the Soviet Union's total output. The Republic also grows almost all the Soviet Union's tangerines and lemons and is renowned for its grapes, wines, tobaccos, essential oils and mineral waters. In areas where crops are grown, particularly

near industrial centres and on the Georgian highlands, stock is raised for meat, milk and wool.

In 1974 there were 573,000 persons engaged in agriculture on 1,159 collective farms and 269 state farms.

THE KAZAKH SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Kazakh Republic was formed as an Autonomous Republic within the Russian Federation on August 26th, 1920, and reconstituted as a Union Republic on December 5th, 1936. It has an area of 2,717,300 sq. km. and a population of 15,045,000 (January 1st, 1981). Of these, 36 per cent are Kazakhs, 40.8 per cent Russians, 6.1 per cent Ukrainians and 2.1 per cent Tatars. The population density is 5.5 persons per sq. km. Alma-Ata, the capital, has a population of 975,000 (1981). In size the Kazakh

Republic (Kazakhstan) is second only to the Russian Federation. It extends from the Volga to the Altai Mountains and from the Western Siberian plains to the Central Asian deserts. Kazakhstan has a frontier with the People's Republic of China to the south-east.

The number of towns and industrial communities in Kazakhstan has increased greatly in recent years. The Kazakh settlement of Baikonur, in the heart of the Steppe, is the launching place of the Soviet spaceships.

AGRICULTURE

Agriculture in Kazakhstan is varied and intensive. It is one of the most productive regions of the U.S.S.R. in grain and other agricultural crops.

Besides sheep and horses, cows, camels, goats, pigs and poultry are raised. Kazakhstan produced 11.8 per cent of

the Soviet Union's total yield of grain, 6.7 per cent of meat and 4.7 per cent of milk in 1978.

In 1978 there were 1,472,000 persons engaged in agriculture on 418 collective farms and 2,035 state farms.

THE KIRGHIZ SOVIET SOCIALIST REPUBLIC

INTRODUCTION

Kirghizia was made an Autonomous Republic on February 1st, 1926, and attained the status of a Union Republic on December 5th, 1936. It has an area of 198,500 sq. km. and a population of 3,655,000 (January 1st, 1981). Of these, 43.8 per cent are Kirghiz, 29.2 per cent Russians, 10.6 per cent Uzbeks, 4.1 per cent Ukrainians and 2.4 per

cent Tatars (1970 census). Frunze, the capital, has a population of 552,000 (1981). The Kirghiz Republic is situated at the junction of two gigantic mountain systems, the Tien-shan and the Pamirs, and is noted for its severe natural beauty and amazing range of climate. In the south-east there is a frontier with the People's Republic of China

AGRICULTURE

The Kirghiz were formerly wandering herdsmen. They have now settled on the land, taken up agriculture and built up their own industry. Kirghizia produces wheat, cotton, tobacco, southern hemp, kenaf, essential oil plants and poppy. Grape- and fruit-growing and silkworm breeding also have an important place in the economy.

Livestock raising is the main branch of agriculture. The wealth of the Republic is made up of its herds of cattle, flocks of fine-fleece sheep and droves of horses.

In 1974 there were 329,000 people engaged in agriculture on 225 collective farms and 121 state farms.

THE LATVIAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

Latvia became part of the Soviet Union on August 5th, 1940, the Republic having been constituted on July 21st of that year. It has an area of 63,700 sq. km. and a population of 2,538,000 (January 1st, 1981). Of these, 56.8 per cent are Letts, 29.8 per cent Russians, 4 per cent Byelorussians, 2.7 per cent Poles and 2.3 per cent Ukrainians

(census 1970). Riga, the capital, has a population of 850,000 (1981). The Latvian Republic is situated in the north-west of the Soviet Union, between Lithuania and Estonia on the Baltic coast. It is bounded on the east by the R.S.F.S.R. and on the south-east by Byelorussia.

AGRICULTURE

Latvia is a maritime country and fishing plays a big part in its economy. The Letts now catch fish not only in the Baltic but also in the Atlantic near the coasts of Canada and Africa. There has been a considerable increase in the amount of fish caught and in the output of tinned fish (herring and sprat). The raising of livestock is also impor-

tant and this is the reason for the growing number of food factories, creameries and cheese factories. In many districts there are collective farms which raise poultry and keep bees. The Republic also has silver fox and mink farms.

In 1974 there were 241,000 people engaged in agriculture on 556 collective farms and 235 state farms.

THE MOLDAVIAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Moldavian S.S.R. was formed as an Autonomous Republic on October 12th, 1924, and joined the U.S.S.R. on August 2nd, 1940. It has an area of 33,700 sq. km. and a population of 3,997,000 (January 1st, 1981). Of these, 63.9 per cent were Moldavians, 14.2 per cent Ukrainians,

12.8 per cent Russians, 3.5 per cent Gagauzi, 2.0 per cent Jews and 2.0 per cent Bulgarians (census 1979). Kishinev, the capital, has a population of 539,000 (1981). Moldavia is situated in the south-west of the Soviet Union, with Romania to the west.

AGRICULTURE

Moldavia contributes a quarter of the grape crop in the Soviet Union, half of the rose oil, and holds first place in tobacco production. In addition to grapes and fruit, the Republic raises high-grade winter wheat, maize, sunflower (the biggest industrial crop) and also sugar beet, vegetables and essential-oil plants. The growth of production of fruit, grapes, vegetables and sugar beet has led to greater development

in the food industries. Thus, Moldavia is one of the country's biggest producers of grape wines and also makes vast quantities of canned foods and essential oils.

In 1979, 39.8 per cent of the working population of Moldavia was engaged in agriculture on 417 collective farms and 368 state farms.

THE TURKMEN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Turkmen Republic was formed on October 27th, 1924. Turkmenia, the southernmost republic in the Soviet Union, is situated in the south-west of Central Asia. It is bounded on the north by the Kazakh S.S.R., on the east by the Uzbek S.S.R., on the south by Iran, and the south-east by Afghanistan. To the west lies the Caspian Sea. The Republic has an area of 488,100 sq. km. and a population of 2,900,000 (January 1st, 1981). Of these, 65.6 per cent are Turkmen, 14.5 per cent Russians, 8.3 per cent Uzbeks and 3.2 per cent Kazakhs (1970 census).

The Kara-Kum, one of the largest Central Asian deserts, occupies more than four-fifths of the territory and irrigation is therefore of prime importance to this desolate land.

The capital, Ashkhabad, has a population of 325,000 (1981).

The average population density of the Republic is five persons per sq. km. The most densely populated areas, with up to 300 inhabitants per sq. km., are the valley of the river Murgab where over a quarter of the population is concentrated, the oases in the foothills of Kopet-Dag, the strip adjoining the railway running across the south of the Republic through the oases of Ashkhabad and Tedzen, and also the lower reaches of the Amu-Dar'ya including the oasis of Tashauz. The population is extremely sparse in the vast desert lands. However, the discovery of rich deposits of petroleum, natural gas, sulphur, mineral salts and other industrial raw materials has caused many settlements to develop even in the most arid districts.

1978	34.4	8.0
1979	34.9	7.6
1980	34.3	8.3

AGRICULTURE

Agricultural areas occupy almost half of the territory. By mid-1979 more than 1,000 km. of the Great Kara-Kum Canal had been completed, from the Amu-Dar'ya river to beyond Ashkhabad. It supplies water for Ashkhabad and has already provided irrigation for more than 160,000 hectares of desert land; it is also used for shipping. Thanks to its special climatic conditions, Turkmenia is able to grow

large quantities of long-staple cotton. Other important crops grown are melons and gourds, grapes and other fruit. Sowing and cultivating are fully mechanized. Turkmenia also specializes in the breeding of astrakhan sheep and the production of raw silk.

In 1974 there were 294,000 people engaged in agriculture on 330 collective farms and 55 state farms.

THE UKRAINIAN SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Ukrainian Republic, formed on December 25th, 1917, and a member of the U.S.S.R. from December 30th, 1922, has an area of 603,700 sq. km. and a population of 50,127,000 (January 1st, 1981). Of these, 74.9 per cent are Ukrainians, 19.4 per cent Russians, 0.8 per cent Byelorussians, 0.6 per cent Moldavians and 0.6 per cent

Poles (census 1970). The capital, Kiev, has a population of 2,248,000 (1981). The Ukraine has frontiers with Poland, Czechoslovakia, Hungary and Romania, and stretches as far as the Black Sea coast.

The Ukrainian Soviet Socialist Republic is a member of the United Nations in its own right.

AGRICULTURE

The Ukraine is the second most productive agricultural area of the Soviet Union as the warm climate and black earth give high yields of diverse crops—wheat, sugar beet, maize and sunflower. About a quarter of the industrial crops and nearly a quarter of the meat and milk in the Soviet Union is produced in the Ukraine.

In 1974 there were 5,300,000 people engaged in agriculture on 8,740 collective farms and 1,635 state farms.

THE UZBEK SOVIET SOCIALIST REPUBLIC

INTRODUCTION

The Uzbek Republic was formed on October 27th, 1924. It has an area of 447,400 sq. km. and a population of 16,161,000 (January 1st, 1981). Of these, 65.5 per cent are Uzbeks, 12.5 per cent Russians, 4.9 per cent Tatars, 4.0 per cent Kazakhs, 3.8 per cent Tadzhiks and 2.0 per cent Kara-Kalpaks (census 1970). Tashkent, the capital, has a population of 1,858,000 (1981). The Auto-

nomous Soviet Socialist Republic of Kara-Kalpakia (capital Nukus) is part of the Uzbek Republic. Uzbekistan is situated in the south-eastern part of the Soviet Union, in the heart of Central Asia, and has a short frontier with Afghanistan in the south. Turkmenia lies to the south-west, Kazakhstan to the north, Kirghizia to the east and Tadzhikistan to the south.

THE UNITED KINGDOM

GREAT BRITAIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The United Kingdom of Great Britain and Northern Ireland lies in northwestern Europe. Its only land boundary is with the Republic of Ireland. Northern Ireland is a constitutionally distinct part of the United Kingdom (see pp. 1384 to 1396). Great Britain, consisting of one large island and several smaller ones, comprises England, Scotland to the north and Wales to the west. It is separated from the coast of western Europe by the English Channel to the south and by the North Sea to the east. The northern and western shores are washed by the Atlantic Ocean. Ireland lies to the west across the Irish Sea. The climate is generally temperate but variable. The average temperature is about 15°C (59°F) in summer and about 5°C (41°F) in winter. Average annual rainfall is 900 to 1,000 mm. (35 to 40 inches). The language is English, but Welsh is spoken fairly extensively in Wales. The Church of England is the established church in England. Other large Christian denominations are Roman Catholicism, Methodism, the United Reformed Church and the Baptists. The national flag (proportions 2 by 1), known as the Union Jack, is a superimposition of the red cross of Saint George of England, the white saltire of Saint Andrew of Scotland and the red saltire of Ireland, all on a blue background. The capital is London.

Recent History

After the Second World War Britain sought a new role in international affairs in the light of the emergence and ideological confrontation of the two "superpowers", the U.S.A. and the U.S.S.R. In 1945 Britain still ruled a vast Empire, and successive governments, in response both to nationalist aspirations and world pressure, gradually granted independence to the colonies. India and Pakistan became independent in 1947, and decolonization continued. By 1981 more than 30 other former British dependencies had achieved independence, nearly all of them becoming members of the Commonwealth. Although the Suez crisis of 1956 clearly signalled the end of Britain's role as a major world power, governments of both parties were slow to recognize this, with British forces continuing a nominal policing role 'East of Suez' until the early 1970s. Britain lost its dominant role in the Commonwealth, which became a free association of states, and by the end of the 1970s the country, soon due to achieve self-sufficiency in energy, looked exclusively to the European Community and the NATO alliance for its future security.

The Labour Party, led by Clement Attlee, gained a large majority in the general election of 1945 and a smaller one in 1950. Sweeping social reforms were enacted, including the establishment of the National Health Service and the nationalization of major industries and services. In 1951 a Conservative government was formed by Winston Churchill,

the wartime Prime Minister. The Conservatives remained in power for 13 years, led successively by Churchill, Sir Anthony Eden (1955-57), Harold Macmillan (1957-63) and Sir Alec Douglas-Home (1963-64). The election of October 1964 gave a small majority to the Labour Party, led by Harold Wilson. Labour were re-elected in March 1966, but in June 1970 a Conservative government under Edward Heath was returned. During this period successive governments struggled with balance of payments problems and the continued international role of sterling.

After the general election of February 1974, Harold Wilson formed a minority government; in the October elections Labour achieved a small majority in the House of Commons. The Conservatives elected Mrs. Margaret Thatcher as their leader in February 1975. Harold Wilson resigned as Prime Minister in April 1976 and was succeeded by James Callaghan, formerly Secretary of State for Foreign Affairs. The new Labour government was immediately put to the test by an extremely serious monetary crisis and the need to avoid defeat in the House of Commons. By April 1976, following a series of by-election defeats, Labour had become a minority government again. In March 1977 the Government, modifying some of its policies, formed a pact with the Liberal Party, which had enormously increased its vote in the 1974 elections but, without a system of proportional representation, held only 13 parliamentary seats. The pact ended in May 1978, with by-elections throughout the country showing a heavy loss of support for the Liberals.

In the general election of May 1979, a Conservative government under Margaret Thatcher was returned, declaring a policy of non-intervention in industry and the encouragement of private enterprise, while aiming to reduce public expenditure in both central and local government. This policy proved to be controversial because of the extent of the economic measures, especially the heavy cuts in social and civil services. The Government also came into conflict with the trades unions, particularly over the 1980 Employment Bill which encourages unions to hold secret ballots and amends the laws relating to "secondary" picketing, the "closed shop" and unfair dismissal, as well as curbing the legal immunities of union officials. During the summer of 1981 there was widespread urban rioting, attributable partly to high levels of unemployment. Criticism by Conservative ministers of the Government's policy of strict monetary control led to a Cabinet reshuffle in September.

Michael Foot was elected Labour Party leader in November 1980 following James Callaghan's resignation. The increasing prominence of the extreme left in the party in 1980 widened already-existing divisions over organizational issues, namely over control of the manifesto, compulsory re-selection of M.P.s, and the method of electing a leader. The rifts in the Party worsened with a decisive

split between left- and right-wing factions. In March 1981 the latter launched the Social Democratic Party (SDP), led collectively by four former Labour ministers. By December one Conservative and 24 Labour M.P.s had joined the SDP. A political alliance was formed with the Liberals, and the alliance's first M.P. was elected in a by-election in October. In another by-election in November the SPD won a parliamentary seat in its own right for the first time.

After long negotiations, the United Kingdom became a full member of the European Economic Community in January 1973. In the election campaigns of 1974, Labour undertook to renegotiate British terms of entry and to hold a referendum on continuing membership, which in June 1975 endorsed British membership by a large majority. Legislation providing for the direct election of members to a European Parliament was passed in 1978 and elections were held in June 1979.

In March 1972 direct rule from London was introduced in Northern Ireland, which is sharply divided between Unionists, demanding majority rule, and Catholics and other minorities insisting on power-sharing (*see* Northern Ireland, page 1384). At the end of 1973 direct rule was replaced by government under an Executive of 15 members from the three main parties in Northern Ireland. This Executive collapsed in May 1974 and the Secretary of State for Northern Ireland assumed responsibility for the Government. During 1974 the Irish Republican Army (IRA) terrorist campaign was extended to Great Britain with increased intensity, leading to the introduction in November of anti-terrorist measures and the outlawing of the IRA. With the situation in the Province remaining intractable, a constitutional conference, involving the main political parties of Northern Ireland, was held in Belfast in January 1980, but failed to achieve sufficient agreement for any of the proposed types of devolved administration to be established. The British Government continued to refuse political status to Republican prisoners in Northern Ireland, in spite of a hunger strike which began in 1980, resulting in the deaths of ten prisoners by the time it was called off in October 1981. One of the hunger strikers was elected a member of the United Kingdom Parliament in a by-election in April 1981, but died several weeks later.

Successes by the Scottish National Party in the 1974 elections induced the Government to offer greater autonomy for Scotland and Wales. However, in referenda held in the two areas in March 1979, the required majority for the Government's devolutionary proposals was not reached.

Government

The United Kingdom is a constitutional monarchy. The Sovereign is Head of the State and the monarchy is hereditary. Parliament consists of the House of Commons and the House of Lords. The 635 members of the Commons are elected for a maximum of five years by direct suffrage by all citizens of 18 years and over, using single-member constituencies. The House of Lords is composed of hereditary Peers of the Realm and Life Peers and Peeresses created by the Sovereign for outstanding public service. Legislation may be initiated in either House but it usually originates in the Commons. Each bill has three readings in the Commons and it is then passed to the House of Lords who may return it to the Commons with amendments or suggestions. The House of Lords cannot prevent any bill from becoming law once it has been passed by the Commons.

Executive power is held by the Cabinet, headed by the Prime Minister. The Cabinet is responsible to the House of Commons.

Defence

The United Kingdom is a member of the North Atlantic Treaty Organization (NATO) and maintains a regular army. The total strength of the armed forces at July 1981, including women's services and those enlisted outside Britain, was 343,646 (navy 74,687, army 176,248, air force 92,701). There is no compulsory military service. Britain possesses a nuclear deterrent. Defence expenditure for 1981/82 is estimated at £12,275 million.

Economic Affairs

The United Kingdom is one of the world's major industrial and exporting countries. In 1980 nearly 25 per cent of the G.D.P. came from manufacturing (compared with about one-third in 1970). Among the principal industries are those producing iron and steel, engineering, chemicals, electronics, motor vehicles, aircraft, textiles, clothes and other consumer goods. The coal, gas, electricity, steel, shipbuilding, aerospace (50 per cent) and atomic energy industries are nationalized, as are the railways and the largest civil aviation group.

Petroleum was first discovered under the bed of the North Sea in 1970 and production began in 1975. In 1980 80.5 million metric tons of high-quality light crude oil and gas condensates were produced by the 15 fields on stream, making Britain almost self-sufficient in oil, which provided about 37 per cent of total energy requirements. Coal also provided about 37 per cent, natural gas 21 per cent and nuclear and hydro-electric power 5 per cent. Large coal deposits were discovered in 1977 under the North Sea and in three mainland fields, and a large on-shore petroleum field was found in Dorset in 1978, extending expected energy self-sufficiency into the 1990s.

Although Britain's agriculture and trawler-fishing are highly mechanized, they account for only 2 per cent of G.D.P.; half of the country's food supplies and most of its raw materials are imported. Britain maintains a large passenger, cargo and oil tanker merchant fleet. At the end of 1975, Britain's merchant shipping fleet totalled 50 million deadweight tons, but by September 1981 had declined to 33 million deadweight tons, following sales of ships in the face of financial problems; the fleet was, however, still the fourth largest in the world.

Although Britain achieved steady economic growth from the end of the Second World War, this declined steadily in relation to other European countries, so that by the early 1970s its per caput G.N.P. was 10 per cent below the European average. Attempts to achieve higher levels of growth by stimulating demand led to repeated crises in the balance of payments and consequent squeezes on credit. Britain was affected by the world recession which followed the 1973 rise in oil prices. Production declined, unemployment rose and wages soared in response to the declining value of the pound and rising prices. The current deficit on the balance of payments increased to £3,273 million in 1974, easing to £1,521 million in 1975 and £881 million in 1976. The value of the pound fell to a record low of U.S. \$1.57 in October 1976.

There were, however, indications of economic recovery from 1977 onwards. In January 1977 international

confidence in the pound was restored by management of the economy on lines recommended by the IMF. The pound was allowed to "float" upwards against the dollar and other currencies. Record numbers of tourists, the increasing flow of oil royalties and a recovery on the stock market reduced the current deficit on the balance of payments to £41 million in 1977 and brought a return to single-figure inflation in 1978. An increase in exports and the rising production of North Sea oil strengthened the country's external position; the 1978 balance of payments showed a current surplus of £939 million. A deficit of £863 million in the 1979 balance of payments was followed by another surplus of £3,206 million in 1980, largely because, in spite of the fact that the strength of the pound put exports at a disadvantage, a fall in the volume of imports led to the first visible trade surplus since 1971. In 1979 and 1980 the pound rose, reaching its highest level for seven years against the dollar in November 1980, but in June 1981, after a decline caused by falling oil prices and high U.S. interest rates, it dropped below U.S. \$2 and continued to fall until September. As a result there was increased pressure on the Government to take Britain into the European Monetary System (to which all the other EEC members except Greece belonged) in order to stabilize sterling.

In 1979 the economy again fell into recession. Industrial production was affected by weakening demand and extensive strikes. Manufacturing output (excluding oil and gas production, which rose slightly) fell by nearly 9 per cent in 1980, while total G.D.P. fell by 2.5 per cent and was expected to fall by a further 2 per cent in 1981. Inflation fell from 21 per cent in May 1980 to below 11 per cent in July 1981, but unemployment rose by 1.6 million between mid-1979 and mid-1981, affecting 12.4 per cent of the workforce (almost three million) in September 1981. The first of 11 "Enterprise Zones" was inaugurated at Swansea in June 1981; it was hoped that the scheme would renew industrial and commercial activity in a number of selected inner city areas by offering exemption from rates and development land tax.

Transport and Communications

Railways in Britain cover some 18,361 route kilometres. Of these British Rail operate 17,735 route kilometres. In 1979 British Rail carried 736 million passengers and 169 million metric tons of freight. The London Transport Executive operates by far the largest urban passenger transport undertaking in the world and in 1979 its buses carried 1,234 million passengers while its Underground, the oldest and most extensive in the world, operated over 388 route kilometres and carried 594 million passengers. Total road length in Great Britain was 336,543 kilometres in 1979, including 2,415 kilometres of motorway, and road transport accounted for 77 per cent of freight movement and 92 per cent of passenger travel. A four-year road programme costing £800 million was launched in 1980, giving priority to improving industrial and port routes. Navigable inland waterways extend for just over 4,000 kilometres. There are over 400 ports, of which London, Milford Haven, the Tees and Hartlepool ports, the Forth ports, Grimsby and Immingham, Southampton, Sullom Voe, the Medway ports, Dover, Felixstowe and Liverpool are the busiest. Britain is linked to the continent of Europe by an extensive passenger and vehicle ship ferry

service. British Rail, besides having a fairly large share of this business, also runs hovercraft services which carry passengers and vehicles to France. In addition to many international air services into and out of the country an internal air network operates from 21 main commercial airports.

Social Welfare

The National Insurance Scheme was started in 1948 and is run by the Department of Health and Social Security, through 520 local offices; the Department of Employment acts as agents in administering unemployment benefit. The scheme is compulsory for most working people over 16 and under minimum pension age (which is 65 for men, 60 for women). Employers and employees make earnings-related contributions. The scheme insures against loss of income due to sickness, unemployment and maternity and provides retirement pensions and widows' benefits, maternity benefits, child and guardian allowances, death and industrial injury benefits.

Child benefit is payable for all children, and certain one-parent families are entitled to an extra allowance for their first or only child. The family income supplement is payable to families with at least one child, where the head of the family is in full-time employment and where the family income is below a certain level. Mobility allowance for those unable or virtually unable to walk owing to physical disablement, attendance allowance for those needing frequent attention or continual supervision and invalid care allowance for those attending them are among provisions for the severely disabled. Supplementary benefit is available to people of pensionable age, and those below pension age not in full-time work, who are not entitled to (or who need more than) the National Insurance benefit, to bring their income up to a certain level.

The National Health Service is a comprehensive health service, not based on an insurance scheme, which everyone ordinarily resident in the United Kingdom may use. Apart from charges (from which there are certain exemptions) for such things as prescriptions, dental treatment and spectacles, the service is free. Most of the cost of the service is met from taxation, the remainder (about 10 per cent) being made up from the proportion of national insurance contributions allocated to the health service. In the financial year ending March 31st, 1981, the gross cost of health and personal social services in Great Britain was estimated at £14,200 million.

Education

Education is compulsory from the age of five to an appropriate school-leaving date in relation to the 16th birthday. Responsibility for education is devolved to a certain extent in that the Secretary of State for Education and Science is responsible for all aspects of education in England and for universities throughout Great Britain while the Secretary of State for Wales is responsible for non-university education in Wales. The Secretaries of State for Scotland and Northern Ireland have full educational responsibilities, except for universities in the case of Scotland.

Secondary education generally begins at the age of 11. In the state-maintained system, there has been since the mid-1960s a steady replacement of the grammar and

* Figures relate to the imports c.i.f., including landing charges, and the exports (including re-exports) f.o.b., excluding purchase tax, of the whole United Kingdom (including Northern Ireland) plus the Isle of Man and the Channel Islands. The coverage includes certain goods imported and exported temporarily (such as animals for breeding and racing or commercial samples on loan) and German War reparations in kind (except ships and boats). Figures exclude trade in unwrought refined gold bullion and (prior to 1978) other gold, aircraft and sea-going vessels (except ships for breaking up and newly-built vessels and aircraft) and stores for naval, military and air forces carried on government vessels. Imports also exclude fissionable materials (including uranium ore and concentrates), the improvement and repair trade in aircraft (prior to 1978), and naval, military and air equipment imported from the U.S.A. under the Mutual Defence Assistance Agreement. Exports also exclude military aircraft delivered to foreign armed forces stationed in the United Kingdom, fish landed abroad directly from British fishing vessels and certain minor categories of military goods on government account. No adjustment has been made for the under-recording of exports (£20 million in 1973; £82 million in 1974; £77 million in 1976; £231 million in 1977; £112 million in 1978).

THE CONSTITUTION

THE United Kingdom is a Constitutional Monarchy. In the ninth century, when England was first united under a Saxon King, the Monarchy was the only central power and the Constitution did not exist. Today, the Sovereign acts on the advice of her Ministers which she cannot, constitutionally, ignore; power, which has been at various times and in varying degrees in the hands of kings, feudal barons, ministers, councils and parliaments, or of particular groups or sections of society, is vested in the people as a whole; and the Sovereign is an essential part of the machinery of government which has gradually been devised to give expression to the popular will.

Both the powers of the Government and the functions of the Sovereign are determined by the Constitution, by the body of fundamental principles on which the State is governed and the methods, institutions and procedures which give them effect. But the United Kingdom has no written Constitution. There is no document, no one law or statute, to which reference can be made. The Constitution is organic; it is an accumulation of convention, precedent and tradition which, although continually changing as the times change, is at any one moment binding and exact.

Some of the principles and many of the practices are secured by Statute, some are avowed by Declaration or Manifesto and many are incorporated in the Common Law; the Reform Bill of 1832 dramatically broadened the basis of representative government and prepared the way for further changes; the Bill of Rights of 1689 ended the long era of rivalry between Crown and Parliament and began the story of their co-operation; and Magna Carta, in 1215, began the process by which the law of the land acquired a status of its own, independent of King and Parliament. The Constitution is, above all, based on usage. It has been modified to match changing customs and to meet successive situations. Any one Parliament could, if it chose, revise or repeal every law and disown every convention that has constitutional significance. It could destroy the whole fabric of political and social existence, including its own; because, according to the Constitution, Parliament, which represents the people, is supreme. The work of one Parliament is not binding on its successors, except in so far as changes must be made by constitutional means. Parliament cannot disobey the law, but it can change it.

It would be impossible to enumerate the principles which are extant in the British Constitution. It would also be misleading, because declarations of general principles are quite out of character. In constitutional as in legal practice, the way has been to admit the general principle in quite practical terms related to specific practical problems: the *Habeas Corpus* Act, which establishes the principle of no imprisonment without trial, makes no mention of the principle itself but lays down in most concrete terms the punishments that shall be inflicted on a judge, or other law officer, if he fails to issue the Writ (commanding the prisoner to be brought before the court) when applied for. The principles of the Constitution and constitutional practice are in fact inherent in the Common Law on the one hand and in the structure, functions and procedures of the various instruments of government on the other: of the Crown, of Parliament, of the Privy Council, of the Government and the Cabinet and of the Government Departments.

THE SOVEREIGN

The monarchy is hereditary, descending to the sons of the Sovereign in order of seniority or, if there are no sons, to the daughters.

Her constitutional position as head of the state, quite apart from her position as Head of the Commonwealth, demands of the Queen that she keep herself informed on all aspects of the life of her subjects, that she maintain absolute impartiality and that she should personally visit the different parts of her realm as often as it is possible for her to do so, but she has also quite specific functions, all exercised on ministerial advice: she summons, prorogues and dissolves Parliament; she must give Royal Assent to a Bill which has passed through both Houses of Parliament, before it becomes law; she is head of the judiciary (although the judiciary is now quite independent of the executive); she appoints all important state officials, including judges, officers of the forces and representatives abroad, and she confers honours and awards. Her formal consent is necessary before a Minister can take up office or a Cabinet be formed; and before a Treaty may be concluded, war declared or peace made. These are some of the more essential functions. But the Queen has also endless residuary responsibilities, such as the guardianship of infants and persons of unsound mind, the creation of corporations, granting of printing rights for the Bible and Prayer Book and for state documents; and her signature and consent are necessary to many important state papers. Constitutional government cannot in fact be carried on without her, so much so that provision has been made by Act of Parliament for the appointment of a Regent should the Sovereign be incapacitated or under age and for Counsellors of State to act in the temporary absence of the Queen.

PARLIAMENT

The Queen in Parliament—the House of Commons and the House of Lords—is the supreme legislative authority in the United Kingdom. Under the Parliament Act of 1911 the maximum life of one Parliament was fixed at five years: if, that is, Parliament has not meanwhile been dissolved for any other reason, such as the fall of the government in power, then a general election is at the end of five years necessary by law. During its lifetime, the power of Parliament is theoretically absolute; it can make or unmake any law. In practice, of course, it must take account of the electorate. Parliament is prorogued at intervals during its life, which therefore consists of a number of sessions; by present custom, a session has normally 160 sitting days and is divided into five periods: from November (when the session is opened) until Christmas (about 30 days), from January till Easter (50), from Easter till Whitsun (30), from Whitsun until the end of July (40) and 10 days in October.

The House of Commons. The House of Commons has 635 members, each elected for one geographical constituency. The Speaker, who is elected by the members immediately a new parliament meets, presides. Members of Parliament may be elected either at a general election or at a by-election (held in the event of the death, resignation or expulsion of the sitting member) and in either case hold their seats during the life of the existing parliament. All British subjects over 18 (and subjects of any Commonwealth country and of the Irish Republic who are resident in the United Kingdom) have the vote unless legally barred (e.g. for insanity). Anyone who has the vote may stand as a candidate for election except clergymen of the Church of England, the established Churches of Scotland and Northern Ireland and the Roman Catholic Church, and certain officers of the Crown; Civil Servants must resign from the Service if they wish to stand as a Member of Parliament.

The House of Lords. There are over 1,000 peers who have the right to a seat in the House of Lords, including Princes of the Royal Blood (who, by tradition, take no part in the proceedings); hereditary peers of England and of the United Kingdom (peerages created since the Act of Union of England and Scotland of 1707 are all peerages of the United Kingdom); several Lords of Appeal in Ordinary (appointed for life to carry out the judicial duties of the House); Scottish peers; created life peers and life peeresses; and the two archbishops and the twenty-four senior bishops of the Church of England. All except the spiritual, judicial and life peerages are hereditary. The Lord Chancellor is the Speaker of the House. The 1963 Peerage Act made three main amendments to the Constitution: (1) An hereditary peerage may be disclaimed by the holder for the duration of his lifetime. The peerage can be reclaimed at his death by his heir, but he himself cannot reclaim it. (2) All Scottish peers, instead of only sixteen representatives, and (3) peeresses in their own right, may take their seats in the House of Lords.

The Party System. Members of Parliament whose views coincide form groups which agree in each case to support the policies put forward by their chosen leaders, and to present a common front on all important issues both in Parliament and to the electorate. This system evolved during the seventeenth and eighteenth centuries and is now essential to the working of the British Constitution.

Under the party system, the Queen sends for the leader of the party which wins the majority of seats (although not necessarily of votes) at a general election and asks him to form a Government. The party which wins the second largest number of seats forms the Opposition, which has quite specific functions. Members of other minority parties and independents may support the Government or Opposition as they choose. Each party has its own Whips, officials whose duty it is to arrange, in consultation with the Whips of other parties, matters of procedure and organization, to see to it that Members attend debates and to muster for their party its maximum voting strength, and each has its own national and local organizations outside Parliament.

Parliamentary Procedure. Parliamentary procedure, like the Constitution itself, is determined by rules, customs, forms and practices which have accumulated over many centuries. The Speaker is responsible for their application, and generally for controlling the course of business and debates in the house.

It is the duty of Parliament to make the laws which govern the life of the community, to appropriate the necessary funds for the various services of state and to criticise and control the Government. Parliament is also consulted before the ratification of certain international treaties and agreements.

Legislation may with some exceptions be initiated in either House and on either side of the House. In practice, most Public Bills are introduced into the House of Commons by the Government in power (the chief exceptions are Private Members' Bills) as the result of Cabinet decisions. Each Bill which is passed by the Commons at its third reading is sent to the House of Lords, who either accept it or return it to the Commons with suggested amendments. The Lords cannot in any instance prevent Bills passed by the Commons from becoming law: over Money Bills or Bills affecting the duration of Parliament they have no power at all, and by the Parliament Act of 1949 any other Bill

passed by the Commons in two successive sessions may be presented for Royal Assent without the consent of the Lords provided one year has elapsed between the date of the second reading in the Commons and the date of its final passing. In practice, the House of Lords is extremely unlikely to push things thus far, and its main function is to scrutinize the work of the Commons, to caution and suggest. Bills of a non-controversial kind are sometimes introduced initially in the House of Lords.

THE PRIVY COUNCIL

The power of the Privy Council has declined with the development of the Cabinet and its main function today is to give effect to decisions made elsewhere. There are at present over 300 Privy Counsellors, including Cabinet Ministers (who are automatically created Privy Counsellors), and people who have reached eminence in some branch of public affairs. Meetings are presided over by the Queen, and the responsible Minister is the Lord President of the Council, an office which since 1600 has always been held by a member of the party in power, who is usually also a leading member of the Cabinet. The Privy Council is responsible for making Orders in Council, of which there are two kinds, those made in virtue of the Royal prerogative, e.g. the ratification of treaties, and those which are authorized by Act of Parliament and are in fact a form of delegated legislation. It has also various advisory functions which cover such subjects as scientific, industrial, medical and agricultural research. An important organ of the Privy Council is the Judicial Committee.

HER MAJESTY'S GOVERNMENT

The Government is headed by the Prime Minister, who is also the leader of the Party which holds the majority in the House of Commons. It includes Ministers who are in charge of Government departments and those who hold traditional offices which involve no special departmental duties; the Chancellor of the Exchequer and the Lord Chancellor, who are specially responsible for financial and economic, and legal affairs respectively, the law officers of the Crown (the Attorney-General and Solicitor-General, the Lord Advocate for Scotland and the Solicitor-General for Scotland), the Ministers of State, who are usually appointed to assist Ministers in charge of departments, and Parliamentary Secretaries and Under-Secretaries.

The Cabinet. The Cabinet system developed during the eighteenth century from the informal meetings of Privy Counsellors who were also Ministers and who formed a committee of manageable size which, it was gradually realized, could take decisions far more quickly and simply than larger bodies. The Cabinet today has between 15-25 members at the discretion of the Prime Minister—its main duty is to formulate policy for submission to Parliament.

Ministerial responsibility. The doctrine of ministerial responsibility has also evolved gradually but was generally accepted by the middle of the last century. Each Minister must take full responsibility for the work of his own department, particularly in Parliament; if his department fails over any important matter, he will be expected to resign. Ministers also assume collective responsibility for the work of the Government and for any advice which it may offer to the Crown.

POLITICAL PARTIES

The Conservative and Unionist Party: 32 Smith Square, London, SW1P 3HH; f. 1870. The aims of the Conservative Party are to uphold the Crown and the Constitution; to build a sound economy based on freedom and competition; to encourage personal responsibility and a wider spread of ownership of property; to look after those most in need; to ensure respect for law and order; to improve educational standards and widen parents' choice; to strengthen Britain's defences, maintain its interests and increase its influence abroad, not least through commitment to the EEC; Chair. CECIL PARKINSON; Leader MARGARET THATCHER.

The Labour Party: 150 Walworth Rd., London, S.E.17; f. 1900; total individual and affiliated membership 6,811,270 (1980). The Labour Party is a democratic socialist party. Its central ideal is the brotherhood of man. Its purpose is to make this ideal a reality everywhere. It rejects discrimination on grounds of race, colour or creed, stands for the right of all peoples to freedom, independence and self-government, pledges itself to support the United Nations Charter and to work for world disarmament. It affirms the duty of richer nations to assist poorer ones, stands for social justice and the creation of a socialist community with a classless society and planned economy. It stands for democracy in industry and the expansion of common ownership, the protection of all citizens from any exercise of arbitrary power. It seeks to obtain and hold power only through free democratic institutions. Relations with the Trades Union Congress and the Co-operative movement are maintained through the National Council of Labour, representing the T.U.C. General Council, the National Executive of the Labour Party (Chair. Dame JUDITH HART, D.B.E.), the Parliamentary Labour Party (Chair. JOHN DORMAND) and the Co-operative Union. Gen. Sec. R. G. JUDICIAL SYSTEM

There are three sources of the law as administered in the law courts today: Statute Law, which is written law and consists mainly of Acts of Parliament, Common Law, which originated in ancient usage and has not been formally enacted, and Equity.

Scottish common and statute law differ in some respects from that current in the rest of the United Kingdom, owing to Scotland's retention of her own legal system under the Act of Union with England of 1707.

Three factors help to ensure a fair trial: the independence of judges, who are outside the control of the executive and can be removed from office only after an address from Parliament to her Majesty; the participation of private citizens in all important criminal and some civil cases, in the form of a summoned jury of twelve persons, who judge, if necessary by a majority, the facts of a case, questions of law being decided by the judge; and the system of appeals to a higher court, including the Criminal and Civil Division of the Court of Appeal, and, thereafter, the House of Lords.

MAGISTRATES' COURTS or PETTY SESSIONS

The criminal courts of lowest jurisdiction are presided over by Justices of the Peace, who are unpaid laymen appointed by the Lord Chancellor. They have power to try all non-indictable offences, and some of the less serious indictable offences, if the accused so desires. The trial of nearly all criminal offences begins in the Magistrates' Court. The vast majority of committals for trial are carried out under the Criminal Justice Act of 1967, which does not require the magistrate to consider the evidence. There are only a few cases in which full committals of the pre-Criminal Justice Act era are now necessary.

In London and in certain other large towns there are professional salaried magistrates, known as metropolitan stipendiary magistrates in London and as stipendiary magistrates in the provinces, who sit alone, whereas lay justices cannot when acting judicially.

Juvenile Courts, composed of specially qualified justices selected by the justices of each petty sessional division (in London, by the Lord Chancellor), have power to try most charges against children under seventeen. The general public is excluded and there are restrictions on newspaper reports of the proceedings.

Magistrates also have power to grant, renew, transfer or remove or order the forfeiture of licences for the sale of intoxicating drinks, and to control the structural design of licensed premises where intoxicating liquor is sold for consumption on the premises. They also control the licensing of betting shops, and grant bookmakers' permits.

COUNTY COURTS

A high proportion of civil actions are tried in these courts, which are presided over by a circuit judge, or, in some cases, a county court registrar, sitting alone. Subjects coming under the jurisdiction of county courts include rent restrictions, certain cases under the Landlord and Tenant Act, 1954, and all civil cases where the sum in dispute is not more than £5,000. The jurisdiction may be increased by the consent of the parties and in certain other special cases. Some county courts also have jurisdiction in divorce matters, and undefended divorce cases are heard by a judge in these courts.

THE CROWN COURT

The Crown Court came into being on January 1st, 1972, under the Courts Act 1971 and replaced Quarter Sessions and Assizes, abolished by the Act. A trial by jury of all indictable criminal cases takes place in the Crown Court, sitting at various centres throughout the country. Court centres have been administratively divided into three tiers. The most serious offences are tried at first and second tier centres presided over by High Court Judges, Circuit Judges or Recorders. Circuit Judges or Recorders preside over third tier centres where the less serious offences are tried. High Court Judges sitting at first tier centres may also hear civil matters. The Crown Court for the City of London is the Central Criminal Court (The Old Bailey).

HIGH COURT OF JUSTICE

Certain civil cases are heard in the three divisions of this court—Chancery, Queen's Bench and Family. The Chancery Division deals with litigation about property, patents, family trusts, companies, dissolution of partnerships and disputed estates. The Queen's Bench Division hears cases involving damage to property, personal injuries, etc. and also includes the Admiralty Court. The Family Division hears contested or complex divorce and

SCOTTISH JUDICIAL SYSTEM

CRIMINAL COURTS

Minor offences are dealt with in District courts.

SHERIFF COURT

Most criminal actions, including all but the most serious offences, are tried in this court. Each of the six sheriffdoms of Scotland has a Sheriff Principal and a number of Sheriffs, who hear the cases.

HIGH COURT OF JUSTICIARY

The supreme criminal court in Scotland and all the most serious criminal cases are taken there. Appeal may be made to it from the Sheriff Court and from the District courts; there is, however, no further appeal to the House of Lords.

The judges of this court are known as Lords Commissioners of Justiciary and are headed by the Lord Justice General. Apart from their criminal jurisdiction in this court, these same twenty-one judges are also judges of the Court of Session (see below) in civil cases. The Lord Justice General is also the President of the Court of Session.

CIVIL COURTS

SHERIFF COURT

Hears civil as well as criminal cases, and in civil cases its jurisdiction is practically unlimited. Appeal may be made to the Court of Session or the Sheriff Principal.

COURT OF SESSION

This is the supreme civil court in Scotland. It has an Inner House and an Outer House.

INNER HOUSE. Has two divisions of equal standing, each consisting of four judges under the presidency of the Lord President and the Lord Justice Clerk respectively; it is mainly an appeal court, whence further appeal may be made to the House of Lords.

First Division:

Lord Justice General and President of the Court of Session:

Rt. Hon. The Lord EMSLIE, M.B.E.

THE CHURCH OF ENGLAND

The Church of England is the Established Church, and as such acknowledges the authority of Parliament in matters in which secular authority is competent to exercise control. Queen Elizabeth I was declared "supreme Governor on Earth" of the Church of England, and the Sovereign is consecrated to this office at coronation.

In England, there are two Provinces, Canterbury and York. The former contains 29, the latter 14, dioceses. Each Province has its ancient Convocations, an Upper and Lower House. By the Enabling Act the Constitution of the

National Assembly of the Church of England ("Church Assembly") received statutory recognition in 1920, with power, subject to the control and authority of Parliament, of initiating legislation on all matters concerning the Church of England. Measures passed by the Assembly and approved by Parliament, are submitted for the Royal Assent, and have the force of Acts of Parliament.

In 1970 by the Synodical Government Measure 1969 the Church Assembly was reconstituted as the General Synod and was also given authority to exercise most of the functions of the Convocations. The House of Bishops consists of members of the Upper House of the Convocations (52 persons). The House of Clergy consists of the members of the Lower Houses (a maximum of 251 persons). The House of Laity consists almost entirely of representatives of the dioceses elected by the deanery synods (a maximum of 251 persons).

THE CHURCH IN WALES

The Province of Wales was created as a result of the Welsh Church Act of 1914, which took effect on March 31st, 1920, and separated the four Welsh Dioceses from the Province of Canterbury. It is divided into 6 Dioceses served by 860 clergy. The number of Easter communicants is approximately 133,000.

The Church in Wales has an administrative Governing Body which is a legislative assembly composed of bishops, clergy and laity, and a Representative Body incorporated by Royal Charter, which holds and manages the property and central funds of the Church.

THE PRESS

(Except where otherwise stated, addresses are in London.)

The United Kingdom has some of the highest circulation figures in the world for individual newspapers (*Daily Mirror* 3.6 million, *The Sun* 4.2 million, *News of the World* 4.5 million). Daily newspaper readership is dominated by nine dailies with a national distribution and combined circulation of over 14 million.

There is no law which specifies the operations of the Press but several items of legislation bear directly on press activities.

Although exact reporting of legal proceedings appearing at the time of trial is protected from later charges of defamation, the freedom to report cases is subject to certain restrictions as defined in the Judicial Proceedings Act of 1926, in the Children's and Young Persons' Act of 1933 and in the Criminal Justice Act 1967.

The strict laws of contempt of court and of libel somewhat limit the scope of the Press. Journalists are subject to the former if they publish material liable to interfere with a matter which is *sub judice*, but this law is qualified by the Administration of Justice Act of 1960 which declares an editor not guilty of contempt if, after taking reasonable care, he remained ignorant of the fact that proceedings were pending. The Scottish law of contempt is more severe than the English.

In recent years libel cases involving the awarding of extremely punitive damages against the Press have taken place. The Defamation Act of 1952 lessened the possible repercussions of unintentional libel and made provision for the claim of fair comment by the defence.

The Official Secrets Act of 1911 prohibits the publication of secret information where this is judged not to be in the national interest. The Secretary of State is empowered to require a person with information about a violation of the Act to disclose his source. Journalists have no exemption here.

The publication of morally objectionable and harmful material is treated in the Children's and Young Persons' (Harmful Publications) Act of 1955 and in the Obscene Publications Act.

In recent years legislative measures have been taken to limit the excessive development of concentrations of newspaper ownership and the extent of the control by newspaper owners over other mass media such as the television. The Television Act of 1964 provides for intervention by the Postmaster-General or the Independent Television Authority where investments by newspaper owners in television companies are judged liable to lead to abuses. The Monopolies and Mergers Act of 1965 requires the written consent of the Board of Trade for the transfer of daily or weekly papers with an aggregate average of over 500,000 copies per day of publication. The Board's decision is based on the conclusions of the Monopolies Commission to which, with exception of cases of papers judged to be uneconomical and of papers with an average daily circulation of no more than 25,000 copies, all cases are referred for investigation.

The Press Council is a non-statutory association of newspaper editors, publishers, journalists' organizations and lay members which though having no legal powers has acquired considerable standing as an adjudicating body on Press conduct.

Although many British newspapers are owned by individual publishers the great rate of news consumption has fostered the growth of large national groups or chains of

papers controlled by a single organization or individual. The six largest of these chains are as follows:

Associated Newspapers Group Ltd.: Carmelite House, EC4 oJA; Chair. Viscount ROTHERMERE; controls one national daily (*Daily Mail*) and one national weekly (*Weekend*); and through the Northcliffe Newspaper Group Ltd. 13 evening papers, 1 morning paper and several weeklies.

Express Newspapers: Fleet St., E.C.4; subsidiary of Trafalgar House; Chair. and Chief Exec. Lord MATTHEWS; controls *Daily Express*, *Daily Star*, *The Standard* (London), and *Sunday Express*.

Mirror Group Newspapers Ltd.: Holborn Circus, EC1P 1DQ; subsidiary of Reed International Ltd.; Chair. ANTHONY MILES; Chief Exec. DOUGLAS LONG; controls two national daily papers (*Daily Mirror*, *Sporting Life*), two national Sunday papers (*Sunday People*, *Sunday Mirror*), provincial newspapers (including two Scottish national papers *Daily Record* and *Sunday Mail*).

News Group Newspapers Ltd.: 30 Bouverie St., London, E.C.4; Chair. RUPERT MURDOCH; controls *The Times*, *The Sun* and *News of the World*.

Thomson Regional Newspapers Ltd.: Greater London House, Hampstead Rd., N.W.1; subsidiary of Thomson British Holdings Ltd.; Chair. C. N. D. COLE; controls 23 daily and weekly papers in England, 8 (including *The Scotsman*) in Scotland, 11 in Wales and 4 in Northern Ireland.

United Newspapers Publications Ltd.: 23-27 Tudor St., EC4Y oHR; Chair. DAVID R. STEVENS; controls 9 provincial dailies (7 evening and 2 morning), and 42 provincial weekly papers; publishes *Punch*, *The Countryman*, and four farming journals.

No newspaper is directly owned by a political party. The *Morning Star*, closely related to the British Communist Party, is effectively owned by the People's Press Printing Society, a co-operative society with 30,000 mems. Several influential newspapers are owned and operated by trusts or independent companies, notably *The Observer* and *The Economist*.

Among the most influential newspapers may be included: *The Times*, *The Guardian*, *The Daily Telegraph* and *Financial Times* (daily), *The Observer*, *The Sunday Times* and *Sunday Telegraph* (Sunday newspapers). Prominent among the popular press are: *Daily Mirror*, *Daily Express* and *The Sun* (daily), *Sunday Mirror*, *News of the World* and *Sunday Telegraph* (Sunday newspapers), *Woman and Woman's Own* (weekly magazines), which together with *Radio Times* and *TVTimes* represent the most widely distributed newspapers and magazines.

THE PRESS COUNCIL

1 Salisbury Square, London, E.C.4.

The Press Council, a voluntary body consisting of an independent chairman, eighteen lay-members and eighteen members nominated by the Newspaper Publishers Association, the Newspaper Society, the Scottish Daily Newspaper Society, the Scottish Newspaper Proprietors' Association, the Periodical Publishers Association, the National Union of Journalists, the Institute of Journalists and the Guild of British Newspaper Editors, was set up in June 1953 and reconstituted in July 1963, July 1973 and July 1978. Its principal aims are to safeguard the freedom of the Press, to maintain its highest professional and commercial standards, to deal with any complaints it may receive about the conduct of the Press or of any persons towards the Press, to keep under review developments likely to restrict the supply of information of public interest and importance and to report publicly on developments that may tend towards greater concentration or monopoly in the Press.

RADIO AND TELEVISION

British Broadcasting Corporation (BBC): Broadcasting House, London, W1A 1AA; Chair. GEORGE HOWARD; Dir.-Gen. Sir IAN TRETHOWAN (until August 1982, then ALASDAIR MILNE); Deputy Dir.-Gen. and Man. Dir. Television ALASDAIR MILNE; Man. Dir. External Broadcasting, DOUGLAS MUGGERIDGE; Man. Dir. Radio AUBREY SINGER.

The BBC was founded in 1922 and operates under Royal Charter and a licence from the Secretary of State for Home Affairs. It is financed by television licence fees, less Post Office expenses.

The number of television licences at June 1981, was 4,784,552 for black and white, and 13,905,594 for colour.

Independent Broadcasting Authority (IBA): 70 Brompton Rd., Knightsbridge, London, SW3 1EY; f. 1954; Chair. Rt. Hon. Lord THOMSON of MONIFIETH, K.T.; Dir.-Gen. Sir BRIAN YOUNG; Dir. of Television COLIN SHAW; Dir. of Radio JOHN THOMPSON; Head of Information BARBARA HOSKING.

The Authority was created by Parliament in 1954 as the Independent Television Authority, to provide a comprehensive television service additional to that of the BBC. Under the terms of the Sound Broadcasting Act 1972, the Authority was renamed the Independent Broadcasting Authority and its functions were extended to cover the provision of Independent Local Radio. The Broadcasting Act 1980 provided for the setting up of the Channel Four Television company as a subsidiary of the IBA; it was due to start broadcasting in England, Scotland and Northern Ireland in November 1982. A separate Welsh Fourth Channel Authority has also been established by this Act.

The Authority selects and appoints the programme companies; supervises the programmes provided by the contractors and their scheduling; controls advertising, and builds, owns and operates transmitting stations. Fifteen television programme companies provide programmes in the 14 independent television regions of the United Kingdom (two companies share the contract for London). In December 1980, as part of its review of the ITV system, the Authority offered a contract to broadcast a new national breakfast-time television service, to start in May 1983, to TV-AM. In addition, changes were made to some ITV companies. In September 1981 30 Independent Local Radio stations provided a programme service in 29 areas of the United Kingdom (two companies operating in London). A further 39 stations are due to come on the air during the 1980s. Both ITV and ILR are financed by the sale of advertising time.

RADIO
BBC

Domestic services

BBC Radio provides a service of four national networks throughout the United Kingdom, 22 local radio stations in England, Radio Scotland, Radio Wales, Radio Cymru, broadcasting in Welsh, and Radio Ulster.

Radio 1 on 275 metres and 285 metres broadcasts about 12 hours a day of "pop" music programmes.

Radio 2 on 330 metres and 433 metres and stereo VHF provides "middle of the road" music and light entertainment; it is the main channel for sports programmes.

Radio 3 on 247 metres and stereo VHF provides classical music, drama, talks and documentaries.

Radio 4 on long wave and VHF is a mixed network including entertainment and drama, and the main channel for the coverage of news and current affairs. Schools programmes are broadcast on Radio 4 VHF.

External services

The World Service (in English) is broadcast for 24 hours daily and directed to all areas of the world in turn. In addition there are special services to:

The Far East In Burmese, Cantonese, Indonesian, Japanese, Standard Chinese, Malay, Thai, Vietnamese.

FINANCE

The United Kingdom's central bank is the Bank of England, which was established by Act of Parliament and Royal Charter in 1694 and nationalized under the Bank of England Act 1946. The Scottish and Northern Ireland banks issue their own notes but these are largely covered by holdings of Bank of England notes.

The *Bank of England* is responsible for advising the Government on the formulation of monetary policy and for its subsequent execution. It holds the main government accounts, acts as registrar of government stocks and as agent of the Government for a number of financial operations, including the management of the Exchange Equalization Account. It is also banker to a number of commercial banks. The London clearing banks maintain a substantial proportion of their total cash holdings in the form of balances at the Bank and these are used in the settlement of the daily cheque and credit clearings.

The *commercial banks* may be divided into two broad categories: clearing banks and other banks.

The *clearing banks* are divided into the six London clearing banks, which cover England and Wales, the three Scottish clearing banks and the four Northern Ireland banks. These banks play the main part in operating the money transmission system throughout the U.K. At mid-September 1979 the London clearing banks held deposits totalling approximately £35,000 million, the Scottish clearing banks some £4,000 million, and the Northern Ireland banks about £1,000 million.

The *other banks* can be divided into accepting houses (taking their name from their business of accepting bills of exchange for payment) and other U.K.-owned banks, overseas-owned banks and consortium banks. The accepting houses and some of the U.K.-owned banks are specialists in bill finance, new issues and company finance.

Consortium banks have been formed in the U.K. by groups of banks, mostly from overseas, but including some British clearing banks. Initially they were set up to afford shareholders access to the Eurocurrency markets. More recently, consortia have been formed as a means of combining institutions from similar geographical areas, when a London operation would be uneconomic for individual banks. Consortium banks are important participants in the major inter-bank markets in sterling and currency deposits and certificates of deposit.

The *Discount Houses* are a specialized group of institutions peculiar to London. They raise the greater part of their funds from within the banking sector. These funds are borrowed by the Houses at call or short notice (thereby providing the lending banks with a highly liquid interest-bearing investment) and are used to purchase correspondingly liquid assets—mainly Treasury and commercial bills, short-dated government stocks, certificates of deposit, local authority debt, etc.

As a result of England's lead in international trade and finance during and after the industrial revolution, several countries tended to use sterling rather than their national currency for international trading transactions and maintained their central currency reserve in London. These countries pegged their currency exchange rate to the pound sterling when the gold standard was abandoned by the United Kingdom in 1931; the pound was devalued by 30.5 per cent in 1949, and by 14.3 per cent in 1967. In June 1972 the pound was floated and, by December 1981, it had not returned to a fixed parity. Since 1958 sterling has been, for non-residents, freely transferable and convertible into other currencies. The United Kingdom's official reserves, comprising gold, convertible currencies and special drawing rights on the International Monetary Fund, are held in the Exchange Equalization Account operated since 1932 by the Bank of England as agent for the Treasury.

The *London Gold Market* evolved in the days of the Australian and Canadian gold rushes in the 19th century, and it remains the leading free market of the world. There are five members of the Market who are present at the two daily price fixings, although all authorized banks may deal in the commodity.

The *building society movement* is important both as a medium of savings (the largest in the U.K.) and for the finance of house purchase in a country where over 50 per cent of dwellings are owner-occupied. There were 316 societies in December 1978 of which ten accounted for over 70 per cent of funds invested by the public in this way.

National Savings are shared between the Department for National Savings and the Trustee Savings Banks. Through the Department for National Savings the Government administers the National Savings Bank "investment" and "ordinary" accounts, National Savings certificates, Premium bonds and other securities, all aimed primarily at the small saver. The outlets for these services are some 22,000 post offices in the U.K. National savings securities can also be bought through Trustee Savings Banks and other banks. The Trustee Savings scheme was started in the 19th century, and at the end of 1977 there were 19 banks with 1,700 offices and some 13 million accounts.

In 1968 a new service, the *Post Office Giro*, was opened to provide a cheap credit transfer and postal cheque service for its account holders, most of whom would not also have bank accounts. In 1978 it changed its name to National Girobank.

There are certain institutions set up to provide finance for specific purposes; the more important of these are Finance for Industry and its two main subsidiaries the Finance Corporation for Industry (capital for large corporations) FFI (U.K. Finance), formerly the Industrial and Commercial Finance Corporation (capital for technical innovation and small companies), the Common-

wealth Development Finance Company (investment of private capital in Commonwealth and other countries' development schemes) and the Agricultural Mortgage Corporation (loans against mortgages on agricultural property).

The main capital market is the *Stock Exchange*. About 10,000 securities are traded, and an options market was opened in 1978.

The U.K. has a highly developed *insurance* market, located primarily in London. Lloyd's, with its unique system of underwriting syndicates (of which there are about 330, with over 14,000 members) has an international reputation for marine, aviation and other types of insurance; most of its premium income comes from outside the U.K. The bulk of the domestic insurance market is shared, through the 265 accredited Lloyds brokerage houses, between about 100 of the 600 (approximately) insurance companies operating in the U.K. which also do a lot of international business. These companies are important for both their general and their life-assurance business.

The *Banking Act*, which grew out of the 1973/74 secondary banking crisis, provides a statutory framework for the supervision of the banking sector. It came into force on October 1st, 1979, and lays down a two-tier system of "recognized banks" and "licensed deposit-taking institutions"; banks and other institutions wishing to take deposits were to apply for authorization by April 1st, 1980, and institutions which had not applied by that date were then to stop taking deposits. In April 1981 the Bank of England published a list of 281 recognized banks and 297 licensed deposit-takers.

SHIPPING

PORTS

There are over 400 ports in the United Kingdom of which London, Milford Haven, the Tees and Hartlepool ports, the Forth ports, Grimsby and Immingham, Southampton, Sullom Voe, the Medway ports and Liverpool are the largest (in terms of the tonnage of goods traffic handled). Nineteen ports, including Southampton, Grimsby and Immingham and five ports in South Wales, are nationally owned and administered by the British Transport Docks Board. The majority of the large ports are owned and operated by public trusts, including London, which is administered by the Port of London Authority, and Belfast, administered by the Belfast Harbour Commission. Sullom Voe, Bristol, and a number of smaller ports are under the control of local authorities, and there are over a hundred ports, owned and administered by statutory or private companies; of these Felixstowe, Liverpool (owned by Mersey Docks and Harbour Company) and Manchester are the largest. In July 1981 Felixstowe overtook London as the country's chief container port when a new terminus was opened, enabling it to handle 750,000 containers a year.

ATOMIC ENERGY

United Kingdom Atomic Energy Authority (UKAEA): 11 Charles II St., London, SW1Y 4QP; f. 1954 Chair. Dr. WALTER MARSHALL, C.B.E., F.R.S.; Dir. G. H. KINCHIN; publ. *Atom* (monthly).

The Authority was created in 1954 to take responsibility for the rapidly growing programme of research and development into all aspects of atomic energy. The Authority is a public corporation with a structure akin to that of a big industrial organization rather than a government Department.

The Authority is responsible for research and development on reactor systems for the generation of electricity; this has included the construction of prototypes. The Authority's role is fourfold: first, their stewardship on behalf of the Government in atomic affairs generally; secondly, research into new reactor systems and safety and environmental matters; thirdly, continuing research and development support for the British nuclear industry and, fourthly, research using the Authority's special expertise and skills in areas outside the nuclear power field.

Its establishments are as follows:

Safety and Reliability Directorate, Wigshaw Lane, Culcheth, Warrington, Cheshire, WA3 4NE; Dir. G. H. KINCHIN.

Risley Nuclear Power Development Establishment, Warrington, Cheshire, WA3 6AT; Man. Dir. Dr. T. N. MARSHAM, C.B.E.

Risley Nuclear Power Development Laboratories, Risley, Warrington, Cheshire, WA3 6AT; Head Dr. R. W. NICHOLS.

Springfields Nuclear Power Development Laboratories, Springfields, Salwick, Preston, Lancs., PR4 0RR; Head D. O. PICKMAN.

Windscale Nuclear Power Development Laboratories, Windscale, Sellafield, Seascale, Cumbria, CA20 1PF; Head Dr. H. LAWTON.

Atomic Energy Research Establishment, Harwell, Didcot, Oxfordshire, OX11 0RA; Dir. Dr. L. E. J. ROBERTS, C.B.E.

Culham Laboratory, Abingdon, Oxfordshire, OX14 3DB; Dir. W. M. LOMER.

Atomic Energy Establishment, Winfrith, Dorchester, Dorset, DT2 8DH; Dir. H. CARTWRIGHT, C.B.E.; Deputy Dir. Dr. J. E. R. HOLMES.

Amersham International Ltd.: Amersham, Bucks.; f. 1940; previously part of the UKAEA, est. (as The Radiochemical Centre Ltd.) as a limited company under the Atomic Energy Authority Act 1971; produces and markets throughout the world a wide range of radioactive products for use in industry, medicine and research; Chair. Sir JOHN HILL; Man. Dir. Dr. J. S. BURGESS, F.R.S.C.

British Nuclear Fuels Limited (BNFL): Risley, Warrington, Cheshire; f. 1971 to take over all the nuclear fuel business of the Production Group of the UKAEA; BNFL is a member of United Reprocessors G.m.b.H., an international reprocessing company with equal French/Federal German/British shareholding; Man. Dir. C. ALLDAY, C.B.E.

UNITED KINGDOM (GREAT BRITAIN)

Atomic Energy

Sellafield Works: Seascale, Cumbria; Gen. Mans. J. DORAN (Windscale); M. J. WYATT (Calder and Chapelcross).

Reprocessing of irradiated nuclear fuels and manufacture of plutonium and plutonium oxide fuels. Windscale will provide a large part of the reprocessing capacity for United Reprocessors G.m.b.H.

Springfields Works: Salwick, Preston, Lancashire; Gen. Man. G. E. STEELE.

Uranium ore treatment, uranium fuel element manufacture and uranium hexafluoride production.

Capenhurst Works: Chester, Cheshire; Gen. Man. Dr. R. M. HORSLEY.

Operation of a gaseous diffusion plant producing enriched uranium. A plant using an alternative gas centrifuge process is now operational. This forms part of the collaborative project between the U.K., the Netherlands and Federal Germany (see co-operation below).

National Nuclear Corporation: 1 Stanhope Gate, London, W.1; f. 1973 as the monopoly supplier and contractor for nuclear stations in the U.K., aiming to promote and develop the nuclear power industry; Chair. FRANK GIBB; Man. Dir. Dr. NED FRANKLIN.

Nuclear Power Programme

Calder Hall, opened in 1956, was the world's first commercial-scale nuclear power station. In 1959 the UKAEA commissioned another four-reactor station at Chapelcross, Scotland.

Nuclear power stations based on the Calder Hall 'magnox' concept, but built for the generating boards by the British nuclear industry, now have an installed capacity of more than 5000 MW(e). The first two, Berkeley (Gloucestershire) and Bradwell (Essex), started to produce electricity in 1962 and the others, at Hinkley Point 'A' (Somerset), Trawsfynydd (Merionethshire), Dungeness 'A' (Kent), Sizewell (Suffolk), Oldbury-on-Severn (Gloucestershire), Hunterston (Ayrshire), and Wylfa (Anglesey), were all on load by 1971.

Stations based on the Authority's advanced gas-cooled reactor will provide 6,000 MW(e) when completed. The first two, AGRs at Hinkley Point, Somerset and at Hunterston, Ayrshire, are now in operation, while a further three stations were expected to start operating in 1982. At the end of 1980 nuclear power accounted for

14 per cent of all electricity generated in England and Wales, and a rather higher percentage in Scotland.

International co-operation

The U.K. continues to support the activities of the IAEA. Support is also given to OECD activities through the Nuclear Energy Agency and the U.K. participates in the NEA/IAEA and WHO/FAO food irradiation project based on Karlsruhe.

U.K. collaboration in the nuclear field is maintained with countries of the Commonwealth, Europe, including the European Economic Community, Latin America, Japan, the U.S.A. and the U.S.S.R., through bilateral and other agreements for the exchange of information, attachment of personnel, visits and other reciprocal arrangements. This collaboration extends over a wide variety of topics, including thermal and fast reactor systems development, reactor safety, fuel enrichment and reprocessing, fusion research and other research and development.

NUCLEAR POWER STATIONS OWNED AND OPERATED BY THE CENTRAL ELECTRICITY GENERATING BOARD

Stations operating, showing declared net capacity:

Berkeley: Power 276 MW.
Bradwell: Power 250 MW.
Dungeness A: Power 410 MW.
Hinkley Point A: Power 430 MW.
Hinkley Point B: Power 800 MW (partly commissioned).
Sizewell: Power 420 MW.
Trawsfynydd: Power 390 MW.
Olebury-on-Severn: Power 416 MW.
Wylfa: Power 840 MW.

Stations under construction:

Dungeness B: Power 1,200 MW; start-up date 1982.
Hartlepool: Power 1,320 MW; start-up date 1982.
Heysham: Power 1,320 MW; start-up date 1982.

NUCLEAR POWER STATIONS OWNED AND OPERATED BY THE SOUTH OF SCOTLAND ELECTRICITY BOARD

Hunterston A: Power 300 MW.
Hunterston B: Power 1,320 MW.

NORTHERN IRELAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Northern Ireland is situated in the north-east of Ireland and forms part of the United Kingdom of Great Britain and Northern Ireland. It comprises the six Ulster counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone. The rest of the island comprises the Republic of Ireland. The climate is mild and temperate. It is characterized by freedom from extremes of temperature. The language is English. There are approximately two Protestants to every one Roman Catholic. The flag is the union flag of the United Kingdom. The capital is Belfast.

Recent History

The sectarian tension that has characterized Ireland's history began with the first major settlement by British Protestants in the 17th century. The main area of Protestant colonization was the province of Ulster, comprising nine counties in the north-east of Ireland. Protestant supremacy over the indigenous Catholics was established and in 1801 Great Britain absorbed Ireland into the new United Kingdom.

The resentment of the dispossessed Catholics came to a head in 1916 with the Easter uprising in Dublin. Administrative division of the country was implemented and the Government of Ireland Act of 1920 provided for two parliaments in Ireland, one in Dublin for 26 of the 32 counties and one in Belfast for the other six (mainly Protestant-populated) counties, known today as Northern Ireland. The presence of a large Catholic minority, traditionally deprived of many civil rights, has led to a continuance of tension. The Catholic community's sense of injustice is expressed in its most extreme form by the outlawed Irish Republican Army (IRA) and its political wing *Sinn Féin*, which favours union with the Republic of Ireland, while the Protestant "loyalists" wish to remain a self-governing part of the United Kingdom.

In the late 1960s increasing agitation for civil rights (particularly with regard to housing discrimination and the property qualification which deprived many Catholics of the right to vote in local government elections) led to rioting and to acts of sabotage by the IRA. In 1969 British troops were called in to take responsibility for security. Brian Faulkner, who became Prime Minister of Northern Ireland in 1971, established internment without trial for terrorists. These measures led to an increase in violence and to the banding together of Protestants in paramilitary groups. In March 1972 the British Government prorogued the Northern Ireland Parliament and introduced direct rule from Westminster, which alienated many Protestants. A referendum held in March 1973 showed that a majority of the electorate (57 per cent) wished to remain part of the United Kingdom. A 78-member Assembly for Northern Ireland was established, and the three main parties formed the first-ever coalition Government in the Province. A 15-member Northern Ireland Executive, with Brian Faulkner at its head, took office on January 1st, 1974.

As a result of talks in December 1973 at Sunningdale, England, between the British and Irish Governments and the Northern Ireland Executive, joint declarations were made by the British and Irish Governments that the status of Northern Ireland could not be changed without the consent of the majority in the Province, and it was agreed that a Council of Ireland comprising a Council of Ministers of seven members each from the Irish Government and the new Executive, together with a Consultative Assembly, would be set up as soon as possible. Following a vote in favour of the Sunningdale Agreement in the Northern Ireland Assembly in May 1974, a Protestant organization, the Ulster Workers' Council, declared a general strike which led to widespread disruption, the declaration of a state of emergency and the collapse two weeks later of the Northern Ireland Executive, followed by the proroguing of the Assembly. The Executive's functions were taken over by the Secretary of State for Northern Ireland. In July the Northern Ireland Act 1974 provided for the election of a Constitutional Convention to determine the general opinion in Northern Ireland on future constitutional and government institutions, with the provision that any proposals must include power-sharing between the ruling Ulster Unionists and the Catholic minority. The Convention, elected in May 1975, reported in November, with a majority firmly opposed to power-sharing. The Convention's conclusions were considered unacceptable by the Westminster Government, and, after further fruitless discussions, the Convention was dissolved in March 1976.

Although the number of deaths due to sectarian violence did not again reach the 1972 level of 467, killings and terrorist activities continued throughout the decade. Political status for prisoners claiming a political motive for their crime, introduced in 1972, was abolished in 1976, a move which prompted the Republican "dirty protest" at the Maze prison, near Belfast, begun in 1977. A hunger strike begun by seven Republican prisoners in the Maze was called off in December 1980 following government assurances about improvements in prison conditions. However, Provisional IRA prisoners renewed the hunger strike in March 1981. One of the strikers, Robert Sands, was elected an M.P. in a by-election in April for the United Kingdom House of Commons (until his death in May), while two others were elected to the Irish *Dáil* (lower legislative house) in June. An upsurge of violence in Northern Ireland and worldwide publicity accompanied the strike, but the Government repeatedly affirmed that political status would not be re-introduced. In October 1981, after ten deaths by fasting, *Sinn Féin* announced the end of the strike.

The establishment of an Anglo-Irish inter-governmental council in November 1981 was seen as a threat by extreme Unionists, in spite of the British Government's assurance that this would have no effect on Northern Ireland's constitutional position. The murder of an Ulster Unionist M.P. a week later was attributed by the Irish Prime

Minister to the IRA's desire to disrupt improving Anglo-Irish relations, and it was feared that an increase in retaliatory violence would follow.

Government

After the collapse of the Northern Ireland Executive in May 1974, the Northern Ireland Act 1974 made the Secretary of State for Northern Ireland and his ministers answerable to Parliament at Westminster for the government of Northern Ireland.

Northern Ireland also returns 12 members to the United Kingdom Parliament; with the Redistribution of Seats Act at the end of 1979, Westminster accepted recommendations that this number be increased to 17.

Economic Affairs

Northern Ireland has experienced significant changes in its economy since the 1950s. The former dependence on the three major industries of shipbuilding, linen and agriculture has diminished greatly and the service sector has become increasingly important in recent years as the main source of employment growth. Within manufacturing, the Government's industrial development programme has sought to diversify and strengthen the economic base. This has been achieved by the encouragement of a continuing inflow of new investment, not only by U.K. companies, but also by major American and European firms, in such industries as car manufacturing, chemicals, rubber products, man-made fibres and engineering.

This injection of new industry, and the encouragement of expansion in local firms, has provided an important stimulus to output, productivity and incomes in the region, and has assisted in narrowing the gap between living standards in Northern Ireland and the rest of the U.K. However, a sizeable gap remains, and average personal disposable income per head in 1980 was little more than 80 per cent of the national average. From 1970 onwards the task of narrowing this gap became more difficult, due to the combined effects of the civil disturbances and the world recession.

Buoyant investment interest in Northern Ireland from 1978 to 1980 enabled the promotion of over 17,000 new jobs in projects assisted under the industrial development programme, but continued progress in 1981 was halted by the renewed recession. Unemployment during the first half of 1981 averaged 17½ per cent and industrial production was 12 per cent below the same period of 1980. In August 1981 it was announced that an Industrial Development Board for Northern Ireland would be set up the following April to replace existing development bodies and provide a unified system for attracting investment. The region's economic performance is closely related to that of the U.K. as a whole and the immediate prospects for improvement depend heavily on the extent of economic recovery at national level.

Defence

All matters of defence come under the jurisdiction of the United Kingdom Parliament.

Transport and Communications

The Northern Ireland Railways Co. Ltd. provides services on 337 km. (210 miles) of railways and there were 14,549 miles of road, including 67 miles of motorway, in 1979. There are frequent shipping services to Great Britain for freight but the only passenger service to England ceased operating in November 1981. Air services operate from Belfast to Heathrow, and between 22 other airports on the mainland.

Social Welfare

There is a comprehensive system of health and personal social services similar to that in Great Britain, managed on behalf of the Department of Health and Social Services by four Health and Social Services Boards and by the Central Services Agency.

Education

Education is compulsory between the ages of 5 and 16 and is free in primary, secondary (intermediate) and special schools; fees are payable in all grammar schools but the great majority of the pupils in their secondary departments have their tuition fees paid by the local education authorities.

There are two universities in Northern Ireland—Queen's University, Belfast, and the New University of Ulster, Coleraine. Teacher training is catered for in three general colleges of education and in the departments of education of Ulster Polytechnic and the universities.

Tourism

Income from tourism has been severely affected by violence and terrorism, although during 1979 and 1980 there were encouraging signs of the Province's return to popularity as a holiday destination. In 1969 there were over two million visitors, whereas in 1980 the total number of tourists was 710,000, producing revenue of £54 million. The majority of visitors are from Great Britain though an increasing number come from the rest of Europe and North America. It is recognized that the number of tourists visiting the Province is unlikely to exceed 750,000 until peace returns to the community.

Public Holidays

The main public holidays are the same as for Great Britain with the addition of March 17th (St. Patrick's Day) and July 12th (Battle of the Boyne).

Weights and Measures

The Imperial System of weights and measures is gradually being replaced by the metric system. (*See* under Great Britain.)

CONSTITUTION AND GOVERNMENT

After the collapse of the Northern Ireland Executive and the proroguing of the Northern Ireland Assembly in May 1974, the Northern Ireland Act of July 1974 made the Secretary of State for Northern Ireland and his ministers responsible to the United Kingdom Parliament at Westminster for the Government of Northern Ireland.

(December 1981)

Secretary of State for Northern Ireland: Rt. Hon. JAMES PRIOR.

Minister of State and Deputy to the Secretary of State: Earl of GOWRIE, responsible for prisons, police administration, compensation for criminal injuries, Department of Finance and Department of the Civil Service; spokesman on all Northern Ireland matters in the House of Lords.

Minister of State: Hon. ADAM BUTLER, responsible for Departments of Agriculture, Commerce and Manpower Services.

Parliamentary Under-Secretaries of State: DAVID MITCHELL (Environment), Dr. JOHN PATTEN (Health and Social Services, spokesman in House of Commons for all matters for which the Minister of State is responsible), NICHOLAS SCOTT (Education).

POLITICAL PARTIES

Alliance Party: 88 University St., Belfast, BT7 1HE; f. 1970; non-sectarian and non-doctrinaire party of the centre; third largest political party in Northern Ireland, attracting support from within both Catholic and Protestant sections of the community; Leader OLIVER NAPIER; Deputy Leader DAVID COOK; Gen. Sec. JOHN CUSHNAHAN; publ. *Alliance* (monthly).

Unionist Party of Northern Ireland: f. 1974; comprises Unionists who support partnership with political representatives of the religious minority to form a stable government for Northern Ireland within the U.K.; pro-European right-of-centre policies; Leader ANNE DICKSON; Chair. R. A. E. MAGEE, M.B., F.R.C.S., F.R.C.O.G.

JUDICIAL SYSTEM

The judicial system of Northern Ireland, so far as the Supreme Court is concerned, is a miniature of the English system, and is based on the Supreme Court established in Ireland in 1877 on the model of the Supreme Court in England. It consists, as in England, of a High Court, a Court of Appeal, and a Crown Court which has jurisdiction in criminal matters. A Court of Criminal Appeal was established in 1930, also on the English pattern, but is now abolished and its jurisdiction is merged with that of the Court of Appeal. The county court system corresponds to its English prototype. County court judges and recorders of boroughs share with the judges of the High Court the exercise of the jurisdiction of the Crown Court. The jurisdiction of the courts of summary jurisdiction is exercised by a permanent judiciary of resident magistrates.

The Lord Chief Justice of Northern Ireland: The Rt. Hon. The Lord LOWRY.

Court of Appeal:

UNITED KINGDOM CROWN DEPENDENCIES

The Isle of Man and the Channel Islands lie off-shore from the United Kingdom but are not integral parts of the country. They are dependencies of the British Crown and have considerable self-government in internal affairs.

THE ISLE OF MAN

The Isle of Man lies in the Irish Sea between the Cumbrian coast of England and Northern Ireland. It is a dependency of the Crown and does not form part of the United Kingdom. It has its own legislative assembly and legal and administrative systems, its laws depending for this validity on Orders made by the Queen in Council. Her Majesty's Government in the United Kingdom is responsible for the defence and international relations of the island, and the Crown is ultimately responsible for its good government. However, control of direct taxation is exercised by the Manx government, and although most rates of indirect taxation are the same on the island as in the United Kingdom, provisions for divergence of rates have been enacted.

THE CONSTITUTION

The Isle of Man is governed by its own laws. Tynwald is the legislative body, and consists of both branches of the Legislature, that is, the Legislative Council and the House of Keys, sitting together as one body, but voting separately on all questions except, in certain eventualities, the appointment of Boards of Tynwald. The House of Keys has 24 members chosen by adult suffrage for five years. The Legislative Council is composed of a President, the Lieut.-Governor, the Lord Bishop of Sodor and Man, the Attorney-General and eight members elected by the House of Keys. Customs duties, some indirect taxation and income-tax come within the province of Tynwald. The Isle of Man Act, 1958, gave the Tynwald greater control of Fiscal matters. An Executive Council of five members of the House of Keys and two of the Legislative Council was set up in 1961, to act with the Governor.

THE GOVERNMENT

(December 1981)

HEAD OF STATE

Lord of Man: H.M. Queen ELIZABETH II.

THE LEGISLATIVE COUNCIL (Upper House)

The Lieutenant-Governor: Sir NIGEL CECIL, K.B.E., C.B.

The Lord Bishop of Sodor and Man: Rt. Rev. VERNON SAMSON NICHOLLS.

President of the Council: J. A. NIVISON, C.B.E.

The Attorney-General: T. W. CAIN.

JUDICIAL SYSTEM

The Isle of Man is, for legal purposes, an independent sovereign country under the British Crown, with its own Legislature and its own Judiciary administering its own common or customary and statute law. The law of the Isle of Man is, in most essential matters, the same as the law of England and general principles of equity administered by the English Courts are followed by the Courts of the Isle of Man unless they conflict with established local precedents. Her Majesty's High Court of Justice of the Isle of Man is based upon the English system but modified and simplified to meet local conditions. Justices of the Peace are appointed by the Lord Chancellor of England usually on the nomination of the Lieutenant Governor. Members of the Legislative Council, the High Bailiff, Deputy High Bailiff and the Mayor of Douglas, and the Chairman of the Town and Village Commissioners are *ex-officio* J.P.s.

First Deemster and Clerk of the Rolls: A. C. LUFT.

Second Deemster: J. W. CORRIN.

Judge of Appeal: B. A. HYTNER, Q.C.

RELIGION

THE CHURCH OF ENGLAND

There are 27 parishes in the Isle of Man. The parish church at Peel was designated a cathedral in 1980.

Lord Bishop of Sodor and Man: Rt. Rev. V. S. NICHOLLS, Bishop's House, Quarterbridge Rd., Douglas.

There are also congregations of the following denominations: Baptist, Congregational, Independent Methodist, Methodist, Presbyterian, Roman Catholic, and Society of Friends; also Christian Science, Jehovah's Witnesses, Church of Jesus Christ and Latterday Saints.

THE CHANNEL ISLANDS

The Channel Islands lie off the north-west coast of France and are the only portions of the Duchy of Normandy now belonging to the Crown of England, to which they have been attached since 1106. They do not form part of the United Kingdom, however. They have their own legislative assemblies and legal and administrative systems, their laws depending for their validity on Orders made by the Queen in Council. Her Majesty's Government in the United Kingdom is responsible for the defence and international relations of the islands, and the Crown is ultimately responsible for their good government.

Exports are protected by British tariff barriers. The citizens of the Channel Islands enjoy tax sovereignty and imports are free of British purchase tax. Income tax is low. Jersey and Guernsey, especially the former, are being developed as finance centres, and Jersey's commercial laws have encouraged the founding of several mercantile banks, mainly subsidiaries of London banks, which profit the economy, otherwise largely based on agriculture.

In addition to the British public holidays, the Channel Islands also celebrate May 9th (Liberation Day).

JERSEY

Jersey, the largest of the Channel Islands, is situated to the south-east of Guernsey, from which it is separated by 17 miles of sea.

THE CONSTITUTION

The Lieutenant-Governor and the Commander-in-Chief of Jersey is the Personal Representative of the Sovereign, the Commander of the Armed Forces of the Crown, and the channel of communication between Her Majesty's Government in the United Kingdom and the Insular Government. He is appointed by the Crown, and is entitled to sit and speak in the Assembly of the States, but not to vote. He has a veto on certain forms of legislation.

The Bailiff is appointed by the Crown, and is President both of the Assembly of the States (the Insular Legislature) and the Royal Court of Jersey. He has, in the States, a right of dissent and a casting vote.

The Deputy Bailiff is appointed by the Crown and, when authorized by the Bailiff to do so, may discharge any function appertaining to the office of Bailiff.

The Government of the Island is conducted by Committees appointed by the States. The States consist of 12 Senators (elected for six years, six retiring every third year), 12 Constables (triennial), and 28 Deputies (triennial), all elected under universal suffrage, by the people. The Dean of Jersey, the Attorney-General and Solicitor-General are appointed by the Crown and are entitled to sit and speak in the States, but not to vote. Permanent laws passed by the States require the sanction of Her Majesty in Council but Triennial Regulations do not.

The official language is French, but English is the language in daily use.

THE CONSTITUTION

The Lieutenant-Governor and Commander-in-Chief of Guernsey is the Personal Representative of the Sovereign and the channel of communication between Her Majesty's Government in the United Kingdom and the Insular Government. He is appointed by the Crown. He is entitled to sit and speak in the Assembly of the States, but not to vote.

The Bailiff is appointed by the Crown and is President both of the Assembly of the States (the insular legislature) and of the Royal Court of Guernsey and has a casting vote.

The Government of the island is conducted by committees appointed by the States.

The States of Deliberation is composed of the following members:

- The Bailiff, who is President *ex-officio*.
- Twelve *Conseillers* elected by the States of Election (elected for six years, six retiring every three years).

- H.M. Attorney-General and H.M. Solicitor-General (Law Officers of the Crown), who have a voice but not a vote.
- Thirty-three People's Deputies elected by popular franchise.
- Ten Douzaine Representatives elected by their respective Parochial Douzaines.
- Two Alderney Representatives elected by the States of Alderney.

The Attorney-General and the Solicitor-General are appointed by the Crown, and are entitled to sit and speak in the States, but not to vote.

Projets de Loi (Permanent Laws) require the sanction of Her Majesty in Council.

The function of the States of Election is to elect persons to the offices of Jurat and Conseiller. It is composed of the following members:

THE VATICAN CITY STATE

(THE HOLY SEE)

HISTORICAL NOTE

For a period of nearly a thousand years, dating roughly from the time of Charlemagne to the entry of the Italians into Rome at Porta Pia, Sept. 20th, 1870, the Papacy held temporal possessions. During the process of unification the Kingdom of Italy gradually absorbed these possessions of the Pope, the States of the Church, which stretched from sea to sea across the middle of the peninsula, the process being completed by the entry into Rome of King Victor Emmanuel's troops in 1870. From 1860 to 1870 many attempts had been made to induce the Pope to surrender his temporal possessions; but regarding them as a sacred trust from a higher Power, to be guarded on behalf of the Church, he replied constantly "Non possumus". After the entry of the Royal Army into Rome he retired into the Vatican, whence no Pope issued thereafter until the ratification of the Lateran Treaty of February 11th, 1929. By the Law of Guarantees of May 1871, Italy attempted to stabilize the position of the Papacy by recognizing the Pope's claim to use of the Palaces of the Lateran and the Vatican, the Papal villa of Castelgandolfo, and their "gardens and annexes", and to certain privileges customary to Sovereignty. This unilateral arrangement was not accepted by Pius IX, and his protest against it was repeated constantly by his successors.

In 1929 two agreements were made with the Mussolini Government, the Concordat and the Lateran Treaty. Under the Concordat, the Catholic religion became the state religion of Italy, with special privileges defined by law. By the terms of the Lateran Treaty the Holy See was given exclusive power and sovereign jurisdiction over the State of the Vatican City, an area of 44 hectares (109 acres) within the city of Rome. The Vatican State was declared neutral and inviolable territory. The new Italian Constitution of 1947 reaffirmed adherence to the Lateran Treaty, but in 1967 negotiations were begun for a revision of the Concordat. In December 1978 the two sides agreed on a draft plan for a new Concordat under which Catholicism would cease to be the state religion and most of the Catholic Church's special privileges in Italy would be removed. The Lateran Treaty and the status of the Vatican City State were not, however, put in question.

Following an assassination attempt on May 13th, 1981, in which Pope John Paul II was shot and seriously wounded, security surrounding the pontiff was considerably tightened.

The population of the Vatican City was 728 at July 1st, 1978.

GOVERNMENT

The Vatican City State came into existence with the Lateran Treaty of 1929. The Holy See (a term designating Rome as the bishopric of the Pope) is a distinct, pre-existing entity. Both entities are subjects of international law. Ambassadors and Ministers are accredited to the Holy See, which sends diplomatic representatives (Nuncios and Pro-Nuncios) to more than 80 states, as well as having Delegates or Observers at the United Nations

and other international organizations. The Vatican City State is a member of such international governmental organizations as IAEA, UNCTAD, the Universal Postal Union and Intelsat.

Both entities are indissolubly united in the person of the Pope, who is at once ruler of the state and visible head of the Catholic Church.

THE GOVERNMENT OF THE VATICAN CITY STATE

The Vatican City is under the temporal jurisdiction of the Pope, the Supreme Pontiff elected for life by a conclave comprising members of the Sacred College of Cardinals. He appoints a Pontifical Commission, headed by a President (who is the Cardinal Secretary of State), to conduct the administrative affairs of the Vatican.

HEAD OF STATE

His Holiness Pope JOHN PAUL II, KAROL WOJTYLA.

PONTIFICAL COMMISSION

Cardinal AGOSTINO CASAROLI (President)
Cardinal SERGIO GUERRI (Pro-President)

Marchese GIULIO SACCHETTI (Special Delegate)

THE CENTRAL GOVERNMENT OF THE HOLY SEE

The central government of the Catholic Church in Rome is vested in the Pope, who is supreme, and in the College of Cardinals. Cardinals who reside in Rome as the Pope's immediate advisers are styled Cardinals "in Curia". The Sacred College of Cardinals derives from the church's earliest days. Until the reign of Pope John XXIII, the number of Cardinals was limited by custom to seventy. In December 1981 there were 124 Cardinals. There are six Cardinal Bishops who are in Titular charge of suburban sees of Rome—Ostia, Albano, Frascati, Palestrina, Porto and Santa Rufina, Sabina and Poggio Mirteto and Velletri.

An Oriental Patriarch is also a member of the order of Cardinal Bishops. Cardinal Priests hold titular churches in Rome, the origins of which go back to the earliest times. The administration of the affairs of the church is carried out through the Secretariat of State and the Council for the Public Affairs of the Church under the Cardinal Secretary of State, and through a number of Sacred Congregations, each under the direction of a Cardinal, as well as through Tribunals, Offices, Commissions and Secretariats for special purposes.

A general reform of the Curia became effective in 1968, with the creation of new organs and the restructuring of the Secretariat of State. In May 1969 the Sacred Congregation of Rites was divided into two Congregations—one for

Divine Worship and the other for the Causes of Saints. In July 1975 the Sacred Congregation for the Discipline of the Sacraments and the Sacred Congregation for Divine Worship were amalgamated.

ORGANIZATION

THE ECCLESIASTICAL ORGANIZATION OF THE CHURCH

The organization of the Church consists of:

(1) Patriarchs, Archbishops and Bishops in countries under the common law of the Church.

(2) Abbots and Prelates "nullius dioceseos".

(3) Vicars Apostolic and Prefects Apostolic in countries classified as Missionary and under Propaganda, the former having Episcopal dignity.

The total population of the world was estimated in 1979 at 4,336,000,000; the Catholic population at 760,000,000, about 17.5 per cent.

Among the Pope's titles is that of Patriarch of the West. There are five other Patriarchates of the Latin Rite—Jerusalem, the West Indies, the East Indies, Lisbon and Venice. The Eastern Catholic Churches each have Patri-

archs: Alexandria for the Coptic Rite, Babylon for the Chaldean Rite, Cilicia for the Armenian Rite, and Antioch for the Syrian, Maronite and Melchite Rites.

There are 2,349 residential sees—13 patriarchates, 431 metropolitan archbishoprics, 64 archbishoprics and 1,841 bishoprics. Of the 1,989 titular sees (92 metropolitan archbishoprics, 90 archbishoprics and 1,807 bishoprics), 1,048 are filled by bishops who have been given these titles but exercise no territorial jurisdiction. Other territorial divisions of the Church include 92 prelacies, 21 abbaties nullius, 8 apostolic administrations, 19 exarchates of the Eastern Church, 73 apostolic vicariates, 59 prefectures and 2 missions 'sui iuris'.

The above figures refer to the state of the Church on November 30th, 1980.

Radio Vatican was founded in 1931 and situated within the Vatican City. A new transmitting centre, inaugurated by Pius XII on October 27th, 1957, has been added and is sited at Santa Maria di Galeria, about twelve miles north-west of the Vatican. Under a special treaty between the Holy See and Italy the site of this new centre, which covers about 1,037 acres, enjoys the same extra-territorial privileges as are recognized by international law to the diplomatic headquarters of foreign States.

The station operates an all-day service, normally in thirty-three languages, but with facilities for broadcasting liturgical and other religious services in additional languages, including Latin.

The purpose of the Vatican Radio is to broadcast Papal teaching, to provide information on important events in the Catholic Church, to express the Catholic point of view on such problems as touch upon religion and morality, but above all to form a continuous link between the Holy See and Catholics throughout the world.

There is no television service.

YUGOSLAVIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Socialist Federal Republic of Yugoslavia has a long western coastline on the Adriatic Sea. It is bounded to the north by Italy, Austria and Hungary, by Romania and Bulgaria to the east, with Greece and Albania to the south. The climate is continental in the hilly interior and Mediterranean on the coast, with a steady rainfall throughout the year. The average summer temperature in Belgrade is 22°C (71°F), the winter average being 0°C (32°F). Serbo-Croat is spoken by Croats, Montenegrins, Serbs and Muslims; Macedonians and Slovenes use their own languages. All three are official languages. Religion is separate from the state; about two-fifths of the population are estimated to belong to the Orthodox Church and one-third to the Roman Catholic Church. There are several other small Christian churches, and also a large Islamic community. The national flag (proportions 2 by 1) consists of blue, white and red horizontal stripes, with a five-pointed, gold-edged red star in the centre. The capital is Belgrade (Beograd).

Recent History

Formerly a kingdom, Yugoslavia was invaded by German and Italian forces in April 1941. The occupation was resisted by the Partisans, led by the Communist Party under Marshal Tito (Josip Broz). The king was deposed and the Federal People's Republic of Yugoslavia was proclaimed on November 29th, 1945, with Tito as Prime Minister. A Soviet-type constitution, establishing a federation of six republics, was adopted in January 1946.

Yugoslavia's independent policies led to its expulsion from the Soviet-dominated Cominform in 1948. The Communist Party was renamed the League of Communists (LCY) in 1952, and under the new constitution of 1953 Tito became President of the Republic, a post he held until his death in 1980. Relations with the Soviet Union were normalized in 1955. Tito attacked the U.S.S.R.'s intervention in the Hungarian revolt of 1956 and the Soviet-led invasion of Czechoslovakia in 1968. Yugoslavia also condemned Soviet involvement in Afghanistan in 1979. President Tito followed a policy of non-alignment in foreign relations, while seeking to improve links with the West and with the developing countries. The first conference of the non-aligned movement was held in Belgrade in 1961. In 1963 the country became the Socialist Federal Republic of Yugoslavia (S.F.R.Y.).

In 1971 President Tito introduced a system of collective leadership and regular rotation of posts, in an attempt to unify the various nationalities and to discourage careerism. A collective state Presidency was established, which was led by Tito until his death. The 1974 constitution aimed to involve the working class directly in the exercise of political power at all levels. Tito advocated decentralization and the devolution of power from the federation to the constituent republics and provinces. He also encouraged the system of workers' self-management in industry.

In February 1979 Edvard Kardelj, Tito's closest colleague, died and in May the principle of rotating leader-

ship was extended to the secretaryship of the LCY. The death of President Tito occurred in May 1980, and his responsibilities were transferred to the collective state Presidency and to the Presidium of the LCY. Cvijetin Mijatović became President of the S.F.R.Y. Presidency for one year from May 1980. The new leadership expressed its determination to uphold the policy of non-alignment and indicated its desire to maintain good relations with both the Soviet Union and the West.

In early 1981 protests over living conditions by students in Priština led to demonstrations by Albanian nationalists throughout Kosovo, and to demands for the province to be upgraded to full republican status. A state of emergency was declared, and the riots resulted in several deaths and many injuries. Hundreds of demonstrators were detained. Numerous changes in the leadership of Kosovo followed, and relations with Albania were severely strained.

Government

Yugoslavia is a Socialist Federal Republic comprising the Republics of Serbia, Croatia, Macedonia, Montenegro, Slovenia and Bosnia-Herzegovina, as well as the autonomous Serbian provinces of Kosovo and Vojvodina. The office of President of the Republic ceased to exist upon the death of Tito. A nine-member collective state Presidency, consisting of one representative of each republic and autonomous province and (*ex officio*) the President of the Presidium of the LCY Central Committee, exercises the rights and duties of Head of State. The posts of President and Vice-President of the collective Presidency rotate annually in a fixed sequence of republics and provinces. The members of the Presidency are elected for a five-year period by both chambers of the S.F.R.Y. Assembly. No one may be elected more than twice in succession. The administrative branch of government is the Federal Executive Council, led by a President and five Vice-Presidents (one from each of the six Republics). The Council is elected by the S.F.R.Y. Assembly for a four-year term.

The S.F.R.Y. Assembly is composed of two chambers. The Federal Chamber has 220 members (30 from each of the six republics and 20 from each of the two provinces) while the Chamber of Republics and Provinces has 88 members (12 from each Republican Assembly and 8 from each Provincial Assembly). A delegate is chosen by each basic self-managing organization or community, a grouping of people in their place of work or residence. These delegates then choose further delegates for higher levels of government. Delegates are not to be career politicians, but ordinary working people, and they do not relinquish their jobs during their four-year term of office.

The only authorized political party is the League of Communists of Yugoslavia, which supervises political activity through the Socialist Alliance of the Working People of Yugoslavia. The LCY's highest authority is its Congress. The 11th Congress, held in June 1978, elected a Central Committee of 165 members (20 from each republic, 15 from each province and 15 from the Army) to supervise

the League's work. The Committee elected a Presidium of 24 members to direct its policy. In 1980 the duties of LCY President devolved upon the Presidium. Its President (formerly Chairman) normally holds office for one year and its Secretary for two years.

Defence

The Republic has no defensive alliances. Military service is compulsory, and lasts for 15 months. In July 1981 estimates put the total strength of the armed forces at 252,500, comprising an army of 190,000, navy 17,500 and air force 45,000. There were 20,000 Frontier Guards, and a territorial defence force of 1-3 million. The system of Total National Defence, in case of war, covers all citizens from 15 to 65 years of age. The 1981 budget set defence expenditure at 101,890 million dinars.

Economic Affairs

The rapid development of industry after 1945 reduced the working population employed in agriculture from 80 per cent to less than 40 per cent. The main crops are wheat, maize, sugar beet and potatoes. There are many forests, orchards and vineyards, and abundant livestock. The country is self-sufficient in wheat and chemical fertilizers. In the industrial sector there has been a marked increase in the production of electric power, crude petroleum and its derivatives, non-ferrous metals, machinery, motor cars, shipbuilding, electronics, paper, food and other consumer goods. Industry and mining account for 45 per cent of gross material product. There are no state industries. Yugoslavia produces 60 per cent of its energy requirements from its own resources, mostly coal. Discoveries of natural gas in the Adriatic Sea were announced in 1979.

In 1965 extensive reforms were introduced, which consolidated the policy of self-management and re-orientated the economy away from central control. President Tito's successors were expected to extend the principle of a free market economy. Since 1965 Yugoslavia has experienced sharp rises in imports and a growth in the persistent trade deficit (partially offset by remittances from Yugoslav workers abroad), as well as a high rate of inflation (estimated to be running at 50 per cent in 1981). Unemployment has also increased, reaching 13 per cent in 1981. These problems have been countered by devaluations of the dinar, and by a series of freezes on wages and prices. Severe import restrictions enabled a reduction in Yugoslavia's current account deficit from U.S. \$3,660 million in 1979 to \$2,300 million in 1980. Exports rose by 9.1 per cent and imports dropped by 10.9 per cent in 1980. The balance of payments deficit is an increasing strain on the economy, interest repayments being estimated at 3 per cent of G.D.P. in 1981. An IMF credit of \$2,200 million was granted in January 1981.

The Five-Year Plan for 1971-75 envisaged an annual growth rate of 7.5 per cent in the material product, but an overall growth rate of only 5.5 to 6 per cent was achieved. This was sufficient to provide employment for a rising population and an increasing number of workers returning from temporary employment abroad.

During the 1976-80 Plan, G.D.P. grew at an average annual rate of 5.7 per cent, less than projected. The volume of industrial production, with the emphasis on capital goods, rose by 6.7 per cent a year. Agricultural

production went up by an average annual rate of 1.6 per cent, compared with a target of 4 per cent. Real incomes rose by only 1 per cent over the five-year period. In 1980, following the 30 per cent devaluation of the dinar in June, G.N.P. expanded by only 2.5 per cent. Industrial output increased by less than 5 per cent, and agricultural production fell by 2 per cent. Capital investment rose by less than 1 per cent, compared with increases of 7-10.5 per cent in the previous four years.

The basic aim of the 1981-85 Plan is the continued stabilization of the economy. An average real growth rate in G.N.P. of 4.5 per cent annually is envisaged. Industrial production is to rise by 5 per cent a year, and agricultural production by 4.5 per cent. Exports should increase by 8 per cent annually and imports by only 1.1 per cent. Personal incomes are to go up by 3 per cent a year. Investment is to be curtailed further.

The U.S.S.R. is Yugoslavia's main trading partner, followed by the Federal Republic of Germany and Italy. Trade with the Third World is increasing. Yugoslavia became a full contracting party to the General Agreement on Tariffs and Trade (GATT) in 1966. A five-year preferential trading agreement with the EEC was concluded in 1980. Loans from the European Investment Bank to finance development projects were also agreed.

Transport and Communications

Yugoslavia has 9,909 km. of railways, of which 4,300 km. have been electrified. There are 111,923 km. of roads, of which 49,924 km. are asphalt, concrete or similar roads, and 40,015 km. are macadamized; many new roads are currently under construction, including the Karavanke tunnel into Austria. The state airline, Jugoslovenski Aerotransport (JAT), provides internal and international services. Yugoslav shipping lines had a fleet of 449 vessels in 1978. The principal Adriatic ports are Rijeka, Split, Kardeljevo (formerly Ploče), Bar, Dubrovnik and Koper. The Danube is the chief inland waterway, the chief ports being Novi Sad and Belgrade.

Social Welfare

All employed persons and their families are covered by obligatory social insurance schemes, providing for health insurance, money and grants in kind in case of sickness, accidents, disablement, old-age and death. Insured persons are entitled to medical care, including compensation for an unlimited period during sick leave, rehabilitation and preventive care. In 1977 there were 130,135 hospital beds, 3,968 general clinics and 2,788 dental clinics, as well as a wide network of medical guidance centres, children's clinics and anti-tubercular dispensaries. There were 34,137 doctors.

The retirement pension is usually equivalent to 85 per cent of average monthly income during the last five years of employment. Women and young children enjoy special protection under the health insurance scheme. Employed women are entitled to 180 days' paid leave before and after confinement. Confinements in hospital and maternity care are free of charge. Women are entitled to shorter working hours until their child is 8 months old. All workers are entitled to annual leave which varies from 14 to 30 days.

Education

The entire educational system is organized at republican and local authority level. Elementary education is free and compulsory for all children between the ages of 7 (6 in Croatia) and 15, when Yugoslav children attend the "eight-year school". Various types of secondary education are available to all who qualify, but the vocational and technical schools are the most popular. Alternatively, a child may attend a general secondary school (gymnasium) where he follows a four-year course which will take him up to university entrance. At the secondary level there are also a number of art schools, apprentice schools and teacher-training schools, which train teachers for the elementary schools over a period of five years. Those who have attended the technical schools may pursue their education further at one of the two-year post-secondary schools, created in response to the needs of industry and the social services. However, the secondary school system is gradually being reorganized into a programme of so-called directed education for youth and adults. Higher education is run on a very open system and is available to all who can qualify. Apart from the 19 universities and the post-secondary schools, there are also schools of higher learning for teachers who have completed the course at training schools. There are facilities for adult education at evening schools and in part-time studies.

Tourism

Tourist attractions include the mountains, the great lakes of Scutari, Prespa and Ohrid in the south, the

Federal capital of Belgrade and the other republican capitals, and, most particularly, the Adriatic resorts. The expansion of the tourist industry in Yugoslavia has been remarkable in recent years, and tourism is now an important source of foreign currency (estimated at U.S. \$1,900 million in 1980). In 1979 about 6 million foreign tourists visited the country.

Public Holidays

1982: May 1st (Labour Day), July 4th (Fighters' Day), Republican Holidays*, November 29th and 30th (Republic Days).

1983: January 1st (New Year).

*Each republic observes a holiday on the following dates:

July 7th (Serbia), July 13th (Montenegro), July 22nd (Slovenia), July 27th (Croatia and Bosnia-Herzegovina), August 2nd, October 11th (Macedonia).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 para = 1 Yugoslav dinar.

Exchange rates (October 1981):

£1 sterling = 71.64 new dinars;

U.S. \$1 = 38.33 new dinars.

FINANCE

100 para = 1 Yugoslav dinar.

Coins: 25 and 50 para; 1, 2, 5 and 10 dinars.

Notes: 5, 10, 100, 500 and 1,000 dinars.

Exchange rates (October 1981): £1 sterling = 71.64 new dinars; U.S. \$1 = 38.33 new dinars;
1,000 Yugoslav dinars = £13.96 = \$26.09.

Note: From January 1966 to January 1971 the central exchange rate was U.S. \$1 = 12.50 new dinars (1 dinar = 8 U.S. cents). Between January and August 1971 the rate was \$1 = 15.00 dinars. From December 1971 to July 1973 it was \$1 = 17.00 dinars. In terms of sterling, the exchange rate was £1 = 30.00 dinars from November 1967 to January 1971; £1 = 36.00 dinars from January to August 1971; and £1 = 44.30 dinars from December 1971 to June 1972. Since July 1973 the dinar has been allowed to "float". The exchange rate against the U.S. dollar is adjusted from month to month. The average rate (dinars per U.S. dollar) was 16.189 in 1973; 15.913 in 1974; 17.386 in 1975; 18.193 in 1976; 18.298 in 1977; 18.644 in 1978; 18.996 in 1979; 24.911 in 1980. However, the value of foreign trade is calculated according to the November 1977 rate of U.S. \$1 = 18.25 dinars.

THE CONSTITUTION

(Adopted February 21st, 1974, subsequently amended)

SUMMARY

INTRODUCTION

The introductory section of the Yugoslav Constitution contains ten chapters dealing with basic principles. The first chapter states:

"The peoples of Yugoslavia, taking as their point of departure the right of every nation to self-determination, including the right of secession; on the basis of their will freely expressed in the common struggle in the National Liberation War and socialist revolution; and in line with their historical aspirations, aware that the further consolidation of their fraternity and unity is in the common interest, have, together with the nationalities with whom they live side by side, united into a federal republic of free and equal peoples and nationalities and created a socialist federal community of working people—the Socialist Federal Republic of Yugoslavia, in which, in the interest of each nation and nationality individually and collectively, they are implementing and assuring:

socialist social relationships based on self-management by the working people and the protection of the socialist system of self-management;

national freedom and independence;

the fraternity and unity of the nations and nationalities; the integral interests of the working class and the solidarity of the workers and all working people;

the possibility and freedom for the comprehensive development of the human personality and for rapprochement among men, nations and nationalities, in line with their interests and aspirations along the road of creating a richer culture and civilization for the socialist society; the unification and coordination of efforts to develop the material foundations of socialist society and prosperity for the people;

the system of socio-economic relationships and the integral foundations of the political system for the purpose of pursuing the joint interests and assuring the equality of the nations and nationalities, and the working people; the integration of their own aspirations with the progressive aspirations of mankind.

The working people, the nations and nationalities exercise their sovereign rights in the socialist republics and in the socialist autonomous provinces in line with their constitutional rights, and in the Socialist Federal Republic of Yugoslavia where this is established by the Constitution of the S.F.R.Y. as being in the common interest.

The working people, the nations and nationalities make their decisions at federal level in line with the principles of agreement between the republics and autonomous provinces; solidarity and mutuality; equitable participation by the republics and autonomous provinces in federal organs in accordance with this Constitution; and the responsibility of the republics and autonomous provinces for their own development and for the development of the socialist community as a whole".

It is stated in the second chapter that the inviolable foundation for the position and role of man is social ownership of the means of production; the emancipation of labour and the transcendence of historically conditioned socio-economic inequalities and dependence of people in labour; the right to self-management; the right of the working man to enjoy the fruits of his labour and the material progress of the social community; the economic, social and personal security of man; democratic political

relationships, etc. The third chapter deals with social ownership, as a reflection of socialist socio-economic relationships among people; the fourth chapter with the working class and working people as the bearers of power and management of social affairs; the fifth chapter with the liberties, rights, duties and responsibilities of individuals and citizens; the sixth chapter with the determination of the working people and citizens, the nations and nationalities of Yugoslavia consistently to pursue a policy of peace and against war and aggressive pressures of any kind whatsoever; the seventh chapter with the international position and foreign policy of Yugoslavia inspired by peaceful coexistence and the principles of non-alignment; the eighth chapter with the League of Communists of Yugoslavia which, by its guiding ideological and political activity in conditions of socialist democracy and social self-management, represents the basic moving force and vehicle of political activity, and also with the role and activities of other socio-political organizations; the ninth chapter with the socio-economic and political system and the tenth chapter with the basic principles as a "component part of the Constitution and the basis and direction for interpreting the Constitution and the laws and for the activity of one and all".

PARTS I-II

Part one, with nine articles, is devoted to the Socialist Federal Republic of Yugoslavia as a "federal state, a state community of voluntarily united peoples and their socialist republics and the socialist autonomous republics of Kosovo and Vojvodina which are part of the Socialist Republic of Serbia, based on the government and self-management of the working class and all working people and on the socialist, self-management, democratic community of working people and citizens and equal nations and nationalities".

Part two is devoted to the social order. Chapter I consists of Articles 10 to 87 and deals with the socio-economic position of man in associated labour, the integration of labour and the means of social reproduction, the self-managed communities of interest, social planning, information systems, socio-economic status and association of farmers, independent personal labour with means owned by citizens, legal property relations, goods of general interest and the protection of the human environment. Chapter II deals with the foundations of the socio-economic system and contains Articles 88 to 152 which regulate the position of the working people in the socio-political system, self-management in the organizations of associated labour, self-management in the managed communities of interest, self-management in the local communities, the position of the commune as a self-managed and basic socio-political community founded on the power and self-management of the working class and all working people, self-management agreements and social compacts, the protection by society of the rights of self-management and social property, the foundations of the assembly system which rests on the principle of delegates as a new form of direct participation by the working people in the management of society's affairs from the local communities to the federation. Each socio-political body (i.e. the communes, Autonomous Provinces, Republics and the Federation) has an assembly as its supreme organ of power. Working people in self-managing organiza-

tions and communities form delegations, elected for a four-year term by secret ballot from members of those bodies, to exercise their responsibilities in the assemblies. Each assembly has an executive council. Chapter III from Articles 153 to 203 deals with the liberties, rights, duties and responsibilities of man and citizen, pursued "in mutual solidarity and through the fulfilment of the duties and discharge of responsibilities of each toward all and all toward each". Chapter IV from Articles 204 to 216 is dedicated to constitutionality and legality. Constitutionality and the rule of law are the concern of the courts, self-managed judicial organs, organs of the socio-political communities, organizations of associated labour and other self-managed organizations and communities and the bearers of self-management, public and other social functions. Chapter V from Articles 217 to 236 deals with the judiciary and public prosecutor and Chapter VI from Articles 237 to 243 with national defence. Article 237 states: "It is the inviolable and inalienable right and duty of the nations and nationalities of Yugoslavia, of the working people and citizens, to protect and defend the independence, sovereignty, territorial integrity and socio-political system of the S.F.R.Y., the latter having been established by the Constitution of the S.F.R.Y.". Article 238 states that "no one has the right to recognize or sign capitulation, or to accept or recognize the occupation of the S.F.R.Y. or any of its parts". The armed forces of the S.F.R.Y. are an integral entity and consist of the Yugoslav People's Army, as the joint armed force of all the nations and nationalities and all working people and citizens; and of the territorial defence forces as the broadest form of organized armed resistance by the people.

PART III

Part three, from Articles 244 to 281, deals with relationships at federal level. "In the S.F.R.Y., the nations and nationalities and the working people and citizens exercise and assure: sovereignty, equality and national freedom, independence, territorial integrity, security and social self-defence, the defence of the country and the international position and relations of the country with other states and inter-state organizations, the system of socialist self-management of socio-economic relationships, the integral foundations of the political system, the fundamental democratic freedoms and rights of men and citizens, solidarity and the social security of the working people and citizens and the integral market, and coordinate their joint economic and social development and other of their common interests." These common interests are pursued through the organs and organizations of the federation with the equitable participation and responsibility of the republics and autonomous provinces; through direct co-operation and agreement between the republics, autonomous provinces, communes and other socio-political communities, by self-management agreement, social compact and integration of organizations of associated labour and other organizations and self-managed communities of interest; through the activities of socio-political and other organizations and through free and multifaceted activities by the citizens.

PARTS IV-VI

Part four, dealing with the rights and duties, and the organization, of the federation, comprises Articles 282 to 397. Chapter 1 deals with the rights and duties of the S.F.R.Y. Assembly, defined as "the supreme organ of power within the framework of federal rights and duties". The Assembly comprises two chambers: the Federal Chamber and the Chamber of Republics and Provinces. The Federal Chamber has 220 members (30 from each of the six republics and 20 from each of the two provinces)

who "lay down the fundamentals of internal and foreign policy", "decide on war and peace" and ratify international treaties. The Chamber of Republics and Provinces has 88 members (12 from each Republican Assembly and eight from each Provincial Assembly) who are responsible for the adoption of a Social Plan, the formulation of economic policy and the determination of the Federal Budget. Chapter 2 deals with the Presidency of the S.F.R.Y. which "represents the S.F.R.Y. at home and abroad and discharges other rights and duties as established by the Constitution"; Chapter 3 with the President of the Republic and contains the express formulation that "in view of the historic role of Josip Broz Tito in the National Liberation War and socialist revolution, in the creation and development of the S.F.R.Y., in the advancement of the Yugoslav socialist society of self-management, in the achievement of fraternity and unity among the nations and nationalities of Yugoslavia, in the consolidation of the country's independence and its position in international relations, in the struggle for peace in the world, and in line with the expressed will of the working people and citizens, nations and nationalities of Yugoslavia—the S.F.R.Y. Assembly may, on the proposal of the Assemblies of the Republics and Autonomous Provinces, elect Josip Broz Tito President of the Republic for an unlimited term of office"; Chapter 4 with the Federal Executive Council (elected by the S.F.R.Y. Assembly for a four-year term); Chapter 5 with the federal administrative organs; Chapter 6 with federal judicial organs, and Chapter 7 with the Constitutional Court of Yugoslavia.

Part five, from Articles 398 to 403, deals with the procedure of amending the Constitution; and Part six, Articles 404 to 406, with transitional and terminal provisions.

* Upon the death of President Tito in May 1980, the function of President of the Republic was terminated. The rights and duties of this office are exercised henceforth by the nine-member S.F.R.Y. Presidency. The Vice-President of the Presidency became President until the expiry of the term for which he was elected Vice-President.

The following amendments were promulgated in 1981.

Amendment I establishes equality of all the members of a collective organ, particularly in the process of decision-making. *Amendment II* sets the upper limit of the duration of term of office of the elected and appointed officials and holders of public and self-management functions. The term of office is limited to four years' duration. *Amendment III* specifies the tenure of office for the highest-placed officials of the S.F.R.Y. Assembly. The President, Vice-President, and President of both Chambers shall be elected to one-year terms of office, every time from some other Republic or Province. The highest post in the League of Communists of Yugoslavia also has a one-year tenure. *Amendment IV* alters the relevant Constitutional provision, so that instead of President of the League of Communists of Yugoslavia (LCY) a member of the S.F.R.Y. Presidency shall, by virtue of office, be president of an LCY organ as established by the LCY Statute. *Amendment V*, which pertains to the Federal Executive Council, introduces the following changes: the preliminary procedure of nominating the candidates for the election of President and members of the Federal Executive Council shall take place within the Socialist Alliance; one person may not be elected Council President for two consecutive terms; Council members may be re-elected only once to the same function; two years following its election, the Council submits to the S.F.R.Y. Assembly a progress report. Under *Amendment VI*, the officials who manage Federal Organs of Administration, and others nominated by the S.F.R.Y. Assembly, may be appointed to the same function

YUGOSLAVIA

for no more than two consecutive terms. *Amendment VII* pertains to the Constitutional Court of Yugoslavia whose judges are elected to terms of eight years, without the right to re-election, whereas the President is elected from

The Constitution, The Government, Legislatures

among the judges for one year's term, every year from some other Republic or Province. *Amendment VIII* drafts the basis for enacting the Constitutional Law on the Promulgation of the Amendments.

JUDICIAL SYSTEM

The Yugoslav Constitution states that judicial functions are to be discharged within a uniform system and that the jurisdiction of the courts shall be established and altered only by law. In general, court proceedings are conducted in public (exceptionally the public may be excluded to preserve professional secrets, public order or morals) in the national language of the region in which the court is situated. Citizens who do not know the language in which the proceedings are being conducted may use their own language.

The judicial system comprises courts of general jurisdiction, i.e. *communal courts, county courts, republican supreme courts, and supreme courts of autonomous regions* (which decide on appeals against the decisions of county courts), *the Federal Court*, and courts of specialized jurisdiction established to hear definite cases. Self-management courts decide specific disputes as laid down by the Constitution or Statute, also disputes from working people in organizations of associated labour or other self-managing organizations and communities. Economic cases and other legal matters of concern to the economy are heard by *economic courts* with the *Supreme Economic Court* at the head, and criminal offences committed by military persons or offences in any way connected with service in the army are heard by *military courts* with the *Supreme Military Court* at the head. Courts of arbitration, arbitration commissions, conciliation councils and other institutions may be set up to settle disputes between citizens or organizations.

Judges are elected or dismissed by the Assembly of the particular Republic and lay judges are elected or dismissed by the assembly of the particular district or town.

The powers of the Constitutional Court of Yugoslavia and the Federal Court are set out in the Constitution.

Constitutional Court of Yugoslavia. Decides on the conformity of laws with the Constitution.

President: NIKOLA SEKULIĆ.

Number of members: 14.

Federal Court of Yugoslavia. This is the highest organ of justice in Yugoslavia. It decides on appeals against decisions of supreme courts of the Republics and supreme courts of autonomous regions, and gives guidance on the application of federal laws. Judges are elected or dismissed by the Federal Chamber of the S.F.R.Y. Assembly.

President of the Federal Court of Yugoslavia: Dr. MIRKO PEROVIĆ.

Number of members: 13.

Office of the Public Prosecutor. The Federal Public Prosecutor is elected or dismissed by the Federal Assembly. Public prosecutors of the various republics are nominated by the Federal Public Prosecutor with the approval of the Executive Council of the particular Republic. All other public prosecutors are appointed by the public prosecutor of the Republic.

Federal Republic Prosecutor: Dr. VUKO GOZZE GUČETIĆ.

Office of Public Attorney. Represents proprietary interests of the federation, republics, districts and communities. There is a Federal Office, and in addition there are six republican offices, two offices in the autonomous regions, five town offices and 228 communal offices.

Federal Attorney-General: DRAGO DRAGOJEVIĆ.

Federal Social Attorney of Self-Management. Carries out his function within the framework of federal rights and duties.

Social Attorney of Self-Management: MILOVANOVIĆ MOMČILO.

Matters concerning the improvements and functioning of the judiciary system are controlled by the *Federal Council for the Judiciary*; President Dr. BRANISLAV IVANOVIĆ.

RELIGION

The principle of the complete separation of Church and State is incorporated in the constitution, which also states that religious confession shall in no way be restricted and makes other provisions for the welfare of religious bodies. The Republic safeguards the freedom of faith and of religious assembly, provided the State laws are respected, and ensures full equality for each religious community, as well as the freedom of its activity.

THE PRESS

Since 1956 the Yugoslav Press has enjoyed an organizational freedom that has enabled it to establish a position of independence and individuality. In that year, ownership of Yugoslav newspapers was transferred to societies controlled by their employees, who share in the profits. The Constitution guarantees newspaper publishers the right to exercise self-management, which includes the appointment of directors, editors and a board comprising a large number of people from public and political life, as well as representatives of the workers. This board has an important role in shaping the newspapers' policy. Censorship is not imposed, editors being aware of their responsibilities and of the flexibility of the Press Law in force since 1960. This lays down the usual restrictions regarding the publication of false and distorted news, confidential information, and items harmful to foreign relations, to the government or to representatives of other countries.

There are 29 dailies published in Yugoslavia, printed in Serbian (Cyrillic alphabet), Croatian (Roman), Slovene, Macedonian, Hungarian, Italian and Albanian. The most influential are those published in Belgrade and the capitals of the constituent republics. Despite a drastic decline in circulation (from 700,000 in the 1950s to about 50,000 in 1978), *Borba*, the organ of the Socialist Alliance, retains a significant amount of influence. The official organ of the League of Communists is the weekly *Komunist*. Other important newspapers include *Politika* (Belgrade), *Vijesnik* (Zagreb), *Delo* (Ljubljana), *Oslobodjenje* (Sarajevo), *Nova Makedonija* (Skopje) and *Pobjeda* (Titograd). Evening papers are also popular, notably *Večernje novosti* (Belgrade), with a circulation of 346,000.

FINANCE

BANKING

The Yugoslav credit and banking system is based on the provisions of the Constitution, of the Law on the National Bank of Yugoslavia (1976), of the law on the Basic Principles of banking and credit operations (1977), and other legislation relating to money and credit. The National Bank is the central bank of Yugoslavia and its powers and obligations are determined by law. Its functions include the issue of money, provision of credit to banks and government authorities, control of credits and bank activities, recommendation of legislation relating to the foreign exchange system and its implementation, management of gold and foreign exchange reserves, control of foreign exchange operations and other special activities.

The banking system in Yugoslavia consists of two kinds of banking organizations: banks, and savings and loan

organizations. There are internal banks, basic banks and associated banks. Savings and loan organizations include savings banks, the Post Office Savings Bank, and other savings and loan organizations. The banking system is based on the principle of self-management, under which labour and resources are pooled.

An internal bank operates within the framework of a composite organization of associated labour. It may transact business with other organizations and social entities. The field of work of the internal bank is limited by law.

A basic bank may carry out all credit and banking operations in Yugoslavia. If it meets special requirements and obtains the necessary licence, it may carry out international payments and perform foreign credit transactions. They may be called universal and commercial banks.

An associated bank performs operations of common interest to members of two or more basic banks, such as credit transactions, international payments, and the concentration of domestic and foreign financial resources needed for major development programmes. In 1981 there were 164 basic banks and 9 associated banks in Yugoslavia; 141 basic banks were within associated banks and 23 were not associated.

TRANSPORT

RAILWAYS

Zajednica Jugoslovenskih Železnica (*Community of Yugoslav Railways*): Nemanjina 6, P.O.B. 563, 11000 Belgrade; Gen. Man. NIKOLA FILIPOVIĆ.

Railways in Yugoslavia are owned by five self-managing enterprises, one in each republic (except Montenegro). The Community of Yugoslav Railways is the co-ordinating body. The total length of track was 9,909 km. in 1980, 4,300 km. of which is electrified.

Construction of a new double-track railway between Rijeka and Zagreb was due to begin in 1981, and is scheduled for completion in 1990. The line will eventually extend from Zagreb to the Hungarian border. A railway linking Titograd with Shkodër, in Albania, was expected to be completed in 1982.

ROADS

The road network totalled 114,118 km., including 285 km. of motorways, in 1979. The most important roads

are the main inland route through Ljubljana, Zagreb, Belgrade, Niš and Skopje to the Greek frontier, the Adriatic highway linking Rijeka, Split, Dubrovnik and Titograd, and a number of intermediate roads. The Karavanke road tunnel, scheduled for completion in 1983, will link Slovenia with Rosenbach in Austria.

INLAND WATERWAYS

Savezni Komitet za Saobraćaj i Veze (*Federal Committee for Transport and Communications*): Bulevar Arvoja, 104-Belgrade.

Navigable waterways are the rivers Danube 588 km., Sava 593 km., Tisa 164 km., Drava 51 km. (for vessels up to 1,500 tons-capacity) and Begej 77 km. (for vessels up to 650 tons-capacity); the Dunav-Tisa-Dunav canal system 321 km. (for vessels up to 650 tons-capacity).

SHIPPING

The principal ports are Rijeka and Koper in the north, Šibenik, Split and Kardeljevo (formerly Ploče) along the

central Dalmatian coast, Dubrovnik and Bar in the south. There is a rail link between Belgrade and Kardeljevo; port facilities at Kardeljevo have undergone extensive expansion, allowing accommodation for vessels of up to 60,000 tons. Reconstruction work at the port of Bar began in 1980, and was scheduled for completion in 1983. A direct rail link between Belgrade and Bar, completed in 1976, provides a third major outlet to the Adriatic. The largest port is Rijeka, which handled 14,733,000 tons of the total goods traffic of 25,319,000 tons in 1978.

Jadrolinija (Adriatic Lines): Obala Jugoslovenske Mornarice 16, Rijeka; regular passenger and cargo services between Adriatic tourist centres and Yugoslav Islands; car-ferry service Ancona-Zadar, Dubrovnik-Bar and to Yugoslav Islands; cruises in the Mediterranean and throughout the world; Man. AFGHANISTAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Democratic Republic of Afghanistan lies in the heart of Asia. Its neighbours are to the north the U.S.S.R., to the west Iran, to the north-east China and to the east and south Pakistan. The climate varies sharply between the highlands and lowlands; the temperature in the south-west in summer reaches 48.8°C (120°F) and in the winter in the Hindu Kush mountains of the north-east falls to -26°C (-15°F). Of the many languages spoken in Afghanistan, the two main ones are Pashtu and Dari (a dialect of Persian). The majority of Afghans are Muslims of the Sunni sect; there are also minority groups of Hindus, Sikhs and Jews. The national flag has three horizontal bands of red, black and green, with a superimposed emblem of an open book under a candle, surrounded by stylized heads of corn. The capital is Kabul.

Recent History

The last King of Afghanistan, Zahir Shah, reigned from 1933 to 1973. His country was neutral during both World Wars and has been a staunch advocate of non-alignment. In 1953 the King's cousin, Lt.-Gen. Sardar Mohammad Daud Khan, became Prime Minister and, securing aid from the U.S.S.R., initiated a series of economic plans for the modernization of the country. General Daud resigned in 1963 and Dr. Mohammad Yusuf became the first Prime Minister not of royal birth. He introduced a new democratic constitution which combined western ideas with Islamic religious and political beliefs, but the King never allowed political parties to operate. Afghanistan made little progress under the succeeding Prime Ministers.

In July 1973, while King Zahir was in Italy, the monarchy was overthrown by a coup, in which the main figure was the former Prime Minister, Gen. Daud. The 1964 constitution was abolished and Afghanistan declared a republic. Daud renounced his royal titles and took office as Head of State, Prime Minister, Foreign Minister and Minister of Defence.

A Loyah Jirgah (National Assembly), appointed from among notable elders by provincial governors, was convened in January 1977 and adopted a new constitution, providing for presidential government and a one-party state. General Daud was elected to continue as President for six years and the Assembly was then dissolved. In March 1977 President Daud formed a new civilian government, nominally ending military rule. However, during 1977 there was growing discontent with Daud, especially within the armed forces, and in April 1978 a bloody coup, known (from the month) as the "Saur Revolution", ousted the President, who was killed with several of his family.

Nur Mohammad Taraki, imprisoned leader of the formerly banned People's Democratic Party (PDP), was released and installed as President of the Revolutionary Council and Prime Minister. The year-old constitution was abolished and no other political parties were allowed to function. In spite of purges of the army and civil service, Taraki's position became increasingly insecure and in September 1979 he was ousted by Hafizullah Amin,

Deputy Premier and Foreign Minister since March. Amin's hard-line Communism was unsuccessful and unpopular. He was removed and killed in a Soviet-backed coup in December which aroused world-wide condemnation. Babrak Karmal, a former Deputy Premier under Taraki, was installed in Amin's place.

Fighting between fiercely traditionalist Muslim rebel tribesmen and Afghan army units had begun in the eastern provinces after the 1978 coup and was aggravated by the implementation of social and economic reforms by the new administrations. The Afghan army relied heavily upon Soviet military aid in the form of machinery, materials and expertise, but morale and resources were severely affected by defections to the rebels' ranks. In October 1981 an estimated 80-85,000 Soviet troops were still in Afghanistan to help the new regime to keep order but the rebel forces still dominated the countryside.

Relations with Pakistan remained strained because of violations of airspace by Afghan aircraft, refuge sought over the border by the rebel tribesmen and Pakistan's refusal to recognize the Karmal Government. By September 1981 it was estimated that over 2.5 million refugees had fled from the fighting to Pakistan. After the death of the American Ambassador in February 1979 in a kidnapping incident, the U.S.A. greatly reduced the amount of aid allocated to Afghanistan. Relations worsened further after the Soviet-backed regime took power later that year. The U.S.A. banned grain exports to the U.S.S.R. (until April 1981) and led a boycott of the Moscow Olympic Games.

Riots, strikes and inter-factional strife and purges continued into 1980 and 1981. President Karmal centralized his authority by reorganizing government departments within the Prime Minister's Office in July 1980, and in June 1981 Sultan Ali Kistmand took over from Karmal as Prime Minister. In the hope of strengthening the position of Karmal's Parcham faction of the PDP over the Khalq faction of the party, the Revolutionary Council and the Politburo were enlarged. In the same month the regime launched the long-awaited National Fatherland Front, incorporating the PDP and other organizations, with the aim of promoting national unity.

During 1980 and 1981 extensive international negotiations took place to try to bring about complete withdrawal of Soviet forces. In January 1980 the UN General Assembly voted to call for the withdrawal of foreign troops and the EEC Foreign Ministers condemned the invasion. The Organization of the Islamic Conference, having refused to recognize the Karmal regime until Soviet forces withdrew, approved in May the establishment of a special committee to negotiate a solution to the problem but little progress was made. During 1981 further initiatives were put forward by the UN, the EEC and by individual Governments, and several attempts were made to begin talks between the Governments of Afghanistan, Pakistan and Iran in the presence of the UN Secretary-General's representative. These continued to be frustrated by disagreements on all sides. In August the Afghan Government seemed willing to participate in the tri-

lateral talks with the UN representative, but by September there was no indication that Pakistan, Iran or the U.S.S.R. had significantly altered their positions on the matter. In August the U.S.S.R. claimed to be ready to withdraw when all alleged external "armed interference" (by Iran and Pakistan) had ceased.

Government

The April 1978 coup brought the People's Democratic Party (PDP) to power and no other political party is allowed to function. The 1977 constitution was abolished after the coup. A declaration of "Basic Principles" was ratified by the Revolutionary Council in April 1980, to remain in force until the ratification of a new Constitution by a Loya Jirgah (National Assembly), to be directly elected by the people. Despite the provisions of the Basic Principles, widescale violation of human rights in Afghanistan has been reported. The 57-member Revolutionary Council and the Government rule jointly by decree. The 36-member Central Committee of the PDP and the Revolutionary Council elect, respectively, a Politburo and a Presidium to direct their policies. Ministers are nominated by the Central Committee and their appointments are approved by the Revolutionary Council. The 28 provinces of Afghanistan are each administered by an appointed governor.

Defence

Every able-bodied Afghan has to serve two years in the army, which numbers about 35,000 men (July 1981 estimate), but conscription is difficult to enforce and desertions are frequent. Its equipment and training are largely provided by the Soviet Union. The Afghan air force, which numbers 8,000 (July 1981 estimate), is equipped with supersonic jet aircraft. Police security forces come under the Ministry of the Interior. Para-military forces number 30,000 men.

Economic Affairs

Afghanistan is essentially a tribal society and 2.5 million of its people are nomadic. Agriculture, which provides employment for 72 per cent of the labour force, is the mainstay of the economy and accounts for half the G.N.P. and for 80 per cent of export earnings. Principal agricultural exports include livestock, wool and cotton, fresh and dried fruits, processed hides and skins and medicinal herbs. A programme of land reform was implemented in the first six months of 1979, each land-owner receiving no more than six hectares of redistributed land. In August 1981, however, due perhaps to the unpopularity of this measure, steps were taken effectively to reverse the programme. The setting-up of farm co-operatives was encouraged and, according to the Government, they numbered nearly 1,200 at the beginning of 1980. In years of normal output Afghanistan is self-sufficient in food, but had to import wheat in 1979 because of production upsets caused by the agrarian reforms, low rainfall and civil unrest. Food shortages became a serious problem in 1981 as Soviet troops destroyed crops to try to curb the rebels, who themselves were engaged in fighting rather than farming.

The country is well-endowed with minerals: natural gas (with estimated reserves of over 100,000 million cubic metres), coal, salt, lapis-lazuli, barite and talc are extracted. In May 1980 a new complex for the extraction and purification of gas became operational at Jarquduq, with

an annual capacity of 2,000 million cubic metres. Other mineral deposits, such as petroleum, iron ore and copper, are to be exploited with the help of foreign aid, including the development of two small oilfields discovered in the north of the country which, when fully operational, should meet Afghanistan's total needs for petroleum products. Such products have been imported at special low prices from Iran and the U.S.S.R. but it is planned to increase internal sources of energy by setting up hydro- and thermal electric power stations. Hydro-electricity constitutes 80 per cent of energy resources.

Afghanistan's major industries include cotton textiles, chemical fertilizers, leather and plastic goods. The 1979-84 five-year plan proposes a total investment of Afs. 105,000 million, 25 per cent of which will be allocated to agriculture in order to triple output. Investment in industry (in 1979 employing only 12 per cent of the working population) and mining is to amount to Afs. 43,654 million and should increase the contribution of industry to G.N.P. from 23 per cent to 41 per cent. The plan envisages the comprehensive development of both heavy and light industry based on the effective utilization of natural resources.

As well as carpets and rugs, Afghanistan exports fruit and vegetables to Pakistan and India, natural gas and ginned cotton to the U.S.S.R. (its main trading partner), oil-cake to Iran and Pakistan and karakul to the European fur markets. Imports include wheat, buses, machinery and petroleum products from the U.S.S.R. The two main exporters to Afghanistan in 1979/80 were the U.S.S.R. (46.0 per cent) and Japan (16.8 per cent).

Due to the backwardness of the economy, the Government has had difficulty in raising revenue. About 50 per cent of domestic revenue comes from indirect taxes and only 10 per cent from direct taxes. Revenue from natural gas is the next largest contributor, totalling 21 per cent in 1979 and expected to reach 34 per cent in 1980. In the 1979-84 plan, "socialist" countries are expected to contribute 66 per cent of the foreign aid needed for basic projects. Afghanistan has received foreign aid chiefly from the U.S.S.R. and new co-operation agreements are continuously being signed. In 1981 a mutual trade agreement for the period 1981-85 was concluded, under which Afghanistan was to supply the U.S.S.R. with raw materials, natural gas and food products and receive industrial equipment and machinery in return. In 1979/80 the U.S.S.R. purchased 51.6 per cent of Afghanistan's total exports, compared with 35.1 per cent in 1978/79.

Transport and Communications

Afghanistan is a land-locked country and the most convenient access to the sea lies through Pakistan, or alternatively on the road and rail container route through the Soviet Union. A network of asphalted highways, connecting the main towns, has been built with Soviet and U.S. help. 1,060 km. of new roads are planned to be constructed by 1984. All-weather highways link Kabul with Qandahar and Herat in the south and west, Jalalabad in the east and Mazar-i-Sharif and the Oxus, on which there is water traffic, in the north. There are two international and 29 local airports.

Social Welfare

Workers and employees are entitled to free hospital treatment. Most private companies have their own doctor

AFGHANISTAN

and hospitals. Disabled people are looked after in social welfare centres in the provincial capitals. In 1978/79 estimated expenditure on social services was Afs. 3,186 million, about 26 per cent of the ordinary budget.

Education

It is estimated that the proportion of children aged 6 to 11 years receiving primary education rose from 9 per cent in 1960 to 23 per cent in 1975. Only 7 per cent of girls in this age-group were enrolled and only 8 per cent of all children aged 12 to 16 attended secondary schools. In 1979 the Government announced the introduction of free and compulsory primary education for children between the ages of 7 and 10 years. The 1979-84 five-year plan provides for a literacy campaign and a restructuring of the education system to dilute the Islamic influence. There are two universities and a polytechnic. In 1980 it was reported that up to 80 per cent of university staff had fled their posts.

Tourism

Afghanistan's attractions for the foreign visitor include: Bamian with its high statue of Buddha and thousands of painted caves; Bandi Amir with its suspended lakes; the Blue Mosque of Mazar; the walls of Kabul; Herat with its Grand Mosque and minarets; the towns of Qandahar and Girishk; Balkh (ancient Bactria), "Mother of Cities", in the north; Bagram, Hadda and Surkh Kotal (of interest to archaeologists); and the high mountains of the Hindu Kush.

Introductory Survey, Statistical Survey

Tourism was an important contributor to Afghanistan's foreign currency reserves, raising over \$12 million a year, but, with the change of regime and internal unrest, the number of visitors dropped sharply in 1978 and 1979.

Public Holidays

1982: March 21st (Nau-roz: New Year's Day, Iranian calendar), June 23rd (first day of Ramadan), July 17th-19th (Jashyn-i Jamhoriyat, Republic Celebrations), July 23rd (Id ul Fitr, end of Ramadan), August 19th (Independence Day), August 31st (Pashtunistan Day), September 9th (Parliament Day), September 29th (Id ul Adha, Celebration of the Sacrifice), October 15th (Roze Nejat, Day of Deliverance), October 24th (United Nations Day), October 28th (Ashura, Martyrdom of Imam Husayn), December 28th (Roze-Maulud, Birth of Prophet Mohamed).

Weights and Measures

The metric system has been officially adopted but traditional weights are still used. One "seer" equals 16 lb. (7.3 kg.).

Currency and Exchange Rates

100 puls = 2 krams = 1 afghani.

Exchange rates (October 1981):

£1 sterling = 94.6 afghanis;

U.S. \$1 = 50.6 afghanis.

THE CONSTITUTION

Immediately after the coup of April 27th, 1978, the 1977 Constitution was abolished. Both Taraki and Amin promised new constitutions but, in each case, were removed from power before special commissions appointed by them had prepared any drafts. On April 21st, 1980, the Revolutionary Council ratified the Basic Principles of the Democratic Republic of Afghanistan. These are to remain valid until the ratification of the Constitution by a Loya Jirgah (National Assembly). The following is a summary of the main provisions of the Basic Principles.

General Provisions. The role of the State is to serve the well-being and prosperity of the people, to safeguard their peaceful life and to protect their rights.

The People's Democratic Party of Afghanistan, the party of the workers and the working class, is the country's guiding force. It aims to realize the ideals of the Great Saur Revolution for the creation of a new, just society.

Muslims are free to practise religious rites, as are members of other religions provided it poses no threat to Afghan society.

All nationalities, tribes and ethnic groups are equal.

Foreign policy is based on the principle of peaceful co-existence and active and positive non-alignment. Friendship and co-operation is to be strengthened with the U.S.S.R. as it will be with all countries of the socialist community. Afghanistan abides by the UN Charter, professes its desire for peace between neighbouring countries of the region and supports the struggle against colonialism, imperialism, Zionism, racism and fascism. Afghanistan favours disarmament and the prevention of proliferation of nuclear weapons. War propaganda is prohibited.

The State protects private ownership and guarantees the law of inheritance of private ownership. Banks, mines, institutes, insurance, heavy industries, radio and television are state-owned. The establishment of agricultural and industrial co-operatives is encouraged.

One of the State's major duties is to provide adequate housing for the workers. Family, mother and child are given special protection by the State.

The capital is Kabul.

Rights and duties of the people. All subjects of Afghanistan are equal before the law. The following rights are guaranteed: the right to life and security, to observe the religious rites of Islam and of other religions, to work, to protection of health and social welfare, to education, to scientific, technical, cultural and artistic activities, to freedom of speech and thought, to security of residence and privacy of correspondence and to complain to the appropriate government organs.

In crime, the accused is considered innocent until guilt is recognized by the court. Nobody may be arrested, detained or punished except in accordance with the law.

The defence of the homeland and of the achievements of the Saur Revolution, loyalty to its aims and ideals and services to the people are the responsibilities of every subject.

Loya Jirgah. This is the highest organ of State power. Its composition and the election of its representatives will be regulated by law. Elections to the Loya Jirgah will be based on a general, secret, free, direct and equal vote. The Loya Jirgah will ratify the Constitution at its first session.

The Revolutionary Council is the highest organ of State power until the necessary conditions for elections to the Loya Jirgah are met.

The number and election or selection of new members is proposed by the Presidium of the Revolutionary Council and ratified by the Revolutionary Council. It is empowered to ratify laws, decrees, state economic and social development plans and to form the Presidium and the Council of Ministers. It also has the authority to call elections for the Loya Jirgah and to declare war. Laws and decrees are ratified by a majority vote of the members and are enforced after their publication in the official gazette. Sessions of the Revolutionary Council are held twice a year and they require a minimum attendance of two-thirds of the members.

The permanent organ of the Revolutionary Council is the Presidium. The Revolutionary Council elects the Presidium from amongst its members. The President of the Revolutionary Council is the Chairman of the Presidium. The Presidium's responsibilities include the interpretation and enforcement of laws, the granting of amnesty and the commuting of punishment. Between sessions all responsibilities of the Revolutionary Council are transferred to the Presidium.

Until the appointment or election of a Premier, the President of the Revolutionary Council is the Premier of Afghanistan.

The Council of Ministers is the supreme executive organ of State power and is responsible to the Revolutionary Council and to the Presidium when the Revolutionary Council is in recess. It is vested with the authority to implement domestic and foreign policy and to submit draft laws to the Revolutionary Council (or Presidium) for consideration and ratification. It comprises the Premier, his deputy or deputies and ministers.

Local administrative organs. Local committees and councils are to be formed in the provinces, cities, sub-districts and villages for the solution of all questions relating to the locality. All matters of election and representation will be regulated by law. Local executive committees of State power are to be established too. Besides taking decisions within the limits of their authority, these local organs are authorized to implement the decisions of higher organs.

The Judiciary. (see Judicial System section).

The Public Prosecution Department. The Attorney-General guides the activities of the country's prosecution organs. The Department consists of the Prosecutor General and the prosecution department of the provinces, cities, districts and sub-districts. These organs are independent of local organs, answerable only to the Prosecutor General. The Attorney-General, who is responsible to the Revolutionary Council, and the prosecutors supervise the implementation and observance of all laws. Until the appointment of the Prosecutor General his authority and duties are vested in the Minister of Justice.

Final Orders. Any alteration of these Basic Principles may be implemented on the proposal of the Presidium and the ratification by two-thirds of the members of the Revolutionary Council. The Basic Principles will remain valid until the ratification of the Constitution of the Democratic Republic of Afghanistan. Decrees, laws and other documents issued prior to the enforcement of the Basic Principles remain valid provided they are not contradictory to the Basic Principles.

AFGHANISTAN

JUDICIAL SYSTEM

The functions and structure of the judiciary are established in Articles 54-58 of the Basic Principles ratified by the Revolutionary Council in April 1980.

Judgment is made by the courts on the basis of democratic principles. The courts implement the laws of the Democratic Republic of Afghanistan and, in cases of ambivalence, will judge in accordance with the rules of *Shari'ah* (Islamic religious law). Trials are held in open session except when circumstances defined by law deem the trial to be held in closed session. Trials are conducted in Pashtu and Dari or in the language of the majority of the inhabitants of the locality. The right to speak in court in one's mother tongue is guaranteed to the two sides of the lawsuit.

The judiciary comprises the Supreme Court, provincial, city and district courts, the courts of the armed forces and other such special courts as are formed in accordance with the directives of the law.

The supreme judicial organ is the Supreme Court, which consists of a President, Vice-President and other members. It supervises the judicial activities of the courts and ensures the uniformity of law enforcement and interpretation by those courts.

The Presidium of the Revolutionary Council appoints all judges. Death sentences are carried out after ratification by the Presidium.

RELIGION

The official religion of Afghanistan is Islam. Ninety-nine per cent of Afghans are Muslims, approximately 80 per cent of them of the Sunni and the remainder of the Shi'ite sect. There are small minority groups of Hindus, Sikhs and Jews.
